ABOUT

GUY CARPENTER.

Guy Carpenter is the world’s leading risk and reinsurance specialist. We are 2,600 unique and talented professionals creating reinsurance and risk financing solutions for clients around the globe. Guy Carpenter brokers are highly consultative, delivering to clients the value-added knowledge and services we’ve developed over 80 years in the industry. Experienced and insightful industry leaders in diverse disciplines, sciences, lines of business and state-of-the-art technology give Guy Carpenter a unique perspective on the multifaceted approaches to assessing, managing, spreading and financing risk. Through the development of proprietary analytical tools and our entrepreneurial approach to solving our client’s risk financing needs, Guy Carpenter has established itself as the leader of this dynamic industry.

Defining Reinsurance

Reinsurance is a type of financing used by insurance companies to reduce risk, stabilize results, venture into new business lines and exit from unprofitable lines. In a world of risk and uncertainty, there will always be a demand for reinsurance.

Reinsurance is a multi-billion dollar global industry which plays a crucial role in the economic recovery from both man-made and natural disasters, such as the World Trade Center terrorist attacks and Hurricane Katrina, by stabilizing financial markets and facilitating continuity for businesses and people worldwide. Guy Carpenter helps clients identify, analyze and create solutions to counteract the negative effects of these potential risks.
The Analyst Position
Depending on your background and interests, you will join Guy Carpenter as an Analyst within Broking, or as an Actuarial Analyst or Catastrophe Risk Analyst within Guy Carpenter’s quantitative analysis group Instrat®. Additionally, you will take part in Guy Carpenter’s Analyst Development Program, recognized as the best training program offered in the industry. Training takes place both on-the-job and in the classroom in various cities across the U.S. You will work side-by-side with senior brokers, actuaries, catastrophe modelers and management, assisting in quantitative and qualitative risk analyses, market research and facilitation of the risk transfer placement process. As you gain experience, you will move into a more consultative role as a reinsurance broker, or Instrat actuarial or catastrophe modeling professional, where you will help provide risk financing solutions for clients and facilitate negotiations with global reinsurance companies.

The training program is designed to build technical, professional and firm-specific expertise. Participants will gain a strong foundation in insurance, reinsurance and risk financing and build a network of colleagues across all disciplines of the firm. The in-class sessions are highly interactive and provide growth and learning through:

- Team case studies and formal presentations
- Instructor led interactive discussions of current and evolving industry issues
- Subject matter experts
- Senior management perspectives

The Analyst Development Program is designed to refine your ability to think analytically and strategically, negotiate effectively and present ideas successfully.
