Click here to upload your resume

Click here to update your privacy settings

Click the “Click here to Update” button to make changes to your address, email, employment information, educational information.
Permanent Email Forwarding

This service allows for you to keep one email address – forever! Your address will be yourname@alum.ups.edu. This will forward to an account of your choosing (Hotmail, Gmail, Yahoo, Mac, etc.) Please note that you can only have one permanent email forwarding account.

1. Select your mail name.
2. Enter your forwarding email address (Gmail account, Hotmail, Yahoo, Mac, etc.)

To test if your permanent email forward account is working, you need to send an email that is not from the account that your @alum.ups.edu address will forward to.

(Example: if your @alum.ups.edu address forwards to your Gmail account, please test your permanent email using an email other than your Gmail account.)

Once you click “Continue,” you will be directed to a confirmation page. Here, you can select your preferences for Spam filtering and showing your permanent email in the Alumni Directory.

Once you click “Confirm,” you will view a page that confirms your email settings. On this page, you can also learn about how to send emails from your @alum.ups.edu email address.
Search for Classmates

You can also search profiles, resumes, classnotes, and chapter pages, and the alumni directory by using the “search” link on the left navigation. This search tool will yield a wider-variety of search results (much more like Google).

Click on “Alumni Directory” in the left navigation. Then click on “Search the Alumni Directory.”

Enter the name of an alumnus/a or a class year to search for fellow alumni.
To narrow your search and search by something other than name, click on the “advanced” link in the upper right corner.

You can also search profiles, resumes, classnotes, and chapter pages, and the alumni directory by using the “search” link on the left navigation. This search tool will yield a wider-variety of search results (much more like Google).
