

University of Puget Sound

Fall 2007 Sustainability Grants

All submitted proposals will be considered, but preference will be given to project based proposals that will provide on-going, measurable benefits after the initial pilot project is completed. Feel free to review the evaluation criteria and past winning proposals at <http://www.ups.edu/x16772.xml>. Completed proposals should be submitted, in full, to Sustainability@ups.edu by 5:00 p.m. on Thursday, November 8, 2007.

Primary Applicant	
<i>Please list the person who will be the primary contact responsible for the administration of any grant funding received. Any other team members selected to work on this project should be identified in the Project Proposal section of this form.</i>	
Name	UPS Bike Shop, Puget Sound Outdoors, Justin Canny
e-mail	jcanny@ups.edu , pryan@ups.edu
Mailing Address	1500 N. Warner Street #1003
Telephone	253.879.3510
Check One:	<input type="checkbox"/> Faculty X Staff X Student
Major (if known) or department of the primary applicant: Student Activities, CSOC	
Title of Proposal	
Bike Shop Storage and Work Area	
Project Abstract	
<i>This abstract should not exceed the amount of space allocated in the box below.</i>	
This fall students have come together to create a student run bike shop for the campus community. The goals of the bike shop are to: offer tools and volunteer bike mechanics to help the community maintain their bikes, safety education, increase the use of bicycles as an alternative mode of transportation to automobiles, and as way to promote health and physically fit. We are applying for funding to purchase a storage shed and a tent to work under on rainy days.	
Project Period	
Start Date: The Bike Shop will be opening in the next few weeks in and outside of the Expeditionary. We would like to have the storage shed and tent in place by the return from Winter Break.	End Date: until the Bike Shop is up and running and has a more permanent space on campus.
Project Budget:	
<i>The budget should include all costs associated with the project. Please separately itemize any equipment purchases and categorize all other anticipated expenses. If applicable, please also identify any other sources of funds that have been committed for this project.</i>	
<i>Amount</i>	
Equipment (please attach price quotes, specifications, diagrams, pictures, etc.)	
<ul style="list-style-type: none"> • Storage Shed: The goal is to be able to hold the bike tools and bikes donated bikes that will brought back into working order to be sold or turned into rental or "logger bikes". This shed may be built for less by the Facilities Department. • Carport Awning – smaller but similar to the one covering the bike racks behind the Wheelock Student Center. 	<p style="text-align: right;">\$2,000</p> <p style="text-align: right;">\$600 - 1,000</p>

	Total amount requested \$ 3,000
<p>Additional funding sources (please describe)</p> <ul style="list-style-type: none"> • Asups has already given the group \$1,300 for bike tools and storage equipment. And if the SAC cannot provide all funds for this project, we will be asking them to contribute the remaining cost of the shed and awning. • Puget Sound Outdoors is providing: <ul style="list-style-type: none"> ○ An Expeditionary staff member to order bike parts and maintain the bike shop records. ○ Funding to build a locked storage space for parts in the Expeditionary. ○ Will provide \$100-\$300 in funds beyond the remaining ASUPS funds to complete the medication of a work bench for the bike shop. Wheels and a locking case will be added to a work bench purchased with Asups funding. • Puget Sound Outdoors will help to cover up to \$500 in additional building expenses. • Puget Sound Outdoors and the Department of Student Activities are working with OIS to purchase a \$2,000 computerized cash register and book keeping system to assist with Bike Shop sales and inventory management. 	
<p>Project Proposal</p> <p><i>Please provide a summary of your project and describe how it will advance the university's sustainability efforts. Please try to keep this succinct but with enough detail so that awarding committee can understand the purpose and scope of your project. If needed, you may attach up to one additional page to describe your project. If equipment will be purchased as part of your project, please be sure to describe and justify your selection (you may attach specifications, diagrams, and pictures of the equipment selected).</i></p>	

For the last year students have conceptualized and now organized to create a student run bike shop for the campus community. The goals of the bike shop are to: offer tools and volunteer bike mechanics to help the community maintain their bikes, safety education, increase the use of bicycles as an alternative mode of transportation, and as way to promote health and physically fitness. The UPS Bike Shop has been supported by ASUPS and Puget Sound Outdoors.

We are applying for funding to purchase a storage shed and a durable tent to work under on rainy days. Currently the Expeditionary has minimal space to provide the current services and has limited storage space.

We expect that the Bike Shop will become a successful program on campus by encouraging increased bike usage among UPS community members. Until the program develops a strong track record we need space out of the rain to work on bikes and space to store the bikes that have been donated to the program by Security Services.

After becoming more established, the UPS Bike Shop also intends to work on a community bicycle project that will provide free or cheap bicycle usage for campus community members. We believe that we will be of fundamental necessity in any such project, as we will have the unique ability to service and maintain bikes in such a program.

We are proposing to place the storage shed and tent next the Expeditionary or the Sculpture building. There are a number of issues which will have to be worked out to determine the best location. Some of the issues include the reduction of parking by 1-2 spaces and the aesthetic issues of these temporary structures.

Agreement to Terms and Statement of Truth

As the primary applicant, I agree to provide the Pilot Project Subcommittee with periodic progress reports, as requested, and to provide a final report summarizing the results of this project and its sustainable impact.

I certify that this proposal is accurate to the best of my knowledge.
