University Accreditation and Memberships

The University of Puget Sound is accredited by the Northwest Commission on Colleges and Universities, an institutional accrediting body recognized by the United States Department of Education. The commission may be contacted at the following address:

Northwest Commission on Colleges and Universities
8060 165th Avenue NE, Suite 100
Redmond, WA  98052-3981

In addition to institutional accreditation from the Northwest Commission on Colleges and Universities, the following programs have specialized accreditation or status. A complete statement of each program’s accreditation or special status is presented with the program listing.

Chemistry by the American Chemical Society
Education by the Washington State Professional Educators Standards Board
Music by the National Association of Schools of Music
Occupational Therapy by the Accreditation Council for Occupational Therapy Education
Physical Therapy by the Commission on Accreditation for Physical Therapy Education

Enrolled or prospective students wishing to review documents describing the university’s accreditation may do so in the Associate Deans’ Office, Jones Hall, Room 212.

University of Puget Sound is committed to being accessible to all people. For accessibility information please contact 253.879.3236 or accessibility@pugetsound.edu.

About University of Puget Sound
Established in 1888, University of Puget Sound is a 2,600-student independent residential national liberal arts college, with three small graduate programs, located in Tacoma, Washington. Graduates include Rhodes and Fulbright scholars, notables in the arts and culture, entrepreneurs and elected officials, and leaders in business and finance locally and throughout the world. A low student-faculty ratio provides Puget Sound students with personal attention from a faculty with a strong commitment to teaching in more than 50 traditional and interdisciplinary areas of study. Puget Sound is the only nationally ranked independent undergraduate liberal arts college in Western Washington, and one of just five independent colleges in the Pacific Northwest granted a charter by Phi Beta Kappa, the nation’s most prestigious academic honor society. Founded by what is now The United Methodist Church, Puget Sound is governed today by a wholly independent board of trustees, and maintains its status as a church-related and affiliated institution in accordance with the criteria established by the Church’s University Senate. The college maintains a relationship with The United Methodist Church based on shared history and values held in common, including the importance of access to a high quality education, academic freedom, social justice, environmental stewardship, and global focus.

The university’s primary goal is to provide an outstanding liberal arts education that prepares students for creative and useful lives. The undergraduate academic program is based on a core curriculum for all students and includes a wide selection of majors in the liberal arts. The university also provides distinctive graduate programs in education, occupational therapy, and physical therapy.

Mission
The mission of the university is to develop in its students capacities for critical analysis, aesthetic appreciation, sound judgment, and apt expression that will sustain a lifetime of intellectual curiosity, active inquiry, and reasoned independence. A Puget Sound education, both academic and cocurricular, encourages a rich knowledge of self and others; an appreciation of commonality and difference; the full, open, and civil discussion of ideas; thoughtful moral discourse; and integration of learning, preparing the university’s graduates to meet the highest tests of democratic citizenship. Such an education seeks to liberate each person’s fullest intellectual and human potential to assist in the unfolding of creative and useful lives.

Faculty and Students
The faculty and Board of Trustees support a program committed to comprehensive liberal learning and academic excellence. The full-time faculty of approximately 225 is first and foremost a teaching faculty, selected not only for expertise in various subject areas but also for the desire and ability to promote deep understanding and critical thinking. Students benefit from classes taught by committed faculty members who welcome students not only into their classrooms but also into the scholarly community of the campus. Faculty members maintain active intellectual lives that nourish their own scholarly development and their work with students.

Puget Sound is large enough to offer the advantages of multiple perspectives, sophisticated technologies, and a rich array of programs, yet small enough to preserve a relaxed, friendly atmosphere. Students come to Puget Sound with diverse backgrounds and interests from nearly every state in the nation and from several foreign countries.

Puget Sound welcomes students, faculty, and staff of all identity characteristics, regardless of age, disability, sex, race, ethnicity, religion/spiritual tradition, gender identity and expression, sexual identity, veteran status, job status or socioeconomic class, nation of origin, language spoken, documentation status, personal appearance and political beliefs. The limited size of the student body, the residential campus, and the commitment of the faculty to intensive, rigorous education create a highly engaging experience and strong sense of community.

The Academic Program
Through its undergraduate core curriculum as well as its major and minor programs, the University of Puget Sound is committed to providing a liberal arts education of enduring value. Such an education enables students to adapt, to change careers, and to assume ever greater responsibilities as new opportunities arise. It also enables students to lead interesting and personally satisfying lives and prepares them to address effectively and constructively the challenges of a continually changing society. To these ends, the faculty has selected the following goals to emphasize in the undergraduate curriculum: A student completing the undergraduate curriculum will be able to (1) think critically and creatively; (2) communicate clearly and effectively, both orally and in writing; (3) develop and apply knowledge both independently and collaboratively and will have developed (4) familiarity with diverse fields of knowledge and the ability to draw connections among them; (5) solid grounding in the field of the student’s choosing; (6) understanding of self, others, and influence in the world; and (7) an informed and thoughtful sense of justice and a commitment to ethical action.

Interdisciplinary Study at Puget Sound
Some of the most exciting developments in higher education are occurring at the intersections of traditional fields of knowledge. The pursuit of new understanding by teachers and students who work across disciplinary lines enriches course offerings and research projects at Puget Sound. Many individual courses, the core curriculum, and several major and minor programs emphasize an interdisciplinary perspective. This interdisciplinary emphasis permits faculty members to combine their particular strengths and creates an array of innovative courses.

The following interdisciplinary programs are available. Descriptions of each can be found in the “Courses of Study” section of this Bulletin.

Majors
African American Studies
Biochemistry
Environmental Policy and Decision Making
International Political Economy
Molecular and Cellular Biology
Natural Science
Science, Technology, and Society
Special Interdisciplinary Major

Minors and Emphases
Asian Studies
Bioethics
Education Studies
Global Development Studies
Gender and Queer Studies
Humanities
Latin American Studies
Latina/o Studies
Neuroscience

Several academic departments offer interdisciplinary majors as well, including Classics, the Business Leadership Program (School of Business and Leadership), French Studies, German Studies, Hispanic Studies, a Music BA with Elective Studies in Business (School of Music), and a Computer Science/Business BS (Mathematics and Computer Science Department).
Writing at Puget Sound
At Puget Sound, writing lies at the heart of a liberal arts education. From the Seminars in Scholarly Inquiry, two sequenced writing-intensive courses for first-year students, through abundant writing projects and opportunities throughout their careers (including a senior thesis in some majors), students are challenged to write expressively and cogently.

The university supports and encourages writing in all disciplines. Based on the premise that every writer needs a reader, the Center for Writing, Learning, and Teaching, staffed by faculty and peer writing advisors, assists students at every level in the writing process. Writing Excellence Awards recognize and reward outstanding writing in all disciplines. Faculty members receive curriculum development grants to work on sequencing and assigning writing in the major. In addition, faculty members attend workshops designed to help them facilitate students in their efforts to sharpen their writing skills.

Cocurricular activities offer additional vehicles by which students can develop as writers: tutoring in the Center for Writing, Learning, and Teaching; writing for The Trail, the student newspaper; working on Tamawanas, the yearbook; contributing to Crosscurrents (the campus literary magazine) or Elements: The Scientific Magazine of the University of Puget Sound (wholly student-conceived and produced biannually); and submitting their work to community publications and professional journals.

Student Research at Puget Sound
The University of Puget Sound offers many opportunities for students to engage in research, whether in the natural sciences, social sciences, arts, or humanities. Most major programs of study either require or provide the option for a research-based thesis in the senior year. In addition, capstone seminars in the major are a common feature of a Puget Sound education. In these seminars, students typically research and write major papers and present their findings to their peers. Each year the campus community enjoys many public presentations of theses and research projects. In some majors, students also present their research findings at regional and national conferences.

The faculty is actively committed to thoughtful mentoring of the intellectual growth of students. The careful structuring of the major so that students engage in active research, collaboration, and presentation results in graduates thoroughly prepared for graduate or professional school or for the mature responsibilities of professional-level employment. The university supports students’ research not only through the curriculum but also through summer research grants and stipends, an array of first-rate scientific equipment, excellent library resources, and widespread access to information technology.

Slater Museum of Natural History
The Slater Museum of Natural History is an internationally recognized research and teaching collection located in the university’s Thompson Hall. The second largest natural history collection in Washington state, the museum features nearly 85,000 specimens of mammals, birds, reptiles, amphibians, and plants. The museum is used by Puget Sound students and faculty for classes and research. It also serves the community, and other scientists, artists, and educators worldwide through educational programs, exhibits, visits, loans, and an extensive website.

Study Abroad
Recognizing the importance of intercultural understanding in liberal education, the University of Puget Sound offers credit for a wide variety of study abroad programs. Students may choose to study abroad for a full academic year, a semester, or a summer, enrolling in Puget Sound-approved programs. Programs are offered in Africa, Asia, Oceania, Europe, and Central and South America. Every three years the University of Puget Sound runs the Pacific Rim/Asia Study-Travel Program (PacRim), in which students study in several Asian countries over a nine-month period. Puget Sound also runs faculty-led study abroad programs. The locations and academic subjects of the faculty-led programs vary each year.

Academic Honor Societies
Puget Sound students are eligible for membership by election to two national academic honor societies: Phi Beta Kappa and Phi Kappa Phi. Both societies select students in their junior or senior year on the basis of scholarly achievement and good character.

Phi Beta Kappa elects members from liberal arts fields of study only, recognizing those students whose programs demonstrate breadth, including study of foreign languages and mathematics.

Phi Kappa Phi selects highly qualified student members from both liberal arts and professional fields of study.

Students also may be elected to a number of discipline-specific honor societies at the university.

Cultural Life
The university has long been one of Tacoma’s prominent educational and cultural centers providing the campus and local community with a wide array of student, faculty, and guest artist performances in music, theatre, and art. A listing of current campus events may be viewed on the university website, pugetsound.edu/calendar.

To supplement formal instruction, each year the university presents a number of lectures in which nationally recognized speakers are brought to campus to provoke meaningful dialogue on topics pertinent to our changing world. Lecture series include Brown and Haley Lectures, with new perspectives in the social sciences or humanities; Chism Lectures, with appearances by nationally recognized performers, artists, and scholars in the arts and humanities; Norton Clapp Visiting Artist Lectures, bringing notables of contemporary theatre to campus for workshops and presentations; Susan Resneck Pierce Lectures in Public Affairs and the Arts, hosting public intellectuals, writers, and artists of high recognition; and Swope Endowed Lectureships on Ethics, Religion, Faith, and Values, in which leading thinkers promote discussion and inquiry into matters of contemporary spirituality, ethics, and world religions.

The Puget Sound region is rich in cultural, social, and educational opportunities. Our location in a vibrant metropolitan area places our students in proximity to the Pacific Rim, providing opportunities to explore diverse cultures. Moreover, the university’s location encourages engagement with a wider educational and artistic community through events and internships in Tacoma, Seattle, and Olympia.

Theatre Arts Season
The Department of Theatre Arts mounts a variety of productions each year: a faculty-directed play is presented each semester in the Norton Clapp Theatre, student-directed one-acts are offered in the fall and the Senior Theatre Festival is eagerly attended every spring. Recent faculty-directed productions include Tennessee Williams’ A Streetcar Named Desire, Suzan-Lori Parks’ 365 Days/365 Plays, Charles Mee’s Iphigenia 2.0, Sara Ruhl’s In the Next Room (or the Vibrator Play), Steven Sater and Duncan Sheik’s Spring Awakening (from the play by Frank Wedekind), Shakespeare’s Twelfth Night, Horton Foote’s A Trip to Bountiful, C. Rosalind Bell’s The New Orleans Monologues, and Anton Chekhov’s Uncle Vanya. Plays directed by students as part of our Senior Theatre Festival include David Auburn’s Proof, Rajiv Joseph’s Gruesome Playground Injuries, Will Eno’s Gnit, Shakespeare’s Macbeth, David Henry Hwang’s Yellow Face, Paul Vogel’s How I Learned to
Sound students may participate in cocurricular enhancements such as forging new friendships in the process, navigating differences, learning to be a productive member of a team, and sustaining efforts, or working on research through the Civic Scholarship Initiative. In these and similar settings, students develop empathy while navigating differences, learn to be a productive member of a team, and forge new friendships in the process.

Some campus activities are clear extensions of the curriculum: Puget Sound students may participate in cocurricular enhancements such as Residential Seminars, residing in a suite focused on environmental policy and decision-making, competing in intercollegiate forensics tournaments, producing student publications or radio broadcasts, or performing with campus arts groups.

Students can explore the greater Puget Sound region through the campus organization Puget Sound Outdoors, which offers snowboarding, sea kayaking, rock climbing, and hiking excursions as well as outdoor leadership and wilderness first aid courses. The Alternative Break programs give students a chance to do volunteer work and explore social justice issues during fall and spring breaks. There are also numerous residence hall-based excursions for students. Students participate in and attend lectures, cultural events, films, dances, and athletic events.

Students can choose to participate in student governance through the Associated Students of the University of Puget Sound, residence hall associations, leadership of fraternities and sororities, membership in departmental or cocurricular clubs, organization of theme-living groups, or by serving on university committees.

Consistent with our mission statement, Puget Sound places a high value on equity and inclusion and provides students with a range of cocurricular opportunities to connect within and across lines of ethnicity, sexuality, religion, and identity.

Other features of campus life are less structured but also contribute significantly to learning beyond the classroom; an informal chat with a professor in Diversions Café or Oppenheimer Café, spontaneous discussions of issues on the Wheelock Student Center plaza, or penning an editorial for The Trail are just a few ways in which students can engage in meaningful dialogue.

Detailed information on campus activities is available at the Wheelock Student Center information desk, from the various Student Affairs offices, at the university website (pugetsound.edu/student-life), in the daily calendar (pugetsound.edu/calendar), or at the ASUPS website (asups.pugetsound.edu).

Civic Scholarship

Puget Sound is committed to its role as an intellectual asset within the community, serving as a center for faculty and student research and scholarship on a broad array of issues. In partnership with community members and organizations throughout the region, numerous projects and programs have taken shape, including three signature initiatives.

Civic Scholarship Initiative

The Civic Scholarship Initiative connects Puget Sound’s faculty and students with citizens of the south Puget Sound region in projects of mutual concern. By investing the college’s intellectual capital, the initiative provides real-world laboratories for faculty and students to pursue their research and teaching objectives while partnering with regional organizations to solve problems, develop policy, and educate the public on issues of regional and national significance. A sample of current programs include the Puget Sound Brass Camp, Senior University, Off the Shelf with Tacoma Little Theatre, Math Circles, and McCarver Day at Puget Sound. For more information, visit pugetsound.edu/csi.

Race and Pedagogy Institute

The Race and Pedagogy Institute, a collaboration between Puget Sound and the South Sound community, seeks to educate students and teachers at all levels to think critically about race and to act to eliminate racism. Since 2006 the initiative has served as an incubator, catalyst, and forum for a variety of programs and projects. The initiative hosted the 2014 Race and Pedagogy National Conference, welcoming to campus more than 2,000 presenters and participants from colleges and universities across the nation, regional schools and community organizations,
and the campus community for three days of plenary sessions, panel discussions, artistic and theatrical performances, and more under the theme “What NOW is the Work of Education and Justice?: Mapping a New Critical Conscience.” Visit pugetsound.edu/raceandpedagogy for more information and to learn about the national conference, September 27-29, 2018.

Sound Policy Institute

Sound policies restore and sustain the natural environment in balance with a healthy, prosperous, and just community. The Sound Policy Institute builds the capacity of individuals and groups, both on campus and in the Puget Sound region, to actively and effectively engage in environmental decision-making. The institute provides opportunities for the inclusion of community-based learning objectives in the coursework and research of the college’s Environmental Policy and Decision Making Program; the integration of “big ideas” related to sustainability into the teaching and learning of faculty members from across academic disciplines and higher education institutions; and community member engagement in lifelong environmental learning experiences through courses, field trips, training sessions, and other events. More information is available at pugetsound.edu/soundpolicy.

Freedom Education Project Puget Sound

Freedom Education Project Puget Sound (FEPPS) provides a rigorous accredited college program to incarcerated women in Washington and creates pathways to educational opportunity after women are released from prison. The goal is to increase women prisoners’ economic and personal empowerment, contribute to family stability, and reduce recidivism through college education. As a Signature Initiative of the University of Puget Sound, more than 20 Puget Sound professors have taught a course or given a lecture at the prison and several Puget Sound undergraduates have volunteered to work in study halls. More information is available at pugetsound.edu/fepps.

THE CORE CURRICULUM

The faculty of the University of Puget Sound has designed the core curriculum to give undergraduates an integrated and demanding introduction to the life of the mind and to established methods of intellectual inquiry. The Puget Sound undergraduate’s core experience begins with two first-year seminars that guide the student through an in-depth exploration of a focused area of interest and that sharpen the student’s skills in constructing persuasive arguments. In the first three years of their Puget Sound college career, students also study five “Approaches to Knowing”—Artistic, Humanistic, Mathematical, Natural Scientific, and Social Scientific. These core areas develop the student’s understanding of different disciplinary perspectives on society, culture, and the physical world, and explore both the strengths of those disciplinary approaches and their limitations. Connections, an upper-level integrative course, challenges the traditional boundaries of disciplines and examines the benefits and limits of interdisciplinary approaches to knowledge.

Further, in accordance with the stated educational goals of the University of Puget Sound, core curriculum requirements have been established: (a) to improve each student’s grasp of the intellectual tools necessary for the understanding and communication of ideas; (b) to enable each student to understand themselves as a thinking person capable of making ethical and aesthetic choices; (c) to help each student comprehend the diversity of intellectual approaches to understanding human society and the physical world; and (d) to increase each student’s awareness of his or her place in those broader contexts. Students choose from a set of courses in the eight Core areas, developing over four years an understanding of the liberal arts as the foundation for a lifetime of learning.

University Core Requirements

Each candidate for the first baccalaureate degree shall have completed the following Core curriculum.

The First Year: Argument and Inquiry

Seminar in Scholarly Inquiry 1 ............................................. 1 unit
Seminar in Scholarly Inquiry 2 ............................................. 1 unit

First-year seminars may not be used to meet major, minor, or emphasis requirements, nor may students enroll in them after fulfilling the core requirement. Some first-year seminars can simultaneously fulfill the Knowledge, Identity, and Power graduation requirement. Students may not enroll in more than one seminar per term. SSI1 is a prerequisite for SSI2.

Years 1 through 3: Five Approaches to Knowing

Artistic .................................................................................. 1 unit
Humanistic .............................................................................. 1 unit
Mathematical (strongly recommended in the first year) ............ 1 unit
Natural Scientific .................................................................. 1 unit
Social Scientific ..................................................................... 1 unit

Junior or Senior Year: Interdisciplinary Experience

Connections ........................................................................... 1 unit

The sections which follow detail the courses that, as of June 2018, fulfill each Core category in the 2018-19 academic year. Full course descriptions for the Seminars in Scholarly Inquiry and the Connections Core courses follow this section; descriptions of all other Core courses are in the departmental sections of this Bulletin.

Seminars in Scholarly Inquiry (two units)

Two first-year seminars to develop the intellectual habits necessary to write and speak effectively and with integrity. To be taken in the first year. May be taken only to fulfill the core requirement. A course labeled SS1/SSI2 in the following list has two versions, one satisfying the Seminar in Scholarly Inquiry 1 requirement and the other satisfying the Seminar in Scholarly Inquiry 2 requirement. Generally, a student will not be granted credit for both versions of the course.

See course descriptions starting after this listing.

SS1/SSI1 101 Dionysus & the Art of Theatre
SS1/SSI1 102 Rhetoric and Religion
SS1/SSI1 103 Alexander the Great
SS1 104 Why Travel: Tales from Far and Wide
SSI2 104 Travel Writing and The Other
SSI1/SSI2 105 Imagining the American West
SSI1/SSI2 106 Cleopatra: History and Myth
SSI1/SSI2 107 Leadership in American History
SSI2 108 Empowering Technologies: Energy in the 21st Century
SSI1/SSI2 109 Rhetoric, Film, and National Identity
SSI1/SSI2 110 Examining Dogs Through the Lens of Science
SSI1/SSI2 111 Life, Death, and Meaning
SSI1/SSI2 112 Salsa, Samba, and Soccer: Popular Culture in Latin America
SSI1 113 Imagining a New World
SSI2 113 Digital Methods in the Study of Literature
SSI1/SSI2 114 Understanding High Risk Behavior
SS1/SSI2 115 Imaging Blackness
SS1/SSI2 116 Communicating Forgiveness and Revenge
SS1 117 People, Plants, and Animals
SS2 117 Coming Out! The Gay Liberation Movement
SS1/SSI2 118 Doing Gender
SS1 119 Einstein and Everything
SS1/SSI2 120 Hagia Sophia: From the Emperor’s Church to the Sultan’s Mosque
SS1 121 Multiracial Identities
SS1/SSI2 122 Ecotopia? Landscape, History, and Identity in the Pacific Northwest
SS1 123 Diego Rivera and Frida Kahlo: Lives of Art and Politics
SS2 123 The Search for Extraterrestrial Intelligence
SS1/SSI2 124 Utopia/Dystopia
SS1 125 Geomythology of Ancient Catastrophes
SS1/SSI2 126 Gender, Literacy, and International Development
SS1 127 “Why Beethoven?”
SS1/SSI2 128 The Philosophy and Science of Human Nature
SS1 129 Mao’s China: A Country in Revolution
SS1 130 Chinese Popular Stories to Awaken the World
SS1 131 Athens, Freedom, and the Liberal Arts
SS1 132 Social Justice and Radical Politics in Early 20th-Century America
SS1/SSI2 132 Wild Things
SS1/SSI2 133 Not Just Fun and Games: Sport and Society in the Americas
SS1/SSI2 134 Dreams and Desire: The Liminal World
SS1/SSI2 135 Hurricane Katrina and the History of New Orleans
SS1 136 Urban America: Problems and Possibilities
SS2 136 Suburbia: Dream or Nightmare?
SS1 137 Una Descarga Latina: A History of Latino Popular Culture in the US
SS1/SSI2 138 The Cosmology of Comedy
SS1/SSI2 139 The Third Wave: Rock After the Beatles
SS1/SSI2 140 Electric Bodies: Experiment in the Age of the Enlightenment
SS1/SSI2 141 Architectures of Power
SS1 142 The Concept “Orwellian”
SS1/SSI2 143 Controversies of Communication and Technology
SS1/SSI2 144 Constitutional Controversies
SS1 147 Contemporary Art Theory and Critique
SS1 148 Journalism and Democracy
SS1 148 Medical Narratives
SS1 149 Transgressive Bodies
SS1 149 Creationism vs Evolution in the U.S.
SS1/SSI2 150 Exploring Bioethics Today
SS1 151 The Natural History of Dinosaurs
SS1 152 Gender and Performance
SS1/SSI2 153 Scientific Controversies
SS1 154 The Anthropology of Food and Eating
SS1 155 Issues in Disability
SS1 156 Worlds of the Bible
SS1 157 Chinese Painting in the West
SS1 158 The Digital Age and Its Discontents
SS2 159 Evolution for All
SS1 160 The Dilemmas of Statecraft: Foreign Policy and the Ethics of Force
SS1 160 Modernist Literature
SS1 161 Social Order and Human Freedom
SS1 162 Colonialism and Films
SS2 162 Mary and ‘Aisha: Feminism and Religion
SS1 163 Gender Bending
SS2 164 The Rhetoric of Warfare: 1908-1938
SS1 165 Never Really Alone: Symbiosis and Parasitism Around and Within Us
SS1 166 Applied Ethics
SS1 167 Learning from Indigenous Societies
SS2 167 The Russian Revolution
SS1 168 Zen Insights and Oversights
SS1 169 A Year in the Life of William Shakespeare
SS1/SSI2 170 Perspectives: Space, Place, and Values
SS1 171 Medical Discourse and the Body
SS1 172 The Scientific and Romantic Revolutions
SS1 173 Alexander Hamilton’s America: The Political Economy behind the Musical
SS1 174 Lethal Othering: Critiquing Genocidal Prejudice
SS1 175 Utopia and the Imagination
SS1/SSI2 176 American Autobiography from Franklin to Facebook
SS1 177 Marriage in History and Literature: An Inquiry into What This Institution is For
SS1 177 The Digital Present and Our Possible Techno Futures
SS1 178 George Gershwin
SS1 179 Women, Art, and Power in Byzantium
SS1 180 Elvis and MJ: The Image of the Kings
SS1/SSI2 181 Russian Mystery: Casting Shadows, Casting Light
SS2 180 The French Revolution
SS1 181 Science and Theater
SS1/SSI2 182 Against Equality? The Marriage Equality Movement and its Queer Critics
SS1 183 Information from Gutenberg to Google
SS1 184 Past Lives
SS1/SSI2 186 Presidential Rhetoric
SS1/SSI2 187 Controversies of Communication: The American Dream
SS1 188 The Tudors
SS1 189 Translation on Stage: Language, Culture, and Genre
SS1 190 Sources and Adaptations
SS1 191 Unsolved History: Engaging with the Mysterious Past
SS1/SSI2 192 Elvis and MJ: The Image of the Kings
SS1 193 An Investigation of Literary Naturalism
SS1 194 Castles
SS1 195 Honors: The Scientific and Romantic Revolutions
SS2 196 Honors: Postmodernism and the Challenge of Belief

Artistic Approaches (one unit)
A course to develop a critical, interpretive, and analytical understanding of art through the study of an artistic tradition. This course should be taken during the first three years.

ARTH 275 Studies in Western Art I: Ancient through Medieval Art
ARTH 276 Studies in Western Art II: Fourteenth to the Twenty-First Century
ARTH 278 Survey of Asian Art
ARTH 302 The Art of Mexico and Mesoamerica
ARTS 102 The Principles of 3D Design
ARTS 147 A History of Ceramics Through Making
ARTS 202 The Printed Image
CLSC 201 Ancient Tragedy
ENGL 211 Introduction to Creative Writing: Story vs. Anti-Story
ENGL 212 The Craft of Literature
ENGL 213 Biography/Autobiography/Memoir
GERM 300 German Cinema of the Weimar Republic and under National Socialism, 1919-1945
GERM 305 Culture in the Third Reich
GERM 310 WWI in Literature and the Other Arts, 1908-1938

### Humanistic Approaches (one unit)

A course to develop an understanding of how humans have addressed fundamental questions of existence, identity, and values and to develop an appreciation of these issues of intellectual and cultural experience. This course should be taken during the first three years.

- AFAM 101 Introduction to African American Studies
- AFAM 205 Survey of African American Literature
- AFAM 210 Black Fictions and Feminism
- ALC 205 Great Books of China and Japan
- ALC 215 Stories of the Strange: From Fox Spirits to the Monkey King in Chinese Literature
- ALC 225 Visualized Fiction: Cinematic Adaptations of Traditional Chinese Literature
- ALC 310 Death and Desire in Premodern Japanese Literature
- ALC 320 Self and Society in Modern Japanese Literature
- ALC 325 Chinese Cinema: Ideology and the Box Office
- ALC 330 Writing the Margins in Contemporary Japanese Literature
- ALC 335 The Chinese Classic Novel: Real Illusions, Virtuous Violence, and the Romance of the State
- ALC 345 Revenge and Retribution
- ASIA 350 Tibet—Real, Imagined, and Perceived
- CLSC 200 Introduction to Classical Literature
- CLSC 209 History of the Ancient Near East
- CLSC 210 Classical Mythology
- CLSC 211 Greek History
- CLSC 212 Roman History
- CLSC 231 Greek and Roman Epic
- CLSC 325 Sex and Gender in Classical Antiquity
- COMM 170 Introduction to Media Studies: Governmentality and Torture
- COMM 171 Introduction to American Civic Rhetoric
- COMM 180 Introduction to Critical Issues in Public Culture: Democracy and Identity in US Public Discourse
- COMM 291 Film Culture
- ENGL 204 The American Dream: Loss and Renewal
- ENGL 206 Literature by Women
- GERM 202 Intermediate German
- GQS 201 Introduction to Gender and Feminist Studies
- HIST 101 Roots of the Western Experience
- HIST 102 Western Civilization: 1650-1990
- HIST 103 History of Modern Europe
- HIST 152 American Experiences I: Origins to 1877

### Mathematical Approaches (one unit)

A course to develop a variety of mathematical skills, an understanding of formal reasoning, and a facility with applications. This course should be taken during the first three years.

- CSCI 161 Introduction to Computer Science
- CSCI 261 Computer Science II
- HON 213 Mathematical Reasoning: Foundations of Geometry
- MATH 103 Introduction to Contemporary Mathematics
- MATH 150 Finite Mathematics
- MATH 160 Introduction to Applied Statistics
- MATH 170 Calculus for Business, Behavioral, and Social Sciences
- MATH 180 Calculus and Analytic Geometry I
- MATH 181 Calculus and Analytic Geometry II
- MATH 260 Intermediate Applied Statistics
- MATH 280 Multivariate Calculus
- MATH 290 Linear Algebra
- PHIL 240 Formal Logic
**Natural Scientific Approaches** (one unit)
A course to develop an understanding of scientific methods and to acquire knowledge of the fundamental elements of one or more natural sciences. This course should be taken during the first three years.

- BIOL 101 Introduction to Biology
- BIOL 102 Evolution and Biology of Sex
- BIOL 111 Unity of Life: Cells, Molecules, and Systems
- BIOL 112 Diversity of Life
- CHEM 110 General Chemistry I
- CHEM 115 Integrated Chemical Principles and Analytical Chemistry
- CHEM 120 General Chemistry II
- CHEM 230 Integrated Chemical Principles and Analytical Chemistry
- CHEM 250 Organic Chemistry I
- CHEM 251 Organic Chemistry II
- ENVR 105 Environmental Science
- GEOL 101 Physical Geology
- GEOL 104 Physical Geology of North America
- GEOL 105 Oceanography
- GEOL 110 Regional Field Geology
- HON 212 Origins of the Modern World View
- PHYS 109 Astronomy
- PHYS 111 General College Physics
- PHYS 112 General College Physics
- PHYS 121 General University Physics
- PHYS 122 General University Physics
- PHYS 205 Physics of Music
- PHYS 221 Modern Physics I
- PHYS 222 Modern Physics II
- PHYS 299 The History and Practice of Ancient Astronomy

**Social Scientific Approaches** (one unit)
A course to acquire an understanding of theories about individual or collective behavior within a social environment and of the ways that empirical evidence is used to develop and test these theories. This course should be taken during the first three years.

- COMM 156 Introduction to Interpersonal Communication
- COMM 160 Introduction to Organizational Communication
- COMM 181 Introduction to Online Communication
- COMM 252 Health Communication Campaigns
- ECON 101 Introduction to Markets and Macroeconomics
- HON 214 Social Scientific Approaches to Knowing
- IPE 101 Introduction to International Political Economy
- PG 101 Introduction to U.S. Politics
- PG 102 Introduction to Comparative Politics
- PG 103 Introduction to International Relations
- PG 104 Introduction to Political Theory
- PHIL 106 Language, Knowledge, and Power
- PSYC 225 Social Psychology
- SOAN 101 Introduction to Sociology
- SOAN 103 Social Problems
- SOAN 212 Sociology of Gender
- SOAN 230 Indigenous Peoples: Alternative Political Economies
- SOAN 301 Power and Inequality

**Connections** (one unit)
A course to develop an understanding of the interrelationship of fields of knowledge. To be taken after completion of all other university core requirements, in the junior or senior year, and must be taken at Puget Sound.

See course descriptions starting on page 40.

- AFAM 346 African Americans and American Law
- AFAM 355 African American Women in American History
- AFAM 360 The Art and Politics of the Civil Rights Era
- AFAM 375 The Harlem Renaissance
- AFAM 401 Narratives of Race
- ASIA 335 Chinese Painting and Poetry
- ASIA 341 Asia Pop! An Exploration of Popular Culture in 20th and 21st Century East Asia
- ASIA 344 Asia in Motion
- CONN 303 Art-Science: Inquiry into the Intersection of Art, Science, and Technology
- CONN 304 The Invention of Britishopstic: Hisory and Literature

Frequency of Course Offerings
Not all elective courses are offered every year. These courses are offered as departments are able to fit them into faculty members’ teaching schedules, which may result in some courses being offered on an infrequent basis. However, each department makes certain that all required courses and an appropriate range of electives are offered regularly so full-time students are able to graduate within four years. This Bulletin lists all courses in the curriculum in order to convey the richness of the wide variety of interests and expertise the faculty bring to the academic program at Puget Sound.

Seminars in Scholarly Inquiry

Purpose
In these first-year seminars, students increase their ability to develop effective arguments by learning to frame questions around a focused topic, to assess and support claims, and to present their work to an academic audience both orally and in writing. As part of understanding scholarly conversations, students learn to identify the most appropriate sources of information and to evaluate those sources critically. Over the course of two seminars, students—with increasing independence—contribute to these conversations and produce a substantive scholarly project. To be taken in the first year. May be taken only to fulfill the core requirement. An approved first-year seminar can simultaneously fulfill the Knowledge, Power, and Identity graduation requirement. A course labeled SSI1/SSI2 in the following list has two versions, one satisfying the Seminar in Scholarly Inquiry 1 requirement and the other satisfying the Seminar in Scholarly Inquiry 2 requirement. Generally, a student will not be granted credit for both versions of the course.

Only students meeting the Seminar in Scholarly Inquiry core requirements may enroll for these courses. Students not take an SSI course
as an elective or to satisfy major, minor, or emphasis requirements. Seminar offerings vary from term to term.

**SSI1/SSI2 101 Dionysus & the Art of Theatre** Ancient Greeks had the same name for the god of theatre, wine, and chaos: Dionysus. They used this god to try to understand life’s craziness, for the ways in which human joy and suffering are so often intertwined. Why, for example, do human beings so regularly destroy what they most love? In this Seminar in Scholarly Inquiry, students study theatre as literature and art: analyzing plays, reading commentary, attending live theatre, and performing scenes from the dramas they have read—all in service of developing the intellectual habits necessary to write and speak effectively and with integrity. **Affiliate department: Theatre Arts. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

**SSI1/SSI2 102 Rhetoric and Religion** This course considers rhetoric as an analytical tool for studying religion, and religious discourse as a distinctive form of, and problem for, the study of rhetoric. Through analysis of religious texts, students study the dynamics of classical rhetoric, including the three appeals (ethos, pathos, logos), the three branches (forensic, deliberative, epideictic), the five canons (invention, arrangement, style, memory, delivery), and the six parts of a speech (lexeum, narration, division, proof, refutation, peroration). Students perform close rhetorical analyses and criticisms on a variety of religious texts and speeches, make regular oral presentations in class (both in groups and individually), and engage in group debate and discussion in order to acquire practical skills in the art of persuasion and public speaking. **Affiliate department: Religious Studies. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

**SSI1/SSI2 103 Alexander the Great** Alexander the Great has been endlessly studied, celebrated, demonized, heroized, and satirized. Some have viewed him as a unifier of mankind, others as a destroyer of civilization. Who was Alexander the Great? What are the realities behind the popular images? Through close reading and evaluation of primary sources and secondary literature, students develop a deep understanding of Alexander and his world and sharpen their skills of critical reading, writing, and research. **Affiliate department: Classics. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

**SSI1 104 Why Travel: Tales from Far and Wide** Why do people travel? Our ancestors were nomadic, of course, and as far as we can tell, settled humans have continued to feel the itch to explore and move beyond the boundaries of their known world. We have traveled so much that it would not be entirely unreasonable to call our species homo peripateticus. This course engages theories of travel—drawn from a range of academic disciplines such as anthropology, history, and philosophy—and examine some seminal instances of travel writing (from Herodotus, the “father” of both History and travel writing to Columbus to contemporary writers such as James Baldwin and Orhan Pamuk). In each instance, students test a theory against one or more case. **Affiliate department: English. Satisifes the Seminar in Scholarly Inquiry 1 core requirement.**

**SSI2 104 Travel Writing and The Other** The course focus is “Travel Writing & the Other.” Because the field of travel writing is so extensive, students hone in on a smaller slice of the topic: the relations between dominant and dominated peoples that originated during the colonial expansion of Europe. The theoretical frameworks students engage in in the early part of the term draw on this encounter and are the shared foundation for the semester. As the semester progresses, students develop independent topics and projects that lie within the orbit of the larger topic. **Affiliate department: English. Satisfies the Seminar in Scholarly Inquiry 2 core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement.**

**SSI1/SSI2 105 Imagining the American West** Throughout the history of the United States, the physical and human resources of the American West have been imagined in numerous, often contradictory ways: as a place to increase the voting power of pro-slavery and abolition forces in the years leading up to the Civil War, and as a place where freed slaves might own their own land; as a place where middle-class families could own their own productive farms, and as the “Great American Desert,” as a place with unlimited natural resources to be exploited, and as the birthplace of the modern environmental movement. The American West spans a huge area of land and has meant many things to many people—at the same time, though, “the West” is a meaningful concept within American culture. In this course, students begin developing the intellectual habits necessary to write and speak effectively and with integrity, through focusing on interdisciplinary perspectives on the American West as an “imagined” place. **Affiliate department: English. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

**SSI1/SSI2 106 Cleopatra: History and Myth** Who was Cleopatra? To the Romans, she was the foreign queen who tried to steal their empire and who represented the most dangerous threat to their civilization in 200 years; to the Egyptians she was a goddess incarnate, the universal mother, and a liberator who came to free them from oppression. But equally fascinating has been the reception of Cleopatra’s image: to Chaucer she was the model of a good wife; to Shakespeare she was a tragic lover; to painters of the Renaissance she was a passive victim; to the Romantics she was a femme fatale; to post-Enlightenment colonialists she was an exotic Easterner; to Hollywood she has been a temptress, a sex-kitten, and a vamp. This course examines both the facts known about Egypt’s most famous queen, and how and why she has been reinterpreted over the centuries to suit the social, racial, and gender needs of different cultures. **Affiliate department: Classics. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement and the Knowledge, Identity, and Power graduation requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

**SSI1/SSI2 107 Leadership in American History** In 1976, leader-ship theorist and political scientist James McGregor Burns wrote that “Leadership is one of the most observed and least understood phe-nomenon on earth.” While this still rings true today, social science re-searchers have since discovered much about how leadership processes function. This course introduces students to contemporary scholarship in the field of leadership studies and asks them to apply aspects of that research to cases studies in American history. **Affiliate school: School of Business and Leadership. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

**SSI2 108 Empowering Technologies: Energy in the 21st Century** Through a variety of readings, in-class discussion, and short writing assignments, students increase their ability to develop effective oral and written arguments and become familiar with concepts and practices of information literacy. The course topic revolves around the technologies currently in use for electrical power generation. Students gain an understanding of the physical principles involved in electrical power genera-tion, the historical development of electrical power in the United States, and the variety of sources used to generate electrical power. **Affiliate...**
department: Physics. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 100 Rhetoric, Film, and National Identity This course approaches the study of argumentation using popular film as a primary source material. Film texts will provide the basis for critical examination of public disputation about the politics of public memory and collective identity. The course is concerned with both argument through film and argument about film in other public venues. The course explores the role of popular and independent film in shaping or contesting public perspective on what it means to be a nation; public disputes over what counts as national interests; and public disputes over who counts as a citizen with fully endowed rights. The course links film and national identity to gender, race, and social class. Some of the films viewed in this course have an R rating. Affiliate department: Communication Studies. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 110 Examining Dogs Through the Lens of Science Humans share their homes with dogs, spend billions of dollars every year on their needs, and worry about what they are feeling. Although dogs and humans have been sharing their lives for thousands of years, most people do not realize that such an intimate association between two different species of animals is highly unusual. How, when, and why did this association come about? Of all animals to domesticate and bring into our homes, why did early humans choose a predator? What do dogs know about humans and what do humans really know about what dogs think and feel? This course introduces students to essential elements of academic discourse. Through learning about the evolution and social cognition of dogs, students learn to distinguish between different types of sources (scholarly v. popular; primary v. secondary) and practice the art of close reading. Students also gain experience using sources judiciously and effectively to build arguments and support a position. Affiliate department: Biology. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 110 Examining Dogs Through the Lens of Science Humans share their homes with dogs, spend billions of dollars on their needs, and worry about that they are feeling. How, when, and why did this highly unusual association between two very different species evolve? What is the biological basis for the tremendous diversity in the shapes and sizes of dogs originate? What does science tell us about what dogs know about humans? How do scientists figure out what dogs think and feel? In this second semester Seminar in Scholarly Inquiry, students address these questions by examining dogs through the lens of science while practicing and building upon the skills of close reading, evaluating sources, and crafting effective arguments. Students also learn how to search for and use appropriate sources as they embark on a major research project on one of the many interesting aspects of dogs. Affiliate department: Biology. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 111 Life, Death, and Meaning This course is devoted to a number of philosophical issues surrounding death and the meaning of life. The main focus is a number of existential questions and different attempts, past and present, to answer these questions. The central question of the course is: What gives life meaning? Some philosophers have argued that meaning is to be found in one of the following: the pursuit of pleasure of one’s own happiness, the pursuit of justice or the common good, religion, the pursuit of knowledge, the pursuit of some other value (like artistic value or human excellence); while other have argued that life has no meaning (life is absurd). In addition, the following questions are examined: Is freedom of some sort necessary for a meaningful life? Would life have meaning if we lived forever? Is it rational to fear death? Does causing someone to exist always benefit that person? Is the question of life go extinct bad? Readings for this course include a number of existentialist writers (Kierkegaard, Nietzsche, Sartre, Camus, de Beauvoir), some excerpts from classic writers (Plato, Aristotle, Epicurus), and a number of contemporary writers (Nagel, Williams, Feldman, Nozick, Parfit, Taylor, Wolf). Affiliate department: Philosophy. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 112 Salsa, Samba, and Soccer: Popular Culture in Latin America This course considers the intersections of gender, race, and class in the production of popular culture as an introduction to, and a way to understand, Latin America, and as a vehicle for students to develop essential skills by examining a variety of sources and developing and supporting arguments in class and on paper. Beginning with introductory historical and theoretical frameworks, students examine a variety of contemporary forms of popular culture: popular religious symbols and rituals, secular festivals, music, dance, food, and sports. Students explore the tensions between elite and popular cultures; popular culture as a resistance or opposition; attempts by the state to manage popular culture as a symbol of national identity or a form of social control; the relation of popular culture to mass and commercial culture; and the migrations of cultural forms between Latin American countries and the rest of the world. The final project is a substantive paper based on independent research. Affiliate Program: Latin American Studies. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 113 Imagining a New World This course explores how early modern writers grappled with new texts, experiences, and existing paradigms of reality to rethink ontology, including ideas about geography, nature, religion, gender, and race. Students read early historical and literary discovery narratives (Raleigh, Shakespeare, Montaigne) as well as revisionist works by contemporary postcolonial writers. Affiliate department: Humanities. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI2 113 Digital Methods in the Study of Literature This course is an intensive writing seminar that introduces students to the process of applying software-assisted methods to the study of literature. To begin, students read several introductory essays by practitioners of the digital humanities about what they do and why, and what they have learned about the promise and limitations of these new approaches to the study of literature. For the balance of the semester students read, analyze (in both traditional ways and using some of the new tools and methods), discuss, and write about a challenging collection of readings—major works of fiction, drama, and poetry. The numerous “labs” give students hands-on experience performing micro- and macro-directed text analytics, building annotated maps and network visualizations, and developing and delivering multi-media presentations will serve as the focus of four substantial individual argumentative essays, including one longer research paper, and two multimedia projects. Affiliate department: Humanities. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 114 Understanding High Risk Behavior Setting and achieving goals has defined many adventurers, but often times the romantic meets with the catastrophic. In this course students take a close look at modern day explorers by critically considering the written and oral work surrounding their feats or attempted feats. By focusing
on a specific disaster, students learn to define community and responsibilities associated with high risk behavior while looking at the situation from many different viewpoints. Affiliate department: Exercise Science. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

**SSI1/SSI2 115 Imaging Blackness** The study of film is a key aspect of visual rhetoric, a growing area of academic interest linking film studies and rhetorical theory. This seminar focuses on the study of popular visual images as public argument. Students examine the political economy (ownership, production, dissemination), engage in a textual/visual analysis (what meanings are embedded), and examine audience reception of black film (how do audiences understand and use these media images). Students explore how these films function as public argument advocating particular views of black identity while contesting counter arguments as part of a larger agenda of promoting blacks and shaping US public life. Affiliate department: African American Studies. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

**SSI1/SSI2 116 Communicating Forgiveness and Revenge** Students critically consume and analyze a variety of challenging texts, formulate and support argumentative claims, produce written assignments, and present their work orally. Students examine forgiveness as a relational and communicative process along with the implications of forgiving between dyads, small groups, and society at large. In addition, alternative post-transgression options such as unforgiveness and revenge that are commonly depicted in opposition to forgiveness are considered. Ultimately, students work to uncover the light and dark sides of both forgiveness and revenge during an examination of these relational processes. Affiliate department: Communication Studies. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

**SSI1 117 People, Plants, and Animals** This course addresses fundamental knowledge acquisition and knowledge construction while teaching important skills of reading, writing, and oral presentation. Students learn about how they think, how others think (in both scholarly and non-scholarly ways), and how to effectively interpret and create forms of written and oral communication. They learn important skills of distinguishing between description, summary, and analysis, and between various sources of information (scholarly vs. popular, primary vs. secondary). The vehicle used in the course for developing these skills is a focused study of epistemologies of the natural world. Students explore the ways that human communities have related to, utilized, and conceptualized the flora and fauna around them by examining different sources of knowledge (scientist, indigenous, based on lived experience, popular) about the relationships between people, plants, and animals. Students study this from various points of view, and discuss how different types of knowledge function in how we construct our understanding of the world. The course examines how knowledge is formed in this one domain (the natural world) will be helpful in seeing how knowledge can be similarly constructed in other domains of inquiry. By taking an historical-anthropological approach, considering human communities of the past as well as the present. Topics covered include domestication, traditional foraging, concepts of animal welfare, cultural values of reciprocity with the plant and animal worlds, urban foraging, and contemporary issues of trade in and conservation of flora and fauna. By examining cross-cultural perspectives, including their own, students use both macro- and micro-lens approaches. Affiliate department: Sociology and Anthropology. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

**SSI2 117 Coming Out! The Gay Liberation Movement** In 1960, homosexuality was considered a mental illness and sex between men (and sometimes between women) was a crime in every state. A 1967 CBS News poll found that 2/3rds of Americans said they reacted to homosexuality with “disgust, discomfort, or fear.” In these days of marriage equality, it can be difficult to understand the challenges lesbian, gay, bisexual, and transgender (LGBT) people faced in attempting to improve their lives. This course examines the gay liberation movement beginning with the Stonewall riots of June 1969. To understand what the riots meant, students will simulate a meeting just after Stonewall, playing the parts of people from various factions seeking to work together to improve the lives of LGBT people. Students will use the early class information and experiences to discover their own area of research interest related to the gay liberation movement. Students will consider the nature of LGBTQ history in the mid-20th century and what this history suggests for our current society. The class requires the use of primary documents found in the Archive of Sexuality and Gender and other sources to create a research paper addressing an important question related to gay liberation. Affiliate department: Education. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

**SSI1/SSI2 118 Doing Gender** Students create both oral and written arguments via the examination of how gender is constructed in communication. The course is grounded on the premise that all we create—including cultures, political and economic systems, and of course gender—is accomplished through communication. Students learn that biological difference between the sexes are really very few, and examine how and why masculinity and femininity are socially constructed and maintained. The class challenges students to examine taken-for-granted perspectives and values. Affiliate department: Communication Studies. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

**SSI1 119 Einstein and Everything** In 1999, Time Magazine named Albert Einstein the most influential person of the twentieth century. Who was Albert Einstein? This course examines his personal and scientific life as well as his legacy. Einstein’s research in physics revolutionized our understanding of space and time, produced a new theory of gravity that underpins modern cosmology, and contributed to the development of quantum theory. A German national who renounced his citizenship as a teenager only to take a distinguished job in Berlin, a pacifist who opposed WWII but urged President Roosevelt to start a nuclear-weapons program, a non-religious Jew who championed freedom of conscience but turned down the presidency of Israel, Einstein embodies many of the contradictions of the twentieth century. By examining Einstein’s life in its historical context, students analyze a range of issues: how does society (e.g., through its religious beliefs, economic, and military interests) shape science, and how does science shape society, affecting institutions, cultural values, and national and personal identity? Affiliate program: Science, Technology, and Society. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

**SSI1/SSI2 120 Hagia Sophia: From the Emperor’s Church to the Sultan’s Mosque** The church of Hagia Sophia in Constantinople was not only a daring architectural achievement at the time of its completion in 537 but also a significant religious and political statement. As the primary church of Constantinople, it was the meeting ground of the
emperor, the patriarch, and the populace, and a treasure trove of holy relics sought out by pilgrims who flocked to the Byzantine capital. After the Ottoman Turks conquered Constantinople in 1453, Hagia Sophia was refurbished and redecorated as a mosque, and it functioned as such until it became a museum in 1935. This course explores ideas related to this single but fundamental monument of world heritage across multiple cultures and periods and from the perspective of multiple disciplines in order to provide students an opportunity to engage with the process of scholarly inquiry. By completing extensive reading and writing assignments, students amplify their skills in creating effective arguments, synthesizing complex ideas based on multiple sources, and deepen their skills in critiquing primary and secondary sources. Affiliated department: Art. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 121 Multiracial Identities Maria Root, considered a pioneer in the study of multiracial people, wrote, “The topic of racially mixed persons provides us with a vehicle for examining ideologies surrounding race, race relations and the role of social sciences in the deconstruction of race.” Beverly Daniel Tatum, a developmental psychologist and expert on racial identity formation, observed that the process of multiracial identity formation is potentially fraught with challenges that are personal, societal, and environmental. This course examines what people of mixed-race descent write and say about their own identity development in the context of the ideologies of race extant in the United States. Affiliated department: African American Studies. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI1/SSI2 122 Ecotopia? Landscape, History, and Identity in the Pacific Northwest In his novel Ecotopia, Ernest Callenbach envisioned Northern California, Oregon, and Washington separating from the USA to become a breakaway “green” republic. Using this vision of the Northwest as a sustainable society as a touchstone, this course explores the multifaceted relationships between human identity and landscape (or place) in the region over the last century. Probing historical documents, visual representations, and literature, students investigate how different peoples have encountered, experienced, and represented the environment in the Pacific Northwest and how, in turn, the environment has shaped their sense of who they are. Additional topics may include the wilderness idea, globalization, and the way that social divisions such as gender and race have intersected with the process of making and re-making places in the region. Affiliated department: History. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 123 Diego Rivera and Frida Kahlo: Lives of Art and Politics During the first half of the 20th century, Diego Rivera was known as Mexico’s most famous and influential living artist, and Frida Kahlo was known mostly as his wife. Soon after their deaths in the mid-20th century, Kahlo became known as Mexico’s most famous and influential artist, and Rivera was known mostly as her husband. This first-year seminar examines Mexico’s most famous modern couple and their changing critical fortunes at three levels: biographical; artistic; and political. The questions the course asks and the answers pursued are informed by the disciplines of history, art history and the interdisciplinary endeavor of the humanities. Questions include: Who were these two individuals, and how were their lives as a couple shaped by socially constructed gender roles? What was the nature of their distinct artistic production, and how was the work of each shaped by gender and by the work of the other? How did they participate in the politics and the cultural movements following the 1910 Mexican Revolution, and how did “the revolution” shape their lives, art, and political roles? And finally, why did the life and art of Kahlo overshadow that of her husband after their deaths? Affiliated department: History. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 123 The Search for Extraterrestrial Intelligence Are humans the only sentient beings in the universe? What is the likelihood that others exist in the cosmos? Can they visit or communicate with earth? Where are they? This seminar examines the last fifty years of the scientific search for intelligent life off the earth. The occurrence of intelligence on a planet depends on astrophysical, biological, and environmental factors. Students investigate these factors and attempt to estimate the number of civilizations within the galaxy. The seminar also examines the view that humans are truly the only intelligent life in the galaxy based on the lack of extraterrestrial artifacts within the solar system. Affiliated department: Physics. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 124 Utopia/Dystopia What is human happiness? Can human beings live together in harmony? What is the perfect society? Is it possible to achieve such a society? This course examines how selected writers and communitarians have answered these questions in theory, fiction, and practice. The SSI1 course studies the themes of utopianism and anti-utopianism in Western thought from ancient times to the twenty-first century. Readings for the SSI1 version vary but may include Plato’s Republic, More’s Utopia, Voltaire’s Candide, Gilman’s Herland, Zamyatin’s We, Atwood’s Handmaid’s Tale, and documents from actual utopian communities. The SSI2 version will emphasize researching communitarian societies in American history. Affiliated department for SSI1 version: Humanities. Affiliated department for SSI2 version: History. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 125 Geomythology of Ancient Catastrophes The Biblical story of the Great Flood and Plato’s account of the Sinking of Atlantis are two examples of mythical tales that describe events bearing a striking resemblance to natural disasters, such as floods, earthquakes, tsunamis, and volcanic eruptions. This course students explore the possibility that some of these mythological accounts may be based on actual events that occurred in the distant past. The course focuses mainly on Mesopotamian, Greek, and Biblical myths but also includes material from the Pacific Northwest and other cultures. The course includes a required weekend field trip to examine evidence of catastrophic flooding. Affiliated department: Geology. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI1/SSI2 126 Gender, Literacy, and International Development Everyone knows the saying, “If you give a man a fish, he will eat for a lifetime.” What if the “fishing” being learned is a form of literacy (whether alphabetic literacy, health literacy, or economic literacy)? For many reasons, women are disproportionately represented among the world’s poor and illiterate populations, and gender roles for both men and women contribute to social inequities as well as possibilities for successful international development. Increasingly, development experts agree that efforts to reduce poverty must take into account cultural norms and gender roles—for both men and women—and that literacy education is key to this process. But what forms of literacy should be learned? Who should make the choice? How do rising literacy rates affect gender roles, religious traditions, health expectations, and resource usage? Students in this course engage in discussions of varied...
reading materials including a novel, policy documents, theory about the effects and nature of literacy, and ethnographic studies of men and women engaged in literacy learning around the world. Through focusing on interdisciplinary perspectives on gender, literacy, and international development, students in this course begin developing intellectual habits necessary to write and speak effectively and with integrity in college. **Affiliate department: English. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

SSI1 127 “Why Beethoven?” “Why Beethoven?” was a question the composer and conductor Leonard Bernstein asked himself in an imaginary conversation published in his book, *The Joy of Music*. More than half a century later we are still asking the same question. Why has Beethoven played such a pivotal role in the history of classical music, the world of ideas as a whole, and in popular culture? Why is he “a ubiquitous icon in all corners of American society,” as described by the scholar Michael Broyles? This seminar attempts to offer some answers about this towering figure in Western culture. Through critical examination of representative works and through important biographical studies, film, and a Broadway play, this course will explore issues that include the nature of genius, the compositional process of Beethoven’s music, the connections between creativity and suffering, and the presence of Beethoven in American culture. **Affiliate school: School of Music. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.**

SSI1/SSI2 128 The Philosophy and Science of Human Nature Is there a universal human nature, and if so what defines it? For millennia now philosophers have debated this question, proposing a number of starkly different accounts of human nature in the process. More recently scientists have gotten in on the action as well, bringing empirical results to bear on various hypotheses regarding what human beings are like. This course examines the interaction between philosophical and scientific approaches to the study of human nature. Topics include the following: Which features of human minds are innate? What is the relation between the language a person speaks and the way in which that person conceptualizes the world? What does evolution entail about human nature? Is the existence of free will compatible with various scientific findings regarding human beings? What are the moral and political implications of different views of human nature? Do men and women have fundamentally different natures? What is the relation between human nature and religion? The course examines works by Aristotle, Hobbes, Rousseau, Marx, Darwin, and Mead, as well as many contemporary philosophers and scientists. **Affiliate department: Philosophy. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

SSI1 129 Mao’s China: A Country in Revolution In 1949 the People’s Republic of China was established, with Mao Zedong at its helm. For the past forty years China has been in almost constant political and cultural turmoil, experiencing the dawn of a republican era, warlord rule, invasion by Japan, and a bloody civil war. The Communists brought an end to the warfare but inaugurated an era of great change to both state and society. This course examines Chinese history under Mao Zedong, focusing on the process and experience of the Chinese Communist Revolution. Topics explored include Mao’s life history, the philosophical underpinnings of the revolution, the ways in which the revolution was experienced by people of different backgrounds, and the social and cultural legacy of Mao’s vision. **Affiliate department: History. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.**

SSI1 131 Athens, Freedom, and the Liberal Arts In this course students explore the first development of the idea of ‘freedom’ in classical Greece, with a particular focus on Athens and its radical democracy in the late fifth-century BCE. Freedom requires practice, discipline, and an understanding of ‘the rules,’ so that one may use, manipulate, and break the rules; thus students study the arts of grammar, rhetoric, and logic—the foundational skills of the liberal arts—so that they may speak, reason, and practice freedom more effectively. Students test their newly acquired skills through close reading and analysis of texts from the Greek tragedy, comedy, history, rhetoric, and philosophy. Students put new skills into action through daily discussions, weekly debates, and performances of Greek drama. Students also participate in a four-week role-playing simulation of the Athenian assembly in which students have to decide on the best form of government, putting their notions of freedom into practice. This course thus offers students an authentic foundation in the liberal arts and in doing so prepares them for their life as a free person. **Affiliate department: Classics. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.**

SSI2 131 Social Justice and Radical Politics in Early 20th-Century America This course takes students to the beginning of the modern era when urbanization, industrialization, and massive waves of immigration were transforming the U.S. way of life. In 1913, suffragists were taking to the streets demanding a constitutional amendment for the vote, while at the same time, the Labor movement turned to the strike to demand living wages and better conditions. Members of all these groups congregated in Greenwich Village to debate their view with the artists and bohemians who were in the process of remaking themselves into the new men and new women of the twentieth century. In the first half of this course, students familiarize themselves with the period and then participate in a role-playing simulation in which they must determine what social changes are most important as well as how one can or should realize these goals. In the second half of the course, students embark on a guided independent research project exploring an issue that arises from a study of this crucial period in American history. **Affiliate department: Classics. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

SSI1/SSI2 132 Wild Things The concept of wilderness—and the related category of the wild—has proved a central imaginative paradigm for much of the environmental literature produced in and about the United States and Canada since the time of European settlement. By examining a varied selection of ecologically minded texts, this seminar explores how and why writers have argued for particular understandings of the concepts of wilderness and wild. Drawing on nature writing in several genres, the course further explores the social, political, and cultural issues at stake in these contested definitions. Among the questions the course considers: Is wilderness a useful conceptual category for current ecocritical analysis, or is it fraught with excess ideological baggage? Is wild a more productive concept for a critical practice that might inform effective resistance to current environmental degradation? How do wild and wilderness intersect with the familiar critical issues of race, gender, and colonial legacy? **Affiliate department: English. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.**

SSI1/SSI2 133 Not Just Fun and Games: Sport and Society in the Americas Many people turn to sport as an escape from the pressures and concerns of everyday life, a space apart from society’s daily grind. This course, however, explores the myriad ways that sport is enmeshed in the social world: the interplay of sports and sporting culture with socio-political conflict and ideology. Honing in on the three major sports of the Americas—baseball, soccer, and boxing—students examine the interaction of these sports with shifting historical and social contexts.
in order to query the role of identity, economy, class, and politics both on and off the field. Drawing on writings and films about sport, as well as sporting events themselves, students learn the rudiments of critical analysis and argumentation as they explore just how permeable are the boundaries between sport and society. Affiliate department: English. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 134 Dreams and Desire: The Liminal World The theme of this course is the exploration of the liminal world: the terrain for which there is evidence but no proof. For example, what do religion, anthropology, philosophy, medicine, psychology, and literature have to say about the seen and the unseen, the threshold between life and death—issues that shoot to the core of human existence and exert the strongest hold on the human spirit? Students explore the validity of claims about belief and unbelief, the world beyond the senses, made by prophets, priests, poets, shamans, scientists, philosophers. As both writers and speakers, students construct persuasive arguments based on an evaluation of sources that either contradict or defend given assumptions about the role of liminality in culture, history, identity, and the natural world. Students begin with texts that insist upon controversial readings, such as Toni Morrison’s Beloved, Louis Owen’s Wolfsong, and Isabel Allende’s The House of the Spirits. Affiliate department: English. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 135 Hurricane Katrina and the History of New Orleans This course explores the causes and consequences of Hurricane Katrina, which ravaged the Gulf Coast in 2005. The course investigates the ways in which this catastrophe might be understood as an “unnatural disaster.” While the course takes an historical perspective, it also explores issues that require students to look at the past from a variety of perspectives—cultural, social, political, legal, economic, environmental, and technological. As a result, students have the opportunity to work with sources drawn from disciplines reaching well beyond history, including meteorology, engineering, public policy and the law, as well as the visual, theatrical, and musical arts. Affiliate department: History. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement and the Knowledge, Identity, and Power graduation requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 136 Urban America: Problems and Possibilities This course introduces students to the essential skills for participation in the academic community. In this course, students develop their ability to read and assess scholarly texts, to identify appropriate methods of academic argumentation, to gather and evaluate evidence, and to present their ideas in focused and academically appropriate oral and written forms. Students are introduced to essential elements of information literacy and approach academic writing and discussion as recursive and mutually reinforcing practices. The course topic, “Urban America,” invites students to enter a contemporary dialogue regarding the nature of urban spaces, to examine the complex forces that contribute to their problems, and to consider the ways that 21st century life brings new possibilities and opportunities to city dwellers. Affiliate department: English. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 136 Suburbia: Dream or Nightmare? This course builds explicitly on skills students develop in SSI 1 by requiring them to produce an extended piece (12-15 pages) of independent writing. The course first offers an introduction to the history of U.S. suburbanization, especially the post-WWII rise of the suburban ideal, during which students fa-
stand the natural world and their place within it. Situated in the context of the Enlightenment and numerous political upheavals, this course examines a range of issues through the lens of electrical research: how does society—e.g. through its religious beliefs, art, economics, politics, etc.—shape science, and how does science shape society, affecting institutions, cultural values, and national and personal identity? Affiliate program: Science, Technology, and Society. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 141 Architectures of Power Using words as its building blocks instead of bricks or stones, writing has power to evoke or create socially coded (and sometimes socially subversive) meanings for its readers. The title of this seminar, "Architectures of Power," suggests that there is some kind of mechanism, be it actual or theoretical, that structures power and one’s ability to act effectively. Focusing on the power dynamics that structure writing, cultural interactions, and individual mindsets, this course is composed of a series of units that, building on one another, move students from the basic questions one asks of writing to more complex written assignments that require integration of a number of provided source materials. In analyzing a variety of texts (linguistic, visual, and even aural), students explore, develop, and analyze the kinds of social and communicative powers that writing can construct. Affiliate department: English. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 142 The Concept "Orwellian" This course investigates meanings and usage of the adjective "Orwellian" in American English. Seminarists analyze essays that deploy "Orwellian" and three of Orwell’s novels and one of his essays to see what sorts of ideas one might associate with "Orwellian." By the end of the semester seminarists produce their original responses to a linguist’s column in The New York Times in fewer words than the linguist used. Affiliate department: Politics and Government. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI1/SSI2 143 Controversies of Communication and Technology This course explores controversies as they relate to technology and communication. Technology is now a pervasive aspect of daily life. Some technology related discussion topics include online privacy, cyberbullying, anonymity, surveillance, trolling, and online dating. In addition to reading about developing and structuring arguments, students view relevant media and read popular press and academic articles about the various issues relating to technology and communication. In the process of examining these controversies, students encounter the two central aspects of the humanistic tradition of rhetorical education: argumentation and effective oral and written expression. Students engage in a variety of activities and exercises and prepare a final paper designed to develop their fluency in written composition and oral expression. Affiliate department: Communication Studies. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 144 Constitutional Controversies This course focuses on the U.S. Constitution in order to introduce students to frameworks for analyzing both policy and interpretive arguments on issues such as bicameralism, presidential veto, equal protection, and racial preferences. In the SSI1 version, students develop their analytical skills using texts provided by the instructor. In the SSI2 version, students research an ongoing legal controversy and prepare arguments on it. Students also gather materials concerning an amendment debate and analyze them. Students examine and assess arguments from authority, with particular attention to what makes for credible authority in a particular area. Through a series of short writing assignments, students prepare to undertake the major writing assignment emphasizing the various analytical perspectives. Affiliate department: Communication Studies. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 147 Contemporary Art Theory and Critique This course explores the intellectual, expressive, and aesthetic issues involved in the creation of contemporary art from the historical context of modernism and the current arena of visual culture. The focus of the course is to engage in written analysis and critical conversations about contemporary art by examining the art of pivotal 20th and 21st century artists and art movements that have redefined our ideas about art and the creative process. Through lectures, discussions, readings, written assignments, group critiques, studio art projects, and attendance at professional art exhibitions the class will address the following questions: What is Art? What developments influenced shifts in artistic practices? In what way(s) do I understand a particular artist’s creative pursuit? What ideas are manifested by curating a collection of art works into an exhibition? Affiliate department: Art and Art History. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI 1 148 Journalism and Democracy Journalism is sometimes called the “Fourth Estate,” a vision in which the press serves an essential function akin to the checks and balances of the executive, legislative, and judicial branches within the American government. In such a vision, the press provides the unbiased information necessary for a citizenry to make informed decisions. But, of course, this idealized vision is complicated. Our country is a diverse country, encompassing a wide range of geographic, cultural, and ideological positions, and the work of journalism is no simple matter. Where (literally and figuratively) is journalism coming from? Who is developing the content? Through what medium is journalistic content being disseminated? Who is funding it? Where is the line between reporting news and creating news? What stories are being told and what stories are not being told? How do the answers to these questions affect the state of democracy? In this course, students explore these and other questions through engaging in writing and speaking assignments that build on a variety of readings from different academic disciplines as well as from modern and historical journalism. Students discuss what the current state of journalism means for them as citizens, consumers, scholars, and—potentially—journalists. Affiliate department: English. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI 1 149 Medical Narratives This class focuses on narratives we create about illnesses and what those narratives reveal about our discourse of the body: who has authority to speak about an illness, disease, or condition? Why and for what reasons? What kinds of narratives to people construct when they write or speak about an illness or disease? Why do they construct these texts and what are the effects of such narratives on how we understand medicine, patients, and medical professionals? Students examine these sources in order to discuss the implications of these narratives both at an individual and personal level, and more broadly in terms of the global, political, cultural, and social implications. Assigned readings come from a variety of authors, including academics, journalists, medical professionals, and patients, and may include a range of media types (original medical reports, popular news articles, autobiographical memoirs or plays, radio programs, TV shows, and film excerpts). Affiliate department: English. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.
SS1 149 Transgressive Bodies  Many art forms reflect and comment on the political and cultural climates of their time. Art may serve as a lens or mirror for sensitive social issues, and act as a catalyst for change. But nowhere, perhaps, can one find artistic expressions of a culture as powerful and uncomfortable as in twentieth-century dance. From the modernist reinvention of ballet by Diaghilev’s Ballets Russes and Balanchine’s neoclassicism to the explosive experiments of modern dance by Isadore Duncan, Mary Wigman, Merce Cunningham, Martha Graham, and Alvin Ailey, dance becomes a vehicle for social movements: a means of critiquing norms and values, and representing tacit anxieties about gender, race, sexuality, nation, and collectivity. Twentieth-century dance is made more transgressive by its medium: the body. The dancing body has been a site for controversy in academic discourse, as the vestiges of our Kantian mind-body dichotomy linger. By exploring embodiment and social activism in watersheds music-dance collaborations of the twentieth Century, this course invites students to face the social issues of today and ask: what can the study of dance mean for us? Affiliate department: Music. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SS1 150 The Anthropology of Food and Eating  The quarry of the anthropologist—the deep social patterns and cultural meanings that shape human existence—are often disguised, out of sight, or behind the curtain of the world as it appears before us. In seeking a vantage point from which one might glimpse these phenomena, this course follows a well-beaten anthropological path: beginning with a commonplace, everyday practice, students work outward in scope and backward in time, constructing an informed, analytic, and critical perspective on human society and culture through the seemingly pedestrian substance of food. The course is organized in two segments. In the first portion of the semester, students engage a set of readings intended to provide an introduction to the multiple research agendas that characterize the burgeoning scholarship on food and eating. In the second segment of the course, students delineate a conversation in that scholarship that they wish to join, and deploy an independent research project of their own design that triangulates between existing scholarship and ethnographic data they collect. Affiliate department: Sociology and Anthropology. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SS2 149 Creationism vs. Evolution in the U.S.  This course examines the historical context of “teaching evolution” trials in the U.S. as a window into debates over the place of science and religion in American life. Starting with the famous Scopes “Monkey” trial of 1925 as an illustrative case study, students learn how to analyze the complex factors in such debates. Students complete an extensive research project on one of various subsequent trials or debates on teaching evolution. Affiliate department: Science, Technology, and Society. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SS1/SS2 150 Exploring Bioethics Today  This seminar examines Western philosophical and religious approaches to a range of topics and cases in contemporary bioethics, especially those posing challenges for public policy. Topic examples include: issues at the beginning of life (abortion, assisted reproduction, embryo controversies such as stem cell research); issues at the end of life (death and dying, assisted suicide/euthanasia controversies, brain death); and issues in between life and death, such as new genetic technologies, enhancement therapies, public health, health care reform and questions of justice for the underserved at the intersection of race, gender, and medicine. Affiliate department: Religious Studies. The SS1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SS2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SS2 151 The Natural History of Dinosaurs  Through a variety of readings, in-class discussion, and writing assignments that culminate in a major research project, students increase their ability to develop effective oral and written arguments and become familiar with concepts and practices of information literacy. The course topic focuses on dinosaurs, and students gain an understanding of the history, perception, and practice of paleontology. Students learn about evolutionary relationships over geologic timescales, and the intersection between biological and geological sciences. Affiliate department: Geology. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SS1 152 Gender and Performance  How do people “do” gender in everyday life and on stage? What histories of gender presentation do plays present, trouble, and remake? Through the reading of play texts as well as contemporary interdisciplinary scholarship, this class widely explores the topics of gender and performance in all their dimensions, including: gender as performance, gendered performance, and the performance of gender within and outside of theatrical contexts. Assignments focus on the key goal of the first Seminar in Scholarly Inquiry: to develop the intellectual habits necessary to write and speak effectively and with integrity. Affiliate department: Theatre Arts. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SS2 153 Scientific Controversies  This course focuses on scientific theories, practices, and/or discoveries that have been controversial. How do scientific controversies arise? What intellectual, religious, social, and political factors shape the debate? How do scientific controversies end? By studying historic debates, students learn general methods for analyzing scientific and non-scientific factors that influence the trajectory and outcome of a scientific controversy. Examples to be treated may include Pintard man, Galileo’s trial, mass extinction, global warming, Lysenkoism, and meteorites. Affiliate department: Science, Technology and Society. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SS2 154 The Anthropology of Food and Eating  The quarry of the anthropologist—the deep social patterns and cultural meanings that shape human existence—are often disguised, out of sight, or behind the curtain of the world as it appears before us. In seeking a vantage point from which one might glimpse these phenomena, this course follows a well-beaten anthropological path: beginning with a commonplace, everyday practice, students work outward in scope and backward in time, constructing an informed, analytic, and critical perspective on human society and culture through the seemingly pedestrian substance of food. The course is organized in two segments. In the first portion of the semester, students engage a set of readings intended to provide an introduction to the multiple research agendas that characterize the burgeoning scholarship on food and eating. In the second segment of the course, students delineate a conversation in that scholarship that they wish to join, and deploy an independent research project of their own design that triangulates between existing scholarship and ethnographic data they collect. Affiliate department: Sociology and Anthropology. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SS2 155 Issues in Disability  This course considers the challenges of acquired physical disability and the perceptions of US society about disability. The US is a highly resourced country and home of the Americans with Disabilities Act which should mean life with a physical disability is relatively easy. Students gain an understanding of disability access and accommodation laws, and how they are applied, as well as some insight into the challenges of living with an acquired disability and how individuals living with disability perceive their life. Affiliate department: School of Physical Therapy. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SS2 156 Worlds of the Bible  The collection of materials known as the Bible (the Hebrew Bible and the Christian New Testament) is a rare survival from the ancient world—indeed from several ancient worlds and cultural contexts, given that the materials were compiled over more than a millennium, a period when empires (Babylon, Assyria, Persia, Greece, and eventually Rome) rose and fell, and when Israel itself endured a series of catastrophes and revivals. In one way, this is the old and well-known “Bible story.” In another way, it is quite new and controversial given that, in recent years, remarkable discoveries in archaeological sites and archives have given new insights into these ancient worlds, into the relationships between Israel and its neighbors, and into the relationships and differences among the Biblical writers themselves. The questions arise all over again: What is distinctive about the ideas of the Bible? How is the ancient to be defined as against the modern, and what can be learned from the ancient concepts of cosmology, of human society, and human destiny? Throughout, the course concentrates on the framing of arguments on the meaning and significance of Biblical
ideas from a comparison of Biblical documents, one with another, and with documents from other cultures. One of the objectives of the course is to discover what the Bible is "saying" in those original contexts. The other objective is to work out, as modern readers, what the Bible might be "saying" in the very different cultural world of the twenty-first century. Affiliate department: Humanities. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI2 157 Chinese Painting in the West This seminar deals with how Chinese painting, one of the unique art traditions in the world, was dramatically exposed to the West at the turn of the twentieth century. This course also explores how market demand, public interest, and academic inquiry contributed to making Chinese painting an inseparable cultural element in the shaping of modern Western society. The course format includes slide lectures, a museum visit, reading assignments, group discussions, and an individual research project. Affiliate department: Art and Art History. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 158 The Digital Age and Its Discontents The topic of this course can be boiled down to an observation and a question: advances in digital technology are transforming the way we read, write, communicate, and even, according to some scholars and scientists, think; what are the consequences of these transformations? As part of a generation of "digital natives," university students and their peers are at times the objects of study, the evidence for various arguments, and the authority on digital technology. The goal for this course is for students to finish the semester with greater insight into the complexities of how technology shapes their lives. Students leave the course as savvy readers, thinkers, and writers, with the ability to transfer the skills they have developed for understanding this area of academic argument to any number of important social and academic debates. Affiliate department: English. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 159 Evolution for All Evolution is the process that allows one to make sense of the wondrous diversity of species, physiologies, behaviors, and everything else biological around us. The course explores both historical and current work that uses an evolutionary lens to look at all kinds of biological questions and focuses on issues near and dear to humans, such as food, sex, violence, and religion. Following the examination of a series of instructor-led case studies, students pursue their own independent research into the historical and/or current evolutionary analysis of a particular trait or characteristic. Affiliate program: Science, Technology, and Society. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 160 The Dilemmas of Statecraft: Foreign Policy and the Ethics of Force The use of force to achieve political ends is the most consequential decision a leader can make. Those uses of force may defend a country from conquest, defeat rapacious dictators, secure vital economic assets, or protect innocents from slaughter. Force may also be used to conquer, dominate, and annihilate. Since force is a tool that can be used for both good and ill, it is not surprising that there is significant debate about the conditions for its appropriate use. After examining two schools of thought addressing the ethical obligations of leaders, students embark upon an exploration of difficult cases designed to shed light on the consequential decisions that leaders of countries face. Was Truman justified in dropping the atomic bombs on Japan in 1945? Is it permissible to order a military intervention that violates a state's sovereignty to in order to protect people from ethnic cleansing? Is the use of drones to conduct targeted assassination an acceptable part of a counter-terrorism strategy? These are just some of the questions this course poses. In examining these issues students complete extensive reading and writing assignments, learn to assess sources of information, develop their ability to read and think critically, and practice writing and speaking persuasively. Affiliate department: Politics and Government. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 160 Modernist Literature In this course, students examine key authors in the Modernist movement. Focusing on the most important figures, such as Woolf, Eliot, Stein, H.D. and Hemingway, students trace the development of a style that pushed the boundaries of all of the arts as it attempted to understand a radically changing world. To frame this investigation, students become fluent in their ability to distinguish between the multiple movements within Modernism as a whole—Imagism, Cubism, Surrealism, the Harlem Renaissance, Bauhaus—and will even try their hand at some of these creative techniques. Students ponder their dreams with Freud, sing off-key with Stravinsky, turn the world into geometry with Picasso, and figure out why Frank Lloyd Wright could stick a house on top of a waterfall. While introducing students to this broad view of the period, however, the course asks, above all, that students deeply investigate the writers of this period. The course aims to ignite the imagination while demanding critical thinking and expert writing. Affiliate department: English. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 162 Colonialism and Films This course begins with the assumption that cinema plays a constitutive role in discursive formations about race, class, gender, sexuality, nation, empire, and so forth. Working from this assumption the course explores representations of colonialism, and empire across a history of Western feature film. Although, the course focuses on a particular genre of films, the course aims to teach students the basic language of film more broadly through interpretation and close analysis of film as argument and public arguments about film. The course workshops student’s written work that culminates with the production of a video essay presenting a completed argument about a specific film. Affiliate department: Communication Studies. The SSI 1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 162 Mary and ‘Aisha: Feminism and Religion Does religion oppress women? Might it empower women? Might it do both? This course asks all these questions. It focuses on two central women in Islam and Christianity: Mary and ‘Aisha, one of the Prophet Muhammad’s wives. Students will look at the existing sources about them and ask “how do we know and evaluate sources as historical sources?” Students then look at later interpretations of Mary and Aisha, both in Islam and Christianity. By looking at how these women have been represented, and reimagined, students better understand these two religious traditions in their historical contexts. Then students look at how feminist thinkers in these traditions look to these two figures in order to re-imagine women into a patriarchal past and to re-think roles of women in the future. Affiliate department: Religious Studies. The SSI 2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 163 Gender Bending Before a child is even born, innumerable expectations have been developed about what that child’s life will entail; what they’ll look like, how they’ll identify, what they’ll wear, who/what they’ll play with… even what their favorite color will be. However, society is becoming more aware that a person’s genitalia does not always coincide with their gender identity. Moreover, even for individuals who identify within the gender binary (i.e., woman/girl or man/boy), the expression of gender and adherence to gender role ideologies varies greatly. This course is the first semester of the Seminars in Scholarly Inquiry (SSI) core requirement and is designed to examine the various theoretical perspectives on gender identity, expectations, and expression, with a particular emphasis on transgender and genderqueer identities. Students review relevant media, popular press, personal narratives,
and and academic articles about the various framings of, and issues relating to, gender. In doing so, students develop skills in communicating effectively through written and oral assignments. Affiliate department: Psychology. The SSI 1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 164 The Rhetoric of Warfare: 1908-1938 This course explores the words, actions, thoughts, and feelings of the individual amidst the catastrophe of war. This course treats a wide variety of materials from the ancient world to the present, including lyric poetry, novels, memoirs, visual art, and film—but the primary focus is on WWI and the lead-up to WWII. Students explore the ways in which various rhetorical and narrative treatments of soldiers and of war offer us understandings of the subjective experiences and ethical choice of ordinary and extraordinary people under extreme stress and facing horrendous challenges. The course also intends to consider notions of the individual, the community, and civilization (with all that word implies) against the backdrop of the chaotic action of war and combat. Affiliate department: Humanities. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 165 Never Really Alone: Symbioses and Parasitism Around and Within Us This course explores the prevalence, impact, and history of the associations between organisms (including human beings), from the very large to the microscopic, throughout the biosphere. A growing paradigm shift in science places diverse associations between organisms as central to evolutionary theory and life on Earth: not so much competition among organisms, but complex “networking” between them. The course examines relationships between organisms through this lens, including examples such as crustaceans that replace the tongues of fish, the tiny “wildlife” that lives on and within human beings, and the fact that life as known on Earth has resulted from ancient symbioses. Students develop skills in evaluating, discussing, and presenting concepts relating to symbiosis and parasitism, from historical, philosophical, and scientific viewpoints. Affiliate department: Biology. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI1 166 Applied Ethics “Morality” is what an individual believes right or wrong. “Law” means the enforceable rules governing society. “Ethics” is the written and unwritten rules governing institutions and professions. This course addresses common misunderstandings about ethics and frequent difficulties in the application, use, and explanation of ethical standards. Students learn to understand and define what ethics is and is not; develop an Applied Ethics analytical structure generating defensible outcomes; and critically evaluate the sources, information, and assumptions used to examine, challenge, and support ethical conclusions. This seminar is not discipline specific. Subject matter varies and encompasses issues of reproductive freedom, bodily integrity, employment and business practices, and law interpretation and enforcement, among others. Affiliate school: School of Business and Leadership. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI1 167 Learning from Indigenous Societies For more than a century, anthropologists have immersed themselves in the social worlds that comprise human cultural diversity. Ethnographies are the product of this academic endeavor—the holistic texts anthropologists produce about these different ways of being in the world. This course explores ethnographies of societies outside the western ambit, and from a period just prior to the welter of global interconnection. These ethnographies yield some perspective on the diverse ways of being in this world. Anchoring the discussion of these indigenous societies is an assessment of gender relations, ethnic interrelations, hierarchy, power, and social organization. How are those social features configured in the variety of diverse, indigenous social worlds we consider? After perusing ethnographies from around the world, the semester concludes with a substantial term paper that requires students to reflect on American society in light of their newfound understandings of the diversity of indigenous societies. Affiliate department: Sociology and Anthropology. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 167 The Russian Revolution This course builds on skills developed in SSI 1 by leading students through the process of researching and writing an extended piece of scholarly writing. The first part of the course is devoted to close examination of the Russian Revolution, a defining event of the twentieth century. In this section of the course, students examine the Tsarist old regime, the revolutionary movements that challenged it, the dramatic events of the 1917 revolutions, and the Civil War and new revolutionary order that followed. This historical work provides opportunities for selecting and evaluating sources, formulating questions, and presenting work in written and spoken form. The course then focuses on the different stages of undertaking an independent research project, including posing a research question, selecting sources, compiling research materials, drafting, revising, and executing a research presentation. Affiliate department: History. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI2 168 Zen Insights and Oversights While Zen is perhaps the most well-known form of Buddhism outside of Asia, it may also be the least understood. This course studies Zen in its Asian contexts, examining the emergence of Chan/Zen within Buddhist history, the interplay between Zen, aesthetics, and philosophy, and the relation between Zen and such developments as nationalism and social discrimination. The course aims to avoid a romantic study of Zen and to develop instead a balanced understanding, exploring the insights as well as oversights that have appeared within the Zen tradition. As the second course in the first year seminar series, a major part of this course is geared towards developing academic independence by guiding students through the process of writing a major research paper in which they advance an academic argument related to some aspect of Buddhism. Affiliate: Religious Studies. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI2 169 A Year in the Life of William Shakespeare Part of what explains Shakespeare’s growing popularity in the Renaissance—and, as some would argue, his popularity through the centuries—is his ability to capitalize on the immediacy and adaptability inherent to the theatre, a responsiveness that uniquely positions its engagement with contemporary political and cultural events. In what ways are these plays shaped by their historical moment, or even the materials of their production? Conversely, how might the plays have shaped the political, literary, and theatrical conditions of the period? This course begins with the analysis of a selection of plays Shakespeare produced in 1599, by all accounts a remarkable year in the life of the dramatist and in Elizabethan England. From there, students turn to a play and year of their own choosing, the analysis of which forms the basis of an independent project. Strategies for research and critical thinking are developed through the study of both dramatic and non-dramatic texts, and in situating work among competing theories of literary historicism. Affiliate: English. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1/SSI2 170 Perspectives: Space, Place, and Values This discussion-based course is designed to introduce the fundamental representations of landscape in visual art as frameworks for broader, multidisciplinary discussions. In particular, the course explores how representations of water and earth art involving water reflect intertwined connections amongst conceptions of space, senses of place, and human values. Affiliate department: Art and Art History. The SSI1 version
satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI 171 Medical Discourse and the Body  The human body presents a challenging topic for discourse. The body is at once universal and yet radically subjective; everyone has a body, but not all bodies are the same or similar. Moreover, knowledge about the body varies dramatically between different groups of people. This course focuses on discourse about the body: who has authority to speak about the body? Why and for what reasons? What kinds of language do people employ when they write or speak about the body? How does their language use change depending on the audience? Students begin thinking about these questions by reading several texts about legislation debates concerning the body. A human body forms the single most basic legal entity in our society, and also perhaps the most contested. Who has power over an individual? What are the limits of that power, and how are such limitations determined? These discussions are followed by reading several accounts by doctors; people who spend their lives examining and interacting with many kinds of bodies in different situations. How do doctors understand their relationship to the kinds of bodies they see? Finally, students consider how people conceptualize their own relationship to their bodies. Affiliate department: English. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI 172 The Scientific and Romantic Revolutions  This course explores the causes and consequences of two decisive turning points in Western civilization—the Scientific Revolution of the 16th and 17th Centuries, and the Romantic movement of the late 18th and early 19th Centuries. The course aims to understand these periods of upheaval in their political, religious, economic, scientific, and aesthetic dimensions, and to discover how their legacy continues to inform the relationship between science and art. Affiliate program: Humanities. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI 173 Alexander Hamilton’s America: The Political Economy behind the Musical  Hamilton: An American Musical has enthralled audiences across the country. Despite the accolades and shower of awards for the artistic achievement that is "Hamilton", it is worth asking -- how much of this is accurate history, political analysis, and economics? Using the music and the musical as our guide, students in this course will read, dissect, critique, and compare written, visual, and aural works in order to understand the foundations of U.S. political economy. Through close reading and evaluation of primary sources and secondary analysis students will learn about Alexander Hamilton’s role in creating the foundational systems of our economy and government. Students also gain experience using sources judiciously and effectively to build arguments and support a position. Affiliate department: Economics and International Political Economy. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI 174 Lethal Othering: Critiquing Genocidal Prejudice  The anthropological study of prejudice looks critically at the process of “othering”—that is, the fear-based tendency to regard groups who are “different from us” in ways that emphasize (their) threat versus (our) safety. Logically, this perspective can lead to attitudes, policies, and actions that aim to annihilate the difference between “us” (the in-group) and “them” (the dangerous outsiders)—either by forced assimilation or even by genocide. This course examines the ways that prejudice has been a part of such murderous and inhumane activity, beginning with a sustained exploration of the role of anti-Semitic prejudice in pogroms that took almost immediately after the Holocaust. Following the first section of the course, students will be guided to examine other situations of prejudicial, even murderous thinking and actions against Native Americans, African Americans, Asian Americans, Latino Americans, and Arab and Muslim Americans. Students will choose one of these five groups as the subject of further, more independent scholarly exploration, while concluding the course with a consideration of yet another kind of “othering”: the practice, in some US locales, of local governments enacting legislation to exclude certain types of people from certain neighborhoods. Affiliate department: Sociology and Anthropology. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI 175 Utopia and the Imagination  In 1516, Thomas More wrote a fanciful story about the New World and called it Utopia. While the term he coined, utopia, literally means no-place, his fictional text served as a powerful indictment of English society. Among other things, he argued for a radical rethinking of education, a reduction in territorial expansion, and an oddly progressive approach to gender relations and marriage. While More coined the term, the notion of utopia as a societal critique stretches back to foundational texts such as Plato’s Republic and Genesis. In fact, it is hard to conceive of the progress of Western thought without the presence of utopian thinking. This course explores utopian thought, examining utopian theories of the golden age, economics, religion, architecture, gender relations, technology, etc. Students are asked to use this frame to examine and critique today’s society. This is a writing-intensive course which uses the theme of utopia to teach critical thinking and scholarly writing. Affiliate department: English. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI/SSI 176 American Autobiography from Franklin to Facebook  The urge to tell one’s life story has a long and illustrious history in American literature. Benjamin Franklin wrote one of the first American autobiographies, a life story and at the same time a blueprint for Franklin’s vision of a new kind of person: an American. Frederick Douglass’s devastating first-person slave narrative worked to establish the humanity of African-Americans and attacked the system of chattel slavery. Maxine Hong Kingston’s experimental memoir told of another new kind of American, the urban immigrant. These masters of the genre used their personal stories for varied rhetorical aims. In the process, each helped create a distinctively American literary genre: biography of self-as-nation, slave narrative, and immigrant story. Over the course of this seminar, students read American autobiographies, addressing a set of linked questions: What is autobiography? Why have Americans chosen to write it? How have its rhetorical functions in American life altered over time? What does it mean to be an American, and how are American autobiographies shapers of and shaped by this notion? The varied conclusions students reach will help them achieve a clearer understanding of both the uses of literature and the complexities of American identity. Affiliate department: English. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI 177 Marriage in History and Literature: An Inquiry into What This Institution is For  This course begins by asking a deceptively simple question: what is marriage for? While the question might seem at first tied to the recent political and legal battles over same-sex marriage, this course explores a number of important ways this question has been at the heart of social and political change across a wide swath of Anglo-American history and examines how tension and conflict inherent in that change show up in literature. Students first encounter this question in the plays of William Shakespeare and John Webster, and in John Milton's impassioned plea for the right to divorce. The inquiry of the course is shaped by Stephanie Coontz’s sweeping historical text Marriage, a History: How Love Conquered Marriage. Students examine the brief period of post-WWII America where “traditional” marriage can be understood as having been the norm, at least for some classes.
Seminar in Scholarly Inquiry

Equipped with a better grasp of the history of marriage, at the end of the semester students turn their attention to the way extending marriage to same-sex couples does or doesn’t raise the question: what is marriage for? They might also wager an answer. Affiliate department: English. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 177 The Digital Present and Our Possible Techno Futures
This course is designed to explore the wildly ramified effects digital technology is having on people’s intellectual, educational, social, professional, and economic lives. Students will be introduced to a number of arguments about the nature and consequences of some of the changes digital technology is fostering; however, each student is asked to pose his or her own scholarly question within this broad field of inquiry. These questions, and the research they inspire and require, will shape the true content of the course. Students leave this course with new and important information about the potential futures made possible by digital technology. More importantly, however, they leave this course with information literacy, research practices and habits, analytical and argumentative strategies, and rhetorical skills they use across the Puget Sound curriculum and throughout their intellectual lives. Affiliate: English Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI2 178 George Gershwin
George Gershwin (1898-1937) composed works such as Rhapsody in Blue and An American in Paris that draw audiences to orchestra concerts around the world. His songs, including “Fascinating Rhythm” and “They Can’t Take That Away from Me,” are favorites of singers, jazz musicians, and casual whistlers alike. He straddled the divide between classical and popular music like no one before him. He also blazed a trail as the first American composer who could be called a celebrity: his rags-to-riches story, friendships with movie stars, glamorous bachelor lifestyle, and shocking death from a brain tumor before age 40 have all contributed to a fascination with Gershwin that goes well beyond rhythm. In this first-year seminar, students explore Gershwin from various angles: as a celebrity, a songwriter, and a target of criticism. By finding and looking at primary and secondary sources, listening closely to music, and considering the social and cultural contexts in which Gershwin lived (and in which his music and memory live on), students will gain insights about music, history, biography, and culture, while also continuing to develop as researchers, communicators, and critical thinkers. Affiliate school: School of Music. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 179 Women, Art, and Power in Byzantium
This course examines the visual and textual representations of women from the 4th through the 11th centuries from the Byzantine Empire and from the perspective of multiple disciplines to offer insight into the role of women and the operation of gender in Byzantium. Because the surviving sources privilege the elite, this course focuses on women of the upper classes, with particular attention to empresses. The course examines the infamous Theodora (6th c.) who rose to imperial rank from the slums of Constantinople, as well as Irene and Theodora (8-9th c.) who affected a lasting change in the religious policy of the empire, and the curious sisters, Zoe and Theodora, who even reigned by themselves briefly in 1042. To shed light on the role of women of the lower classes, the course also explores marital and home life, women’s work, childbearing, women’s attitudes toward icons, and the importance of the cult of the Virgin Mary. The course provides students an opportunity to engage with the process of scholarly inquiry by completing extensive reading and writing assignments. Students amplify their skills in creating effective arguments, synthesizing complex ideas based on multiple sources, and deepen their skills in critiquing primary and secondary sources. Affiliate department: Art and Art History. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 179 A Russian Mystery: Casting Shadows, Casting Light
In this seminar students are led through the stages of the research process beginning with popular concepts and sources through increasingly more sophisticated primary and secondary sources as they journey more deeply into the course subject: the Butakov Papers. Over a hundred years old, these documents form a mosaic of images and texts that tell an extraordinary story of privilege, courage, tragedy and loss. They include field diaries, letters, passports, birth, death, marriage certificates, news articles, as well as many pictures. The story of their provenance begins and ends with a mystery: how did these documents travel from St. Petersburg, Russia, to Spokane, Washington, finally be found in a cardboard box in a storage unit north of Seattle? What stories does this journey tell? Students discover facts and put them together in an order that yields the deepest and most logical thesis. Where there are missing facts, students discover ways to use secondary sources to fill in the contexts. Where there are blank spaces, students collaborate on ways to imagine linkages that suggest the deepest and most meaningful interpretations. In other words, out of these recovered facts, students create a life story set against a backdrop of one of the most astonishing periods in modern history. Affiliate department: English. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI2 180 The French Revolution
The tumult of the French Revolution animates this SSI2 seminar and provides students with ample material for developing writing and research skills. Several writing projects allow students to hone their abilities to construct a convincing argument as they learn about both the historical and philosophical underpinnings of the fall of the French monarchy. The course begins by addressing the social structure of pre-revolutionary France and the events and ideas that led to its upheaval. Significant time is spent analyzing the details of the revolutionary years and the formation of a new government. The course closes with a study of the period from the Terror to the rise of Napoleon. Students must be willing to actively participate in a role-playing academic game which makes up a significant portion of the class sessions. Class is taught in English. Affiliate: French Studies. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI1 181 Science and Theater
This course examines the ways in which new science, or scientific controversy, is presented on stage. How have playwrights grappled with the challenges to worldviews and to social order that science can pose? How successful is theater in presenting the social, intellectual and moral dilemmas raised by science? Students will read and analyze a number of plays with science themes, or with scientists as characters. Near the end of the semester, each student will also participate in a role-playing academic game which makes up a significant portion of the class sessions. Affiliate department: Science, Technology and Society. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI2 182 Against Equality? The Marriage Equality Movement and its Queer Critics
This course explores the legal findings and social changes that allowed marriage rights to be extended to all couples, and the critiques of the marriage equality movement that came, not from social conservatives outside of the LGBTQ community, but from the most progressive camps within that community. This course examines how queer critiques of marriage equality can help students understand the institution of marriage more fully, especially in terms of what personal and social benefits marriage is intended to confer. By mid-semester, students develop a research question addressing the evolution of marriage as an institution and/or legal and social progress toward LGBTQ rights in the US. Students’ pursuit of answers to their research ques-
tions structure the second half of the semester, which will culminate in 10- to 12-page researched argument essays. Affiliate: English. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI 184 Past Lives This course uses a series of autobiographical narratives composed between the fourth and twentieth centuries as points of entry into specific moments in the European past: the final years of the Roman Empire, the Twelfth-Century Renaissance, the Enlightenment, and World War I. Rather than focusing on autobiography as a genre, students use these primary sources in conjunction with supplementary secondary source materials to reconstruct the cultural and political setting of each writer’s life. In the first part of the semester, students practice the historian’s craft of close, contextualized analysis of evidence. In the second part of the semester, students conduct substantial independent research projects on an historical topic related to the course. Affiliate department: History. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI/SSI 186 Presidential Rhetoric In this seminar, students develop the intellectual habits necessary to write and speak effectively by engaging with primary and historical sources. In addition, students develop their capacity to analyze various forms of presidential rhetoric. Students increase their ability to develop effective arguments by learning to frame questions around a focused topic, to assess and support claims, and to present their work to an academic audience both orally and in writing. Affiliate department: Communication Studies. The SSI 1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI 2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI/SSI 187 Controversies of Communication: The American Dream Every day individuals are bombarded by various messages, advertisements, songs, and even everyday conversations that are trying to persuade them to think or behave in particular ways. Often individuals accept these arguments as facts, truth(s), and reality. In this course, students explore the rhetorical techniques (persuasive communication) of such messages and understand that they can resist, challenge, and question them. In particular, this course explores persuasion and controversial topics related to the American Dream. The mythos of the American Dream permeates daily life in the United States; this course centers on discussion topics that include the ways that the American Dream influences politics, education and workplaces, understandings of families and relationships, and even individuals’ desires and goals. In addition to reading about developing and structuring arguments, students view relevant media and read popular press and academic articles about the various framings of, and issues relating to, communication and the American Dream. While critically examining these controversies, students encounter two central aspects of the humanistic tradition of rhetorical education: argumentation and effective oral and written expression. Students engage in a variety of activities and exercises to develop fluency in written composition and oral expression. Affiliate department: Communication Studies. The SSI 1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI 2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI 188 The Tudors The relatively short Tudor period (1485-1603) is among the most studied and romanticized of any in English history. This era saw radical revisions in government, religion, society, and the arts, as English men and women lived through the birth of Protestantism and capitalism, embraced print culture, experienced new forms of state control and nationalistic fervor, and learned to see themselves in global terms as they founded colonies and trading posts halfway around the world. At the center of these changes were the five Tudor monarchs themselves, all of whom have been the subject of much debate among historians. This course introduces students to the raw materials of Tudor history and culture, giving them practice evaluating different types of primary sources with an eye toward issues of authorship, bias, and audience. The course also invites students to identify and critically assess conflicting claims made in secondary sources, including both modern works of scholarship and popular interpretations, and gives them analytical tools needed to enter into these ongoing conversations. Affiliate department: History. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI 190 Translation on Stage: Language, Culture, and Genre This course starts with a literal meaning of the word translate—“to carry across”—and then explores literature that moves across language, culture, and genre as it produces meaning. Case studies focus on plays that stage a collision of cultures between groups of people who speak different languages and novels that feature translators as central characters. The course culminates with the investigation of movement of a single story or character across genres: from short story, to stage play, to film, for instance. The course considers different disciplinary perspectives on translation and/as adaptation and focuses throughout on critical reading and thinking and the development of academic writing and argumentation. Affiliate department: Theatre Arts. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI 190 Sources and Adaptations This course thinks dramaturgically about translated theatre texts and the aesthetic and cultural conversations created by adaptation of existing narratives into other genres and mediums. With reading from contemporary adaptation theory and dramaturgical scholarship framing case studies of plays, students consider the modes of “telling, showing, and interacting” created by different combinations of sources and their adaptations, culminating in individualized student research projects on a specific adaptation of an existing artwork into theatrical production. Affiliate department: Theatre Arts. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

SSI 191 Unsolved History: Engaging with the Mysterious Past Too often, history is thought of as authoritative and unified, the singular record of “what really happened” in the past. In reality, history is complex, contested, and incomplete. Historical evidence is frequently missing, contradictory, or open to multiple interpretations. Historians’ development of arguments and narratives involves as much art as science. This course uses a series of case studies—including everything from circulating chapatis to baby-stealing dingos—to examine how historical knowledge is produced and how historians grapple with the problem of uncertainty. How much can be truly known about the past? Is it “another country”? How certain do historians need to be in order to make responsible arguments? Are there pieces of the past that are simply lost forever? Are historians at the mercy of “who lives, who dies, who tells the story”? Students address all of these questions as they consider the methods of “telling, showing, and interacting” created by different combinations of sources and their adaptations, culminating in individualized student research projects on a specific adaptation of an existing artwork into theatrical production. Affiliate department: History. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

SSI/SSI 192 Elvis and MJ: The Image of the Kings This course examines several instances of rock celebrity, focusing on the recent tragedy surrounding Michael Jackson, the “King of Pop,” which, in many ways, parallels that of his predecessor Elvis Presley, the “King of Rock and Roll.” While Jackson’s career trajectory is eerily similar to that of Presley, his story involves additional complex issues of race, gender, mental illness, and criminality. Mega-celebrity is a phenomenon cutting across all the performing arts. However, rock superstardom has been a particularly difficult status to manage, perhaps because rock artists play pivotal roles in youth culture and are often perceived as mirroring
broader societal changes. We examine how artists interact with the media forces through which they work. How do artists manage their image? Can this image be hijacked, and, if so, by whom and to what end? Can this image be reclaimed? In addition, we engage these artists as musicians and evaluate their impact on the development of rock music from the mid 1950s to the present day. Affiliate school: Music. The SSI1 version satisfies the Seminar in Scholarly Inquiry 1 core requirement. The SSI2 version satisfies the Seminar in Scholarly Inquiry 2 core requirement.

**SSSI 193 An Investigation of Literary Naturalism**  This course introduces students to Literary Naturalism, a controversial movement that took root in Europe and the United States in the second half of the 19th Century and that continues to flourish today. The course begins by examining the socio-political and intellectual climate of the Naturalist period, especially the influence of Darwin, Marx, and others on beliefs about progress, social responsibility, human motivation, and the purposes of literature and art. Students then read fiction and drama by several important practitioners of Naturalism, as well as contemporary reviewers’ responses to their works and short critical writings in which the writers themselves explain what they are doing and why. Included in this group are the dramatist August Strindberg and fiction writers Emile Zola, Stephen Crane, Jack London, Frank Norris, Edith Wharton, and Theodore Dreiser. Students also study Jacob Riis’ photojournalism, which focused, like many of the early Naturalist novels, on the plight of the urban poor. Affiliate program: Humanities. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

**SSI2 194 Castles**  Castles are one of the most recognizable symbols of the medieval past, evoking visions of both romance and violence. In Western Europe between the ninth and fifteenth centuries, castles served as status symbols and reminders of political and economic hierarchies, as focal points for military conflict, and as domestic and courtly settings. This course introduces students to the castle phenomenon, using recent work by historians and archaeologists that has considerably enhanced our understanding of the origins, physical construction, and functions of castles. Students become familiar with a range of medieval evidence, such as extant castles and ruins, medieval literature, and chronicles, and study castles from the perspectives of several disciplines, including history, archaeology, and literary studies, asking how we know what we think we know about castles. In the second half of the semester students research and write a substantial term paper with a complementary digital component. Affiliate: History. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

**SSI1 195 Honors: The Scientific and Romantic Revolutions**  This course explores the causes and consequences of two decisive turning points in Western civilization—the Scientific Revolution of the 16th and 17th Centuries, and the Romantic movement of the late 18th and early 19th Centuries. The course aims to understand these periods of upheaval in their political, religious, economic, scientific, and aesthetic dimensions, and traces their legacies in contemporary Western cultures. Affiliate department: Honors. Satisfies the Seminar in Scholarly Inquiry 1 core requirement.

**SSI2 196 Honors: Postmodernism and the Challenge of Belief**  This course studies the philosophical, historical, and aesthetic underpinnings of the late twentieth-century zeitgeist known as postmodernism, the assumptions of which continue to govern much of how we think today, especially in the academy. While many of the ideas central to postmodernism are many centuries old, their significance with respect to matters of belief (whether ethical, epistemological, or religious) has never before been so fully realized. The nature of subjectivity, truth, reality, morality, and knowledge itself have all been radically ‘problematised’. Without recourse to claims of truth, or moral systems, how do we distinguish right from wrong? How do we adjudicate conflicts in a world in which all values are equally contingent? How do we convince others of the validity of our positions, and is it even ethical to do so? The course explores the origins of postmodernism; the social, moral, and philosophical consequences of its core assumptions; its benefits and limitations in addressing real world concerns; and how it is itself a system of belief with a worldview no less totalizing and morally rigorous than the religious and Enlightenment precursors it sought to displace. Affiliate department: Honors. Satisfies the Seminar in Scholarly Inquiry 2 core requirement.

**Connections**

**Purpose**

The purpose of this core area is for students to develop an understanding of the interrelationship of fields of knowledge. The Connections core course is normally taken after completion of all other university core requirements, in the junior or senior year, and must be taken at Puget Sound.

**AFAM 346 African Americans and American Law**  This course explores the relationship between African Americans and American law, especially but not exclusively American constitutional law. The first part of the course examines important antebellum cases such as Scott v. Sanford (Dred Scott). The second part of the course traces two conflicting trajectories of legal decisions that emerged as the federal courts sought to determine whether and how the fourteenth amendment altered race relations in America. The final part of the course begins with the landmark Brown decision and then examines two important domains of American law: race, law, and American educational practices (e.g. desegregation, busing, affirmative action, school assignment policies) and race, law, and the workplace (e.g. employment discrimination, affirmative action). Satisfies the Connections core requirement.

**AFAM 355 African American Women in American History**  This course examines the distinct historical experience of African American women and explores the importance of race and of gender in the American past. Some of the topics considered include African American women and slavery, free black women in antebellum America, African American women and reform, issues of the family in slavery and freedom, sexuality and reproductive issues, African American women and the world of work, African American women in the struggle for education, and African American women and organized politics. The exploration of values is an important component of the course. Readings emphasize the use of primary sources ranging from slave narratives to contemporary fiction. Satisfies the Connections core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement.

**AFAM 360 The Art and Politics of the Civil Rights Era**  This course employs an interdisciplinary approach to explore the history and expressive culture of the civil rights era. Emphasizing how historians call the “civil rights movement,” the course explores earlier strategies of resistance, the civil rights black power movements, and legacies of these movements. An interdisciplinary approach is particularly applicable for a course focused on the civil rights movements because the literature of racial protest and of the ‘black arts’ was not simply parallel to the political upheavals. As Amiri Baraka put it in 1971, “Art is Politics.” Readings and assignments engage the complex, sometimes contradictory, legal, political, literary, artistic, and musical responses to this charged historical period. Students may not receive credit for both HIST 131 and AFAM 360. Satisfies the Connections core requirement.
AFAM 375 The Harlem Renaissance  This course examines the renaissance of African American literature, music, and visual art that, for the most part, emerges from Harlem, a cultural hub in the 1920s and 1930s. The course also approaches the literature, music, and visual art, as well as the social changes in Harlem, from different disciplinary perspectives, including literary criticism, cultural history, music criticism, art criticism, and aesthetic theory. Students explore social and aesthetic debates that arose during the Harlem Renaissance and connect these two parallel debates today. Students also make connections between and among different artists and thinkers of the period, including Langston Hughes, W.E.B. Du Bois, Zora Neale Hurston, Duke Ellington, Louis Armstrong, Jean Toomer, Jessie Redmon Fauset, Wallace Thurman, Claude McKay, Sargent Johnson, Romare Bearden, Cab Calloway, Bessie Smith, and Walter White. The course invites students to make connections between literature, visual art, and music from the period and between the Harlem Renaissance and their own ideas about art and society. Satisfies the Connections core requirement.

AFAM 401 Narratives of Race  This course takes as its central object the idea of race. Race is understood as a social construct that designates relations of structural difference and disparity. How race is treated is a crucial issue in this course. It is in this question of “the how” that the term narrative becomes salient. The term narrative intentionally focuses attention on the material practices through which we have come to define race as a social construct. This terminology, “narratives of race” spotlights an interest in investigating the historical events and visual and verbal images employed in the linking, patterning, sequencing, and relaying our ways of knowing race and its social relations. Implicated in the construction of race is its production and deployment of the moral and intellectual values that our academic disciplines bear. In considering such values as part of the investigation, this course includes careful comparative analyses of the ways in which the disciplinary systems of ontology, epistemology, aesthetics, and politics are used in the making and remaking of the academic and social grammars of race. Thus the analysis necessarily includes an intertextualization of the several academic disciplines engaging the question of race. Satisfies the Connections core requirement.

ASIA 335 Chinese Painting and Poetry  Combining some of the greatest works of Chinese poetry with approaches and visual materials from the history of Chinese landscape painting, in this course students examine the changing use of landscape as a medium to express different philosophical and social meanings by competing social groups across historical periods from early times to the 13th century. In the first half of this course, students see how natural landscape in poetry became a historical and literary text. Beginning with the premise that Britishness is not innate, static or in any way permanent, but “invented” and constantly constructed and deconstructed, this course traces the development of British national identity from its origins in the eighteenth century to the present. Students read both historical and literary works that elucidate the changing meaning of “Britishness” as the state expanded and collided with its counterparts on the British Isles and its imperial holdings in other countries. The course examines the formation of “racial” identities as they intersect with class and gender identities. Satisfies the Connections core requirement.

CONNECTIONS TO THE COMMUNITY: STUDIES IN THE HUMANITIES AND SOCIAL SCIENCES
to music, and participate in experiential learning modules designed to teach the art and science of liquor production. Students leave the class with a clearer understanding of the biology and chemistry behind their libations and how these drinks are both shaped and have helped shape the world we live in. Satisfies the Connections core requirement.

**CONN 309 Applied Environmental Politics and Agenda Setting**

This is a political science course. It is more ambitious than a survey of environmental problems in the U.S., because problems do not speak for themselves. While environmental problems reflect certain empirical realities about our physical world, they come to our attention through human contests over values. Environmental problems are strategically defined, managed, promoted, and challenged by a complex array of social actors. In a word, environmental problems are “political.” This course explores the politics underlying the societal decisions we make regarding the environment. The essential question for this course is: Why do some environmental problems rise on governmental agendas while other problems are neglected? Course objectives include 1) developing enduring understanding of the politics affecting our societal environmental decisions; 2) cultivating analytical and research skills that reveal the values, incentives, and strategies of political actors affecting environmental policy; and 3) gaining familiarity with a range of national and regional environmental problems. Satisfies the Connections core requirement.

**CONN 313 Biomimicry and Bioart**

Designers, engineers, and artists are beginning to use biologically inspired or biologically derived materials for solving a variety of world issues—from self-cooling buildings inspired by beehives to sticky tape inspired by geckos to DNA origami. This has influenced a variety of fields such as architecture, technology, visual art and fashion design. This course provides a broad framework of such design principles in use and allows students to create their own biologically inspired designs. Satisfies the Connections core requirement.

**CONN 318 Crime and Punishment**

The U.S. criminal justice system has embraced retribution at the expense of other models of justice. Retributive punishment harms and sometimes kills; therefore it is either wrong or needs justification. This course suggests that such justification is difficult to construct and is undermined by pervasive injustices of classism and racism. Is restorative justice a viable alternative? The course begins by studying the death penalty in the Abrahamic traditions and understanding how contemporary Jews, Muslims, and Christians argue against capital punishment. Attention turns to philosophical arguments for and against retributive justice and capital punishment. The course then explores how well philosophical justifications of retributive punishment withstand the sociological injustices that some argue are embedded in the criminal justice system. The psychology of dangerous, violent offenders is studied to understand how their backgrounds may or may not mitigate imposition of a death sentence. In the final unit, the viability of restorative justice is investigated. Satisfies the Connections core requirement.

**CONN 320 Health and Medicine**

Drawing from the biological, behavioral, and social sciences, as well as ethics and public policy, this course provides the opportunity to explore intrinsic and extrinsic factors that contribute to and detract from health and human performance. By applying concepts and critical thinking processes developed in this course to personal lifestyle and political decisions, students are prepared to make more informed choices on emerging personal and policy issues related to health. The course emphasizes holistic approaches to understanding and preventing disease. Both allopathic and alternative interventions are explored. Major topics include defining health; therapeutic options including allopathic, complementary (e.g., homeopathy, Chinese medicine, etc.), and more experimental approaches (e.g., gene therapy); the central, somatic, and autonomic nervous systems; psychobiology; stress and stress management methods; approaches to prevention and treatment of conditions such as cancer and AIDS; issues in public policy and financing of mainstream and alternative healing approaches; ethical dilemmas such as informed consent, confidentiality, compliance, health care directives, allocation of resources, euthanasia, dying, grieving, and hospice. Students may not receive credit for both CONN 320 and SOAN 360. Satisfies the Connections core requirement.

**CONN 322 Jihad and Islamic Fundamentalism**

The emergence of Islamic fundamentalism and Islamist political thought in the twentieth century has garnered much media attention in the last few decades. This course examines how Islamic fundamentalism developed in the first half of the twentieth century in the wake of Western colonization and why it gained so much support during the second half of the century. The course develops in three stages: (1) historical background of Muslim confrontations with the West and the emergence of fundamentalism; (2) case studies of selected Muslim countries and regions, and finally (3) discussion of challenges and problems of fundamentalism in a pluralistic world. Similarly, the course examines the major intellectual figures of Islamist thought and their malcontents in the Middle East, the Indian Subcontinent, and the Muslim communities of Europe and the Americas. Examples include: Hassan al-Banna, Abu Ala Mawdudi, Sayyid Qutb, Ayatollah Khomeini, Usama bin Ladin, Ayman al-Zawahiri, Khaled Abou El Fadl, Sherman Jackson, among others. Islamist ideas of modernity and the revival of a traditionalist approach towards the life and sayings of the Prophet Muhammad is also discussed. Finally, students take a close look at the idea of jihad and discuss the implications of Sharia law for the twenty-first century. Satisfies the Connections core requirement.

**CONN 325 The Experience of Prejudice**

This course uses the disciplinary lenses of psychology and literary studies to examine how the world looks and feels from the perspective of someone who is a member of an oppressed or negatively stereotyped group. The course provides an introduction to the assumptions, scientific methods, and forms of writing used by experimental social psychologists and to theories and research findings bearing on the experience of prejudice. Analysis of literary texts including poetry, fiction, and autobiography provide additional insights into the experience of prejudice. Integration and synthesis occurs by comparing and contrasting the two approaches, using psychology as a lens for analyzing literature, using literature as a source of ideas to inform psychology, and considering how insights gained from both approaches might be used together to create positive personal or social change. Satisfies the Connections core requirement.

**CONN 330 Finding Germany: Memory, History, and Identity in Berlin**

Germans are still asking themselves the question: “What does it mean to be German?” Throughout its recent history, Germany has repeatedly turned to Berlin, its re-designated (and re-designed) capital, in an attempt to find its own identity. In this way, Berlin could be seen as a mirror of German affairs. Emphasizing the textual and visual histories of the city, this interdisciplinary course explores the effects of transition and upheaval on Berlin, highlighting the interconnectivity of history and memory discourses, topography, popular culture, the arts, politics, urban renewal, and multiculturalism. Discussions focus on Berlin’s ever-changing façade and constant self-reinvention and re-evaluation. Definitions of “metropolis” and close readings of the city as “textual space” will be covered within the framework of questions of modernity and post-modernity. The class meets on-campus during ten weeks of the spring semester, with individual consultations and preparation for
Germany thereafter, and has a required study-abroad component that will take the class to Berlin for five weeks during summer to engage the course themes first-hand. No previous German-language experience or coursework is required. Course taught in English. **Satisfies the Connections core requirement.**

**CONN 332 Witchcraft in Colonial New England**  This course undertakes the study of witchcraft in colonial New England from a variety of disciplinary and methodological perspectives, drawing upon several of the best recent scholarly attempts to explain witchcraft and witch hunts. Students examine religious, political, sociological, anthropological, psychological, medical, legal, feminist, and cinematic interpretations of witchcraft. In addition to evaluating these disciplinary approaches, students analyze a set of primary sources from a witchcraft case and use multiple methodologies to develop an interpretation of it. **Satisfies the Connections core requirement.**

**CONN 333 Nations and Nationalism in Modern Europe**  This course examines the rise of nationalism in continental Europe from 1789 to 1918, a period beginning with the French Revolution and ending with World War One. Drawing on interdisciplinary scholarship, the course explores a period when modern nationalism emerged as a coherent way of seeing the world and then emerged as the principle ideology for organizing states and societies in Europe. Primary focus is on highly interrelated nation-building projects in five parts of Europe: France, Germany, Hapsburg Austria, Poland, and Russia. Seminar discussions draw on major theoretical works on nationalism as well as primary source texts like speeches, literary works, memoirs and diaries written by Europeans who embraced or struggled with national identity. **Satisfies the Connections Core requirement.**

**CONN 334 Truth and Reconciliation in South Africa and Beyond**  This course uses South Africa’s Truth and Reconciliation Commission (established in 1995) as a starting point for considering questions around historical trauma, transitional justice and the production of knowledge. Students analyze the TRC in terms of South African history and identity, examining ways in which it both replicated and sought to remake relationships of power within that country, and also explore points of comparison with TRCs in other countries. As a Connections core course, the course introduces students to a variety of disciplinary perspectives. Students consider the TRC as a self-conscious rewriting of history, as a political strategy for nation-building, as a psychological treatment for trauma, as the creation of a body of narratives, and as a religious/spiritual exercise. As a KNOW course, the course requires students to think about how issues of identity and positionality impacted the engagement of various South Africans with the TRC and to reflect on how their own positionality shapes their understanding of truth and reconciliation, both in South Africa and elsewhere, including the United States. **Satisfies the Connections Core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement.**

**CONN 335 Race and Multiculturalism in the American Context**  The objective of this course is to cultivate an appreciation of the intersection of a sociological and historical approach to understanding the complexity and dynamics of race relations and multiculturalism in the American context. Using scholarly resources from these two distinct disciplinary traditions, the course provides students with a comparative and critical appreciation of the development of race relations in the United States. In examining the concrete historical developments and sociological patterns in race/ethnic relations, the course enables student to develop a more nuanced and comprehensive appreciation of a multidisciplinary approach to the study of race relations and multiculturalism. Through such an integrated approach, students better recognize and understand the unfolding of relations among different racial/ethnic groups; better appreciate current conflicts; and explore the significance of ethnic membership in shaping our social world. **Students who have received credit for SOAN 215 may not receive credit for CONN 335. Satisfies the Connections core requirement.**

**CONN 340 Gender and Communication**  Using gender as the primary focus, this course engages students in critical analysis of the ways in which symbol systems in their cultural contexts function to create subjective spaces (e.g. assign specific roles) for particular groups of people. Students learn how communication practices shape the ways gender is viewed, how these practices constrain or promote resistance, and how individuals and groups negotiate their subjective spaces and “gendered” practices. Students study the role of imagery and language in constructing gendered identities, the social construction of culturally defined categories such as masculinity and femininity, the gendered body, and contemporary trends of theories on gender to examine gender across race, class, nation, and empire. Additionally, students make connections between their everyday lives, their specific disciplinary backgrounds, and the course materials. **Satisfies the Connections core requirement.**

**CONN 344 Magic and Religion**  This course in intellectual history draws upon history, religion, anthropology, and sociology in order to understand how the categories of ‘religion’ and ‘magic’ have been shaped by the Western, and largely Christian-influenced, tradition. ‘Magic’ and ‘religion’ arose out of the history of the West’s engagement with internal groups decried as ‘deviant,’ such as medieval ‘heretics,’ or Catholics in the Protestant imagination, and then, during colonialism, in response to other societies and cultures. The course draws upon a range of disciplines to examine how intellectual categories are dynamic, how they shaped over time, and how particular assumptions and viewpoints inform the creation of these categories. **Offered occasionally. Satisfies the Connections Core requirement.**

**CONN 345 Economics of Happiness**  This course explores the intersection of economics and happiness. It critiques several of the key assumptions in mainstream economic theory, in particular those involving how the production and acquisition of greater material goods affect well-being. The course taps the research in the burgeoning field of the economics of happiness, much of which counters traditional economic ideas. The course also draws on recent related findings in positive psychology and to a lesser degree in neuroscience, specifically the findings in neuroscience that relate to mindfulness and meditation. In addition, the course utilizes several metrics (such as the Genuine Progress Indicator and the Happy Planet Index) to assess the happiness and well-being of different countries; these measures are juxtaposed with the standard measure of economic well-being: Gross Domestic Product (GDP). One of the alternative measures to GDP, Bhutan’s Gross National Happiness, serves as a vehicle to further consider the implications of Buddhist wisdom for economics. While examining these alternative measures, students consider the implications for social policy regarding issues such as consumerism, inequality, ecological sustainability and work-family balance. **Satisfies the Connections core requirement.**

**CONN 354 Hormones, Sex, Society, & Self**  Ways of identifying vary and are informed by both lived experience and aspects of biology. Our language around identity, gender identity in particular, has grown and evolved over time. Yet there remains a critical gap in understanding the contribution of biology and the biological sexes to this deeply personal psychosocial construct. There is, however, a growing body of literature that demonstrates that the sex of the brain itself (i.e. sex-typical pat-
terns of neural organization), genetic sex (i.e. chromosomal sex), and phenotypic sex (i.e. how one's body develops and presents) can be disassociated from one another. That disassociation speaks to a biological reality that is not adequately (or often accurately) codified by the dominant social construct of gender. This course examines the intricacies and nuances of sexual differentiation with the goal of understanding this process from a multi-level view from which solid inferences can be made as to the biological underpinnings of certain aspects of gender and sexual identity formation variability. **Satisfies the Connections core requirement.**

**CONN 357 Exploring Animal Minds** In 2012, seven neuroscientists collaborated to write the Cambridge Declaration on Consciousness—effectively stating that many other species, including octopuses, have the same neurobiological mechanisms that are associated with conscious awareness in humans. This multidisciplinary course integrates perspectives and concepts from biology, psychology, and philosophy as well as ethics and law to further explore the nonhuman animal mind. Topics include what consciousness is and whether it has a physical home in the brain, why being conscious might be evolutionarily adaptive to species other than humans, specific tasks scientists have developed to assess consciousness in other species, as well as ethical, legal, and societal repercussions of deeming other species conscious. Students who have some background or interest in biology, neuroscience, and/or psychology may find this course particularly relevant. **Satisfies the Connections core requirement. Prerequisite: Junior or senior standing.**

**CONN 358 The Mississippi River** Named with an Ojibwa word meaning “Great River,” the Mississippi River is 2,320 miles long and its drainage basin covers 31 states and roughly 40 percent of the United States land mass. This course considers the river as an historical and imaginative site, a place where a diversity of people have lived, worked, loved, fought, and died, and also as a place that has played a role in the imaginations of those peoples. Investigations focus especially on the river as it shaped the United States and as Americans have constructed it, imagined it, and used it to tell stories about themselves and their nation. Students have the opportunity to explore contemporary issues facing the river and those whose lives are intimately connected to it. As a course meeting the requirements for the Connections core, the course takes seriously its employment of multiple disciplinary methods, and student have the opportunity to integrate their studies in scholarly and primary sources drawn especially from history, literature, film studies, environmental studies and African American Studies. As a course meeting the Knowledge, Identity, and Power requirement, in turn, readings, class discussions and assignments ask students to engage together in reflecting on their own constructions of religious and political power and their attitudes towards them. **Satisfies the Connections core requirement.**

**CONN 359 The United States in the 1960s** This course explores the history of the United States during the “long 1960s.” Focusing especially on topics and themes in political, social, and cultural history, the course emphasizes the movements for change that challenged existing norms in arenas as varied as race relations, sexuality, gender, and foreign affairs, and engages the intersection of politics and art in these contests. Employing methods and sources from a range of disciplines, key themes in the course include the construction of cultural concepts of liberalism and conservatism, of gradualism and radicalism; the complications of alliance across racial, class and gender lines; Americans’ often conflicting views of themselves, of the responsibilities of citizenship, and of their role in the world; the complex role of the media in shaping those understandings; the complicated relationship between activism and the counterculture on the one hand, and between events at home and abroad on the other; the exposure of secrecy and abuse of power in the government and a corresponding growth of distrust among the citizenry; and generational conflict. **This course counts as an upper-division elective in the History Major. Satisfies the Connections core requirement.**

**CONN 369 Power, Gender, and Divinity: the Construction of Goddesses** This course compares goddesses as representatives of a culture’s values toward power from various disciplinary approaches including religion, history, and anthropology. By examining the roles of goddesses within the realm of political and religious powers from cross-cultural perspectives in diverse historical periods, students understand how a culture values religious and political powers; its attitudes towards power and sovereignty; and how issues of power, gender, and divinity are inter-related. These comparisons of power help students reflect on their own constructions of religious and political power and their attitudes towards them. **Satisfies the Connections core requirement.**

**CONN 370 Rome: Sketchbooks and Space Studies** Rome Sketchbooks and Space Studies synthesizes studio art practices and art historical methodologies to explore representations of landscape and the social and aesthetic implications of select public spaces, culminating in a three-week study abroad experience centered in Rome, Italy. Experiential sketchbook exercises complement weekly reading assignments and more sustained independent research assignments. Additionally, this course explores connections between American landscape painting and public sites and historically significant sites in Italy. Connections 370 meets once a week during spring semester followed by a three-week intensive trip to Italy. **Satisfies the Connections core requirement. Prerequisite: ARTS 101.**

**CONN 372 The Gilded Age: Literary Realism and Historical Reality** This course considers the connections between U.S. literature and history in the late-nineteenth-century and beyond, as we study the impact of the Gilded Age (1873 – 1889) on past and present American society. It was an era of growth and industry surpassing any other before it in the history of the U.S. and, some claimed, the world. It was also a time in which a gilded exterior hid a baser, even defective social core, when appearance sought to conceal but could not eradicate an ugly reality. Reading three novels of the time, William Dean Howells’s *The Rise of Silas Lapham*, Mary Lane’s *Mizora: A Prophecy*, and Mark Twain’s *A Connecticut Yankee in King Arthur’s Court*, students gain an understanding of the American realist tradition and consider how this literary genre both represented and reinvented what was “real” about the Gilded Age. In tandem, students analyze historical texts—works such as Andrew Carnegie’s *Wealth* and Jacob Riis’s *How the Other Half Lives*—and read contemporary perspectives, including those of historians Richard Hofstadter and Allen Trachtenberg. These texts, as well as two films, intertwine and converse with one another, inviting students to observe the interplay between two fields and methodologies that together shaped an influential and lasting myth of American might. Contributing to our understanding are cross-disciplinary conversations and projects that draw upon students’ own areas of interest and expertise. **Satisfies the Connections core requirement.**

**CONN 375 The Art and Science of Color** Why do people see? What is color? How do people see? How do people think of and label color? These questions involve a highly interdisciplinary understanding of chemistry, physics, biology, studio art and art history. This class exposes students to the history of color and the understanding of color
theory, i.e., the principles that define color contrast and interaction. Many interesting stories and cultural practices are associated with different colors. Students explore select, compelling narratives and cultural associations integral to the use and development of distinct pigments and colors. Students discover the relational nature of color and its role in evoking expressive content, communicating symbolically, and creating illusions of space and sensations of light. They discuss influential visual artists who have changed the way color is organized, opened up new perceptual possibilities, and experimented with new pigments and dyes. Students are initially exposed to the complex and beautiful steps (both chemically and physically) in the process of human vision, from initial light source to the signal in the brain. This fundamental background concerning the interactions of light and matter are continuously reflected upon as the history of color unfolds. The course explores subtractive and additive color systems through the history of pigments, dyes, and technologies that project light, such as modern day computer screens. Satisfies the Connections core requirement.

**CONN 377 Caesar in Vietnam: PTSD in the Ancient World** This class takes a penetrating look at the burgeoning scholarly interest in Post Traumatic Stress Disorder and its possible relevance to ancient combat in Greece and Rome. Extensive readings include selections from Homer’s Iliad, Odyssey, the tragedies Aias and Herakles Mainomenos, and Roman battle accounts. Students then look at how various of these works have been interpreted as proof of PTSD in the ancient world, most notably by psychologist Jonathan Shay, but also by an increasing number of classical scholars. Modern studies of the causes of PTSD, its definition, and how it is diagnosed provide theories of how combat causes traumatic injury. Along the way students engage with firsthand accounts of combatants from multiple periods and battle zones. Each student then writes a research paper that explores a pre-industrial account of combat using the theoretical models from modern psychological and social scientific writing as well as modern comparanda. Students reach their own conclusions, but must argue with sophistication and demonstrate an awareness of the different types of evidence and the particular challenges posed by each source and approach. Is human reaction to trauma situationally or inherently a bit of both? Satisfies the Connections core requirement.

**CONN 379 Postcolonial Literature and Theory** This course examines the literature produced by and about Britain’s colonial spaces during the process of decolonization, from the late nineteenth-century to the present. It explores texts from Ireland, India, the Sudan, and Trinidad, as well as other former colonies and territories. Authors studied include Joseph Conrad, James Joyce, Tayeb Salih, Sam Selvon, Buchi Emecheta, Salman Rushdie, and Zadie Smith; theorists considered include Gayatri Spivak, Aijiz Ahmad, Homi Bhabha, John Boli, Benjamin Barber, and Lourdes Beneria. This course understands the term postcolonial in its broadest sense, with its focus spanning texts written under colonialism that argue for decolonization to texts that address such properly postcolonial issues as neocolonialism and globalization. The study of fiction and postcolonial theory is complemented by readings drawing from political theory, sociology, gender studies, and economics. Course requirements include active participation, discussion leadership, a conference-style presentation, two short essays, and a final project. Prerequisite: Junior or Senior standing. Satisfies the Connections core requirement.

**CONN 387 Never-Never Land** Children are unique in American law as they are caught somewhere between adult and non-existent status. At least in theory the law is separate from individual moral beliefs or institutional ethical standards, but children blur such distinction. This course attempts to examine the evolution and future of children in the American legal system under legal, ethical, and moral perspectives, while likely recognizing that any pure compartmentalization is impossible. The course addresses issues such as when a “child” exists, what rights may exist before birth, the allocation of power between the state and parents, children’s rights within educational frameworks, child abuse and neglect, medical treatment decisions for children, child custody, juvenile delinquency, and limitation on minors’ liberties. While students focus on children, they find that these topics lead to broader issues such as social media and human trafficking. Case law is the primary analytic tool; students also use select readings from narrative, professional, and other sources as necessary to supplement content or structure. Satisfies the Connections core requirement.

**CONN 390 Black Business Leadership: Past and Present** Students in this cross-disciplinary course develop an understanding of both the historical and contemporary experiences of African-American business leaders in the United States. Black business leaders herein are defined as either entrepreneurs or as managers and executives working within for-profit enterprises. Students draw connections and contrasts between critical issues and decisions facing black business leaders past and present by analyzing the influence of racism and prejudice on the evolution of American black capitalism. Among the broader topics are black business intellectualism, business-government relations, gender and black enterprise, and celebrity-athlete entrepreneurship. Prerequisite: Junior or Senior standing. Satisfies the Connections core requirement.

**CONN 393 The Cognitive Foundations of Morality and Religion** Cognitive science is the interdisciplinary study of the mind that exists at the intersection of philosophy, psychology, neuroscience, evolutionary biology, and anthropology among other fields. There are now burgeoning research programs devoted to developing accounts of the cognitive foundations of morality and religion. This is an upper level survey of some of the leading views from these fields. Topics to be covered may include: the role of emotions and reason in moral deliberation; the nature of our moral intuitions; whether the scientific study of the mind can help us decide between competing moral theories; whether cognitive accounts of moral psychology show morality to be a sham; the elements of mind involved in the formation of religious belief; whether religion is a kind of evolutionary byproduct; whether religion is a part of human nature; and whether scientific accounts of the cognitive foundations of religion show religious beliefs to be irrational. Satisfies the Connections core requirement.

**CONN 395 China and Latin America: A New Era of Transpacific Relations** As a Connections course, this class examines the changing relations between China and Latin America using a full range of social-scientific and humanistic methods to understand the nature and stakes of this newest wave of transpacific relations. The course examines historical encounters between the regions, including the colonial, cold war, and contemporary, in order to interrogate both the changing meaning of China and Latin America and also the implications of these changes on the social, economic, and political relations between the two regions. By focusing on diverse spaces of encounter, including international organizations, state negotiations, popular cultural production, activism, social media, and business relations, the course materials highlight the diverse actors, institutions, and arenas shaping transregional politics. The course also explores a range of contemporary issues, such as extractivism and energy, illicit economies, new forms of entrepreneurship, food security, shifting diasporic identity, and state politics, to highlight the dynamics that form the ground for debate, controversy,
and collaboration between the two regions. Some background in Asian or Latin American Studies is recommended, but not required. Satisfies the Connections core requirement.

CONN 397 Migration and the Global City This course explores the political, cultural, historical, and social footprint of urban life in the contemporary era of unprecedented mobility. Students explore scholarly frameworks used to understand contemporary migration and mobility, and the foundational scholarship that shapes our conceptualization of urban space and the urban landscape. Putting theories regarding state formation of immigration regimes into conversation with the lived experience of migrants in the urban landscape provides a multi-dimensional vantage point on the patterns and consequences of migration. After students develop these theoretical foundations, they deploy these new perspectives in field excursions in the Puget Sound region, framed by a series of series of lecture/discussions and encounters with a number of experts, specialists, and practitioners concerned with Tacoma. Lectures, guest speakers, and field excursions focus on the city’s history of migration, the legal framework governing contemporary admittance, the lived experience of foreigners’ place-making in the city, the interactions between migration flows and the built landscape of the city, and the cultural web through which the foreign presence is framed. These themes are then carried abroad: At the conclusion of the semester, students depart on a faculty-led trip to cities in Europe and the Middle East, and work closely with faculty to conduct independent research projects that conclude the course. Satisfies the Connections core requirement.

CONN 410 Science and Economics of Climate Change This interdisciplinary Connections course brings together atmospheric science and economics to explore the climate change problem. Students address this overarching question: How do science and economics inform and direct climate change policy? To answer this question, students begin the course by working with climate data to see firsthand evidence of climate change. As students gain competence with data manipulation, they apply those skills to economic models and concepts. No prerequisites are required but ECON 101 is recommended. This course satisfies the policy elective requirement for the Environmental Policy and Decision Making program. Satisfies the Connections core requirement.

CONN 415 Education and the Changing Workforce This course examines the relationship between the evolving nature of work in the U.S. over the last 50 years and concurrent developments in educational policies. The relationship between work and public education is complex. It is one thing to argue for an education agenda that emphasizes “higher cognitive outcomes” for everyone based on current and future trends in the nature of work in the U.S., yet it may be too much to expect that even a highly successful education system alone can shape and sustain an economy. This course addresses how technology and globalization place new demands on work in advanced economies as well as how these new demands translate into dramatic proposals for changing the nature of public school education in the U.S. and selected Asian countries. A final theme in the course considers the issues of poverty and diversity by examining the children of highly mobile, generally low wage workers and the way they affect public education. Satisfies the Connections core requirement.

CONN 420 The American Progressive Ideal In 1872, Prussian-born and longtime Brooklyn resident John Gast painted “American Progress,” an artistic rendering of Americans’ dominant-cultural belief that they were destined to expand throughout the continent. In the painting, Columbia, an angelic female figure betokening Anglo-American “civilization,” drives belligerent forces of “savagery” into oblivion and ushers in their replacements, those 19th-century emblems of progress, the telegraph wire, the locomotive, the farmer, the schoolbook. The technologies and the agrarian ideal may strike us today as quaint, but we may not question the nature or inevitability of American progress. Through the pairing of English Studies and Political Theory this Connections course identifies and interrogates an American narrative of progress beholden to the biological, political, economic, and sociological philosophies of mid-19th- to early 20th-century Europe. Within a capitalistic and “socially Darwinistic” system, what is progress? Who progresses and how? What does it mean to be “progressive”? The critical and creative engagement with such questions about the mid-19th to early 20th-century U.S. equips students to examine inherited notions of American progress that are regularly invoked in American politics and culture today. From these various perspectives (primarily literary and philosophical, but also biological, historical, and sociological), students will develop an understanding of the development of an idea—progress—as an American political value. “Connections days” are discussion-oriented classes specifically devoted to cross-disciplinary dialogue so that students and faculty alike can interrogate these myriad perspectives. Finally, student writing assignments are devised to help students learn to work with textual materials and to situate and problematize this narrative in contemporary American discourse. Satisfies the Connections core requirement.

CONN 478 Animals, Law, and Society Animals or their parts are ubiquitous—they are traded for food, companionship, clothing, research, entertainment, and sport. Animals are living beings that have the legal status of personal property. This dual status of both living being and personal property creates a paradox of thought about how animals fit within western societies and cultures. Contemporary debates concerning the question of the animal tend to become entrenched around this bifurcation, with one side emphasizing the animal state of being, and the other, emphasizing their status as property. In this course students examine cultural and societal influences that affect the way that animals are understood within western society. Students explore the laws affecting and relating to animals, public policies that support the status quo versus social movements that challenge it, theoretical and philosophical perspectives relating to our conceptualization of animals (e.g. Foucault’s theory of power, Regan’s subject-of-a-life, speciesism, Francione’s abolition, feminist writings, etc.), creative non-fiction and fiction that addresses the question of the animal, and the ethics of the use of animals. Students examine trends toward future change. Prerequisite: junior or senior standing. Recommended: any law or legal studies course. Satisfies the Connections core requirement.

CONN 480 Informed Seeing Seeing (in contrast to mere “looking”) involves a learned propensity to notice (or ignore) particular aspects of what is perceived through the lenses of one’s culturally filtered perspectives. Whether these perspectives are “scientific” (involving deliberate doubt and systematic inquiry), “aesthetic” (involving the enjoyment of artfully crafted illusion), or “commonsensical” (involving enormously complicated but unquestioned assumptions about the nature of “reality”), the process of “seeing” (in this more-than-visual sense) can be constantly refined, yielding even more depth of experience. In relation to these ideas, this course explores some of the similarities and differences in the way the world is seen through the perspectives of artists and art educators, cultural anthropologists, photographers, environmentalists, science fiction writers, and filmmakers. These ways of “informed seeing” are applied to selected problems and philosophical questions involving “beauty,” “disruption of meaning,” and “choice.” While there are no prerequisites, students with some previous background in art, literature, anthropology, sociology, and/or environmental studies would be especially well prepared for this course. Satisfies the Connections core requirement.
**CONN 481 Gamblers, Liars, and Cheats**  This course challenges students to recognize the ubiquity of probability and risk in their daily lives. The theme of stochasticity is explored through the perspectives of economists, psychologists, investors, entrepreneurs, political scientists, biologists, and of course mathematicians. Students are asked to explore critically the institutions, both formal and informal, which have developed to deal with risk and uncertainty in society. The concept of evidence in law and science is examined. Students also investigate the ways in which we perceive and respond to probability in the world around us. *Prerequisite: MATH 160 or 260. Satisfies the Connections core requirement.*

**ENVR 325 Geographical and Environmental Catastrophes**  This course is a survey of natural and human-influenced geological “catastrophes,” and focuses primarily on four hazards that are relevant to the Puget Sound region: (1) volcanic eruptions, (2) earthquakes, (3) floods, (4) landslides. It examines the relationship of science and other fields, including economics and politics, in the development of policy to help us cope with potential catastrophes. The course reviews some of the scientific literature bearing on each disaster, discusses points of controversy with the scientific community, and considers ways in which our society—primarily government—uses this information to develop hazard mitigation strategies and regulations. Each unit concludes with analysis and discussion of one or more case studies. *Satisfies the Connections core requirement.*

**ENVR 335 Thinking About Biodiversity**  The preservation of biodiversity—of the variety of living organisms here on Earth—has recently become a major focus of scientific and environmental concern and policy. This course draws on perspectives from history, ethics, environmental studies, and conservation biology to explore the ways in which ideas and values have shaped scientific approaches to biodiversity and to the current biodiversity crisis. Students who receive credit for ENVR 335 may not receive credit for ENVR 337. *Satisfies the Connections core requirement.*

**HON 401 What is America?**  This course aims to help students achieve a comprehensive and philosophical understanding of America through an interdisciplinary and critical examination of selected central themes. These themes may include: democracy, equality, and freedom; wealth and capitalism; nature and wilderness; religion and cult; slavery and the African-American experience; women’s experience and women’s rights; technology, experiment, and innovation; the West and manifest destiny; optimism, progress, and futurism; immigration and multiculturalism; individualism and pragmatism. *Prerequisite: all other Honors core requirements. This course satisfies the Honors Connections core requirement.*

**HUM 301 The Idea of the Self**  This course engages philosophical and literary works from the late seventeenth to the mid-twentieth century that document the emergence of the modern concept of the self. The authors considered explore such questions as, “Is the self static, determinate, and unified, or is it dynamic, ephemeral, and fragmented? Is it autonomous or culturally conditioned? Does it will its own actions, or are these determined by external circumstances? Is it innately good, or evil, or neither?” Working from literary, philosophical, historical, and psychological perspectives, the course traces how early modern thought in the West has variously represented the self, how these representations have reflected and influenced its cultural evolution, and how they remain embedded in contemporary formulations of selfhood. Authors include Pascal, Hobbes, Bunyan, Locke, La Rochefoucauld, De Lafayette, Franklin, Rousseau, Diderot, Hume, Blake, Coleridge, Wordsworth, Dostoevsky, Freud, Kojeve, and Girard. *Satisfies the Connections core requirement.*

**HUM 302 Mystics, Knights, and Pilgrims: The Medieval Quest**  This course offers students an introduction to high medieval culture through verbal and visual experience of the quest. Medieval romances and spiritual quest literature are informed by the neoplatonic idea of a transcendent reality, a divinely ordered world beyond us that yields an ultimate truth. At the same time, all such journeys begin in the post-Edenic world where the fallen senses can deceive the knight, the pilgrim, and the visionary navigating the dark forest, the garden of erotic pleasure, or the castle, where seemingly noble conduct masks sin. When the knight or pilgrim sets forth, he or she experiences not only the soul’s journey to God but also the construction of identity. Humanities 302 asks students to draw informed connections between the disciplines of history, art history, literary history, the history of gender, and the history of religion. *Satisfies the Connections core requirement.*

**HUM 303 The Monstrous Middle Ages**  Why does monstrosity assume such a visible place in medieval culture? Gothic babwyns (grotesques) gambol in the margins of liturgical manuscripts, function as downspouts on cathedrals, and appear in epics and chivalric romances as forces of both good and evil. This course explores medieval ontology, the nature of creation, and our human ability to know it fully, through the monstrous. The course begins with an art historical introduction to Classical theories of monstrosity reflected in a visual tradition medieval artists and writers inherited. The role of the monstrous in pagan, classical culture serve as a contrast to the place monsters assume in the evolving Christian contexts the course sets forth as interdisciplinary case studies in medieval monstrosity. Each case study sets up a historical context for the study of monstrosity, informed by a specific material and literary culture. Recent research in art history, geography, anthropology, literary history, and cultural studies inform the course’s interdisciplinary format. *Satisfies the Connections core requirement.*

**HUM 300 Children’s Literature: To Teach and to Entertain**  This course focuses on fairy tales, fables, and classical literature parents often still read to their young children, and much of which serves both to teach and to entertain (docet et delectat, the Latin dictum). Almost without fail, most collections of nursery rhymes, fables, or fairy tales (indeed most children’s books) have usually been accompanied by illustrations of remarkable aesthetic power. The course commences with a study of the fable as literary form and the Aesopica, followed by a study of tales based on the oral tradition (and of more modern derivation) and the subsequent retelling or butchering of such tales by Disney. Finally, students explore the relationship between text and image in illustrated versions of Mother Goose rhymes from the semiotic perspective—based on reading of works by the American philosopher C.S. Peirce. *Satisfies the Connections core requirement.*
the major texts themselves, but also the adequacy of concepts which scholars have developed to explain them. Satisfies the Connections core requirement.

HUM 309 Nationalism: British and German Nationalism in the Age of Industrialization and Empire, 1700–1919 This course examines the development of British and German nationalism from the perspective of history and literary studies. The course also makes use of the visual arts, film, and song. Students in their papers and exams are asked to draw upon their knowledge of these interdisciplinary materials. By comparing and contrasting the forms that liberalism, conservatism, and socialism took in England and Germany, students become acquainted with a wide range of political and sociopolitical visions of freedom and authority that still inform national conflicts today. Satisfies the Connections core requirement.

HUM 310 Imperialism and Culture: the British Experience An exploration of the break-up of the British colonial empire of the 18th and 19th century as reflected in literature and history. Emphasis is placed upon the idea of imperialism, the role of culture in imperial expansion, the conception of national character, and the process of decolonization. The readings trace the theory of empire in the metropole and its practice in the colony in both literary and historical works. The course is organized around the interaction of two disciplines: history and literature, emphasizing the ways in which two discourses treat the past. History not only provides an account of the past and therefore a context for literary works, but also incorporates aspects of literary language and method; conversely, literary texts that focus on the past attempt to capture a reality of historical experience. By reading selections from each discipline students are able to gauge how two distinct but related disciplines reflect upon the culture of a particular epoch. Particular attention is given to the British experience in India. Satisfies the Connections core requirement.

HUM 315 Drama, Film, and the Musical Stage This interdisciplinary humanities course (theater, music, film) explores the artistic and cultural meanings of selected dramatic works and their treatment in film from Sophocles to Shaw and the ways librettists, composers, and directors have adapted plays to the musical stage and film from Mozart to Bernstein. The course examines not only what has been adapted, discarded, and transformed in musical stage and film versions of dramatic works, but also why particular changes in structure, emphasis, and interpretation were thought necessary and desirable. Students also explore the evolving cultural and aesthetic values from one era to another as they discover what musical stage and film adaptations of plays can reveal about the present as well as the past. Satisfies the Connections core requirement.

HUM 316 The Lord of The Ring: Wagner’s Ring of the Nibelung Richard Wagner’s monumental operatic tetralogy Der Ring des Nibelungen (The Ring of Nibelung) (1848-1874) constitutes one of the most significant and influential artistic achievements in Western music and drama. Since Wagner is also a one-man interdisciplinary humanities show, to study his work one must address, not only music and drama, but Greek theater, German, Norse, and Icelandic mythology, architecture, set design, and philosophy, in particular Schopenhauer and Nietzsche. The course, which does not require any musical background, will explore scholarly and critical responses to the four operas of Wagner’s Ring and also Tristan und Isolde and will introduce students to the central issues connecting music and drama, film, philosophy, and the evolving dialogue between art and culture as embodied in these works. Satisfies the Connections core requirement.

HUM 320 Surveillance Society This course presents an interdisciplinary exploration of surveillance and control in historical and contemporary contexts using fiction and non-fiction texts. The exploration begins by engaging the narrative of a Civil War Era slave who escapes her overseer. The discussion then moves to the classic dystopian big brother narrative Nineteen Eight-Four. Moving from archetypal surveillance and control to a contemporary exploration of resistance to surveillance, students engage with Suzanne Collins’ heroine Katniss Everdeen. The class will culminate with students identifying a key theme of their own choice and then collecting and digitizing their work into a technology-based project. Overall, students will acquire the academic framework to help them understand the field of Digital Humanities both within the course and across the courses they have already explored at the university. Satisfies the Connections core requirement.

HUM 330 Tao and Landscape Art Taoism is one of the most influential beliefs in East Asia, and is perfectly embodied in landscape art. As a significant visual tradition in the world, this landscape art reveals the complicated relationships between man and self, man and man, man and society, and, above all, man and nature. From an interdisciplinary perspective the course examines the richness of this cultural heritage. The achievements of Taoist landscape art in China, Korea, and Japan are approached through slide lectures, museum visits, creative work sessions, writing assignments, group discussion, and class presentation of research projects. The emphasis is placed on students’ comprehension of Taoism and appreciation of landscape art and their capacity to explore the intricate relationships between art and religion. Satisfies the Connections core requirement.

HUM 335 Japan and the Dutch: A Cross-Cultural Visual Dialogue 1600-2000 Geographically, Japan and The Netherlands (often referred to as Holland) are relatively small countries, never far from the ocean, with large, highly urbanized and literate populations engaged in dynamic civic rivalries. Historically, the relationship between the two has been close. For a long period, the Dutch of “Holland,” a major maritime and trading power in the 17th century, provided the Japanese with their window on the world. It was in fact a two-way window, a way, through Dutch merchants, Japan learned of Europe, but also Holland and the rest of Europe (and America) learned of Japan. From a cross-cultural perspective the course examines the richness of the 300/400 years Japan-Dutch artistic relations in a variety of media. The achievements in the visual arts in these countries are approached through illustrated lectures, museum visits, creative work sessions, writing assignments, group discussions, and class presentations of individual research projects.

HUM 368 A Precious Barbarism: Enlightenment, Ideology, and Colonialism This course presents a constellation of influential critiques of Western intellectual history, especially examining Enlightenment liberalism and its ideological afterlives. Themes include: critique, Euro-American centrum, orientalism, de-colonial struggles, postcolonial theory, pathologies of freedom, power, hegemony, racialization, identity, liberalism, the democratic illusion, mass deception, the Holocaust, camps, mass migration, terrorism, comprador intellectuals, and culture war. Horkheimer and Adorno’s Dialectic of Enlightenment provides the starting point for our humanist and aesthetic critique via readings of Homer, mythology, philosophy, and religion. Important “non-western” authors might include Aime Cesaire, Frantz Fanon, Edward Said, Sylvia Wynter, Gayatri Spivak, and Hamid Dabashi. Satisfies the Connections core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement.

IPE 389 Global Struggles over Intellectual Property This course examines a wide range of contemporary struggles over global intellectual property, especially patents, copyrights, and trademarks. Drawing upon and contrasting the disciplines of political science, economics, law, and
cultural studies, the course examines how rules governing intellectual property have been established, who benefits from them, and how some people are using political power—and law-breaking—to try to achieve alternative intellectual property systems. Some specific cases that will be analyzed are struggles over generic medicines in developing countries, counterfeiting, music and software piracy, and “bio-piracy.” Satisfies the Connections core requirement.

IPE 405 The Idea of Wine Wine is a simple thing. The idea of wine, however, is very complicated, since it reflects both wine itself and wine’s complex and dynamic social and economic terror of values, attitudes, and interests. Because wine intersects social processes in so many ways, the question of which idea of wine will prevail, or how the contradictions between and among the different ideas will be resolved or not, has important implications. This course looks closely at the battle for the idea of wine with special attention to its interdisciplinary aspects and conflicts and consideration of how the globalization of wine has intensified the inherent conflicts. Satisfies the Connections core requirement.

IPE 427 Competing Perspectives on the Material World Many sociologists have joined economists in the study of that entity we call the economy. Apart from this interest, however, the two groups share very little in common. The disagreements include the importance of rationality and selfishness, the proper methodologies, the nature of explanation, and even the definition of the field of study. This course surveys the different ways in which economists and sociologists approach the material world and the key debates between them. Satisfies the Connections core requirement.

LAS 380 Around Macondo in Eighty Days This course explores the concept of Modernity as it applies to the creation and development of the modern nation with particular attention to the Latin American region. The role of the local and autochthonous cultures versus global and external trends and forces, and the impact of modern inventions and technical developments in an ever-evolving society are examined using literary, historical, and political texts, combined with readings on post-colonialism and post-modernism, globalization and neo-liberalism. These texts inform the reading of the English translation of One Hundred Years of Solitude, by Colombian author Gabriel Garcia Marquez, a novel often read as an allegory of the forces at play in the shaping of modern Latin America. This course is taught in English. Satisfies the Connections core requirement.

LAS 387 Art and Revolution in Latin America This course combines the disciplines of history and art to consider the ways in which artists participated in and created a visual analogue to the political and social transformations wrought by successful revolutions in Latin America. The interaction of art and revolution in Mexico (from the late nineteenth century to the 1940s) forms the foundation of the course. Its revolution (1910-1920) produced the most successful, vibrant, and internationally recognized artistic formation of national identity of the last century. The final third of the course analyzes and compares the similarity explosive changes that occur in revolutionary Cuba from 1959 and in Nicaragua from 1979-1990. These three revolutions demonstrate a connection between art and politics to a rare degree, as artistic expression (painting, prints, photography, and architecture) become fundamental to both creating, reflecting, and challenging the new order. Satisfies the Connections core requirement.

REL 301 Consciousness and the Bourgeoisie “Know thyself” is a maxim central to the religious quest, but individuals who are intensely and urgently driven to know themselves often occupy the outskirts of ordinary society. Although these “outsiders” are a part of their culture and contribute to their culture, they no longer share the common values of their society. The course seeks to explore the role of outsiders (those who desire inner freedom and transformation) in the context of bourgeois society. The first half of the course draws on ancient materials (Epic of Gilgamesh, The Oresteia, and Plato’s Republic) in discussing ideas of ontology, psychology, consciousness, and transformation. The second half of the course relies on novels and novellas by Ouspensky, Hesse, and Mann for a discussion of bourgeois attitudes toward the outsider and toward the outsider’s struggle to become an individual who confronts the habitual, unconscious, and mechanical patterns of existence. Satisfies the Connections core requirement.

STS 301 Technology and Culture Science and technology revolutionize our lives, but memory, tradition and myth frame our response. Technology has powerfully shaped and altered human experience. In this course, students examine what is technology, how is our relationship with technology changing, how does technology shape our modern culture and, in turn, how does our culture shape our technology. Topics covered may include: the industrial revolution, the airplane, Julia Child’s kitchen, the Chernobyl disaster, and the development of the internet. Satisfies the Connections core requirement.

STS 302 Cancer and Society In this course students develop an understanding of the history of cancer medicine, the biology of cancer, and analyze public perceptions of both. Students build a solid foundation in the science, history, and social context of cancer to allow thoughtful exploration and critique of cancer history and to identify future areas of concern and hope. Satisfies the Connections core requirement.

STS 314 Cosmological Thought Cosmology is the attempt to understand what the whole universe is, how the universe came into being, and what forms or structures organize it. Cosmology had its origins in myth, but soon incorporated elements of astronomy, physics, and philosophy. This course is a study of cosmological thought in its historical and cultural context, from the cosmologies of the ancient and medieval worlds to twentieth-century cosmology. Throughout, the course stresses not only the scientific content of the various cosmologies that have contended for primacy, but also their historical origins and their philosophical implications. Satisfies the Connections core requirement.

STS 318 Science and Gender This course explores gender from a scientific perspective. Taking a comparative approach, students critically examine the biological and experiential/social factors that influence sex differences, gender roles, and sexual preference in human and non-human animals, as well as sexual orientation and gender identity in humans. Students consider how variation in sex and gender may evolve through natural and sexual selection, and how human perceptions of gender feedback to influence the scientific study of animals. Policy and ethical implications of scientific research on gender are also considered. Satisfies the Connections core requirement.

STS 330 Evolution and Society Since Darwin his course examines the historical relationship between the theory of evolution and society in the twentieth century, with an emphasis on Britain, Germany, and the United States since 1870. Students examine a range of efforts to apply evolution theory to human society (including social Darwinism, eugenics, scientific racism, and the biology of war and peace), and place these efforts in historical context. In doing so, students study the complex relationship between science and society, and the place of science in the intellectual, social, and cultural history of the twentieth century. Satisfies the Connections core requirement.
STS 333 Evolution and Ethics The study of evolution and ethics—at the intersections between biology, the human sciences and philosophy—has received a lot of attention in recent years. News stories abound that give, in sound byte form, the (often controversial) ethical implications of conclusions regarding evolutionary theory. Drawing upon historical and philosophical approaches, this course provides students with an interdisciplinary framework from which to understand and study such debates. The course examines the historical context of previous discussions regarding the implications of the theory of evolution for ethical theories, and examines modern debates regarding the normative implications that may or may not result from different interpretations of the conclusions of evolutionary biology. Satisfies the Connections core requirement.

STS 340 Finding Order in Nature Our knowledge of nature is just that: “our knowledge.” The activity we call “science” is created and pursued by humans in historical time. It certainly reflects the natural world, and is limited by what there is for us to see (or detect where we cannot see). But science also reflects human preoccupations, and is shaped powerfully by what we want to see and to know. This leads us to an interesting question: what and how much of science is “out there” and what and how much is “made up”? That is the subject of this course: looking at the “out there” and the “made up” in physics, biology, geology, natural history, and in that branch of mathematical investigation called “complexity theory.” Satisfies the Connections core requirement.

STS 345 Physics in the Modern World: Copenhagen to Manhattan This course examines the mutual interactions between physics and other forms of culture in the modern world, centering on the development of relativity and quantum theory. These great ideas of modern physics are examined critically in light of the effects they have produced in the world at large, with particular attention to the building of the atomic bomb. A number of scientific, cultural, political, and philosophical themes leading up to the conception and building of the atomic bomb are considered. Satisfies the Connections core requirement.

STS 347 Better Living Through Chemistry: Studies in the History and Practice of Chemistry “Better things for better living...through chemistry” was a popular slogan used by DuPont in the mid-to-late twentieth century to market laboratory-developed products. Increasingly, concerns have been raised about the merits and consequences of chemicals in our food, goods, and environment. This class analyzes how we know what we know about chemistry, and how studies of the very small shape fundamental questions about the world, e.g. what is natural, what is artificial, does the difference matter, and if so in what contexts? By investigating a series of historical episodes that highlight some of the key intellectual, social, and political challenges of the nineteenth and twentieth centuries, this course examines how we learn about, modify, and relate to our environment chemically. From the development of the periodic table to the study of pollution, this course encourages students to gain an appreciation for the science of chemistry while engaging in cross-disciplinary dialogue about ways in which chemistry affects our daily lives. Satisfies the Connections core requirement.

STS 348 Strange Realities: Physics in the Twentieth Century In the early Twentieth Century, new experimental evidence encouraged physicists to abandon a consistent and nearly complete description of nature. They replaced common sense notions about the physical world with strange realities based on the new theories of relativity and quantum mechanics. As the physicists’ new explanations of nature grew increasingly counter-intuitive, it became harder for non-physicists to understand precisely what physicists were doing. Without using higher mathematics, this course explores quantum mechanics and relativity as they describe the nature of matter and energy and the structure of space and time. It also addresses how physicists struggled to understand the philosophical implications of the new physical theories, how they worked to express their strange descriptions of nature to both public and professional audiences, and how they maintained public support for their increasingly expensive explorations of nature. Satisfies the Connections core requirement.

STS 352 Memory in a Social Context This class provides an intensive introduction to the scientific study of memory, and then examines the application of this science to four important social contexts. These include the social implications of age-related changes in memory, the role of memory in between-individual and between-group relations, the role of memory in the courtroom, and the role of memory in advertising and marketing. Satisfies the Connections core requirement.

STS 361 Mars Exploration A survey of the history, science, and technology of Mars exploration. Topics include the discovery of Mars by ancient civilizations, the first telescopic observations of Mars, the economics and politics of the U.S. and Russian Mars exploration programs, spacecraft design and the technologies needed for planetary exploration, and the future of Mars exploration including a possible manned mission to Mars. The scientific component of this course focuses on the planetary evolution of Mars and the question of whether life might have arisen on Mars. The class also takes a brief look at Mars in popular culture including literature, radio, and film. Satisfies the Connections core requirement.

STS 370 Science and Religion: Historical Perspectives Over the centuries the traditions of both science and religion have attempted to improve our understanding of ourselves, society, and the natural world. This course examines the relationship between science and religion. It asks students to critically analyze the various models that have been proposed to characterize that relationship—from one of conflict to cooperation—using a series of historical case studies. Through developing a historical understanding of how people have viewed these important traditions, students obtain a nuanced background from which to develop their own assessment of the relationship between these extraordinarily influential ways of knowing. Satisfies the Connections core requirement.

STS 375 Science and Politics There is a long tradition of seeing science as apolitical but historically a complex relationship has existed between science and politics. Scientists work within political structures, and those systems in turn influence what kinds of science are pursued within a given society. Science has also come with norms that make claims about what kind of political systems support the best kind of science. This course draws on historical, sociological, and philosophical studies of science, primary source material from scientists, politicians, and others, as well as literature, film, and cartoons. Students examine issues such as these: the types of science that get done within democratic and totalitarian systems; in communist, socialist, and capitalist societies; how and why science has been harnessed in fights over political authority; and how political decisions direct the scientists’ careers and the trajectory of scientific disciplines. Satisfies the Connections core requirement.
DEGREE REQUIREMENTS

Degrees Offered

Bachelor of Arts with a Major in
- African American Studies
- Art History
- Business
- Chemistry
- Chinese
- Classics
- Communication Studies
- Economics
- English
- Environmental Policy and Decision Making
- French
- French International Affairs
- German Studies
- Hispanic International Studies
- Hispanic Studies (Language, Culture, and Literature)
- History
- International Political Economy
- Japanese
- Music
- Philosophy
- Politics and Government
- Psychology
- Religious Studies
- Science, Technology, and Society
- Sociology and Anthropology
- Special Interdisciplinary Major
- Studio Art
- Theatre Arts

Bachelor of Science with a Major in
- Biology
- Biochemistry
- Chemistry
- Computer Science
- Computer Science/Business
- Economics
- Exercise Science
- Geology
- Mathematics
- Molecular and Cellular Biology
- Natural Science
- Physics
- Special Interdisciplinary Major

Bachelor of Music with a Major in
- Elective Studies in Business
- Music Education
- Performance

Minors Offered
- African American Studies
- Art History
- Asian Studies
- Biology
- Business
- Chemistry
- Chinese
- Classics
- Communication Studies
- Computer Science
- Economics
- Education Studies
- English
- Environmental Policy and Decision Making
- Exercise Science
- French
- German
- Gender and Queer Studies
- Geology
- Global Development Studies
- History
- Japanese
- Latin American Studies
- Latina/o Studies
- Mathematics
- Music
- Neuroscience
- Philosophy
- Physics
- Politics and Government
- Religious Studies
- Science, Technology, and Society
- Sociology and Anthropology
- Spanish
- Studio Art
- Theatre Arts

Interdisciplinary Emphasis in
- Bioethics
- Interdisciplinary Humanities

Note: Students interested in graduate degree programs in Education, Occupational Therapy, or Physical Therapy should write the Director of Admission, University of Puget Sound, 1500 N. Warner St. #1062, Tacoma, WA 98416-1062 or visit pugetsound.edu.

Degree Requirements

General
In order to receive the baccalaureate degree from the University of Puget Sound, a student must:

1. Earn a minimum of 32 units. The 32 units may include up to 4 academic courses graded pass/fail, up to 2.0 units in activity courses, and up to 4.0 units of independent study. (See regulations regarding transfer credit and activity credit.)
2. Earn a minimum of 16 units in residence at the University of Puget Sound. Residence requirements also exist in core, majors, minors, and graduation honors. (See also the section on study abroad.)
3. Earn a minimum of 6 of the last 8 units in residence at the University of Puget Sound.
4. Maintain a minimum grade-point average (GPA) of 2.00 in all courses taken at Puget Sound.
5. Maintain a minimum GPA of 2.00 in all graded courses, including transfer courses.
6. Maintain a minimum GPA of 2.00 in all graded courses, including transfer courses, in the major(s) and the minor(s), if a minor is elected.
Degree Requirements

7. Successfully complete Puget Sound's core requirements. (Courses taken pass/fail will not fill Puget Sound core requirements.) Specific courses satisfying core requirements are listed on Puget Sound's website and in the Bulletin. Students are reminded that specific courses applicable to the core will fulfill core requirements only during the semester(s) that they are officially listed in a Bulletin as fulfilling core.

8. Satisfy the foreign language graduation requirement in one of the following ways*:
   a. Successfully complete two semesters of a foreign language at the 101-102 college level, or 1 semester of a foreign language at the 200 level or above. (Courses taken pass/fail will not fulfill the foreign language graduation requirement.);
   b. Pass a Puget Sound-approved foreign language proficiency exam at the third-year high school or first-year college level;
   c. Receive a score of 4 or 5 on an Advanced Placement foreign language exam or a score of 5, 6, or 7 on an International Baccalaureate Higher Level foreign language exam.

9. Satisfy the Knowledge, Identity, and Power (KNOW) graduation requirement by successfully completing one course that has been approved to meet that requirement. See below for details.

10. Earn at least three academic units outside the requirements of the first major, and outside the department/program of the first major, at the upper division level, which is understood to be 300 or 400 level courses or 200 level courses with departmental approval and at least 2 prerequisites. (Courses taken pass/fail will not fulfill the upper division course graduation requirement.)

11. Meet the requirements for a major field of study. A second major or a minor are options for the student. (Courses counting toward the major or minor may not be taken pass/fail unless they are mandatory pass/fail courses.)

12. Complete all incomplete or in-progress grades.

13. File an application for graduation with the Office of the Registrar. Applications are due in September for graduation at the end of the next Spring, Summer, or Fall term

* A student with a learning disability that affects the ability to learn a foreign language should consult with the Office of Student Accessibility and Accommodations.

All degree requirements must be completed prior to the awarding of the degree. Degrees are awarded on three degree dates each year in May, August, and December.

Each student is subject to one of the following:
   a. degree requirements published in the Bulletin at the time of graduation, or
   b. to degree requirements applicable at the time of matriculation, or
   c. to degree requirements listed in any Bulletin published between the student’s matriculation and graduation, provided that no more than six years separate matriculation and graduation. Students should be aware that specific courses applicable to the core will fulfill the core requirements only during the semester(s) that they are officially listed in a Bulletin or class schedule.

Courses which were listed as satisfying core or department requirements at the time of matriculation may be altered or removed from the curriculum before a student reaches graduation. In the case of department requirements, a student must plan alternate courses with the advisor.

Students applying transfer credit to their degree requirements must complete at least the following minimum core requirements at Puget Sound:

1. Students entering with freshman or sophomore standing must complete at least a course in Connections plus three additional core areas.

2. Students entering with junior standing must complete at least a course in Connections plus two additional core areas.

Knowledge, Identity, and Power Requirement

Courses fulfilling the KNOW requirement are approved by the Curriculum Committee based on the guidelines listed in the following rubric:

1. Learning Objectives: Courses in Knowledge, Identity and Power (KNOW) provide a distinct site for students to develop their understanding of the dynamics and consequences of power differentials, inequalities and divisions among social groups, and the relationship of these issues to the representation and production of knowledge. In these courses, students also develop their capacity to communicate meaningfully about issues of power, disparity, and diversity of experiences and identities.

2. Guidelines:
   a. These courses promote critical engagement with the causes, nature, and consequences of individual, institutional, cultural and/or structural dynamics of disparity, power, and privilege. These courses provide opportunities for students to (a) engage in dialogue about issues of knowledge, identity, and power, and (b) consider linkages between their social positions and course themes related to these issues.
   b. KNOW courses may also fulfill other program or graduation requirements.

The following courses have been approved as satisfying the Knowledge, Identity, and Power requirement.

AFAM 101 Introduction to African American Studies
AFAM 201 Methods in African American Studies
AFAM 265 Thinking Ethically
AFAM 304 Capital and Captivity
AFAM 355 African American Women in American History
AFAM 370 Communication and Diversity
AFAM 375 The Harem Renaissance
ASIA 344 Asia in Motion
BIOL 362 Nanobiology
BUS 365 Cultural Diversity and Law
CLSC 310 Theories of Myth
COMM 361 Organizing Difference
COMM 370 Communication and Diversity
COMM 372 Contemporary Media Culture: Deconstructing Disney
CONN 334 Truth and Reconciliation in South Africa and Beyond
CONN 358 The Mississippi River
EDUC 419 American Schools Inside and Out
EDUC 420 Multiple Perspectives on Classroom Teaching and Learning
ENGL 242 Introduction to Native American Literature
ENGL 247 Introduction to Popular Genres
ENGL 372 History of Rhetorical Theory
ENVR 326 People, Politics, and Parks
ENVR 343 Buddhist Environmentalisms
GERM 300 German Cinema of the Weimar Republic and Under National Socialism, 1919-1945
GERM 305 Culture in the Third Reich
GQS 201 Introduction to Gender, Queer, and Feminist Studies
GQS 220 What is Queer?
GQS 327 Queer Cultures
HIST 383 Borderlands: La Frontera: The U.S.-Mexico Border
HON 214 Interrogating Inequality
HUM 327 Queer Cultures
HUM 368 A Precious Barbarism: Enlightenment, Ideology, and Colonialism
IPE 101 Introduction to International Political Economy
IPE 311 Political Economy of International Development
LAS 100 Introduction to Latin American Studies
LTS 200 Latina/o America: A Critical Introduction to Latina/o Studies
MUS 223 Women in Music
MUS 393 Introduction to Secondary Music Education
PG 104 Introduction to Political Theory
PG 315 Law and Society
PG 326 People, Politics, and Parks
PG 346 Race in the American Political Imagination
PG 390 Gender and Philosophy
PHIL 106 Language, Knowledge, and Power
PHIL 389 Race and Philosophy
PHIL 390 Gender and Philosophy
PSYC 265 Cross-Cultural Psychology
PSYC 373 Perceiving Self and Other
REL 265 Thinking Ethically
REL 270 Religion, Social Movements and (in)Justice in the United States
REL 307 Prisons, Gender, and Education
SOAN 101 Introduction to Sociology
SOAN 102 Introduction to Anthropology
SOAN 215 Race and Ethnic Relations
SOAN 303 Contemporary Immigration, Race, and Immigration Regimes in the U.S.
SOAN 370 Disability, Identity, and Power
SPAN 210 Latina/o America: A Critical Introduction to Latina/o Studies
SSI1 104 Why Travel?: Tales from Far and Wide
SSI1 106 Cleopatra: History and Myth
SSI1 135 Hurricane Katrina and the History of New Orleans
STS 324 Science and Race: A History
THTR 250 World Theatre I: African Diaspora
THTR 252 World Theatre II: Asian Theatres

Minor Requirements
An minor is not required for a degree. If the student elects to earn a minor, it must consist of a minimum of 5 units within the minor area. At least 3 of these must be completed in residence at Puget Sound. Specific requirements for the minor are established by the individual minor area. A 2.0 minimum grade-point average is required both for those courses completed at Puget Sound and elsewhere. Minors must be completed before the degree is awarded. A student may not major and minor in the same department. Courses counting toward the minor may not be taken pass/fail unless they are mandatory pass/fail courses.

Simultaneous Baccalaureate Degrees
Students who wish to earn two baccalaureate degrees simultaneously must complete:

- university requirements for a baccalaureate degree with two majors,
- a minimum of 40 total units and a minimum of 24 units in residence,
- a minimum of 6 of the last 8 units in residence.

For purposes of other academic policies, simultaneously earned degrees may both be considered “first” degrees.

Second Baccalaureate Degree
Students who wish to earn a second baccalaureate degree must complete a minimum of 8 additional academic and graded units in residence subsequent to the awarding of the first baccalaureate degree. Students are required to complete departmental requirements current as of the date of post-baccalaureate enrollment. Each additional baccalaureate degree requires 8 more discrete academic, and graded units earned in residence.

Major Requirements
Students must declare their major area of study through the Office of Academic Advising by the end of their sophomore year. A major consists of a minimum of 8 units outlined within a department/school or program. One major is required of all graduates. At least 4 units of the major must be completed in residence at Puget Sound. A 2.0 minimum grade-point average is required both for those courses completed at Puget Sound and elsewhere. Courses counting toward the major may not be taken pass/fail unless they are mandatory pass/fail courses.

Graduation with Two Majors
Students may earn the baccalaureate degree with two majors. Whichever major is declared as the first major controls the degree to be awarded. Both majors must be completed before the degree is awarded.
Academic Advising Course/African American Studies

Courses of Study

ACADEMIC ADVISING COURSE

201 Major Exploration and Decision 0.25 activity unit. Liberal arts degrees are valuable and instill the education and training that employers in most fields say are crucial—communication, team-work, writing, and critical thinking. However, liberal arts majors are not inherently linked to one, or even a few, specific careers. This course assists students in their search for programs of study, to focus on major review and selection using concrete actions and plans to explore liberal arts disciplines based on students’ interests, strengths, weaknesses, and post-baccalaureate goals. This course is designed for students who have completed at least one semester of study at the university, sophomore standing with no declared major is required. Course available through the Office of Academic Advising. Pass/fail grading.

AFRICAN AMERICAN STUDIES

Professor: Dexter Gordon, Director; Grace Livingston (on leave 2019);
Associate Professor: Renee Simms (on leave spring 2019)
Visiting Assistant Professor: LaToya Brackett

Advisory Committee: Nancy Bristow, History; Rachel DeMotts, Environmental Policy and Decision Making; Dexter Gordon, African American Studies/Communication Studies; Robin Jacobson, Politics and Government; James Jasinski, Communication Studies; Grace Livingston, African American Studies; A. Susan Owen, Communication Studies; Renee Simms, African American Studies; Carolyn Weisz, Psychology.

About the Program

African American Studies is an interdisciplinary program. The program focuses on African American experiences, while recognizing that other academic subjects bear importantly on the understanding of these experiences and should have a place in the African American Studies curriculum. Within the interrogative, interdisciplinary, reflexive, and justice oriented mode that guides African American Studies, students in the program acquire sophisticated knowledge of African American and other African diasporic experiences; become conversant with the role of race, power, difference, and intersectionality in the personal, institutional, and structural relations of our daily lives including their relevance for local, regional, national, and international affairs; cultivate rigorous transdisciplinary skills in analytic, reflexive, and community-based research methodologies, and written, oral, and multi-media communication, to formulate, articulate, and interrogate ideas in private and public spheres; develop critical, intellectual, and ethical perspectives that can guide and advance personal, educational, civic, political, and professional actions; and engage and interact with differential sites of community development and leadership in the Puget Sound and beyond so as to deepen and apply their understanding of African American Studies and to learn to contribute collaboratively to the ongoing work of equity.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major

A major in African American Studies consists of 9 units:
1. AFAM 101
2. AFAM 201
3. AFAM 399
4. Four elective units, including two depth and two breadth courses, selected and approved through advising from the courses listed below. At least three of the four must be taken at the upper-division level (courses numbered 300 or higher).
5. Capstone sequence: AFAM 401 and 402

Requirements for the Minor

A minor in African American Studies consists of 5 units:
1. AFAM 101
2. Three elective units meeting the following conditions: (i) at least two must be taken outside the student’s major; (ii) at least one must be a depth course from the list below; (iii) at least one must be a breadth course from the list below; and (iv) at least one must be an upper-division course (i.e., numbered 300 or higher).

Notes for the major and minor

a. Students may apply up to two approved courses of study abroad credit toward their African American Studies major or minor.
b. Majors and minors may satisfy no more than two university core requirement from African American Studies offerings.
c. When a course both supports their African American Studies major and fulfills a major or minor requirement in another field, a student may count no more than two units from that major or minor toward their African American Studies major.
d. Students majoring or minoring in African American Studies must earn a grade of C- or higher in all courses which are taken in fulfillment of a major or minor requirement.
e. The African American Studies program reserves the option of determining, on an individual basis, a time limit on the applicability of courses to the major or minor.

Depth Electives

Depth courses provide students with specialized knowledge in African American experiences, opportunities for sustained and deep thinking about a topic in African American Studies, and specifically highlight how African American Studies acquires, organizes, and defines knowledge. Students will acquire new methodological or theoretical tools to understand and situate African American experiences and their import. A course will meet the depth criteria if: (1) course topics are central to African American experiences; (2) these topics are considered across the course; and (3) the course introduces methodological or theoretical tools rooted in African American Studies. Courses that currently count toward the depth elective are:

AFAM 205 Survey of African American Literature
AFAM 210 Black Fiction and Feminisms
AFAM 346 African Americans and American Law
AFAM 355 African American Women in American History
AFAM 360 The Art and Politics of the Civil Rights Era
AFAM/COMM 370 Communication and Diversity
AFAM 375 The Harlem Renaissance
AFAM 495 Independent Study
COMM 347 African American Public Discourse
**African American Studies**

**Breadth Electives**

Breadth courses multiply points of application of specialized knowledge and expertise which students gain from African American Studies, allowing them access to different methodological and theoretical modes of treating topics and interrogating course material across disciplines, and varied platforms for building their capacity for critical and recursive intellectual engagement. A course will meet the breadth criteria if the syllabus or conversation with the instructor indicates that (1) topics show a distinct relationship to African American studies; (2) topics allow application of methods and theories from AFAM studies; and (3) the course expands lenses and extends contexts on topics instructive to African American experiences. Courses that currently count toward the breadth elective are:

- AFAM/REL 265 Thinking Ethically: What is Justice?
- AFAM 304 Capital and Captivity
- ARTH 302 The Art of Mexico and Mesoamerica
- COMM 321 Film Criticism
- COMM 322 Television Culture
- COMM 373 Critical Cultural Theory
- CONN 325 Homelessness and Race
- ECON 218 American Economic History
- ECON 241 Urban Economics
- ENGL 362 Native American Literature
- ENGL 364 Asian-American Literature
- ENGL 365 Gender and Sexualities
- ENGL 366 Critical Whiteness Studies
- GQS 201 Introduction to Gender, Queer, and Feminist Studies
- HIST 280 Colonial Latin America
- HIST 281 Modern Latin America
- HIST 360 Frontiers of Native America
- HIST 381 Film and History: Latin America
- HIST 382 Comparative Revolution in Twentieth Century Latin America
- HIST 383 Borderlands: The U.S.-Mexico Border
- HIST 384 Transnational Latin America
- HIST 391 Nelson Mandela and 20th Century South Africa
- HIST 392 Men and Women in Colonial Africa
- HIS 393 Missions and Christianity in Africa
- LAS 100 Introduction to Latin American Studies
- LAS 387 Art and Revolution in Latin America
- LTS 200 Latina/o America: A Critical Introduction to Latina/o Studies
- LTS 300 Latina/o Literatures
- MUS 222 Music of the World’s Peoples
- PG 303 Diversity in Post-Industrial Democracies
- PG 311 Politics of Detention: Criminal Justice, Immigation, and the War on Terror
- PG 315 Law and Society
- PG 316 Civil Liberties
- PG 325 African Politics
- PSYC 225 Social Psychology
- PSYC 265 Cross-Cultural Psychology
- PSYC 373 Perceiving Self and Other
- REL 302 Ethics and the Other
- SOAN 103 Social Problems
- SOAN 213 City and Society
- SOAN 230 Indigenous Peoples: Alternative Political Economies
- SOAN 301 Power and Inequality
- SOAN 305 Heritage Languages and Language Policies
- SOAN 335 Third World Perspectives
- SOAN 350 Border Crossings: Transnational Migration and Diaspora Studies
- SPAN 212 Latin American Culture and Civilization
- SPAN 301 Literature of the Americas
- SPAN 306 Latin American Film
- SPAN 311 Migration Narratives
- SPAN 402 Seminar in Nineteenth-Century Latin America
- SPAN 405 Seminar in Twentieth and/or Twenty-First Century Latin America
- THTR 250 World Theatre I: African Diaspora

Note that the following first-year seminars have relevance but cannot count toward the major or minor:

- SSI1/SSI2 115 Imaging Blackness
- SSI1 121 Multiracial Identities
- SSI1/SSI2 135 Hurricane Katrina and the History of New Orleans

**Course Offerings**

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

**Seminars in Scholarly Inquiry** See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions. While these courses cannot count toward a major or a minor, the following are recommended for their focus on important aspects of African American Studies.

- SSI1/SSI2 115 Imaging Blackness
- SSI1 121 Multiracial Identity

**Connections courses.** See the Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24).

- AFAM 346 African Americans and American Law
- AFAM 355 African-American Women in American History
- AFAM 360 The Art and Politics of the Civil Rights Era
- AFAM 375 The Harlem Renaissance
- AFAM 401 Narratives of Race

**101 Introduction to African American Studies** This course provides an examination of intellectual and creative productions, developments, and events that have come to be recognized as forming the discipline of African American Studies. The course explores literature, history, popular culture (music, television, magazines, newspapers, movies, film documentaries), and politics as a way to identify the historical and political origins and objectives of Black Studies. It also explores and the 1960’s national and transnational Black Liberation struggles, the early academic
and social concerns of Black Studies advocates, the theoretical and critical approaches to Black Studies as a discipline, and the early objectives of Black Studies in relation to present conversations and projects regarding goals of multiculturalism and diversity. Satisfies the Humanistic Approaches core requirements. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered each semester.

201 Methods in African American Studies  This course is the primary methods course for the major. The course provides students with a thorough grounding in the literature and research areas within African American Studies. In this course students are taught to investigate historical, cultural, economic, religious, political, and literary phenomena and are encouraged to form new thinking based on thoughtful reflection on personal and community experiences. Prerequisite: AFAM 101. Satisfies the Knowledge, Identity, and Power graduation requirement.

205 Survey of African American Literature  This course aims to provide a panoramic view of African American literature, from early oral traditions through the first written and published works in the 18th century, and continuing into the era of published slave narratives and early autobiographies. From there the course follows African American literature as its production accelerates and its variety expands after Emancipation, during and after Reconstruction, into the early 20th century. Students study poetry, prose, and drama from the Harlem Renaissance (circa 1919-1934). The latter part of the course concerns literature from the Civil Rights Era, the Black Arts period of the 1960s and 1970s, and more recent decades, when African American literature, criticism, and literary theory achieved immeasurable success and generated enormous influence nationally and globally. Cultivating an informed sense of African American literature as a whole is one major objective of the course. Satisfies the Humanistic Approaches core requirement.

210 Black Fictions and Feminism  This course is an integrative course in the humanities that explores various constructions of black female identity. The course looks at black womanhood as it’s represented in the public imaginary, feminist theories, critical race theories, and in literature and literary criticism written by black women writers. One of the questions the course asks is: How have scholars and writers addressed fundamental questions of black female identity? To answer this question, students read and view a wide survey of materials including novels, essays, memoir, and film. Through this investigation, students consider how studies of race, feminism, and gender connect to personal lives. Prerequisites: AFAM 101 strongly recommended. Satisfies the Humanistic Approaches core requirement.

265 Thinking Ethically: What is Justice?  This course provides students with tools of ethical analysis so that they can think critically about pressing contemporary moral issues through the lens of justice. The course focuses on ethical methods from world Christianity and western philosophy. The course introduces both ethical theories and modern justice theories, and examines multicultural perspectives of the long-standing religious and philosophical understanding of justice. It analyzes how social justice concepts have been applied in different cultural contexts, including non-western communities. Students examine different models of justice and their implications for contemporary moral issues (e.g. healthcare, social welfare, racism, war, capital punishment, human rights, immigration, refugees, property rights, and the environment). The class includes interactive lectures on justice theories and students actively participate in discussions on selected case studies. Course readings include excerpts from Aristotle, Aquinas, Mill, Pope, Locke, Calvin, Kant, Rawls, Sandel, Nussbaum, Singer, and Hauerwas. Crosslisted with AFAM 265. Satisfies the Knowledge, Identity, and Power graduation requirement.

304 Capital and Captivity  Capital and Captivity is an upper-level introduction to the study of Capital and its modern development, especially as it relates to race and class. The seminar examines philosophical concepts central to Marx’s theories of capital and capitalism regarding issues of human potential for freedom and happiness. Central ideas to be discussed are alienation, slavery, race, class, labor, surplus value, machines, money, debt, capitalist accumulation, and communism. This seminar includes a substantive Marxist critique of modes of control and domination in contemporary society, including a critique of incarceration and race. Cross-listed with REL 304. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every other year.

370 Communication and Diversity  The purpose of this course is to enhance students’ understanding of diversity issues as they relate to the study of communication. The course looks at how the media, its images and discourses, shape one’s understanding of experiences, shape the experiences of women, and the experiences of people of color. The course also explores the ways in elements of the media socially reproduce prejudice and foster resistance to prejudice. As a result of engagement in the course, students gain the ability to critically analyze and evaluate media products. They also become aware of critical professional issues in relation to a diversified workforce as it relates to the production, distribution, and consumption of media products. Cross-listed with COMM 370. Satisfies the Knowledge, Identity, and Power graduation requirement.

399 Public Scholarship  This is the African American Studies Program course in public scholarship. It provides students the opportunity to connect their coursework with the Race and Pedagogy Institute. One of the tenets of African American studies is the production of scholarship and public programs that effects change and impacts lives especially for communities historically underserved by official state and national institutions (i.e., public scholarship; some prefer the term civic engagement). The Race and Pedagogy Institute articulates these tenets in its various initiatives. The African American Studies program builds on the synergy evolving between the Institute’s various activities including its Community Partners Forum, and debates and events in the larger community to provide students with unique opportunities for dynamic engagement with social and cultural challenges. This course provides students with the necessary educational scaffolding for the production of public scholarship and then offers them the opportunity to contribute their work as part of ongoing critical efforts to confront and transform historical disparities in power, and privilege between different communities especially among local, regional, and national communities. Prerequisite: AFAM 101.

402 Research Seminar in African American Studies  In this course students employ the range of methods and understandings gained through AFAM 101 and further studies in the major to complete an independent research project/paper. Prerequisite: AFAM 401.

ART AND ART HISTORY

Professor: Zaixin Hong; Michael Johnson; Kriszta Kotsis; Janet Marcavage; Elise Richman, Chair; Linda Williams
Assistant Professor: Chad Gunderson

About the Department

The Department of Art and Art History offers two Bachelor of Arts degrees: Studio Art and Art History. The two majors are distinct, but students in each area are required to take supporting courses in the
other to ensure breadth and depth in their knowledge of art. The specific education of artists and of art historians, which includes technical skills, visual analysis, and research methodologies, are taught within the context of our liberal arts institution. The department values providing a strong liberal arts education and writing and critical thinking skills are emphasized in all art courses. Department of Art and Art History courses serve majors as well as students who are enrolled in the Artistic Approaches core. Careful attention is given to meet the needs of students from diverse majors and programs. The Department of Art and Art History occupies three buildings with Kittredge Hall and its gallery as the nucleus. Studio art courses are also taught in the Ceramics Building and the Sculpture House. Approximately eight exhibitions are held each academic year in the Kittredge Gallery, including a juried student show and the senior studio art thesis show in the spring semester.

Students who graduate from the Department of Art and Art History will be able to:

1. Clearly articulate ideas in visual, verbal, and written form that reflect critical thinking and sustained engagement with the field.
2. Successfully critique and discuss aesthetic experiences and apply training in visual literacy.
3. Apply theories and methods of artistic creation and critical evaluation of sources with an understanding of social and historical context.
4. Demonstrate the ability to independently create works in the plastic arts and/or complete significant research projects in the history of art.
5. Through the study and creation of art, develop a nuanced understanding of self and a more sophisticated view of our world in order to participate as successful and mindful citizens.

**Studio Art**

Studio art students master distinct processes, an understanding of the principles of design, a familiarity with art history, and sensitivity to expression in visual languages, and strategies for developing strong visual communication skills. They also form the ability to synthesize formal and conceptual issues and develop an understanding of how visual art relates to contemporary culture. The studio areas are well equipped for an institution of our size. Areas of concentration include ceramics, painting, printmaking, and sculpture. In addition to instruction from the regular staff, a number of visiting artists are brought to the campus each year to lecture and work with students. Studio classes average 15 students per class, providing opportunities for close relationships between faculty and students. The studio faculty are all exhibiting artists, showing their works in national and international exhibitions as well as in regional and local shows.

**Art History**

Art history majors develop an understanding of the trajectory of multiple art historical periods and cultivate skills in analyzing artworks from a wide range of cultures and from various methodological approaches. Students are also introduced to the historiography of the discipline and fundamental methods of analyzing art. Written work culminates in the presentation of a capstone paper that demonstrates the student’s ability to apply methods of research and analysis. Courses in art history cover the surveys of Western and Asian art, with upper division (300-400 level) studies in Ancient, Medieval, Renaissance and Baroque, 19th and 20th Century European and American art, Mexican, Chinese, and Japanese art, and Asian calligraphy. Sophomore level standing or consent of instructor is required for 300 level courses. The art history faculty present their research at national and international conferences and publish their work in scholarly journals and books.

**General Requirements for the Major or Minor**

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Courses taken to meet the Seminars in Scholarly Inquiry core requirements may not be used to meet major or minor requirements.

**Requirements for the Major**

**BA Degree in Studio Art**

A limited number of seats have been reserved in ARTS 101 and 102 for prospective studio art majors. Students who plan to major in studio art and wish to take one of these courses should contact the instructor prior to registration week.

1. Completion of two foundation courses in studio art, specifically ARTS 101, 102;
2. Completion of any two of the following art history courses: ARTH 275, 276, 278; and the completion of one art history course from the following courses: ARTH 302, 325, 359, 360, 361, 362, 363, 365, 367, 368, 369, 370, 371, 380, 399, HUM 330, 335, LAS 387.
3. Studio Art tracks (choose A, B, C, or D)
   - A. Printmaking: 281, 282, ARTS 201 or 251, 382, 492, 3-D elective.
   - B. Painting: ARTS 201, 251, 281 or 282, 350, 492, 3-D elective.
   - C. Ceramics: ARTS 247, 248, 265 or 266, 347, 493, 2-D elective.
   - D. Sculpture: ARTS 247 or 248, 265, 355, 493, 2-D elective.
4. Satisfactory participation in the Senior Exhibition.

**Notes**

1. Elective units are available in art and art-related fields that provide concentration, depth, and choices for the art major in painting, ceramics, drawing, printmaking, and other fields.
2. Sophomore orientation is highly recommended.
3. HON 206 may only be taken by Honors students and is a replacement for ARTH 275.
4. ARTS 147 and ARTS 202 do not apply to the Studio Art major.

Advisors: Professors Gunderson, Johnson, Marcavage, and Richman.

**BA Degree in Art History**

1. Completion of ARTS 101 or 102, ARTH 275, 276, 278 or 302, 294, 494 and four of the following: ARTH 278, 302, 325, 334, 359, 360, 361, 362, 363, 365, 367, 368, 369, 370, 371, 380, 399, HUM 330, 335, LAS 387.
2. Art majors with an art history emphasis are required to submit by the end of their junior year a copy of a graded substantial art history research paper (at least ten pages in length) for mid-level evaluation.
3. At least two 300-level art history courses must be taken at the University of Puget Sound and be completed by the end of the junior year.
4. Completion of the university’s foreign language graduation requirement by taking either 101/102 or 201 in a modern language (Arabic, Chinese, French, German, Japanese, or Spanish). Students who meet the foreign language graduation requirement through a university proficiency examination in one of these languages will be expected to take and pass a further departmental translation ex-
amination. Students who pass a university proficiency examination in a language other than those listed above must consult with the department regarding the departmental language requirement.

Notes
1. Elective units are available in art and art-related fields which provide concentration, depth, and choices for the art major in painting, ceramics, drawing, printmaking, and other fields.
2. HON 206 may only be taken by Honors students and is a replacement for ARTH 275.

Advisors: Professors Hong, Kotsis, and Williams.

Requirements for the Minor

Studio Art
Completion of six units to include: 1) ARTS 101, 102; 2) one unit from the following art history courses: ARTH 275, 276, 278, 302, 325, 334, 359, 360, 361, 362, 363, 365, 367, 368, 369, 370, 371, 399; and 3) three art electives.

Art History
Completion of six units to include: 1) ARTH 275, 276, 278 or 302, 294; and 2) two art history units at the 300 level from the following courses: ARTH 302, 325, 334, 359, 360, 361, 362, 363, 365, 367, 368, 369, 370, 371, 380, 399, HUM 330, 335, LAS 387.

Notes
1. The student must have a grade of C or higher in all courses for the major or minor.
2. Courses more than 10 years old will not be applied to an Art major or minor.
3. HON 206 may only be taken by Honors students and is a replacement for ARTH 275.
4. ARTS 147 and ARTS 202 do not apply to the Studio Art minor.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSII/SSI2 120 Hagia Sophia: From the Emperor’s Church to the Sultan’s Mosque
SSII 147 Contemporary Art Theory and Critique
SSI2 157, Chinese Painting in the West
SSI2/SSI2 170 Perspectives: Space, Place, and Values
SSI1 179 Women, Art, and Power in Byzantium

Other courses offered by Department of Art and Art History faculty. See Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24).

CONN 370 Rome: Sketchbooks and Space Studies
Satisfies the Connections core requirement.
HON 206 The Arts of the Classical World and the Middle Ages
Satisfies the Artistic Approaches core requirement.
HUM 330 Tao and Landscape Art
Satisfies the Connections core requirement.
Satisfies the Connections core requirement.

LAS 387 Art and Revolution in Latin America
Satisfies the Connections core requirement.

Studio Art

101 Visual Concepts I This course introduces the formal, perceptual, and expressive elements that form the basis for drawing and two-dimensional design. This course addresses the notion of drawing and design as inter-related aspects of a shared visual language. The course focuses on using this language as a means of developing ideas, heightening perceptual awareness, and honing technical skills. Various methods, techniques, and materials are explored. Available to non-majors. Offered every semester.

102 Principles of 3-D Design This course is a comprehensive investigation of contemporary and traditional three-dimensional concepts and processes. Students develop a working understanding of the visual and conceptual vocabulary needed for making and critically assessing three-dimensional form. Projects are designed to provide each student the opportunity to fully develop an understanding and envisioning of space, the autonomous object, the effects of scale, and the relationship of the body to the built environment. The student gains experience in handling both plastic and rigid materials while employing additive and reductive forming practices. In addition to making, students engage in research pertaining to the historical development of three-dimensional art and present findings through writing and oral presentation. Critiques also serve as a vehicle to help students learn to critically evaluate their work and that of their peers. Available to non-majors. Satisfies the Artistic Approaches core requirement. Offered every semester.

147 A History of Ceramics Through Making As one of the first technological discoveries made by humans, ceramics has an extremely rich history. New uses for this diverse material are still being developed today. Students focus on the techniques and practice of making ceramic objects while, in parallel, learning about and researching the history of this worldwide innovation. Skills learned build upon one another chronologically. Critiques, readings, and discussions supplement and enrich students’ working knowledge of clay as a material and provide a historical context in which to view ceramics in the present. Classes frequently begin with lectures followed by in-class work time. Creative production is balanced with reading, writing, and oral presentation. Note that this course does not apply to the Studio Art major or minor. Satisfies the Artistic Approaches core requirement. Offered every other spring.

201 Intermediate Drawing This course explores drawing as a means of seeing more acutely, examining cultural narratives, and experimenting with a range of materials. Technical skills are fused with conceptual inquiries and critical analysis. This course emphasizes the interplay between intellectual, expressive, and material aspects of the creative process as they relate to recording and relating visual relationships, expressing spatial and temporal phenomena, and critically engaging with art historical, contemporary, and personal issues and narratives. Assignments incorporate black and white wet and dry materials as well as water based pigments. The course includes an extensive figure drawing unit. Additionally, an examination of contemporary trends in art informs the themes and approaches explored in this course. Prerequisite: ARTS 101. Offered Fall semester.

202 The Printed Image This course introduces students to significant developments and works in printmaking. Students are exposed to the craft and function of printmaking through exploring its historical foundation and contemporary applications. Printmaking’s potential for visual communication is considered through readings, research, writing, creative projects, discussion, class presentations, studio and
This studio course provides an introduction to the history and techniques of East Asian calligraphy as one of the supreme artistic accomplishments in China, Japan, and Korea. It combines the historical study of this art form with its hands-on practice as an art performance. Emphasis is placed on understanding the multi-functions of calligraphy in East Asian society. Crosslisted as ARTH 371. Offered every other year.

282 Beginning Printmaking: Lithography and Screen Print  This beginning printmaking course introduces students to technical aspects and creative possibilities of lithography and screenprinting. Planographic processes that are introduced include stone lithography and plate lithography. Students learn several non-toxic screenprint procedures, including paper and fluid stencils, reduction printing and crayon resists. There is an overview of historical and contemporary works in each area. Prerequisites: for Studio Art majors and minors, ARTS 101. Offered Spring semester.

287 Introduction to Digital Imaging  This studio course provides practical knowledge of the tools necessary to generate and output creative digital images in print. Students learn how to utilize the tools of Photoshop and Illustrator. Students also become familiar with the use of a digital drawing tablet, digital camera, and flatbed scanner. The course content includes digital drawing, painting, and photography. Prerequisite: ART 101. Offered Spring 2018.

247 Ceramics: Beginning Wheel Throwing  This course presents students with the spectacular possibilities of functional ceramic vessels as formed on the wheel. Students start the course by learning the fundamentals of throwing. These basic skills provide the groundwork for the creation of more elaborate and complex forms as the course progresses. In tandem with these assignments, students also explore high temperature glaze formulation. Historical and contemporary examples of ceramic vessels are presented to students throughout the duration of the course. As a result, students acquire an appreciation for historic and contemporary ceramics and become able to critically discuss a myriad of ceramic artwork. Along with regular lectures, students are required to research and present on a contemporary ceramic artist. Available to non-majors. Prerequisites: for Studio Art majors and minors, ARTS 102 (no prerequisites for non-majors). Offered Fall semester.

248 Ceramics: Beginning Handbuilding  This course presents students with the spectacular possibilities of handbuilding techniques used to create ceramic objects. Different methods of creation are introduced throughout the duration of the course culminating in a final project that incorporates knowledge of these fundamental techniques. In tandem with these assignments, students also explore low temperature glaze formulation. Historical and contemporary examples of ceramic art are presented to students throughout the duration of the course. As a result, students acquire an appreciation for historic and contemporary ceramics and become able to critically discuss a myriad of ceramic artwork. Along with regular lectures, students are required to research and present on a contemporary ceramic artist. Available to non-majors. Prerequisites: for Studio Art majors and minors, ARTS 102 (no prerequisites for non-majors). Offered Spring semester.

251 Painting  Students explore the wonders of color relationships, learn how to mix accurate colors, create the illusion of mass and space and manipulate oil paint to create a range of expressive effects. Additionally, this class emphasizes the notion of artistic intention as well as the relationship between expressive content and perceptual elements. Prerequisites: for Studio Art majors and minors, ARTS 101. Offered Spring semester.

265 Sculpture/Metal  This course explores form, mass, structure, surface, and scale using steel as the primary medium. Welding construction, forging and shaping are introduced and put into practice through problem solving assignments. Prerequisites: for Studio Art majors and minors, ARTS 102 (no prerequisites for non-majors). Offered Fall semester.

266 Sculpture/Wood  This course explores mass, structure, surface and scale using wood as the primary medium. Construction, carving, bending and joinery are introduced and put into practice through problem solving assignments. Prerequisites: for Studio Art majors and minors, ARTS 102 (no prerequisites for non-majors). Offered Fall semester.

281 Beginning Printmaking: Relief and Intaglio  This beginning printmaking class introduces students to basic relief and intaglio printing techniques, in addition to a history of the media. Drawing is an important aspect of the two processes that are explored. Relief processes include transfer methods, safe use of carving tools, black and white and color printing. Intaglio processes include plate preparation, the application of grounds, methods of biting the plates with acids, Chine-collé, and printing. Prerequisites: for Studio Art majors and minors, ARTS 101. Offered Fall semester.

285 Intermediate Painting  Students develop a personal visual vocabulary by making deliberate choices about subject matter and the handling of media. This course combines assignments, including 4–5 weeks of figure painting, which build technical skills and encourage explorations of distinct layering processes with the development of an independent series of paintings. Students will also learn to mix paint, and experiment with different kinds of pigments, thereby developing a deeper understanding of materials. In addition to engaging with distinct processes and techniques, this course will introduce and examine contemporary trends in painting. This course takes place in tandem with ARTS 447; intermediate students share work days and critiques with advanced students. Prerequisite: ARTS 247 or ARTS 248. Offered Fall semester.

287 Introduction to Digital Imaging  This studio course provides practical knowledge of the tools necessary to generate and output creative digital images in print. Students learn how to utilize the tools of Photoshop and Illustrator. Students also become familiar with the use of a digital drawing tablet, digital camera, and flatbed scanner. The course content includes digital drawing, painting, and photography. Prerequisite: ART 101. Offered Spring 2018.

247 Intermediate Ceramics  This course examines advanced methods of forming and decorating ceramics. Instruction covers clay bodies, glaze, surface treatment, and the loading and firing of kilns. Group and individual critiques focus on defining and developing a personal style. This course takes place in tandem with Art 447; intermediate students share work days and critiques with advanced students. Prerequisite: ARTS 247 or ARTS 248. Offered Fall semester.

250 Intermediate Sculpture  This course emphasizes the combination of materials, use of alternative materials, and scale and presentation. Mold making and casting are introduced along with other contemporary sculptural issues such as site work. This course takes place in tandem with ARTS 455; intermediate students share work days and critiques with advanced students. Prerequisite: ARTS 251. Offered Fall semester.

266 Intermediate Sculpture  This course explores mass, structure, surface and scale using wood as the primary medium. Construction, carving, bending and joinery are introduced and put into practice through problem solving assignments. Prerequisites: for Studio Art majors and minors, ARTS 102 (no prerequisites for non-majors). Offered Spring semester.
plate color printing and serial imagery may also be explored. Students develop concept and technique within the language of multiples. This course takes place in tandem with ARTS 482; intermediate students share work days and critiques with advanced students. Prerequisite: ARTS 281 or ARTS 282. Offered Fall semester.

447 Advanced Ceramics This advanced course requires students to further develop an individual direction with their use of the ceramic medium. Focus is placed on nurturing a creative voice, but is balanced with an emphasis on continued experimentation with clay and glaze formulation. Taking place in tandem with ARTS 347, advanced students share work days and critique days with intermediate students. Along with regular lectures, students research, interview, and present on a contemporary ceramic artist. Exploration is project based in this course and evaluation is be based as much on content as craftsmanship. Prerequisite: ARTS 347. Offered Fall semester.

450 Advanced Painting This course promotes the exploration of personal artistic motivations and independent relationships to processes and materials. Students are encouraged to work from the figure, pushing issues of scale and experimentation with materials for 4–5 weeks of the semester. Additionally, students expand upon their understandings of process, media, and conceptual issues, generating an independent, advanced series of work. Students also examine and interrogate contemporary artistic issues and trends in written and oral forms of communication. This course takes place in tandem with ARTS 350, advanced students share work days and may share critiques with intermediate students. Prerequisite: ARTS 350. Offered Fall semester.

455 Advanced Sculpture This advanced course provides the structure enabling each student to develop an individualized program of studio practice. This practice will consist of creating a consistent, coherent, body of work where individual students galvanize their formal and conceptual concerns. This course takes place in tandem with ARTS 356; advanced students share work days and critiques with intermediate students. Prerequisite: ARTS 356. Offered Fall semester.

482 Advanced Printmaking Students develop independent projects with print media, furthering their critical thinking and artistic growth. Students engage in a concentrated study and studio practice. Print matrices and substrates may be examined as tools for editioning, variation, accumulation, distribution or other means. Students investigate scale and format with their projects, and have the opportunity to explore relationships between printmaking and other media such as installation, digital media, and textiles. Students will consider the production of prints within the context of contemporary culture and print history. Inventiveness, individual problem solving, risk taking and a willingness to challenge one’s abilities are essential to this class. This course takes place in tandem with ARTS 382, advanced students share work days and critiques with intermediate students. Prerequisite: ARTS 382. Offered Spring semester.

492 Advanced 2D Studio This advanced studio course in 2D studies is designed to help students develop a coherent body of work. Prerequisite: ARTS 350 or ARTS 382. Offered Spring semester.

493 Advanced 3D Studio This advanced studio course in 3D studies is designed to help students develop a coherent body of work. Prerequisite: ARTS 347 or ARTS 355. Offered Spring semester.

495/496 Independent Study Independent study is available to those students who wish to continue their learning in an area after completing the regularly offered courses in that area. Requires junior standing, a contract with the supervising professor, and departmental approval.

Art History

275 Studies in Western Art I: Ancient through Medieval Art This course introduces selected monuments produced by the civilizations of the pagan ancient Mediterranean and the Near East, medieval Christian Europe, and the world of Islam, from ca. 3000 BCE to ca. 1300 CE. The course examines a wide range of material—from colossal monuments built for the powerful to humble objects used by commoners, from works of awesome religious significance to lighthearted artifacts of the secular realm—to understand the role art played in the various societies of the ancient and medieval world. Emphasis will be placed on how the monuments functioned within their cultural contexts and how they expressed political, social, and religious meanings. To facilitate the inquiry, the course also introduces terms and principal methods of art historical study. Satisfies the Artistic Approaches core requirement. Students may not receive credit for both ARTH 275 and HON 206. Offered every year.

276 Studies in Western Art II: Fourteenth to the Twenty-First Century This class introduces students to artistic works created in Western Europe and the Americas from circa 1300 CE to the present. Students will learn to discuss how art communicates, while pursuing larger questions of meaning related to the social, cultural, and artistic context in which the works were created. While students will learn to identify stylistic characteristics, particular emphasis is given to how the works complement and/or reflect particular political, spiritual, scientific, or philosophical issues. Discussion and writings stress the interpretive methods of the discipline of art history. Satisfies the Artistic Approaches core requirement. Offered every year.

278 Survey of Asian Art This course is a survey of the major artistic traditions of Asia, primarily of China, India, and Japan, from prehistoric times to the turn of the twentieth century. It examines important monuments and emphasizes the interaction of art and society, specifically, how different artistic styles are tied to different intellectual beliefs, geographical locations, and other historical contexts. The course includes a field trip to the Seattle Asian Art Museum. Satisfies the Artistic Approaches core requirement. Offered every year.

294 Art History Research Methods This course examines the origins and history of the discipline of art history and serves as an introduction to fundamental methods of art historical research (e.g., biographical, formalist, iconographic, sociological, feminist, etc.) approaches. The course, intended for prospective and recently declared majors, prepares students for more advanced courses in art history. This generally chronological seminar also provides hands-on learning of museological and archival procedures, and offers students the opportunity to become acquainted with and to practice different types of art historical writing (e.g., ranging from catalog entry to book review). Students also have the opportunity to develop and refine their research skills through the completion of a substantial research project. Students present their work to the class both in formal and informal presentations throughout the term. Prerequisite: Second-year standing or above, and two art history courses completed at a university. Offered every semester.

302 The Art of Mexico and Mesoamerica This course introduces the arts of Mesoamerica and Mexico from 1200 BCE to the present. Architecture, sculpture, pottery, and painting of the pre-Columbian and Viceregal periods are examined with their ritual functions in mind, focusing on the political and religious contexts of the works. Style is analyzed throughout the course as a product of cultural intersection and transmission, reflecting ongoing adaptation and assimilation rather than the hegemonic expression of one particular culture. Readings and discussions of the 16th and 19th centuries include the reception of “New World”
images and objects by European and North American audiences, investigating the power of art to create, confirm, or reject views of other cultures. Counts toward Latin American Studies minor. Prerequisite: second-year standing or above. Satisfies the Artistic Approaches core requirement. Offered every other year.

325 The Cutting Edge: Art and Architecture Since 1900 This course explores the artistic trends in the West from 1900 to the present focusing on the relationship of artists and movements to historical and cultural events that shaped the period. Theoretical readings inform the study of painting, architecture, sculpture, photography, printmaking, installation, and performance art from the modernism of the early twentieth century to current artistic movements. Prerequisite: second year standing or above. Offered every third year.

334 Early Italian Renaissance Art: From Giotto to Michelangelo This course offers an overview of works created throughout the Italian peninsula, from Naples to Genoa, and Venice to Rome from the thirteenth through the fifteenth century. In addition to the well-known artists who generally define the period (Giotto, Donatello, Botticelli) the course covers a variety of artists, media, and sites that broaden students’ understanding of the early Renaissance, examining formal transformations within social, political, and religious contexts. Students focus particularly on how art was used in the civic structure of both republics and courts, and how individual patrons shaped the visual arts in Italy from the early fourteenth-century innovations of Giotto to the late fifteenth-century innovations of Leonardo and Michelangelo. In addition to understanding how visual images communicate by developing skills of formal analysis of art and architecture, students focus on the interpretation of how and what particular styles conveyed in society. Writing assignments include the critical analysis of art historical writing, analysis of style, and a research paper. Prerequisite: second year standing or above. Offered every third year.

359 Islamic Art Islamic culture is truly global, encircling the planet from the Islamic Center of Tacoma, Washington, to the Kaaba in Mecca, to the myriad mosques of Xinjiang Province in China. The history of the Islamic world is equally vast, spanning over a millennium. This course focuses on the history of Islamic visual culture from the 7th through the 17th century and explores works of art in a variety of media (e.g. architecture and monumental decoration, book illuminations, ceramics, metal-works, textiles, etc.) both from the religious and the secular realms. Art works are examined with particular attention to their original function, context, and intended audience, and are presented from a range of methodological perspectives. Topics of special interest include: formation of Islamic art; functioning and decoration of Islamic religious artifacts and architecture; development of regional styles; interactions of text and image; visual expressions of power and authority; representations of gender; the function and decoration of liturgical space; icons, image theory, and the Iconoclastic controversy; depictions of the secular world. Prerequisite: second year standing or above. Offered every other year.

362 Art, Religion, and Power in Late Antiquity and Byzantium This course explores the artistic traditions of the Late Antique and Byzantine periods from the earliest surviving monuments of Christian art of the mid-3rd century to the monuments of the Late Byzantine Empire up to the fall of Constantinople in 1453. The course examines how the interactions between the Greco-Roman, Jewish, and Christian traditions produced the art of Late Antiquity and Byzantium, and accentuates the visual, social, and religious continuities and ruptures between these traditions. Works of art are examined with particular attention to their original function, context, and intended audience, and are presented from a range of methodological perspectives. Topics of special interest include: the formation of Christian art; images of power and authority; representations of gender; the function and decoration of liturgical space; icons, image theory, and the Iconoclastic controversy; depictions of the secular world. Prerequisite: second year standing or above. Offered every other year.

363 Faith and Power in the Art of the Medieval West (7-14th century) This course introduces the art of Medieval Western Europe from the Period of Migrations through the Gothic Era (7-14th century.) A fundamental social and cultural transformation of Western Europe followed the end of the Roman Empire characterized by the increasing dominance of the Christian Church, the interaction of various cultural and ethnic groups, the development of feudalism, and the eventual renascence of the Western Roman Empire. The intermingling of the Germanic, Greco-Roman, Early Christian, and Byzantine pictorial traditions produced a distinct visual culture that developed separately from the artistic tradition of the Byzantine East. Works of art are examined with particular attention to their original function, context, and intended audience, and are presented from a range of methodological perspectives. Topics of special interest include the role of relics and pilgrimage, the visual expression of imperial and monastic ideology, revival and rejection of the classical style, function and decoration of liturgical spaces, and the role of words and images in illuminated books. Prerequisite: second year standing or above. Offered every other year.

365 Nineteenth-Century Art and Architecture in Europe and the Americas The period between 1780 and the end of the nineteenth century is marked by myriad social changes and scientific/technical innovations, from revolutions across Europe and the Americas, enlightenment thought, and increasing emphasis on human rights, to the innovation of photography, steel construction, and paint in tubes. This course studies how artists and architects responded to these developments, focusing particularly on the shift from academic works to the rise of
modernism and the avant-garde. Prerequisite: second year standing or above. Offered every third year.

367 Chinese Art This course is an introduction to the foundations of Chinese art from the Neolithic period to the present. It covers the arts of ceramics, bronze, jade, painting, calligraphy, sculpture, and architecture. Emphasis is placed on the relationship of art forms and the socio-political factors and intellectual discourses that shaped them. Each class combines lecture and discussion. The course includes two hands-on sessions of Chinese calligraphy and ink painting. Offered every other year.

368 Japanese Art This course is a survey of the visual arts of Japan from the Neolithic period to modern times. The course also examines the social, political, and philosophical atmosphere that shaped these arts. Architecture, sculpture, ceramics, and decorative arts are discussed, but painting and woodblock print are emphasized in the later periods. Offered every other year.

369 Twentieth-Century Chinese Art This course examines Chinese art in the socially and politically tumultuous twentieth century, which has witnessed the end of Imperial China, the founding of the Republic, the rise of the People’s Republic, and the impact of the West throughout the period. The focus is on the art and society from the Cultural Revolution (1966-1976) to the end of the century. Usually offered every other year.

370 Buddhist Art This course is an introduction to the major monuments and movements of Buddhist art in Asia, including China, Korea, Japan, Southeast Asia, and Tibet. Emphasis is placed on the interactions between different Buddhist concepts/schools and the diverse visual forms that represent them. Issues for examination include the evolution of the Buddha’s image from aniconic to iconic representation, the development of Buddhist iconography in relation to other religious iconography and secular imagery, the role of patronage, and the relationship of pilgrimage and art production. Each class combines lecture and discussion. Offered occasionally.

371 East Asian Calligraphy This course provides a comprehensive introduction to the history and techniques of East Asian calligraphy as one of the supreme artistic accomplishments in China, Japan, and Korea. It combines the historical study of this art form with its hands-on practice as an art performance. Emphasis is placed on understanding the multi-functions of calligraphy in East Asian society. Cross-listed as ARTS 371. Offered every other year.

380 Museums and Curating in the 21st Century: History, Theory, and Practice This course explores the history of museums, collecting, theories, and practice of contemporary curating. Students learn the history of different types of exhibitions of material culture—art and artifacts and objects/displays of the natural world. The class includes visits to regional museums, proper handling of art and artifacts, and guest presentations by professionals in the field. Students study the politics and ethics of collecting and curating, and for the final project, plan and/or participate in the curation of an exhibition. Offered occasionally.

399 Special Topics in Art History This seminar is designed to allow in-depth examination of selected topics from the history of art. The course may focus on a region, time period, artistic movement or a single artist, yet it may also cover the thematic study of artworks from multiple regions or periods. The course explores relevant art historical research and methodologies on the selected topic. A different topic is chosen by faculty each time the course is offered. The content of the course varies with the instructor and may have Ancient or Medieval European, Modern European or American, or Asian emphasis. Offered occasionally.

492 Curatorial/Art History Research Practicum 0.25 academic unit. This semester-long course allows students to work with an art history professor on a project related to the history of art or visual culture. The work may include: the planning and implementing of an exhibition in Kittredge Gallery or another venue on campus; cataloging and researching works of art belonging to the Puget Sound art collection; art education or other initiatives that connect the community and visual arts on the Puget Sound campus. Students develop re-search and writing skills that aim to provide a context for artistic works and makem them accessible to the public. This course is designed for second year students and above. Prerequisite: at least one 200 or 300-level art history course at Puget Sound. Instructor permission required.

494 Seminar in Art History The course is a reading and writing intensive seminar, required for all art history majors, which focuses on research methods and approaches in the field of art history. Students culminate their disciplinary studies with a substantial thesis/research paper. Open only to art history majors in the senior year of study. Prerequisites: Art History 294 and two additional art history courses and the completion of at least one substantial research paper in art history (at least 10 pages and approved by the art history faculty).

495/496 Independent Study Independent study is available to those students who wish to continue their learning in an area after completing the regularly offered courses in that area. Requires junior standing, a contract with the supervising professor, and departmental approval.

ASIAN LANGUAGES AND CULTURES

About the Program

The Asian Languages and Cultures (ALC) Program, a component of the Asian Studies Program (see Asian Studies in this Bulletin), offers majors, minors and courses of interest to all undergraduates at Puget Sound. Grounded in a strong foundation of languages, the program draws on the broad expertise of the Asian Studies faculty and complements the Asian Studies Program’s Interdisciplinary Minor and Trimble Distinguished Asia Scholar designation in offering students a focused and comprehensive understanding of the languages, cultures, and literatures of China and Japan. The program offers two majors, two minors, courses in the core curriculum, and Chinese and Japanese language courses that fulfill requirements toward the Asian Studies minor and meet the university’s foreign language requirement.

ALC offers majors in Chinese Language and Culture, Japanese Language and Culture and Japanese Language and Literature, as well as minors in Chinese and Japanese. The goals of the language curriculum are based on the proficiency guidelines of the American Council on the Teaching of Foreign Languages (ACTFL). Each major is designed to provide students with a solid foundation in language and culture through intensive language training and broad exposure to the cultural traditions of China and Japan. The curriculum systematically prepares students through highly structured and interactive classroom instruction and a wide variety of learning opportunities outside of the classroom.

Students who graduate from the Asian Language & Cultures Program will be able to:
I. Concentration in language and culture

1. Communicate effectively with native speakers of Chinese and/or Japanese in a variety of situations using culturally appropriate language.
2. Read and understand the gist of authentic materials, such as news summaries and short essays, with the aid of dictionaries and other resources.
3. Write expository and expressive essays in the target language on a variety of topics.
4. Implement tools to become independent, self-sufficient learners of the target language beyond the classroom.
5. Demonstrate fundamental knowledge of the literary and cultural traditions of China and/or Japan, and understand those traditions within the East Asian and world contexts.
6. Analyze and discuss coherently Chinese and/or Japanese literary and cultural works.
7. Write logically and clearly in English about Chinese and/or Japanese literary and cultural traditions.
8. Apply critical thinking, research and learning skills to be successful in their academic, professional and personal lives after graduation.

Choice of Majors
Students may select from two major areas of study:
1. Chinese
2. Japanese

II. Concentration in language and literature

1. Seven units in Japanese language, of which at least two must be at the 300 level, and one must be either JAPN 325, 360, 380, or 385.
2. Three units from the following: ALC 205, 310, 320, 330.

General Requirements for the Major or Minor

General university degree requirements stipulate that (1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; (2) students earn a GPA of at least 2.0 in courses taken for the major or minor; (3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major

Each major consists of 10 units.
1. Courses taken for an ALC major may not be used to satisfy requirements for a second ALC major or a minor.
2. Only courses in which a student has received a grade of C- or better may be counted toward the major or minor.
3. Each student must coordinate his or her program with an ALC faculty member. Variation of requirements is possible, as arranged by petition to the Director of Asian Studies.

Requirements for the Minor (5 units)

Completion of a minimum of five units in one language is required for the minor in Chinese or Japanese.

Interdisciplinary Minor in Asian Studies

All students majoring in the Asian languages are strongly encouraged to augment these majors with the Interdisciplinary Minor in Asian Studies offered by the Asian Studies program, thereby enhancing their major with a deeper and broader comprehension of Asian cultures and societies. Courses taken for the majors may not be applied to the Asian Studies Minor. See requirements under the Asian Studies listing.

Robert Trimble Distinguished Asia Scholar

Students pursuing the Asian Studies Minor who demonstrate academic excellence and complete a one-semester senior thesis will achieve the added designation Robert Trimble Distinguished Asia Scholar (DAS). See requirements under the Asian Studies listing.

International Experience

Not all international experiences are suited for Asian Languages and Cultures majors and minors; therefore, only pre-approved study-abroad coursework may be counted toward degrees in the program. To ensure that credit will transfer, a student wishing to apply study-abroad credit toward a major should consult ALC faculty prior to enrollment. Students with demonstrated financial need who are selected for any Chinese or Japanese language program in Asia are eligible for financial support through the Charles Garnet Trimble Endowment in Chinese Studies.

Language Houses

Knowing that a residential atmosphere provides strong support for language learning, students are encouraged to create their own living-language programs. Students have the opportunity to organize a group of language learners and apply to live in university-owned houses on campus where they may communicate in Chinese or Japanese and share their enthusiasm for the cultures they study in a small group environment. For further information and application deadlines, contact Residence Life.

Spring Festivals

The Asian Languages and Cultures program organizes festivals each spring celebrating the cultures of China and Japan. The Chinese festival coincides with the Chinese Lunar New Year and features a number of activities including calligraphy and tea workshops, traditional cultural displays, and community-based events. Japan Week occurs during the spring cherry blossom season and features movies, speakers, performances, and student-led activities. All Puget Sound students are encouraged to participate in these events.
Transfer of Units and Placement

Students with previous high school language study may be capable of beginning their language coursework at Puget Sound beyond the introductory level. Heritage students and those with other international experiences, such as study abroad, living with exchange students or other intensive studies should have their language proficiency evaluated by a faculty member. Consult program advisors in the particular language.

Advanced Placement Examinations (AP) with a score of four or five apply toward majors or minors for a maximum of one unit at the 200 level.

Asian language coursework completed at other accredited institutions may be accepted toward major areas of concentration for a maximum of four units, with two going toward the language component, and two more units going toward non-language courses. For the minor, only two units of language may be accepted.

ALC transfer students, especially those who have experienced prolonged periods since their last language coursework, will be evaluated on an individual basis. The Asian Languages and Cultures program does not accept or award credit for distance learning courses. The program also reserves the right to exclude a course from a major or minor based on the age of the course.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10. The proper course sequence in the first two years of foreign language instruction is 101, 102, 201, and 202. A student who has received a C- grade or better in any course of this sequence or its equivalent cannot subsequently receive credit for a course that appears before it in the sequence.

Asian Languages and Culture

205 Great Books of China and Japan This course explores the important literary periods of China and Japan from the classical periods to the present. Interpreting literary works within their historical context, this course introduces students to various genres and themes that are particular to the culture and society of China and Japan. Satisfies the Humanistic Approaches core requirement. Satisfies a core requirement for the Asian Studies Minor. Offered frequently.

215 Stories of the Strange: From Fox Spirits to The Monkey King in Chinese Literature The cultures that have occupied modern-day China have left incredibly long and varied written histories. Among these histories, accounts of the strange and anomalous are often overlooked, and yet they provide a wealth of critical information about culture in a broad sense. This class uses analysis of stories of ghosts, demons, fox-spirits and other anomalies from over 2000 years of Chinese literary history as a way to understand Chinese fiction generally, but also to shed light on the ways in which the authors approached issues of identity, the other, society, and conceptions of the transcendent. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

225 Visualized Fiction: Cinematic Adaptations of Traditional Chinese Literature Classical Chinese literature has contributed the inspiration and source materials for a host of modern cultural products. This course is designed to help students develop an awareness of the importance, uses and the significance of classical Chinese literature in modern cultural production. In this course, students study classical texts in English translation and their modern and contemporary film adaptations. In the process, students try to understand what about the original classics appeals to modern cultural producers, and what cultural, social, and political purposes they might serve in different modern contexts. The goals of this course are 1) to develop an overall understanding of major Chinese literary genres; 2) to examine why traditional Chinese literature still matters to us today and why literary works from the past have been used by the West and recycled in our modern cultural production; 3) to demonstrate critical thinking through written and oral expression; and 4) to retrieve and use written information critically and effectively. Satisfies the Humanistic Approaches core requirement. Offered frequently.

310 Death and Desire in Premodern Japanese Literature One of the most prominent themes of early Japanese literature is a longing for and deep appreciation of beauty coupled with a poignant understanding of its perishability. In this class students read classical Japanese literature from the mid-eighth to the mid-eighteenth century and analyze the works in the context of these major themes of desire and death. In such varied works as The Tale of the Genji, Chûshingura (the story of the 47 ronin), and the memoirs of Medieval recluses, students explore the different shapes that desire and death take, and how the treatment of these themes changes alongside developments in Japanese culture. Satisfies the Humanistic Approaches core requirement. Offered frequently.

315 Narrative and Nation in Modern Chinese Literature This course is a survey of major works of literature from China, Hong Kong, and Taiwan produced between the late Qing period and the 1980s. Students become familiar with prominent themes of Chinese literature from the turbulent 20th century, examining the works for what they have to say about such topics as modernity, tradition, gender and subjectivity. The goals of this course are to 1) become familiar with the most critically acclaimed literary voices of the modern period; 2) to identify dominant themes in the literature of the period and examine what they say about what it means to be human; 3) to develop skills in critical reading, thinking and writing. Offered occasionally.

320 Self and Society in Modern Japanese Literature This course is a survey of modern Japanese literature with an emphasis on Japanese writers in the late nineteenth through the twentieth centuries who struggled with questions of identity. The course is organized chronologically and focuses on some of the major authors of the modern period, including Natsume Sôseki, Tanizaki Jun’ichiro, Kawabata Yasunari, and Mishima Yukio. Satisfies the Humanistic Approaches core requirement. Offered frequently.

325 Chinese Cinema: Ideology and the Box Office Chinese cinema is a global powerhouse, winning major international awards and capturing remarkable box office receipts. However, like most Chinese stories, that of Chinese film is a long and intricate one. In this course, students will be exposed to the broad historical scope of Chinese cinema from the earliest silent films of the 1920s to some of the most recent critical productions. Through films by Zhang Yimou, Ang Lee, Stephen Chow and Bruce Lee, among many others, students will explore the fundamental tensions between artistic expression and the political context of the day in addition to commercial pressures. Students will also approach issues of identity, gender, ethnicity, and modernity while developing basic film analysis techniques. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

330 Writing the Margins in Contemporary Japanese Literature This course surveys contemporary and post-modern literature in the post-war period. The examination of the self and its representation that has dominated Japanese literature since the Meiji period (1868-1912) took on a new urgency and tone in Japan’s post-war period, with many authors exploring identities that challenged the established order. For some, that
challenge was expressed through transgression and violence; for others, it was embodied in characters who lived outside of the boundaries of social acceptance. During a post-war period of general economic prosperity in which the Japanese government has famously taken pride in being a “homogenous” society, the country’s contemporary literature is consistently and remarkably populated by characters who live on the margins of that homogenous identity. This course will explore the dominant themes of the most important modern and post-modern authors of Japan, including Ōe Kenzaburo, Haruki Murakami, and Yoshimoto Banana, with particular emphasis on these marginalized characters and what they say about the “center” and the self. Satisfies the Humanistic Approaches core requirement. Offered frequently.

335 The Chinese Classic Novel: Real Illusions, Virtuous Violence, and the Romance of the State The narrative tradition in Chinese literature is a long and complex one, but while Chinese poetry is said to have reached its height in the Tang and Song Dynasties, there is a near-universal agreement that the novels of the Ming and Qing Dynasties represent the golden age of fiction in the Chinese language. These novels cover an incredible range, from pointed satire to subtle and moving romance, from magical adventures to grand political drama, and from heroic war epics to the vividly ribald. The class’s primary focus is on reading and interpreting selections from six novels: The Romance of the Three Kingdoms, The Marshes of Mont Liang, Journey to the West, The Plum in the Golden Vase, The Scholars, and The Dream of the Red Mansions. Through these texts, students gain a detailed understanding of the historical and cultural contexts of the novels, as well as a deep understanding of the ways in which the authors approached all aspects of human existence, from the practical to the religious and philosophical. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

345 Revenge and Retribution in Chinese Literature Since antiquity, many cultures have turned to retribution as a means of restoring justice. Stories about getting even through revenge abound in both highbrow and popular Chinese literature. The themes of revenge and retribution have lent themselves effectively to various literary genres throughout Chinese history, from historical biographies and classical tales to vernacular short stories and plays, extending all the way into twentieth-century ballet and film. Literature has served as an important site of inquiry into the moral and mechanisms of revenge and retribution, sometimes offering conclusions that are a good deal more ambiguous than legal and philosophical discourses about the same question. This course works through four organizing themes: The Collective (assassination and self-destruction for a larger cause); The Individual (revenge and redemption in interpersonal relationships); Modern Man and Nation Building (from the Republican Period to Socialism); and Transnational Interpretations of “China’s Hamlet”. By the end of the course students should be able to identify the relevant genres, produce effective oral and written analyses of the material, and critically and cogently reflect on how Chinese conceptions of revenge and retribution might help them think through their own beliefs about revenge, justice, forgiveness, and identity. Satisfies the Humanistic Approaches core requirement. Offered frequently.

201/202 Second Year Chinese Development of oral and written fluency at the intermediate level. Emphasis is on the acquisition of basic sentence patterns and their application in day-to-day situations. Oral and written assignments on a variety of topics are included to enhance students’ control of grammatical forms and communicative skills. Prerequisite: 201 and 202 are sequential courses: 201 or permission of instructor required for 202. 201 offered Fall term only; 202 offered Spring term only.

216 Chinese Corner: Conversation 0.25 activity unit Chinese Corner is an opportunity for Chinese language learners of intermediate level or above to practice Mandarin on a weekly basis in a non-classroom setting. The goals of this activity course are for learners to increase their oral communication skills and comprehension, get help with homework, acquire a deeper understanding of Chinese culture, and interact with other speakers. Prerequisite: CHIN 202 or equivalent. Pass or Fail only.

230 Grammar and Articulation This course focuses on patterns, translation, and the use of linguistic structures to articulate ideas in public speaking and composition writing. Course material includes a multimedia component and a grammar review. Students who have completed 300-level courses may enroll for credit. Prerequisite: CHIN 202 or permission of instructor. Offered every two years.

250 Culture and Communication This course aims to develop increased accuracy in communication skills utilizing Mandarin Chinese in a cultural context. Emphasis is on oral fluency, comprehension, and the language used in daily life. Course material includes study of films and songs with class activities and discussions geared toward further understanding of the society in which the language is spoken. Prerequisite: CHIN 202 or permission of instructor. Students who have completed 300-level courses may enroll for credit. Offered every two years.

260 Situational Oral Expression This course integrates linguistic functions and structures with culture via listening, speaking, reading, and writing activities. Course materials are derived from contemporary Chinese film, TV plays, and other media sources. The course focuses on oral fluency in Chinese through class discussions utilizing topics presented in the original media materials and their illustration of language in a cultural context. Prerequisite: CHIN 202 or permission of instructor. Students who have completed 300-level courses may enroll for credit. Offered every two years.

301 Across the Strait: Cultures in China and Taiwan Chinese language studies with specific concerns on issues related to popular culture as well as contemporary social and political conditions. This course includes a grammar review and a multimedia component, and aims for development of oral and written fluency at the advanced level with emphasis on reading, writing, and group discussion. Prerequisite: CHIN 230, 250, or 260, or permission of instructor. Offered every two years.

303 Greater China: Commerce and the Media Chinese language studies in the world of business and media. Areas of exploration include China, Hong Kong, Taiwan and their transpacific Chinese-speaking network. This course includes a grammar review and a multimedia component, and aims for development of oral and written fluency at the advanced level with emphasis on reading, writing, and group discussion. Prerequisite: CHIN 230, 250, or 260, or permission of instructor. Offered every two years.

305 From Bamboo Grove to Cyberspace: Chinese Literary Texts Now and Then Chinese language studies focusing on classical and contemporary literary texts that are available in either traditional or elec-
Asian Languages and Cultures

307 Through the Cinematic Lens: Old and New China through Film This Chinese language studies course explores traditional values and contemporary issues via film produced in China, Hong Kong, and Taiwan. The course includes a grammar review and a multimedia component, and aims for development of oral and written fluency at the advanced level with emphasis on reading, writing, and group discussion. Prerequisite: CHIN 230, 250, or 260 or permission of instructor. Offered every two years.

309 Phoenix Claws and Lion’s Head: Food and Chinese Culture Chinese language studies explores topics related to food in Chinese culture. This course includes a grammar review and a multimedia component, and aims for development of oral and written fluency at the advanced level with emphasis on reading, writing, and group discussion. Prerequisite: CHIN 230, 250, or 260, or permission of instructor. Offered every two years.

311 Chinese Thought: From the Dao to Mao In this modern Chinese language course students improve reading, writing, listening, and speaking skills through an exploration of sources related to Chinese thought. Sources are drawn from Confucian, Daoist, and Buddhist texts as well as those produced by modern political and intellectual movements. This course includes a grammar review and a multimedia component, and aims for development of oral and written fluency at the advanced level with emphasis on reading, writing, and group discussion. Prerequisite: CHIN 230, 250, or 260, or permission of instructor. Offered every two years.

Japanese

101/102 First Year Japanese Introduction and development of the four basic language skills: comprehension, speaking, reading, and writing. Acquisition of two native scripts, Hiragana and Katakana, is emphasized in 101. Emphasis is on basic sentence patterns with basic vocabulary and development of communicative skills in everyday situations. Prerequisite: 101 and 102 are sequential courses; 101 or permission of the instructor required for 102. 101 offered Fall term only; 102 offered Spring term only.

201/202 Second Year Japanese Development and practical communication skills by enhancement of oral and written skills at the intermediate level. Previously studied grammatical patterns are consolidated and expanded upon, while new ones are introduced. Prerequisite: 201 and 202 are sequential courses; 201 or permission of the instructor required for 202. 201 offered Fall term only; 202 offered Spring term only.

230 Kanji in Context In this course, students develop an understanding of Kanji and Kanji-based vocabulary and its role in Japanese daily life. Special emphasis is on accuracy in Kanji usage in writing and reading. Calligraphy is used to improve Kanji stroke orders and formation. Prerequisite: JAPN 201 or permission of instructor. The course may include some grammar review. Offered occasionally.

250 Popular Culture and Society This course examines popular culture and society through sources such as manga, animated films, and feature films. These form the basis for reading, writing, and discussion. Special emphasis is placed on speech levels, male/female speech, formal/informal speech levels, informal speech, slang, and regional dialects. Prerequisite: JAPN 202. Offered occasionally.

301 Third Year Japanese Previously studied grammatical patterns are consolidated and expanded upon, while new ones are introduced. Development of oral and written fluency and reading at the third-year level. Lesson topics focus on current as well as traditional uses. Prerequisite: JAPN 202 or permission of instructor. Offered Fall term only.

311 Communicative Japanese: The Harmony of Writing and Speaking This course is designed for students who wish to further improve their language skills in all areas: oral, aural, reading, and writing. The first half of the semester places special emphasis on writing and the second half of the semester on speaking, so that students will further develop their proficiency in these two areas as a preparation for advanced level courses. The course goal is to enable students to obtain intermediate to high intermediate level communication skills in both written and spoken Japanese. Students will be trained to write letters, messages, resumes, 2-4 page compositions, reports, speeches, and to carry on longer and more natural conversations and participate in group discussion in Japanese. Prerequisite: JAPN 301 or equivalent. Offered each Spring.

325 Shibuya Scramble Crossing: Developing Listening Skill Through TV Drama This course is designed to further advance high intermediate Japanese learners’ listening skills and to improve their vocabulary, sentence patterns and expressions as well as deepen their understanding of Japanese culture. Students explore contemporary Japanese usage and culture through Japanese TV dramas including animation and everyday listening materials. Although the focus is on listening, exposure to authentic Japanese materials will enhance students’ communicative competence in their four language skills (speaking, listening, reading and writing). Prerequisite: JAPN 311 with a minimum course grade of C- or equivalent. Offered every other year.

360 Japanese through Fiction and Film Students strengthen all four skills of reading, writing, listening and speaking by using original Japanese materials that appear in both written form and as films. Students first read an original novel or short story, building vocabulary and kanji. Later they view the film made of the story, working on listening comprehension. Activities include weekly writing assignments on readings, kanji and vocabulary quizzes, class discussion of the books and films, and writing English subtitles for the movies. Prerequisite: JAPN 311 with a minimum grade of C- or equivalent. Offered every other year.

380 Reading Modern Japanese Prose Students strengthen reading and writing skills by reading a wide variety of Japanese prose, including newspaper articles and editorials, nonfiction and fiction. Activities include writing assignments and class discussion of the readings, and a significant final research paper and presentation. The final weeks of the class are devoted to peer review of completed work on the research paper, and student presentations of research. Prerequisite: Japanese 311 or equivalent. Offered every other year.

385 Not Lost in Translation: English to Japanese Translation This course is designed to develop high intermediate level translation skills from English to Japanese. Students have an overview of the considerations that the translator should take into account when approaching texts. Particular attention is paid to understanding the sentence structural differences between English and Japanese, cross-cultural differences in stylistics, making the appropriate choice of words and phrases, and further advancing students’ expressions in the Japanese language. Although the focus is on acquiring translation skills, exposure to authen-
tic Japanese materials enhances students’ communicative competence in their four language skills (speaking, listening, reading, and writing) as well as deepen their understanding of Japanese culture. Prerequisite: JAPN 311 with a minimum course grade of C- or equivalent. Offered every other year.

ASIAN STUDIES

Director: Nick Kontogeorgopoulos, International Political Economy
Advisory Committee: Gareth Barkin, Sociology and Anthropology; Karl Fields, Politics and Government; Denise Glover, Sociology and Anthropology; Zaixin Hong, Art and Art History; Priti Joshi, English; Nick Kontogeorgopoulos, International Political Economy; Sunil Kukreja, Sociology and Anthropology; Jan Leuchtenberger, Asian Studies; Mengjun Li, Asian Languages and Cultures; Mikiko Ludden, Asian Languages and Cultures; Jennifer Neighbors, History; Lo Sun Perry, Asian Languages and Cultures; Stuart Smithers, Religious Studies; Jonathan Stockdale, Religious Studies

About the Program

The Asian Studies Program provides courses on Asian cultures, civilizations, and societies, in a broad range that includes East Asia, South Asia, and Southeast Asia, as electives for all students. The underlying assumption of all aspects of the Asian Studies Program is that the vast region labeled “Asia” is complex and diverse and that varied Asian peoples and institutions have greatly influenced, and continue to influence, human experience throughout the world. Faculty members with Asian language and area expertise are members of many different departments, and the Asian Studies Program brings together courses from multiple departments and programs for interdisciplinary engagement. In the subsidiary program of Asian Languages and Cultures (see below), students may major or minor in Japanese or Chinese. The program also offers the university’s unique Pacific Rim/Asia Study-Travel Program (see below).

The Asian Studies Program offers an Interdisciplinary Minor in Asian Studies. Students in the minor who demonstrate academic excellence and complete a one-semester senior thesis will achieve the added designation of Robert Trimble Distinguished Asia Scholar.

Students who graduate with the Interdisciplinary Minor in Asian Studies will be able to:
1. Demonstrate familiarity with the cultural traditions and contemporary societies of Asia, and understand those cultures and societies within the Asian and world contexts;
2. Analyze, understand, and discuss coherently difficult texts about those Asian cultures and societies;
3. Formulate abstract ideas and write logically and clearly in English about those Asian cultures;
4. Make informed judgments about a world of many cultures and about their own society as viewed by others.

Subsidiary Programs

Asian Languages and Cultures Program

The Asian Languages and Cultures Program offers majors and minors grounded in a strong foundation of language and draws on the broad range of culture courses offered by the Asian Studies faculty. The program offers two majors and two minors, as well as Chinese and Japanese literature courses that fulfill requirements toward the Asian Studies Minor, and language courses that meet the university’s foreign language requirement. For information on major requirements, see the Asian Languages and Cultures section of this bulletin.

PacRim Program

The Pacific Rim/Asia Study-Travel Program (PacRim) is scheduled every three years (next in Asia 2020–2021), and offers a full academic year of courses taught at different locations in Asia. Approximately 25 students participate in the program through a process of formal application. Participants prepare in advance of the scheduled study-travel year by passing specified prerequisite courses in the Asian Studies Program and a non-credit orientation taught by the PacRim Directors.

Additional Opportunities

In addition to Asian Languages and Cultures and PacRim, the Asian Studies Program offers special opportunities for all students, including the Miki Fellowship, Charles Garnet Trimble Scholarships, and Trimble scholarship grants for study abroad in Asia. Furthermore, the program provides a context for the Miki Fellowship for a post-graduate year in Japan and offers a postgraduate English-instructorship at Hwa Nan Women’s College in Fuzhou, China. For students seeking to become Robert Trimble Distinguished Asia Scholars (described below), Trimble summer research grants prior to the senior thesis are also available.

The Asian Studies Colloquium is a co-curricular series of presentations by guest speakers, special films, and other cultural events to promote campus awareness of, and knowledge about, Asia. Meetings and events occur on an irregular basis and are open to the entire university community and especially to students enrolled in courses listed under the Asian Studies Program. For information, see the Director of the Asian Studies Program.

University Requirements

Asian studies courses are represented in the First-Year Seminar program (see list of courses, below), although these do not count toward the Asian Studies Minor. Several courses in the Asian Studies program are options in the core curriculum (in Artistic and Humanistic Approaches, as well as Connections), and Chinese and Japanese language courses meet the university’s foreign-language requirement. In general, any student may take any course offered in the program without related prior study (although some upper level courses have prerequisites, as indicated in departmental listings).

Requirements for the Minor

To qualify for the Asian Studies Minor, a student must meet the requirements specified below. While students self-select their participation in the Asian Studies Program through declaration of the Minor with the Academic Advising office, each student seeking the Minor should coordinate her or his program with the Director of the Asian Studies Program and is encouraged to select a primary or secondary advisor from among the faculty members in the program.

Minor in Asian Studies

The Asian Studies Minor consists of five units, of which four are elective courses. Of the four electives two must be from the Humanities and two from the Social Sciences. One of the four elective courses must also be a core course chosen from a designated list. Detailed requirements are:

1. A total of four elective Asian Studies courses, two of which must be in the Social Sciences, and two in the Humanities.
2. Among these four electives, one must be a core course chosen from those listed below:
   a. ALC 205 Great Books of China and Japan (Humanities)
Asian Studies

b. ARTH 278 Survey of Asian Art (Humanities)
c. PG 323 Asian Political Systems (Social Science)
d. IPE 333 Political Economy of Southeast Asia (Social Science)

3. Asia 344.
4. No more than two electives can be used to fulfill the requirements of a major or another minor.
5. At least two of the four elective courses must be taken at the 300 or 400 level.
6. Good academic standing upon entering the program, overall GPA in the program of 2.5 or above, and grades of C- or better in all program courses (no Pass/Fail).
7. Upon approval of the Asian Studies Program Director, students may complete up to two of the required units of study for the minor when enrolled in a study abroad program in Asia.

Students pursuing the Asian Studies minor are encouraged, but not required, to participate in experiences such as internships, international work and study, or field research in Asia.

Variation of requirements is possible, as arranged with the Asian Studies Committee by way of the Director of the program. Courses applicable to the Asian Studies minor have no time limit.

**Humanities Elective Courses in Asian Studies:**

- ALC 205 Great Books of China and Japan (core course)
- ALC 215 Stories of the Strange: From Fox Spirits to the Monkey King in Chinese Literature
- ALC 225 Visualized Fiction: Cinematic Adaptations of Traditional Chinese Literature
- ALC 310 Death and Desire in Premodern Japanese Literature
- ALC 315 Narrative and Nation in Modern Chinese Literature
- ALC 320 Self and Society in Modern Japanese Literature
- ALC 325 Chinese Cinema: Ideology and the Box Office
- ALC 330 Writing the Margins in Contemporary Japanese Literature
- ALC 335 The Chinese Classic Novel: Real Illusions, Virtuous Violence, and the Romance of the State
- ALC 345 Revenge and Retribution in Chinese Literature
- ARTH 278 Survey of Asian Art (core course)
- ARTH 367 Chinese Art
- ARTH 368 Japanese Art
- ARTH 369 Twentieth-Century Chinese Art
- ARTH 370 Buddhist Art
- ARTH 371 East Asian Calligraphy
- ASIA 341 Asia Pop! An Exploration of Popular Culture in 20th and 21st Century East Asia
- ASIA 350 Tibet - Real, Imagined, and Perceived
- CONN 369 Power, Gender, and Divinity: the Construction of Goddesses
- ENGL 356 Bollywood Film
- ENGL 361 South Asian Fiction
- HIST 245 Chinese Civilization
- HIST 248 History of Japan: 1600 to Present
- HIST 343 Law, Society, and Justice in China
- HIST 344 Resistance, Rebellion, and Revolution in China, 1800 to the Present
- HIST 349 Women of East Asia
- HUM 330 Tao and Landscape Art
- PHIL 311 Classical Chinese Philosophy
- REL 208 Yoga and the Ascetic Imperative
- REL 233 Japanese Religious Traditions
- REL 234 Chinese Religious Traditions
- REL 300 Japananimals: Power, Knowledge, and Spirituality at the Intersection of Species
- REL 328 Religion, the State, and Nationalism in Japan
- REL 332 Buddhism
- REL 333 Asian Women and Religion
- REL 334 Vedic Religion and Brahmanism
- REL 335 Classical Hinduism
- REL 336 Tantra and Alchemy

**Social Science Elective Courses in Asian Studies:**

- BUS 471 Business in Asia
- BUS 474 Business in India and South Asia
- IPE 323 Tourism and the Global Order (cross-listed as SOAN 323)
- IPE 333 Political Economy of Southeast Asia (core course)
- PG 323 Asian Political Systems (core course)
- PG 372 Japanese Political Economy
- PG 378 Chinese Political Economy
- SOAN 225 Asian Medical Systems
- SOAN 312 Indonesia and Southeast Asia in Cultural Context
- SOAN 335 Third World Perspectives
- SOAN 380 Islam and the Media
- SOAN 395 China and Latin America: A New Era of Transpacific Relations
- SOAN 416 Modern India and Diaspora

**Robert Trimble Distinguished Asia Scholar**

To qualify as a Robert Trimble Distinguished Asia Scholar, a student must meet the following requirements:

1. All requirements, as listed above, for the Asian Studies minor;
2. One-semester senior thesis: ASIA 489, or approved research seminar course in a department participating in the program (Art, Business and Leadership, Sociology and Anthropology, Economics, English, History, International Political Economy, Politics and Government, or Religious Studies);
3. Overall GPA in Asian Studies courses of 3.5 or above, grades of C- or better in all program courses (no Pass/Fail), and a grade of B- or above in ASIA 489 (or equivalent).

**Pacific Rim/Asia Study-Travel Program Prerequisites**

PacRim students must complete three Asian Studies or Asian Languages and Cultures courses, exclusive of first-year seminars, foreign-language courses, and ASIA 489 (or equivalent). Such courses include those denominated by the ASIA or ALC prefix (listed below), or that count as Asian Studies Humanities or Social Science elective courses (listed above).

By completing all requirements for the Pacific Rim/Asia Study-Travel (PacRim) Program, including three units of prerequisite courses (with at least one of the three prerequisite units at the 300 or 400 level), and all other stated requirements, a PacRim student will have fulfilled most requirements for the Asian Studies Minor or the Robert Trimble Distinguished Asia Scholar distinction.

**Course Offerings**

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

**Seminars in Scholarly Inquiry**

See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10). Seminars in Scholarly Inquiry do not count toward the Asian Studies Minor or the Robert Trimble Distinguished Asia Scholar distinction.
SS1 129 Mao’s China: A Country in Revolution
SS1 157 Chinese Painting in the West
SS1 168 Zen Insights and Oversights

Connections courses. See Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24).

ASIA 341 Asia Pop! An Exploration of Popular Culture in 20th and 21st Century East Asia
ASIA 344 Asia in Motion
CONN 369 Power, Gender, and Divinity
HUM 330 Tao and Landscape Art

Arabic

Note: Arabic courses will not apply to the Asian Studies Minor.

101 Modern Elementary Arabic  Modern Elementary Arabic is a course designed for students who have had no previous background in Arabic. Students learn the Arabic alphabet and focus on developing their listening and speaking skills to be able to read and write simple Arabic texts and conduct a basic interaction/conversation in Arabic. Course will not apply to the Asian Studies Minor.

102 Elementary Arabic  ARAB 102 is designed for students who have completed one semester of ARAB 101. Students will focus on developing their listening and speaking skills to be able to read and write simple Arabic texts and conduct a basic interaction/conversation in Arabic. By the end of the course, students will have completed the elementary level of Modern Standard Arabic and will be qualified to move on to the intermediate level in Arabic. Prerequisite: 101 or permission of the instructor. Course will not apply to the Asian Studies Minor.

201 Modern Intermediate Arabic  This course is designed for students who have completed two semesters of ARAB 101 and 102. The overall aim of this course is the enhancement of the fundamental skills acquired in Elementary Arabic, namely: the ability to read, write, speak, and understand the language. The approach for this course will be essentially communicative; therefore the focus will remain on writing, reading, speaking, and listening, as well as gaining further insight into the cultural and social complexion of the Arabic-speaking world.

202 Intermediate Arabic  This course is designed for students who have completed ARAB 201. The overall aim of the course is the enhancement of the fundamental skills acquired in Elementary Arabic; namely, the ability to read, write, speak, and understand the language. The approach for this course is essentially communicative, therefore, the focus remains on writing, reading, speaking, and listening, as well as on gaining further insight into the cultural and social complexion of the Arabic-speaking world. Prerequisite: ARAB 201.

Asian Studies

200 Malaysian Cultures and Traditions 25 unit  Malaysian Cultures and Traditions is an introduction to the cultures, traditions, and people of Malaysia. The course aims to teach students about the diverse ethnicities that currently exist in Malaysia. Each ethnicity’s unique and distinctive culture and tradition will be introduced to students. Basic communicative Malay language necessary for transactional purposes is integrated into the course. This course is designed for students who have no prior knowledge of Malaysia and is suitable for students who intend to study abroad in Malaysia or have an interest to learn the culture and traditions of Malaysia. Offered occasionally.

341 Asia Pop! An Exploration of Popular Culture in 20th and 21st Century East Asia  For the first half of the twentieth century, China and Japan were most often viewed as sites of imperialism and war. During the second half of the twentieth century, discussions of Japan focused on its economic boom while discussion of China focused on the entrenchment of the Chinese Community Party. While this course gives attention to major political and economic developments in East Asia during the past century, the focus is on East Asia as a site of cultural production. Among the sources are critical essays in the 1910s meant to spur China towards literary and cultural revolution, anime that explores post-apocalyptic visions of Japan, and Mandopop songs that contemplate what it means to be young and modern in China today. All of these sources examine interactions within East Asia and between East and West in the development and dissemination of popular culture during the past century. Offered occasionally.

344 Asia in Motion  This course explores the interactions of Asian peoples and the commodities, social practices, and ideas which they produce across borders, both political and imagined. The course crosses disciplinary borders, as well, drawing upon divergent materials from the humanities and social sciences in an attempt to do justice to a contemporary context that could be called ‘Asia in motion.’ An underlying thesis holds that, since nineteenth-century colonialism, nations in the ‘West’ and ‘Asia’ participate in a global, dialectical movement in which notions of identity (national, cultural, ethnic, religious, territorial, linguistic) share moments of fluidity and fixity. Satisfies the Knowledge, Identity, and Power graduation requirement. Satisfies the Connections core requirement. Offered spring term only.

345 Reflective Analysis of Southeast Asian Experiential Field School 25 unit  This course is designed to allow students returning from experiential field schools in Southeast Asia to reflect on their field experiences in the region, to work collaboratively on projects related to those field experiences, and to present their projects at the annual Luce Initiative on Asian Studies and the Environment (LIASE) Southeast Asia Symposium. Prerequisite: instructor permission required. Offered occasionally.

350 Tibet – Real, Imagined, and Perceived  This course examines the country and people of Tibet by three major categories - actual Tibet, imagined Tibet, and perceived Tibet. Studying various perspectives within Tibet and externally from her neighbors, explorers, missionaries, and others, one discovers that the perceptions of Tibet range from land of barbarians to Shangri-la. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

489 One-Semester Senior Thesis  This course consists of independent research and the preparation of a significant paper of original scholarship. Each student seeking the Minor in Asian Studies as Robert Trimble Distinguished Asia Scholar must initiate a topic, identify a supervising instructor in the Asian Studies Program, and develop a plan for research, writing, and public presentation of the project (normally presentation will be in an Asian Studies Colloquium). Alternatively, a student may meet the one-semester thesis requirement for the Distinguished Asia Scholar distinction in Asian Studies by an approved research seminar in a department participating in the Asian Studies Program. For those participating in the PacRim Program, this course requires of students a research and writing project on Asian life and thought working either with the director or another faculty member of the Asian Studies Committee. Each student initiates a topic and conducts bibliographical research on campus and research on site during the year in Asia as part of the Pacific Rim/Asia Study-Travel Program. Each student presents the project for critical review by others in the group.
495 Independent Study  An independent study allows a student to pursue a specific topic not covered in existing courses, under the supervision of a faculty member. A written proposal must be submitted and agreed upon by the faculty independent study advisor. 

Prerequisite: junior standing, a contract with a supervising professor, and department approval.

Indonesian

101 Beginning Indonesian  This course introduces students to the Indonesian language. It is intended for novice to basic level students with little or no prior knowledge of Indonesian language. This course focuses on basic language skills including speaking, reading, listening, and writing. Students learn the Indonesian alphabet, basic grammar, conversation style, and engage in task-based activities set in real-life situations, while gaining an understanding of the cultural contexts in which the language is spoken. Students read and write using the Indonesian alphabet and basic grammatical structures in simple sentences, speak and understand short dialogs, introduce themselves and others, describe family relations, give directions, discuss an itinerary, describe an illness, and describe a set of chronological events. 

Offered occasionally.

102 Beginning Indonesian  This course is intended for intermediate level students with prior level students with prior knowledge of basic Indonesian grammar and vocabulary. This course focuses on basic language skills including speaking, reading, listening, and writing. Students learn to write in longer and more complex ways, including short stories, engage in task-based activities mirroring real-life situations, while gaining an understanding of the cultural contexts in which the language is spoken. Students learn to listen and understand short dialogs, news stories, and video clips, while gaining proficiency in using small talk to start a conversation, speaking on behalf of a group, talking about the climate and weather, hobbies and entertainment, culture and tradition, as well as discussing the latest news. 

Prerequisite: INDO 101 or instructor permission. 

Offered occasionally.

Thai

101 Elementary Thai  This course is an introduction to spoken and written Thai, and is designed for students with no prior knowledge of Thai. The course emphasizes the development of comprehension skills, spoken language competence, and elementary reading and writing skills. By the end of the course, students should be able to carry on a simple conversation in Thai, read Thai words with correct pronunciation, and write words and phrases in Thai. This course satisfies the university foreign language requirement and the language requirement in the Asian Studies Emphasis.

Offered occasionally.

102 Elementary Thai  This course continues the introduction to spoken and written Thai, and is designed for students who have completed THAI 101. The course emphasizes the development of comprehension skills, spoken language competence, and elementary reading and writing skills. By the end of the course, students should be able to carry on a simple conversation in Thai, read Thai words with correct pronunciation, and write words and phrases in Thai. This course satisfies the university foreign language requirement and the language requirement in the Asian Studies Emphasis. 

Prerequisite: THAI 101 or instructor permission. 

Offered occasionally.

Course Offerings: Asian Languages and Cultures

See listings under the Asian Languages and Cultures Program for course descriptions and other relevant information.

ALC 205 Great Books of China and Japan (Asian Studies Minor core course and Humanistic Approaches Core)

ALC 215 Stories of the Strange: From Fox Spirits to the Monkey King in Chinese Literature (Humanistic Approaches Core)

ALC 225 Visualized Fiction: Cinematic Adaptations of Traditional Chinese Literature (Humanistic Approaches Core)

ALC 310 Death and Desire in Premodern Japanese Literature (Humanistic Approaches Core)

ALC 315 Narrative and Nation in Modern Chinese Literature (Humanistic Approaches Core)

ALC 320 Self and Society in Modern Japanese Literature (Humanistic Approaches Core)

ALC 325 Chinese Cinema: Ideology and the Box Office (Humanistic Approaches Core)

ALC 330 Writing the Margins in Contemporary Japanese Literature (Humanistic Approaches Core)

ALC 335 The Chinese Classic Novel: Real Illusions, Virtuous Violence, and the Romance of the State (Humanistic Approaches Core)

JAPN 385 Not Lost in Translation: English to Japanese Translation

BIOCHEMISTRY

Students interested in a degree in Biochemistry should consult the Chemistry section in this Bulletin.

Students interested in a degree in Molecular and Cellular Biology should consult the Biology section in this Bulletin.

BIOETHICS

Director: Suzanne Holland, John B. Magee Professor of Science & Values, Religious Studies and Honors

Advisory Committee: Kristin Johnson, Science, Technology, & Society; Jung Kim, Exercise Science; Benjamin Lewin, Sociology and Exercise Science.
About the Program

The interdisciplinary program in Bioethics (BIOE) is unique at Puget Sound, and rare among liberal arts colleges. This program of study encompasses work in the fields of biology, natural science, neuroscience, religion, philosophy, literature, sociology, psychology, politics, economics, and business. It enables students to study topics at the intersection of the life sciences and the humanities (broadly conceived) such as: regenerative medicine and human stem cell research, global health, race, culture, gender and health care, global warming, human and animal experimentation, genetic screening and gene therapy, human population growth, genetics, embryology, reproduction, death and dying, disability studies, neuroscience, and human/animal psychology. The program prepares students for analyzing and understanding the ethical, moral, cultural and historical dimensions of problems at the nexus of these topics. Faculty drawn from several disciplines and departments provide the unique cross-disciplinary perspective that is the hallmark of this concentration.

The Bioethics Program at Puget Sound helps students to analyze, understand, and integrate the challenging issues facing society as a result of advances in medicine, health and science. In keeping with its interdisciplinary nature the Program in Bioethics, through its design and course work, highlights the following University of Puget Sound curricular goals: An understanding of the interrelationship of knowledge; familiarity with diverse fields of knowledge; the ability to think logically and analytically; the ability to communicate clearly and effectively, both orally and in writing; informed appreciation of self and others as part of a broader humanity in the world environment; an acknowledged set of personal values.

The interdisciplinary emphasis program in Bioethics helps to prepare students for a broad range of future careers, or for advanced study in medicine and the health professions, the sciences, research, teaching, law, journalism, public policy, hospital chaplaincy, biotechnology, social work, clinical ethics consultation, genetic counseling, and Master’s programs in Bioethics. Students who successfully complete the program receive a designation on the transcript of “Emphasis in Bioethics.”

Requirements for the Interdisciplinary Emphasis in Bioethics

Completion of six units to include:

A. BIOL 101 or 111. These courses can satisfy the Natural Scientific Core requirement.
B. BIOE/REL 292 or BIOE/PHIL 292.
C. Three elective units at the 200-level or above drawn from at least two of the three elective categories: Scientific, Ethical, and Humanities & Social Sciences. Elective options are listed below.
D. BIOE 400 Bioethics Integration Seminar.

Scientific
BIOL 212 Cell Biology
BIOL 213 Genetics
BIOL 362 Nanobiology
BIOL 370 Conservation Biology
BIOL 375 Developmental Biology
BIOL 404 Molecular Biology
BIOL 441 Cancer Biology
EXSC 331 Scientific Writing in Exercise Science
NRSC 201 Foundations of Neuroscience
NRSC 350 Methods in Neuroscience

Ethical
CONN 393 The Cognitive Foundations of Morality and Religion*
PHIL 105 Neuroethics and Human Enhancement
PHIL 228 Philosophy of Mind
PHIL 280 Social & Political Philosophy
PHIL 281 Moral Philosophy
PHIL 285 Environmental Ethics
PHIL 378 Philosophy of Law
REL 265 Thinking Ethically
STS 333 Evolution and Ethics*

Humanities & Social Sciences
BUS 478 Environmental Law
COMM 252 Health Communication Campaigns
CONN 393 Art-Scientific Inquiry into the Intersection of Art, Science, and Technology*
CONN 320 Health and Medicine*
CONN 357 Animal Minds*
CONN 387 Never-Never Land*
CONN 478 Animals, Law, and Society*
ECON 225 Environmental and Natural Resource Economics
ENGL 348 Illness and Narrative: Discourses of Disease
IPE 331 The International Political Economy of Food and Hunger
IPE 389 Global Struggles Over Intellectual Property*
SOAN 225 Asian Medical Systems
SOAN 360 Sociology of Health and Medicine
SOAN 365 Global Health
SOAN 370 Disability, Identity, and Power
STS 301 Technology and Culture
STS 318 Science and Gender*
STS 366 History of Medicine
* Can also satisfy the Connections core requirement.

Notes
1. BIOE/REL 292 or BIOE/PHIL 292 is a prerequisite for BIOE 400.
2. For students with a major in science (any major in Biology, Chemistry, Exercise Science, Geology, Physics, and Psychology departments, including the Natural Science majors) only one scientific elective may count unless special exception is granted from the Advisory Committee.
3. Students who study abroad may apply one approved course toward the elective requirement unless an exception is granted by the Program Director.

Course Offerings

292 Basics of Bioethics (Version cross-listed as REL 292.) This course is an examination of Western philosophical and religious understandings of moral issues brought on by advances in health care, science and technology. In this course, students will learn the “Principles approach” to bioethics, as well as other ethical approaches to the difficult moral issues raised by contemporary medical science and its clinical applications. To that end, case analysis will be used extensively in this course. The course is designed to help facilitate connections for students between medical/scientific advances, ethics, religious values, and American public policy about technology and health care. Each class session will alternate between theoretical and medical/scientific considerations, and the concreteness of bio-

Notes
ethics. Cross-listed as REL 292. Students may not receive credit for both BIOE/REL 292 and BIOE/PHIL 292. Offered frequently.

292 Basics of Bioethics (Version cross-listed as PHIL 292.) This course is an examination of Western philosophical understandings of moral issues brought on by advances in health care, science and technology. In this course, students will learn the "Principles approach" to bioethics, as well as other ethical approaches to the difficult moral issues raised by contemporary medical science and its clinical applications. Cross-listed as PHIL 292. Students may not receive credit for both BIOE/PHIL 292 and BIOE/REL 292. Offered frequently.

392 Practicum: Clinical Bioethics This course is an experiential learning course that focuses on the practical application of ethical principles and philosophical reasoning in a clinical health care setting. This course provides the opportunity for students to learn how to identify ethical issues and properly to address them in the clinical setting, as well as to learn the practical approach to real-life clinical issues. Students split time between the classroom and the on-site hospital setting, taking information learned in different clinical settings and learning how to work through ethics issues. Students also learn typical duties of a clinical bioethicist including: consultations, education, and policy development/review. Prerequisite: BIOE/REL 292 or BIOE/PHIL 292 and permission of instructor. Course alternates between on-campus and off-campus locations each week.

400 Bioethics Integration Seminar This is the capstone course required of all students who aim to attain the interdisciplinary curricular designation of Emphasis in Bioethics. In this senior seminar students pull together the ethical implications of the courses they have taken toward the BIOE designation. Students individually or collaboratively examine a bioethical case issue from the variety of disciplinary perspectives that comprise the program in an attempt to understand the full complexity of the issue. The course rotates among Bioethics core faculty from different disciplines, who help model for students the challenges and promises of cross-disciplinary integration on particular issues of relevance. The following themes serve as semester-long focal points depending on which of the core faculty is teaching the course in any given year: Moral Philosophy, Ethics of Research, Narrative Medicine, Health Inequalities, Patient/Physician Interactions, Animal Models in Science & Art, Emerging Technologies in Science & Ethics. Prerequisite: BIOE/REL 292 or BIOE/PHIL 292. Offered frequently.

---

**BIOLOGY**

Professor: Alyce DeMarais; Joel Elliott; Susannah Hannaford; Andreas Madlung, William L. McCormick Professor of Natural Sciences, Chair; Leslie Saucedo; Alexa Tullis; Stacey Weiss; Peter Winberger, Director, Slater Museum of Natural History

Associate Professor: Peter Hodum (on leave 2018-2019); Mark Martin (on leave Spring 2019); Siddharth Ramakrishnan, Jennie M. Caruthers Chair in Neuroscience (on leave Fall 2018)

Associate Professor: Bryan Thines (on leave Fall 2018)

Assistant Professor: Carrie Woods

Visiting Assistant Professor: Carrie Woods

Instructor: Joyce Tamashiro

**About the Department**

The Biology Department offers a breadth of courses in modern biology for science majors and courses on contemporary topics in biology for non-majors. Science education for non-majors is provided through a number of courses that meet first-year seminar, Natural Scientific Approaches and Connections core requirements. The curriculum for majors covers modern biology from molecules and cells through organisms, populations, and ecosystems, and emphasizes the conceptual, historical, and technical progression of biological science. Specialization in specific areas of biology is made possible by offering a variety of advanced elective courses. The Biology majors can be used as preparation for graduate school or professional careers in technical fields, the health sciences and education.

The Biology Department promotes close contact between faculty and students through faculty-taught laboratories and a highly organized student/faculty research program. The department has well-equipped programs for faculty-directed student research in areas such as cell and molecular biology, physiology, ecology, and evolutionary biology. A unique program for the undergraduate is instruction in the techniques of electron and confocal microscopy and their application to biological problems. For marine and other animal studies, the department maintains a cooperative agreement with Pt. Defiance Zoo and Aquarium. The James R. Slater Museum of Natural History serves not only the students, faculty, and staff at the University of Puget Sound but also the entire Northwest region as a resource for teaching and research.

The curriculum offered in the Biology Department enables students to

1. Acquire introductory and in-depth learning in the field of biology through classroom and laboratory exercises;
2. Develop intellectually through the practice of the following skills: Learning from oral presentations and reading; Communicating clearly and well both orally and in writing; Locating and analyzing scientific literature; Analyzing and solving problems; Engaging in scientific observation and experimentation in both the field and in the laboratory; Engaging in quantitative analysis, graphing of data and the use of statistics in data evaluation;
3. Work comfortably with the extensive array of techniques and instrumentation used in biological research;
4. Collect, interpret, and present scientific data in written reports;
5. Understand the relevance of biology to contemporary issues and problems in society;
6. Acquire a broad background in biology to provide a basis for sustained professional development.

**General Requirements for a Degree in Biology or Molecular and Cellular Biology**

The Biology and Molecular and Cellular Biology degrees offered at Puget Sound are based on similar principles. Both degrees are rooted in the fundamentals of living systems, their relationship to each other, their evolution, structure and function. Both degrees further emphasize the use of experimental approaches and the development of scientific writing skills. The Biology degree offers a broad approach to the living world stressing both molecular-cellular aspects and organismal-ecological aspects of life. In contrast, the Molecular and Cellular Biology degree emphasizes the molecular and genetic basis of organisms and the biochemical adaptations and pathways that unify and distinguish them. In both degrees, students develop interdisciplinary skills in biology and chemistry.

**General Requirements for the Major or Minor**

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound.
Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

**Requirements for the Bachelor of Science in Biology**

Completion of a minimum of 15 units of Biology and supporting courses to include:

1. Biology core courses: BIOL 111, 112, 211, 212, 213 and one unit from the following: 332 or 334;
2. Biology electives: Three additional units in biology courses numbered at 312 or above, excluding 398. GEOL 306 (Fossil Record) may count as one of the three units. CHEM 461 may count as one of the three units. One unit may count toward the major from research or independent study courses: BIOL 390, 392, 490, 491, 495, 496;
3. Three units in chemistry: CHEM 110, 120, 250; OR 115, 230, 250;
4. One unit of mathematics: MATH 180 or 181;
5. Two additional units from the following: One unit from BIOL 312 or higher; CHEM 251 or higher; CSCI 141 or higher, EXSC 222; GEOL 101 or higher; MATH 150 or higher; NRSC 201, 350; PHYS 111 or higher.

**Requirements for the Bachelor of Science in Molecular and Cellular Biology**

Completion of a minimum of 16 units of Biology and supporting courses to include:

1. Four units in Biology: BIOL 111, 212, 213, 404
2. First-year Chemistry: CHEM 110, 120 OR 115, 230
3. Organic Chemistry: CHEM 250, 251
4. Biochemistry: CHEM 460, 461 (Students who satisfy the first-year chemistry requirement with CHEM 110 and 120 must also complete CHEM 231 prior to enrolling in CHEM 460)
5. Two units of Mathematics: MATH 180, 181; MATH 260 may substitute for MATH 181
6. Two units of analytical science from the following: PHYS 111/112 or 121/122; MATH 150 or higher; CSCI 141 or higher;
7. Two additional units in Biology, one of which must be at the 300 or 400 level (excluding 398), and which can include one unit of research credit (BIOL 390, 490, or 491). Students with an interest in evolutionary, environmental, or ecological applications of molecular biology should strongly consider BIOL 112 and 360 as their electives. Students may not use BIOL 361 to satisfy this requirement.

**Requirements for the Minor**

Completion of five units of Biology to include BIOL 111 and 112, a minimum of one course from the following group (BIOL 211, 212, 213) and two elective units (BIOL 211 or higher; GEOL 306, Fossil Record, may count as one of the two units). BIOL 398 may not count towards the Biology Minor.

**Notes**

1. The following courses do not satisfy major or minor requirements: BIOL 101, 102, 201, 205, 398, 498, or 499; INTN 497.
2. Students majoring in Molecular and Cellular Biology may not also major or minor in Biology, Chemistry, or Biochemistry. There is no minor in Molecular and Cellular Biology.
3. Majors are encouraged to participate in the undergraduate research program within the department. Courses in the undergraduate research program include Directed Research (290/390/490), Introduction to Biological Research (392), Science and Mathematics Seminar Series (398), Biology Colloquium (201), and Senior Thesis (491). Students may begin doing research with faculty members at any time in their career. Students who wish to do a senior thesis project should enroll in Biology Colloquium (201), Introduction to Biological Research (392), and either one unit of Senior Thesis (491) or one unit of Senior Directed Research (490) and one of Senior Thesis (491). Students may count one unit of research (390, 490, or 491) as one of the advanced Biology electives required for the degree. Students doing research must consult with and gain approval from a Biology faculty research adviser, and must submit a research proposal.
4. Students interested in graduate or professional school are urged to participate in the research program as well as to complete one year of organic chemistry, one year of calculus, one year of physics, and one year of a foreign language.
5. Majors who wish to obtain secondary-level teaching certification may do so by satisfying the MAT requirements of the School of Education. Details and requirements may be obtained from the School of Education.
6. All courses required for the majors or minor, with the exception of BIOL 495/496, must be taken on a graded basis. The pass/fail grading option is not recommended for any student planning to enter graduate or professional school. Biology activity classes (BIOL 201, 205, 398) cannot be applied towards the Biology majors or minor.
7. To be eligible to graduate with departmental honors, a student must maintain a GPA in accordance with university regulations for such distinction and must complete an independent research project.
8. Coursework completed more than ten years prior to completion of degree requirements may not be counted towards fulfilling degree requirements for the majors or the minor.
9. At least two of the Biology electives and one of the Molecular and Cellular Biology electives must be completed on the Puget Sound campus.
10. For Biology majors, at least two of the Biology elective courses (BIOL 312 and above) must have a lab component. One unit of Junior or Senior-level Research (BIOL 390, 490, or 491) can be used to fulfill one of these lab course requirements.

**Course Offerings**

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

**Seminars in Scholarly Inquiry.** See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI1/SSI2 110 Examining Dogs Through the Lens of Science
SSI1 159 Evolution for All
SSI1 165 Never Really Alone: Symbiosis and Parasitism Around and Within Us

**Other courses offered by Biology Department faculty.** See Connections in the Core Curriculum section of this Bulletin for course descriptions.

CONN 303 Art-Science: Inquiry into the Intersection of Art, Science, and Technology
Satisfies the Connections core requirement.

CONN 307 Hooch: The Natural and Social Science of Liquor
Satisfies the Connections core requirement.

CONN 313 Biomimicry and Bioart
Satisfies the Connections core requirement.
ENVR 202 Tools in Environmental Science
ENVR 203 Topics in Environmental Science
ENVR 335 Thinking about Biodiversity
Satisfies the Connections core requirement.
ENVR 400 Senior Seminar in Environmental Studies
STS 302 Cancer and Society
Satisfies the Connections core requirement.
STS 318 Science and Gender
Satisfies the Connections core requirement.

101 Introduction to Biology This course introduces the organizing principles of biology through a study of selected cellular, organismal, and ecological systems. Relevant topics are used to illustrate fundamental concepts. The course takes a thematic approach in which the chosen examples relate to a particular topic. The use of a theme topic highlights the interconnection of the various fields of biology and illustrates the complexity of relevant problems. Laboratory is required. Credit for BIOL 101 will not be granted to students who have completed BIOL 111. Students who decide to major in Biology after receiving credit for BIOL 101 should talk to the Biology chair. Satisfies Natural Scientific Approaches core requirement. Offered each semester.

102 Evolution and Biology of Sex This course introduces students to important biological concepts and approaches of study, and applies them to questions about sexual reproduction. Topics include: scientific inquiry, evolution, the central dogma of molecular biology, basic genetics and inheritance, development, behavioral ecology, and population growth. The course takes a decidedly comparative approach, utilizing information from many different species, including humans. Laboratory is required. Satisfies the Natural Scientific Approaches core.

111 Unity of Life: Cells, Molecules, and Systems A contemporary approach to the major themes of modern biology. Sub-cellular, cellular, genetic, and physiological aspects of biological systems are explored in the context of the scientific process. Laboratory is required. Satisfies Natural Scientific Approaches core requirement. Offered each semester.

112 Evolution and the Diversity of Life This lecture/laboratory course explores the mechanisms of evolution and the vast diversity of life to which it gave rise. The characteristics that define different groups of organisms, and the evolutionary relationships among these groups are explored. Structure and function relationships are emphasized throughout the course. Laboratory is required. Some labs involve the dissection of plants, animals, and fungi. Some labs may involve the collection and sacrificing of zooplankton and insects as well as the handling of plant and animal parts. Satisfies Natural Scientific Approaches core requirement. Prerequisite: none, BIOL 111 recommended. Offered each semester.

201 Biology Colloquium 0.25 activity unit This course introduces biology majors to the professional activities of departmental faculty and staff. It includes a series of presentations by biology faculty relating their interests in both teaching and research, with a description of current research projects. It also includes orientation to the research support facilities provided by the biology department. Prerequisite: two semesters of biology credit. Offered fall term only.

205 Natural History Museum Docent 0.25 activity unit This course is designed to provide a general overview of natural history museum practices that support the main functions of these institutions: research and education. Natural history museums are invaluable archives of Earth’s biodiversity and were the primary locus for biological research in the 18th and 19th centuries. The vast collections of specimens in natural history museums provide a temporal and geographic record of life unmatched by written or illustrated accounts. They document variation—the foundation of evolution—in time and space and allow biologists to make comparisons that are difficult or impossible to observe in the field. Students learn about the resources housed in the Slater Museum of Natural History and be trained as Docents, learning and developing stories, providing tours, staffing open hours and Nights at the Museum and teaching museum curricula in K-12 schools. Offered occasionally.

211 General Ecology An introduction to the interaction of individuals in a population, populations in a community, and communities in ecosystems. Laboratories are designed to illustrate ecological principles and give experience in approaches and techniques of ecology. Experimental design, quantitative data analysis, and statistics are emphasized throughout the course. Prerequisite: BIOL 111, 112. Offered each semester.

212 Cell Biology The structure, metabolism, and specialized activities of eukaryotic cells are the major lecture topics. Complementary laboratories focus on microscopy and biochemical techniques. Data analysis is highly emphasized throughout the course. Prerequisite: BIOL 111; one year of college chemistry; CHEM 250 recommended. Offered each semester.

213 Genetics This course introduces students to the principles of classical and modern genetics. The laboratory illustrates major concepts in genetics through directed inquiry experiments. Prerequisite: BIOL 111; one year of college chemistry. Offered each semester.

290 Directed Research Credit, variable up to 1 unit This course provides a laboratory/field research experience for sophomores under the direction of a faculty mentor. Students may initiate a project or join a research project in the mentor’s lab. Student and mentor fill out a departmental contract. A written research paper and a reflective summary of the research experience must be submitted for a final grade. Students are strongly encouraged to take BIOL 201 before choosing a research project. May be repeated up to 1 unit. Prerequisite: Permission of instructor. Offered each semester, including summer.

332 Molecular Biology and Physiology of Plants A study of growth, nutrition, and metabolism of the higher plants at the organismal, cellular, and molecular levels. Laboratory demonstrates data collection methodology, data analysis, and experimental design in plant physiology. Prerequisite: BIOL 212; one year of college chemistry; BIOL 112 recommended. Offered spring term only.

334 Comparative Animal Physiology A study of function at the systems and cellular levels in a variety of animal forms with emphasis on fundamental physiological principles. Physiological adaptation to different habitats is also discussed. Laboratory involves application of various experimental techniques. Lab is required. Some labs require the dissection of earthworms, the use of crab blood, and may require the use of live tissue preparations. Prerequisite: BIOL 112, 212; one year college chemistry; BIOL 211 or MATH 160 recommended. Offered fall term only.

340 Animal Communication This course examines the production, transmission and reception of animal communication signals in different sensory modalities, including acoustic, visual, chemical, and short-range sensory modes. In addition, the course explores the evolution and function of such signals as mechanisms to transfer information and bias decision making. Throughout the semester, students draw upon theory from ecology, physiology and evolution, as well as the physical sciences and economics. Prerequisite: BIOL 112; 211 recommended. Offered occasionally.
350 Microbiology  Microbiology is the biology of two of the three Domains of life (the bacteria, the archaea, and the viruses of both) as opposed to eukaryotic organisms. This course explores three aspects of microbiology – diversity, ecology, and interactions with other organisms (including pathogen/host relationships in medical microbiology and more mutualistic associations such as symbioses). A term paper exploring the natural history of a particular microbe or related topic is required for this course. The laboratory includes basic microbiological techniques, classic experiments, and introduces current paradigm shifts in microbiology, including sociomicrobiology, microbial genomics, quorum sensing, and biofilms. Student teams carry out and write a report on an independent lab project of their own design. Students also read and discuss “cutting edge” journal articles showcasing recent advances in microbiology, and present those papers to their peers. Prerequisite: BIOL 212, one year college chemistry, and CHEM 250. Offered each year.

360 Evolution  Evolution is fundamental to understanding the big why and how in biology. Beginning with the fundamentals of population genetics, this course explores a diverse array of topics such as speciation, mass extinctions, adaptive radiation, molecular evolution, systematics, disease and conservation biology. Prerequisite: BIOL 112 or 213.

361 Biochemical Pathways and Processes  This course deals with the structure and function of proteins, carbohydrates, fats, and nucleic acids at the cellular and molecular levels. The course emphasizes both the interrelationships among major metabolic pathways, and how modern techniques are applied to study biomolecular structure and function. The course is suitable for students interested in health-related fields as well as those interested in broader applications. There is no laboratory associated with this course. This course does not fulfill a requirement for a degree in either Biochemistry or Molecular and Cellular Biology. Credit for BIOL 361 will not be granted to students who have completed CHEM 461. Prerequisite: BIOL 212; one year college chemistry and CHEM 250; BIOL 213 recommended. Offered Spring term.

362 Nanobiology  This course offers students an introduction to the field of nanobiology. Nanotechnology is becoming a new frontier in biological explorations and manipulation. Engineering tools and techniques have been used to expand biological research, enrich the medical field, as well as alter food and materials. Fast expanding, nanobiology is becoming a part of the cultural lexicon with ramifications in both ethical and cultural aspects of everyday life. This course explores these themes, with overviews of methodologies and future technology. Prerequisite: BIOL 101, 111, or 112; and either CHEM 110/115 or PHYS 111/121. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered occasionally.

363 Biophysics  This course explores the principles of physics applied to living systems. Topics include diffusion, hydrodynamics and the low Reynolds-number world, importance of entropy and free energy, entropic forces, molecular machines, membranes, and nerve impulses. Written and oral scientific communication is emphasized. This course is appropriate for junior or senior undergraduates in the sciences, particularly physics and biology. No specialized knowledge of biology or physics is expected, but a facility with algebraic manipulations and a working knowledge of calculus is needed. Crosslisted with PHYS 363. Prerequisites: Math 180 and either Physics 111 or 121 are required, as is either Biology 212 or a previous 300-level course in biology or physics, or permission of instructor. Offered frequently.

364 Marine Invertebrate Zoology  Marine Invertebrate Zoology takes advantage of the rich marine biota of the Salish Sea to introduce students to the principles of animal organization and biodiversity. Emphasis is placed on homology and convergence, diversity and complexity, and is presented in a phylogenetic and ecological context through the study of form and function of living and preserved specimens. In addition to the basics of invertebrate anatomy, development, ecology and evolution, this course includes analysis of evolutionary changes and discussion of the fossil record. The course includes a laboratory component offering hands-on experience working with marine invertebrates from the DNA to the whole organism level. Prerequisite: BIOL 112; BIOL 111 recommended.

365 Applied Bioinformatics  This course introduces students to the principles and practical applications of bioinformatics in the analysis of genomic data. Students learn how to use bioinformatics software to evaluate and analyze genomic data to answer questions in molecular and evolutionary genetics. Prerequisite: BIOL 213. Offered frequently.

370 Conservation Biology  This course focuses on biological concepts and techniques fundamental to the science of conservation biology. To understand mechanisms that drive the loss of biological diversity and approaches to address those threats, the course explores a variety of topics including extinction processes, population dynamics, population genetics, habitat fragmentation, invasive species, protected area design, and restoration ecology. The laboratory component involves field work, including a full weekend field trip, and quantitative computer simulations. Prerequisite: BIOL 211 and junior or senior standing. Offered fall term only.

374 Mammalian Cell Microanatomy  Mammals are composed of a number of highly integrated physiological systems, the tissues and organs, each with characteristic structure and function. This course combines aspects of histology, cell biology, and physiology to analyze the cells and tissues of mammals. The principal goal of this course is to learn the structure and function of normal mammalian tissues. Key experiments that have produced our understanding of cell structures and function are analyzed. Prerequisite: BIOL 212; one year of college chemistry. Offered occasionally.

375 Developmental Biology  Contemporary theories on differentiation and descriptive patterns of development with emphasis on animals. The laboratory deals with a variety of invertebrates and vertebrates including some experiments with living materials. Alternative exercises are provided for students who prefer not to work with living animals. Prerequisite: BIOL 111; one year of college chemistry; BIOL 213 recommended. Offered frequently.

376 One: Our Symbiotic Planet  This course is designed for juniors and seniors interested in learning more about the diversity, depth, and breadth of associations between organisms. Such associations and their study range from mutualism to parasitism, from viruses to cetaceans, from biochemical to ecological approaches. The first part of the course explores the history and paradigms in the study of symbioses, using specific case studies and journal articles. The second part of the course involves critical analysis of current peer reviewed journal articles by experts in the field, who will “tele-visit” the classroom to discuss their work with students. Finally, there are individual and group projects exploring a student-chosen specific association of particular interest. There is no laboratory associated with this course. Offered occasionally.

377 Field Botany  This course explores vascular plant evolution and ecology and introduces students to identification of the local flora. Lectures cover vascular plant morphology, evolutionary history, systematics, life-history trade-offs, and ecological interactions. Labs focus on family recognition and species identification, both in the lab and in the field, as well as alter food and materials. Fast expanding, nanobiology is becoming a new frontier in biological explorations and manipulation. Engineering tools and techniques have been used to expand biological research, enrich the medical field, as well as alter food and materials. Fast expanding, nanobiology is becoming a part of the cultural lexicon with ramifications in both ethical and cultural aspects of everyday life. This course explores these themes, with overviews of methodologies and future technology. Prerequisite: BIOL 101, 111, or 112; and either CHEM 110/115 or PHYS 111/121. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered occasionally.
the field. Numerous in-class field trips are required. **Prerequisite: BIOL 211. Offered occasionally.**

378 **Vertebrate Biology** A survey of the major groups of vertebrates with emphasis on evolution, adaptation, morphology, ecology, and behavior. Vertebrates of the varied habitats of the Pacific Northwest are studied in lab and field. Laboratory may involve dissection of vertebrate animals. **Prerequisite: BIOL 112. Offered occasionally.**

379 **Ornithology** This course examines the origin, speciation, diversity, ecology, behavior, and conservation of birds. The laboratory component will include field trips as well as draw from the Slater Museum's extensive bird collection for studies of avian taxonomy, identification, anatomy and physiology. **Prerequisite: BIOL 211. Offered occasionally.**

390 **Directed Research** Credit, variable up to 1 unit. This course provides a laboratory/field research experience for juniors under the direction of a faculty mentor. Students may initiate a project or join a research project in the mentor's lab. Student and mentor fill out a departmental contract. A written research paper, a reflective summary of the research experience, and an oral or poster presentation must be submitted for a final grade. Students are strongly encouraged to take BIOL 201 before choosing a research project. **May be repeated up to 1 unit. Prerequisite: Permission of instructor. Offered each semester, including summer.**

392 **Introduction to Biological Research** 0.5 unit. The main audience for this course are students interested in a) preparing a research proposal that they want to submit for funding to the University of Puget Sound Summer Research Program, and b) doing full-time research over the summer following the course with a Puget Sound faculty member in the sciences. During the course students will match up with a research advisor, learn techniques on how to write an effective proposal, and become familiar with general research procedures, and aspects of research ethics. Open to second and third year students. **Prerequisite: Biology majors: BIOL 211, 212 (may be taken concurrently); MCB majors: BIOL 212; or by permission of instructor. Offered spring term only.**

395 **The History, Utility, and Practices of Natural History Museums** 0.5 unit. This course is designed to provide a general overview of natural history museum uses and practices. Natural history museums were the primary locus for biological research in the 18th and 19th centuries. They represent invaluable archives of Earth's biodiversity; their vast collections of specimens provide a temporal and geographic record of life unmatched by written or illustrated accounts. They document variation—the foundation of evolution—in time and space and allow biologists to make comparisons that are difficult or impossible to observe in the field. Natural history museums are an incredible resource for researchers with interests in evolution, ecology, zoology, botany and environmental change. They are phenomenal venues for teaching and engaging students ranging from young children to senior citizens. And they are sources of inspiration for scientists and artists. In this course students learn the history of natural history collections, engage in the practices of natural history museums, learn the myriad ways that natural specimens have been used in research, and do an independent project. **Offered occasionally.**

398 **Science and Mathematics Seminar Series** 0.25 activity unit. This course promotes active and regular attendance at science and mathematics seminars. Students attend a minimum of 12 full-length science or mathematics seminars each semester and write a summary of each presentation attended. Students are free to meet the minimum seminar requirement according to their interests and class schedule, but are strongly encouraged to attend the Thompson Hall Science and Mathematics Seminar Series to at least partially fulfill the 12 seminar requirement. **Offered each semester. May be repeated for credit.**

404 **Molecular Biology** Molecular Biology is the study of structure, organization, and regulation of genetic material at the molecular level. This class emphasizes modern genetics and genomics, and introduces students to techniques used in molecular biology both in lecture and in the lab. **Prerequisite: BIOL 212 and 213; one year of college chemistry. Offered each semester.**

411 **Advanced Ecology** This course provides an in-depth examination of major ecological fields, including ecophysiology, island biogeography, community ecology, and ecosystem ecology. Current ecological research is used to introduce major concepts and methods, foster critical thinking and discussion, and to introduce issues of experimental design and analysis and different approaches to ecology. This course enhances skills that are critical for ecologists including written and oral communication skills, quantitative and programming skills. **Prerequisite: BIOL 112 and 211. Offered frequently.**

434 **Neurobiology** An examination of the biology of nerve cells and nervous systems through lectures and discussion of recent research. Topics include cell biology of the neuron, synaptic interactions and the neural bases of learning and memory, the neural circuitry underlying behavior, and developmental neurobiology. Emphasis is placed on students' oral and written evaluations of scientific literature. **Prerequisite: BIOL 212; one year of college chemistry; junior or senior standing; permission of instructor. Offered frequently.**

441 **Cancer Biology** This course examines genetic alterations that contribute to cancer and how they disrupt normal regulation of cell growth. Several specific mechanisms that promote cancer progression are examined in detail, providing a platform for thoughtful consideration of current therapeutic approaches. **Prerequisite: BIOL 212, 213; one year of college chemistry. Offered occasionally.**

472 **Animal Behavior** This course provides a survey of key concepts, theories and models in the field of Animal Behavior, integrating behavioral analyses into an explicitly evolutionary framework. Students discuss behaviors important to reproduction, such as selecting mates, and those important to survival, such as finding food and avoiding predators. For each of these contexts, students ask both “proximate” and “ultimate” questions. Proximate questions concern the mechanistic causes of behavior, including the genetic, hormonal, neural and environmental influences on the development and expression of behavior. Ultimate questions of behavior concern how behavior is shaped and constrained by ecology and evolutionary history. Students actively discuss modern theory, engage in observational and experimental study, and develop an innovative research proposal. **Prerequisite: BIOL 211. Offered frequently.**

477 **Marine Biology** The marine environment encompasses 99% of the Earth's biosphere and contains an incredible diversity of microbial, algal, and animal life forms. This course examines the biology of these organisms and the abiotic (e.g., salinity, nutrients, water currents and tides) and biotic factors (e.g., competition, predation, symbioses) that influence their distribution and abundance. Specific topics include primary and secondary production, rocky intertidal biodiversity, estuaries, subtidal communities, coral reefs, pelagic and deep sea communities, impacts of humans on the ocean, and conservation. Lecture periods include discussions of primary literature and student presentations. Laboratory sessions involve field work, laboratory analyses, report writing, and multimedia presentation of project results. **Prerequisite: BIOL 211; GEOL 105 recommended. Offered fall term only.**
490 Directed Research  Credit, variable up to 2 units  This course provides a laboratory/field research experience for seniors under the direction of a faculty mentor. Students may initiate a project or join a research project in the mentor’s lab. Student and mentor fill out a departmental contract. A written research paper, a reflective summary of the research experience, and an oral or poster presentation must be submitted for a final grade. Students are strongly encouraged to take BIOL 201 before choosing a research project. May be repeated once for credit. Prerequisite: Permission of instructor. Offered each semester, including summer.

491 Senior Thesis  Credit, variable up to 1 unit  Students must carry out research, write a thesis, and present a public seminar on their research. The research effort is typically based on a research proposal written by the student. Details and application forms can be obtained from the faculty research advisor or department administrative assistant. Prerequisite: permission of instructor. Offered each semester, including summer.

495/496 Independent Study  Credit, variable up to 1 unit  Study of a specific topic under the supervision of a faculty member. The topic must be agreed upon and described in a proposal to the department. Details and application forms can be obtained from faculty, independent study advisor, or department chair. The results of all independent studies must be reported in the form of a written paper. Prerequisite: permission of instructor.

INTN 497; BIOL 498, 499 See Internship Program section of the Bulletin for course descriptions.

SCHOOL OF BUSINESS AND LEADERSHIP

Professor: Alva Butcher; Lynnette Claire, (on leave 2018-2019); Lisa Johnson; Lynda Livingston, Interim Director, Spring 2019, Nat S. and Marian W. Rogers Professor; Jeffrey Matthews, Interim Director, Fall 2018, George Frederick Jewett Distinguished Professor; Brad Reich; Nila Wiese, Nat S. and Marian W. Rogers Professor; Paula Wilson

Associate Professor: Alan Krause, Director, Business Leadership Program; Andreas Udbye

Visiting Assistant Professor: Sherri Johnson

About the School

The mission of the School of Business and Leadership is to provide students with a unique and innovative business education that prepares them for success as leaders in a complex and dynamic global environment. The program of the School of Business and Leadership incorporates business fundamentals (management, marketing, finance, accounting, law, and ethics) while strengthening its ties to other academic units on campus.

Students who graduate from the School of Business and Leadership should be able to:

1. Communicate effectively, both orally and in writing, within the discourse of business and leadership.
2. Formulate and investigate questions relevant to the marketplace and managed organizations.
3. Solve problems using appropriate analytical, quantitative, and qualitative techniques.
4. Understand the conceptual models that inform accounting, finance, law and ethics, management, and marketing (the functional areas).
5. Understand the ethical and social perspectives of a global marketplace.
6. Demonstrate an awareness of the impact of globalization on business and its stakeholders.

The School of Business and Leadership offers a Bachelor of Arts degree. Within the program, the student may select a Business Administration Emphasis or an International Business Emphasis. First-year students may also apply to the selective Business Leadership Program (BLP). To complement the academic program business majors are encouraged to participate in experiential learning opportunities including internships, mentorships, international work and study, field research, and problem solving projects.

Cross-disciplinary degrees are offered in conjunction with other departments. The School of Music offers a Bachelor of Music degree with Elective Studies in Business. See the Music section in this Bulletin for additional information.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn at least a cumulative GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Bachelor of Arts in Business: Business Administration Emphasis

Ten units to include:

1. Preparatory courses (2 units): ECON 101 (this course may also be used to satisfy the core requirement in Social Scientific Approaches) and MATH 160 or MATH 260 (this course may also be used to satisfy the core requirement in Mathematical Approaches).
2. Foundation Courses (5 units): BUS 205, 305, 310, 315, 340.
3. Business Electives (2 units) at 300-400 level (excluding BUS 300, 316, and 344; CONN 387, 390, and 478).
4. Senior Research Seminar (1 unit). Students must complete the foundational courses and have senior standing before taking the Senior Research Seminar. Courses approved: BUS 432, 476, 478, 482, and 485.

See additional “Notes on the Major” below.

Bachelor of Arts in Business: International Emphasis

Eleven units to include:

1. Preparatory courses (2 units): ECON 101 (this course may also be used to satisfy the core requirement in Social Scientific Approaches) and MATH 160 or MATH 260 (this course may also be used to satisfy the core requirement in Mathematical Approaches).
2. Foundation Courses (6 units): BUS 205, 305, 310, 315, 340 and 370.
3. International Business Electives (2 units) at 300-400 level from: BUS 361, 435, 452, 471, 472, 474, 475, and 493 if it has been approved as an International Business Elective.
4. Senior Research Seminar: (1 unit). Students must complete the foundational courses and have senior standing before taking the Senior Research Seminar. Courses approved: BUS 432, 476, 478, 482, and 485.
5. An international experience, which may include study abroad, a formal internship abroad, or academic research abroad.
School of Business and Leadership

6. Competency in a modern foreign language through the 202 level.
7. Increased exposure to international content and context through one of the following:
   a. Completion of a third year college level language course;
   b. Demonstrated proficiency of third year college level language;
   c. Completion of one upper-division global studies course from an approved list (ASIA 344, CHIN 303, ENVR/PG 382, FREN 380, GERM 304, HIST 343, 382, or 384, IPE 311, 333, 382, or 395, PG 321, 323, 325, 332, 333, 360, 361, or 380; REL 322 or 420, SOAN 316, 352, or 380).
   d. Other method as approved by advisor and SBL director.

Notes on the Major (Business Administration and International)
1. Courses used to satisfy the elective and senior research seminar requirements may not also be used to satisfy university core requirements.
2. Only courses for which the student has received a C- or better can count for the major.
3. Students must earn a grade of C- or better in all prerequisite courses.
4. A minimum of five BUS courses towards the major must be completed in residence at Puget Sound, or a waiver must be approved.
5. Transfer students choosing to major in the School of Business and Leadership should meet with the SBL Director to determine transferability of business courses completed elsewhere.
6. Students planning to pursue a graduate degree in business, such as an MBA, are encouraged to take Calculus (Math 180, 181).

Requirements for the Minor
Six units to include:
1. Economics: ECON 101 (this course may also be used to satisfy the core requirement in Social Scientific Approaches).
2. Statistics: MATH 160 or MATH 260 (this course may also be used to satisfy the core requirement in Mathematical Approaches).
3. Any four business courses (excluding BUS 170, 300, 316 and 344; CONN 387, 390, and 478).

Notes on the Minor
1. Only courses for which the student has received a C- or better can count for the minor.
2. Students must earn a grade of C- or better in all prerequisite courses.
3. A minimum of three BUS courses toward the major must be completed in residence at Puget Sound, or a waiver must be approved.

Bachelor of Arts in Business—Business Leadership Program
The Business Leadership Program (BLP) is a four-year program for students selected on the basis of intellectual abilities, motivation, and demonstrated potential for organizational leadership in business. In addition to the learning outcomes outlined above, key objectives of the program are for students to develop leadership and managerial skills and to develop the ability to think logically and analytically.

The BLP is distinguished by a unique curriculum that blends coursework in business and the liberal arts, and features multiple special BLP cohort classes. BLP students must participate in regional business field trips, an evening leadership speaker series, a professional internship, and a formal mentorship program. Students can pursue the BLP major with a business administration emphasis or an international business emphasis. Students receive the Bachelor of Arts degree.

Special application to the program should be made during a student’s senior year in high school. Application forms are accessible at pugetsound.edu/admission/apply/freshmen/business-leadership-program.

Sophomore-level admission to the Business Leadership Program is possible, but contingent on space availability. Interested freshmen should contact the Business Leadership Program director during the first or second semester of their freshman year to obtain application requirements.

Continued participation in the program is subject to academic performance as well as acceptable participation in all aspects of the program. See "Special Considerations for Business Leadership Program students" below.

Thirteen units to include:
1. Politics and Government (1 unit): PG 101, 102, or 103
2. Quantitative (2 units): MATH 160 or MATH 260, and one additional unit numbered MATH 150 or higher. Students planning to pursue a graduate degree in business, such as an MBA, are encouraged to take Calculus. CSCI 161 or PHIL 240 can be used to satisfy the additional math requirement. BLP students must take at least one MATH unit in residence.
4. Business and Leadership (9 units): BUS 205, 305, 310, 315, 340, 385; two business electives at the 300-400 level (excluding BUS 300, 316 and 344; CONN 387, 390, and 478); and a Senior Research Seminar.
   a. Courses used to satisfy the elective and senior research seminar requirements may not also be used to satisfy university core requirements.
   b. Students must complete the foundational courses and have senior standing before taking the Senior Research Seminar. Courses approved: BUS 432, 476, 478, 482, and 485.
5. Business Leadership Seminars (BUS 101, 201, 301, and 401) (no credit)
6. Internship (no credit)
7. In addition to the BLP requirements listed above, students pursuing the BLP major with an international emphasis are required to:
   a. Complete BUS 370;
   b. Complete one International Business Elective (1), in lieu of a regular business elective, at the 300-400 level from: BUS 361, 435, 452, 471, 472, 474, 475, and 493 if it has been approved as an International Business Elective
   c. Have competency in a modern foreign language through the 202 level;
   d. Complete an international experience, which may include study abroad, a formal internship abroad, or academic research abroad; and
   e. Have additional exposure to international content and context through one of the following:
      i. Completion of a third year college level language course;
      ii. Demonstrated proficiency of third year college level language;
      iii. Completion of one upper division global studies course from an approved list; or
      iv. Other method as approved by advisor and BLP director.

Special Considerations for Business Leadership Program students
Once admitted to the Business Leadership Program, students can continue in the program as long as they:
a. Register for, regularly attend, and earn a passing grade for BLP seminars (BUS 101, 201, 301, 401), freshman through senior years (Fall and Spring);
b. Regularly meet with their mentor, as required by the program;
c. Maintain a minimum cumulative GPA of 3.0 in all university work. Only courses for which the student has received a C or better count for the major (in addition, students must earn a grade of C- or better in all prerequisite courses.) In cases where performance falls below this level, students may apply for a probationary period to bring the cumulative GPA back up to 3.0 or be dismissed from the program.
d. Enroll in special sections of cohort courses for the BLP major with higher implicit expectations and standards. There will be at least six cohort courses during any four-year period; and
e. Demonstrate adherence to the highest standards of academic integrity and conduct. Any violation of the University Student Integrity Code may result in dismissal from the BLP.

For university policy regarding Advanced Placement credit, please see the Admission section of this Bulletin.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Seminars in Scholarly Inquiry. See the Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI1/SSI2 107 Leadership in American History
SSI1 166 Applied Ethics

Other courses offered by SBL faculty. See Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24).

CONN 387 Never-Never Land
Satisfies the Connections core requirement
CONN 390 Black Business Leadership: Past and Present
Satisfies the Connections core requirement
CONN 478 Animals, Law, and Society
Satisfies the Connections core requirement

101 Business Leadership Seminar No credit The Business Leadership Seminar meets 10-12 times per semester and offers students an opportunity to network with representatives from regional businesses and to learn about their companies’ strategies and business practices. Guest speakers in the Business Leadership Seminar also discuss careers in various business fields and functional areas. Speakers present information on current leadership topics and practices and provide perspective on the theories and tools studied in class. Some seminars are devoted to the particular needs of a BLP class. Other seminar activities include, but are not limited to field trips, career development, community service and engagement with mentors. Pass/Fail grading only. Prerequisite: Admission to the Business Leadership Program.

170 Doing Business in a Digital World This course introduces students to software tools and techniques that workers are more and more expected to be familiar with in the technology-driven business environment of the 21st century. The course format is lecture/lab, with frequent demonstrations, hands-on exercises, and individual and team projects modeled on real-world business scenarios. Topics covered include establishing and maintaining an effective online presence; managing the email/text/tweet information flow; working with big data, BI, and analytic tools; researching, writing, and formatting reports; developing and delivering presentations; using project management concepts and tools; and exploring and making use of social media. Students will share their work in a professional manner in this course. After finishing the course students will have a portfolio of work that helps demonstrate their proficiency with state-of-the-art business tools and methods and their understanding of the concepts underlying them. May not be used to satisfy a requirement in the business major or minor. Offered occasionally.

201 Business Leadership Seminar No credit See description for BUS 101.

205 Financial Accounting Financial accounting is the language of business. The study of financial accounting helps students acquire a broad conceptual framework for understanding and preparing financial reports. The course helps students to become reasonably proficient at interpreting numbers in financial statements and assessing their usefulness for decisions. Students examine and analyze financial statements for U.S. and global companies. Prerequisite: Sophomore standing or permission of instructor. Offered each semester.

300 Personal Finance This course is a primer in sound personal financial management. Students are introduced to the financial challenges that occur over a lifetime: managing credit, evaluating mortgages and installment loans, identifying and meeting insurance needs, investing in the financial markets, and planning for retirement. Fundamental techniques for handling these challenges, such as discounting and diversification, are developed. Finally, while current products and strategies are discussed and evaluated, the dynamic nature of the financial environment is stressed, and application of the basic techniques to new situations is emphasized. May not be used to satisfy a requirement in the business major or minor. Offered occasionally.

301 Business Leadership Seminar No credit See description for BUS 101.

305 Principles of Management A broad introduction to the field of management including such topics as planning, motivation, group dynamics, decision-making, organizing, and group organizational change. The course challenges students to adapt management techniques to a diverse global environment. The course includes case studies and emphasizes critical thinking. Offered each semester.

310 Principles of Marketing As the global economy becomes more complex and dynamic, businesses of all sizes demand global managers who understand how organizations can compete effectively in a variety of market environments. This survey course is designed to provide an overview of the main concepts and theories in the field of marketing. The course provides students an opportunity to develop an in-depth understanding of how cultural, legal, political and economic factors affect the marketing of products and services in different national, regional, and global contexts. The course also examines the competitive dynamics of global markets and provides a framework that guides marketing strategy formulation and implementation at the stages of market entry, local market development, and global market integration. Prerequisite: ECON 101 or permission of instructor. Offered each semester.

314 Managerial Accounting This accounting course examines the creation and use of information to support the execution of strategy and evaluation of performance within organizations. Managerial accounting information plays a vital role in the planning and control functions. It is also used to motivate and direct behavior. Topics include cost concepts, systems design, cost behavior, cost-volume-profit analysis, variable costing, profit planning, and strategic performance measurement and
evaluation. The course also examines the concept of shared value and sustainability reporting. Prerequisites: BUS 205.

315 Principles of Financial Management This course introduces students to fundamental issues in both corporate financial management and investment management. Students learn one of the most fundamental principles in corporate and personal finance, the time value of money. Students are introduced to the basic features of stocks and bonds and how they are priced. Students work with information reported in the financial press on such items as bonds, equity, interest rates, and foreign exchange rates. They learn how to identify the relevant cash flows for a proposed investment, evaluate that investment, and use financial information to estimate the required rate of return. Students examine the relationship between risk and return and the implication of diversification in both national and international markets. Prerequisites: BUS 205, MATH 160 or MATH 260, ECON 101. Offered each semester.

316 CFA Investment Research Challenge 0.25 activity unit Students in this course prepare a sell-side equity research report to present in the Chartered Financial Analyst Institute’s Investment Research Challenge. Students learn current best practices in equity analysis, including financial statement analysis applications and equity valuation models. May not be used to satisfy a requirement in the business major or minor. Prerequisite: instructor permission.

340 Law and Ethics in the Business Environment This course introduces students to the external constraints that society places on business activity and behavior. The most obvious are those constraints imposed by law in its various forms: case law from courts, statutory law from legislatures, and regulations from government agencies. However, in addition to these formal systems there are the informal, but extremely powerful constraints imposed by generally accepted moral beliefs and norms of ethical behavior. In this course students explore the relationship between legal and ethical standards to critically analyze and evaluate the behavior of business owners, managers, and employees. Prerequisite: Sophomore standing. Offered each semester.

344 Law, Lawyers, and Legal Education This course is designed to introduce students to the three stages of the legal educational experience: pre-law school and law school, post-law school careers, and the legal environment as a whole. Students understand the purpose and procedure of the LSAT, learn to plan critically for law school and subsequent careers, develop basic electronic legal research skills, and gain exposure to real legal fields. Students spend as much time working on this course outside of the classroom as inside it. The course emphasizes inter-related research activities and culminates in a major research paper. Prerequisite: junior or senior standing. May not be used to satisfy a requirement in the business major or minor. Offered occasionally.

355 Sustainable Business As corporations grow in size and influence, their impact on both social wellbeing and the natural environment has increased. Understanding interactions between corporations and the social and natural environments plays a large and growing role in effective management. This course provides an overview of the opportunities and challenges that established US businesses face regarding sustainable business. Students investigate corporations’ ethical, regulatory, and financial interests in relation to the social and environmental values of the communities in which they operate. Students are expected to master key concepts related to sustainable business and to develop the ability to think critically about sustainable topics.

361 Business and the Base of the Pyramid The base of the pyramid (BOP) refers to the billions of people living on very low incomes ($2-4 per day). Currently, various approaches exist as to how best to align business activity with the needs and potential of this segment of the global population. Those at the BOP can be seen as a large untapped market of demanding consumers, as creative entrepreneurs, as business partners, and as innovators. This course examines the various BOP perspectives to need satisfaction, poverty alleviation, and economic growth through business activity. The focus is on emerging business models that address individual and social needs in an innovative, profitable, sustainable, and socially-responsible manner. This course integrates concepts of development economics, international business, leadership, and strategy. Cross-listed with IPE 361. Prerequisite: Junior or Senior standing. Satisfies the International Business elective requirement.

365 Cultural Diversity and Law This course develops understandings of the dynamics and consequences of power differentials, inequalities, and divisions among cultural groups through the lens of criminal and civil law in US state and federal law. In both criminal and civil contexts, students examine the feasibility of legal pluralism in three types of cases: intra-cultural, inter-cultural, and no-longer accepted cultural practices in an intra-cultural event. In the criminal context, students consider criminalization of culturally appropriate acts of non-mainstream cultural communities, the “cultural defense,” and the role of law as an instrument of tolerance or tyranny. In the civil context, students examine taboo language, reappropriation or reclaiming of words, and law. Students examine law as a cultural artifact, including who it favors and who it silences or punishes, in tandem with its production of knowledge related to “right and wrong.” This course promotes critical engagement with the nature of law, the role of the state and its police powers to regulate disputes between diverse groups, and institutionalized power. This is a seminar-based course, requiring active student participation. Students learn to discuss cultural differences in the legal context and consider their own cultural perspectives. Satisfies the Knowledge, Identity and Power graduation requirement. Prerequisite: BUS 340 or any university level course in US state and/or federal government, law, or legal studies.

370 International Business Theory and Strategy This course introduces students to the most important theories that guide the field of international business strategy, and to key concepts and models related to the formulation and implementation of global strategy. The course provides students with analytical and planning tools for adapting a company’s business model to global markets, specifically: assessing opportunities and risks in the global environment; identifying current and potential positioning spaces within a competitive environment; and for developing strategies that suit different organizational, sectorial, and geographical contexts. The course also explores the interplay between organizational stakeholders, including trade-offs between financial and market goals and the ethical and social values of organizations (i.e., balancing economic and non-economic objectives). Finally, global strategic management requires moving beyond analysis into the realm of strategic action. The course addresses the various combinations of systems (e.g., information, control, reward, etc.), organization structures, and people necessary to execute a strategy that is internally cohesive. Prerequisites: BUS 305, BUS 310, and junior standing or permission of instructor.

380 An Entrepreneurial Mindset for the Arts Arts organizations and artists face many challenges that could benefit from an entrepreneurial mindset. Entrepreneurial thinking requires focusing primarily on finding the right questions rather than finding the right answers. In this course, students develop an entrepreneurial mindset by focusing on an issue in a local arts organization, identifying the concepts that help them under-
stand the issue, de-constructing and re-constructing their knowledge, and creating a feasibility study that tests their potential solution against reality. Students work to develop solutions that local organizations and artists are truly interested in implementing. The classroom learning directly benefits the arts. Topics covered in this course include entrepreneurship, the entrepreneurial mindset, questioning, interviewing and analysis, research, feasibility studies, and presenting findings. These topics are covered through readings, interaction with community arts organizations and artists, class activities and discussion, and students’ hard work.

385 Paradigms of Leadership This course provides students with an introduction to the art and science of the leadership process. It is not limited to business leadership. Topics include organizational culture and climate, motivation, performance, power, tactics, ethics and values, personality traits, and intelligence. Students develop skills necessary to effectively analyze historical, contemporary, and even fictional leadership case studies. A primary aim is to help prepare students to meet the challenges of “life’s leadership situations.” Prerequisite: BUS 305 or permission of instructor.

394 Special Topics in Consulting 25 academic credit. This course provides students the opportunity to enrich and apply their business knowledge in a consultative manner. Students learn to work with a variety of stakeholders and in a team environment. Pass/fail grading only. Prerequisite: concurrent enrollment in BUS 395.

395 Practicum in Consulting 25 activity credit. In this practicum course, students apply theory and skills from BUS 394 in consulting work on a specific project. Pass/fail grading only. Prerequisite: concurrent enrollment in BUS 394 and instructor permission.

401 Business Leadership Seminar No credit. See description for BUS 101.

402 Marketing Research Marketing research is the common currency in modern business practices as business and marketing decisions rely on research to make informed choices. This class helps students explore the critical role of marketing research in business, learn the language of marketing research, and learn how to implement and interpret key marketing research techniques (e.g., surveys, experiments, and focus groups), implementation of the research plan, analysis and interpretation of marketing research data, and reporting the results of marketing research. Students develop skills in research design, data collection, statistical data analysis, and communication of results through hands-on experience. Prerequisites: BUS 310 and Math 160.

407 Consumption Science This course is concerned with understanding the psychology of consumer behavior by focusing on the factors that affect the consumers’ pre-purchase, purchase, and post-purchase processes. An in-depth analysis of the components of the consumer decision making process is presented in order to illustrate and integrate theoretical and empirical knowledge from a variety of perspectives. Emphasis is placed upon the evaluation of the relevance of such data and the application of what is learned in the classroom to the solution of real world marketing problems. Prerequisites: BUS 310 and Math 160.

409 Integrated Marketing Communication This course is designed to introduce students to the field of integrated marketing communications (IMC), which includes communication tools such as advertising, promotion, sales, and public relations, among others. The development of an IMC strategy requires an understanding of the overall marketing process, consumer behavior, and communications theory. Prerequisite: BUS 310. Offered occasionally.

416 Financial Reporting and Analysis The course expands students’ knowledge and understanding of financial reporting and analysis by examining key questions of economic significance within the context of real companies and their reported financial information. The course includes analysis of U.S. companies that follow U.S. GAAP and global companies that use International Financial Reporting Standards. The underlying objective of financial analysis is to measure and compare risk and return characteristics of alternative investments when making investment and credit decisions. The course culminates with a substantial research project of a publicly traded company and a presentation. Prerequisites: BUS 205, 305, 310, 315, 340; and senior standing or permission of instructor.

431 Financial Markets This course introduces students to major sectors of the financial markets, particularly the money market, the primary market, the capital markets for debt, and the secondary markets for equity. The qualitative aspects of these markets are stressed, including their legal and economic frameworks. Prerequisite: BUS 315.

432 Investments This course is designed to introduce students to quantitative techniques for managing investment assets. These techniques are illustrated through the development of three main topics: portfolio theory, fixed-income portfolio management, and option valuation. Economic factors affecting investment management, particularly efficient markets concepts, are stressed. Prerequisites: BUS 205, 305, 310, 315, 340, plus at least one upper-division finance or accounting elective (excluding 300); senior standing required unless waived or with permission of instructor. Satisfies the senior research seminar requirement for business majors.

434 Advanced Topics in Corporate Finance Corporate finance is concerned with a corporation’s acquisition and allocation of capital. Students apply more advanced concepts in corporate finance in a decision making context. Valuation is discussed as a unifying theme. Students assess how the firm’s capital structure or its dividend policy might impact firm value. Students examine the valuation of investment projects and the valuation of a firm that is not publicly traded. Students study the underlying factors that impact the value of a financial option. The role of mergers and acquisitions in the growth of a firm is considered, as well as the impact of these deals on the shareholders of both the acquiring and acquired firms. Course materials include decision oriented cases and readings from professional journals. Prerequisite: BUS 315.

435 International Finance This course begins with a macroeconomic perspective and introduces students to international financial markets. Students examine the economic and governmental factors that influence exchange rates and currency derivatives which are commonly traded to profit from or hedge against expected changes in foreign currencies. The perspective is then microeconomic. Students examine financial issues faced by managers of firms that are engaged in international business. These include: the measurement and management of exchange rate risk, multinational capital budgeting, and the assessment of both domestic and foreign sources of funds to finance long-term projects. Current issues in the international market and real-life problems in decision oriented cases are analyzed. Prerequisite: BUS 315 or permission of instructor. Satisfies the International Business elective requirement.

437 Valuation This course introduces the valuation of public and private equity, including free cash flow, residual income, economic profit, and relative valuation models. Critical analysis of financial statements is highlighted, and applications to real-world companies is stressed. Course content is informed by the Chartered Financial Analyst curricu-
lum. Students complete a sell-side equity research report on a public company. Course is recommended for students competing in the CFA Investment Research Challenge and for students managing the Puget Sound student managed fund. Prerequisites: BUS 205 and BUS 315.

438 Portfolio Management This course introduces the design, implementation, and assessment of financial-asset portfolios. The main focus is the active management of long-only equity portfolios. Relevant behavioral issues are considered. Course content is informed by the curricula for both the Chartered Financial Analyst (CFA) and Professional Risk Manager (PRM) designations. Students are eligible to manage the university’s student investment fund. Prerequisites: BUS 205 and BUS 315.

440 Entrepreneurship In this course students learn how to generate new venture ideas and evaluate their viability. Students devote significant time to learning to recognize opportunities through experiential exercises. To understand how to develop an idea into a for-profit or non-profit organization, coursework also focuses on business plan research and writing as well as business creation. An in-depth job shadow culminates in the creation of a short documentary film. Students learn creative problem solving and sharpen their research, analytical, and presentation skills. Prerequisites: BUS 205, 305, 310, 315, 340.

442 Social Entrepreneurship This course explores how people and organizations can innovate to fulfill our social and environmental needs efficiently and effectively. Using innovative business models as the foundation, each student selects a social sector to study throughout the term on the local, national, and international levels. Research includes reading articles, examination of financial data, and interviews. A series of research papers results in in-depth knowledge of the chosen sector. Knowledge is shared through public displays and presentations. Insights into how to solve difficult social and environmental problems will be gained through the research and the course. Additionally, the class selects one social issue and enacts tangible solutions to this issue through the practicum, enabling students to participate in hands-on social entrepreneurship. Prerequisites: BUS 205 and BUS 305.

451 Organizational Behavior This course examines how individuals behave in and around organizations and how organizations themselves behave. Every day, individuals share time with others and operate within organizations. When people understand the behavior of individuals and organizations in their lives, they can better establish expectations, operate efficiently, and achieve goals. This class examines concepts and develops perspectives that help students effectively manage individuals and organizations. At the level of the individual, students learn about self-presentation, career planning, giving and receiving, feedback, personality, decision making, resilience, and creating success. At the level of the organization, students learn about teamwork, structure, culture, identity, change, resistance to change, and overcoming resistance to change. In addition, Organizational Behavior challenges students to develop skills in writing, presentation, and working in groups. Prerequisite: BUS 305 or permission of instructor.

452 Supply Chain Management Supply chain management encompasses the planning and management of all activities involved in sourcing and procurement, conversion, and all logistics management activities. Importantly, it also includes coordination and collaboration with channel partners, which can be suppliers, intermediaries, third party service providers, and customers. In essence, supply chain management integrates supply and demand management within and across companies. This course prepares the students to manage modern supply chains, both domestically and globally. Prerequisite: BUS 205 and BUS, 305 or permission of instructor. Satisfies the International Business elective requirement. Offered frequently.

471 Business in Asia This course introduces students to the business environments and practices of East and South East Asia and may focus on specific countries of the region. The countries of this region are viable trading partners and destinations for foreign direct investment, and the course considers pertinent historical, cultural, macro-economic and political factors that impact business activity in the region. The course focuses on business opportunity and risk assessment, and introduces students to appropriate managerial, organizational, and strategic planning skills and methods for successfully doing and growing business in the region. The course relies on various teaching methods, including lectures, readings, case studies, class discussions, videos, independent research, and guest presentations. Prerequisite: BUS 305 or 310 and Junior standing, or permission of instructor. Satisfies the International Business elective requirement. Offered occasionally.

472 Business in Latin America This course introduces students to the business environments and practices of Latin America and may focus on specific countries of the region. The countries of this region are viable trading partners and destinations for foreign direct investment, and the course considers pertinent historical, cultural, macro-economic and political factors that impact business activity in the region. The course focuses on business opportunity and risk assessment, and introduces students to appropriate managerial, organizational and strategic planning skills and methods for successfully doing and growing business in the region. The course relies on various teaching methods, including lectures, readings, case studies, class discussions, videos, independent research, and guest presentations. Satisfies the International Business elective requirement. Prerequisite: BUS 305 or 310 and Junior standing, or permission of instructor. Satisfies the International Business elective requirement.

473 Dispute Resolution This course focuses on two primary forms of non-litigious dispute resolution: negotiation and mediation. Students learn and develop the substantive, procedural, and communication skills necessary to utilize these models “successfully,” both personally and professionally. Prerequisite: BUS 340 and junior or senior standing.

474 Business in India and South Asia This course introduces students to the business environments and practices of India and South Asia. The countries of this region are viable trading partners and destinations for foreign direct investment, and the course considers pertinent historical, cultural, macro-economic and political factors that impact business activity in the region. The course focuses on business opportunity and risk assessment, and introduces students to appropriate managerial, organizational, and strategic planning skills and methods for successfully doing and growing business in the region. The course relies on various teaching methods, including lectures, readings, case studies, class discussions, videos, independent research, and guest presentations. Prerequisite: BUS 305 or 310 and Junior standing, or permission of instructor. Satisfies the International Business elective requirement.

475 Business in Europe This course introduces students to the business environments and practices of Europe and may focus on specific countries of the region. The countries of this region are viable trading partners and destinations for foreign direct investment, and the course considers pertinent historical, cultural, macro-economic and political factors that impact business activity in the region. The course focuses on business opportunity and risk assessment, and introduces students to appropriate managerial, organizational, and strategic planning skills and methods for successfully doing and growing business in the region. The course relies on various teaching methods, including lectures, read-
ings, case studies, class discussions, videos, independent research, and guest presentations. Prerequisite: BUS 305 or 310 and Junior standing, or permission of instructor. Satisfies the International Business elective requirement. Offered occasionally.

476 Sports Law This course discusses and analyzes historical and current legal issues shaping amateur and professional sports in the United States. For clarification, the “amateur” sport discussion is largely limited to Division I inter-collegiate athletics and “professional” sports focuses on sports played in exchange for compensation in the United States. Students undertake this analysis to understand the legal aspects of what is, often, the “business of sports”. While this course is grounded in sports, its true base is traditional areas of law including, but not limited to: employment, contract, tort, labor, intellectual property, and criminal law. This class requires a major, independent research project. Prerequisites: BUS 205, 305, 310, 315, 340, and senior standing or permission of instructor. Satisfies the senior research seminar requirement for business majors.

478 Environmental Law This class examines domestic and international environmental law and natural resource law to better understand how those laws relate to businesses in the United States and internationally. Students consider issues related to environmental and natural resource legislation and regulation. These issues include the tension between business and the environment, sustainability, the goals of environmental regulation, the problems of monitoring and enforcement, and the roles of science and risk assessment, including valuation of environmental injuries and environmental benefits. Students use case method studies, statutes, and legal cases to explore these concepts in contemporary situations. Students are responsible for substantial class leadership responsibilities including leading discussions and substantively contributing to each class session. Students identify suitable topics for exploration, formulate research questions, conduct independent research, write a substantial research paper, and present their work to the class. Prerequisite: BUS 205, 305, 310, 315, 340, and senior standing or permission of instructor. Satisfies the senior research seminar requirement for business majors.

482 Strategic Management and Consulting This course focuses on how organizations can achieve a sustainable competitive advantage. Strategic management involves a foundation of research and analysis of an organization’s internal and external environments, followed by the identification of strategic choices, and the development and implementation of strategic plans. A resource-based view of the firm provides the theoretical underpinning for case analysis and the strategic consulting projects. Students work in small consulting teams with local organizations to develop successful strategies in these projects. Prerequisites: BUS 205, 340, 305, 310, 315, and one business elective (excluding BUS 300 and 344; CONN 387, 490, and 478); senior standing; or permission of instructor. Satisfies the senior research seminar requirement for business majors.

485 Business Leadership and The Liberal Arts This is a senior research course in leadership that builds upon the foundational course, “Paradigms of Leadership” (BUS 385). Its overarching theme is that astute business leaders are liberally educated, able to comprehend and benefit from the interconnectivity of business leadership and the liberal arts. This cross-disciplinary course culminates with a substantial research paper and presentation. Prerequisites: BUS 205, 315, 340, 305, 310, 385, and senior standing or permission of instructor. Satisfies the senior research seminar requirement for business majors.

493 Special Topics This seminar is organized around topics that reflect the particular field of research or expertise of the instructor. Each offering is on a unique topic. Some sections satisfy the International Business elective requirement. May be repeated.

495 Independent Study An independent study allows a student to pursue a specific topic not covered in existing courses under the supervision of a faculty member. A written proposal must be submitted and agreed upon by the faculty independent study advisor. No more than one independent study may be applied toward a specific major or minor in business.

498 Internship Tutorial Students who enroll in this course work with a faculty member in the School of Business and Leadership to develop an individualized learning plan that connects the actual internship site experience to study in the major. The learning plan will include required reading, writing assignments, as well as a culminating project or paper. Prerequisite: Approval of tutorial professor and the Internship Coordinator.

**CAREER DEVELOPMENT**

201 Career Awareness 0.5 activity credit Using a liberal arts education as a foundation, this class provides opportunity for self-assessment and application of this knowledge to career options. Designed for individuals who are just beginning to or currently exploring different occupations, an emphasis is placed upon self-assessment and exploration of various career paths. Topics include: assessing personality, values, skills, and interests; developing a resume and cover letter; introduction to networking and informational interviewing. Course available through Career and Employment Services.

301 Career Readiness 0.5 activity unit This class provides the opportunity for students to reflect upon themselves (personality, values, skills, and interests), and apply this knowledge to career options as well as take active steps toward a future career choice. Designed for individuals who are refining or focused on career options and are ready to take action. An emphasis is placed on career research and developing a professional presence on paper, online, and in person. Topics include using multiple methods of career research and professional skills that include resume writing, building online profiles, networking, interviewing, and salary negotiation. Course available through Career and Employment Services.

**CENTER FOR WRITING, LEARNING, AND TEACHING**

100 Strategies for College Reading 0.25 unit College reading presents significant challenges, both in the amount of material assigned and in the complexity of ideas. Students frequently remark that they have difficulty getting through the required reading in a course, that they have problems concentrating on the material, or that they cannot remember what they have read. They are expected to learn to read selectively but carefully, to identify passages that require close reading, and to search out the structure of a text. Furthermore, assigned reading is often a diverse collection of primary and secondary sources, rather than sections from one authoritative textbook. This course is designed to help students become more demanding and skillful readers, able to effectively navigate the demands of college reading. Students develop new techniques to improve their reading efficiency, both in terms of speed and comprehension. By making reading and studying into a conscious activity, students are better able to extract information from a scholarly text, critically question the material they read, flexibly adjust
reading strategies according to the task, and vary their reading speed to enhance comprehension. Pass/fail grading only. Offered frequently.

299 Writing Personal Statements 0.25 unit This course is designed to help students write effective personal statements for post-graduate opportunities, whether for fellowships or graduate or professional school applications. The course introduces writers to the concept of the personal essay as a genre, through readings that include both theoretical discussions and examples of the genre. Students write multiple drafts of personal statements, and through that process discover what is essential to convey about themselves for the particular application. Significant time is devoted to sharing drafts with the other writers in the class and providing feedback to deepen the learning process. Pass/fail grading only. Offered occasionally.

300 Theory and Praxis of Peer Learning 0.25 unit This course is designed to prepare first-semester writing advisors and peer tutors to be effective in their new roles in the Center for Writing, Learning, and Teaching (CWLT). Through discussions on writing center theory and practice, critical pedagogy, cultural competence, and interdisciplinarity, this course prepares new peer tutors and writing advisors for effective and reflective practice, as well as equips them with the skills to contribute to the intellectual conversation of the Writing Center. Pass/fail grading only. Prerequisite: employment at the CWLT. Offered frequently.

398 Practicum in Peer Tutoring 0.25 academic unit CWLT 300 discusses ways in which peer tutors at the Center for Writing, Learning, and Teaching might use their influence as knowledgeable peer collaborators to disrupt inequalities in higher education. This follow-up course is designed to go into more depth about the larger social contexts that shape educational inequalities at the college level. By discussing racial bias in the criminal justice system and the school-to-prison pipeline, the class examines the role that educational inequalities have on producing the carceral state. By combining academic class time with volunteer work at the Washington Corrections Center for Women, this class helps peer tutors learn how to use their tutoring skills to pursue social justice outside the CWLT. Pass/fail grading only.

495 Independent Study Independent study is available to those students who wish to continue their learning in an area after completing the regularly offered courses in that area. Prerequisites: Junior or Senior standing and at least a 3.0 cumulative grade point average.

CHEMISTRY

Professor: Daniel Burgard, Chair; Johanna Crane; John Hanson; Steven Neshyba; Eric Scharrr

Associate Professor: Luc Boisvert (on leave spring 2019); Jeffrey Grinstead; Amanda Mifflin

Assistant Professor: Megan Gessel

Visiting Assistant Professor: Travis Harris; Il-Hyung Lee; Stacia Rink

Visiting Instructor: Jill McCourt

About the Department

The Chemistry Department offers a broad-based curriculum designed to meet the needs of a variety of students, from those taking only one or two chemistry courses in order to broaden their liberal arts background to those majoring in chemistry in preparation for a career in the chemical sciences. The department is approved by the American Chemical Society and offers degrees that are appropriate for students interested in careers in chemistry, medicine, dentistry, engineering, science teaching, or any other area where a scientific background would be valuable. Students are encouraged to consult with members of the department as they plan their undergraduate programs and to discuss career options in the sciences.

The expertise of the chemistry faculty covers all five major chemical sub-disciplines: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. In addition to core courses in these major areas, faculty members teach upper-level courses on a variety of special topics including atmospheric chemistry, computational chemistry, materials chemistry, organic synthesis, and environmental chemistry. Faculty members are also engaged in a wide range of research projects and all students seeking the BS degree participate in this research and produce a thesis based on their work.

In addition to being introduced to modern chemical knowledge and the role of chemistry in society, students in chemistry courses learn to think analytically and logically. As students move through upper-level courses, they develop the ability to critically assess work in the field and the attitude necessary to cope with the demands of independent inquiry.

Students completing a chemistry degree are able to:
1. rationalize and predict chemical behavior based on chemical principles;
2. apply laboratory methods to investigate chemical phenomena and synthesize compounds in a safe and environmentally responsible manner;
3. operate modern analytical instruments and interpret the data obtained from these instruments;
4. use computers for collection and analysis of chemical data and the modeling and visualization of chemical structures and properties;
5. communicate effectively in both written and oral forms typical of the chemical literature and professional conferences;
6. search and use the chemical literature.

General Requirements for degrees in Chemistry and Biochemistry

The Chemistry and Biochemistry degrees offered at Puget Sound have much in common. Both are rooted in fundamentals of chemistry that include chemical thermodynamics and atomic structure, chemical analysis, organic chemistry, and laboratory techniques. Both degrees provide students the opportunity to study advanced topics in chemistry. The Biochemistry degree emphasizes the chemical basis of biological systems, with students developing skills in interdisciplinary inquiry that include cell biology, genetics, and biochemical laboratory techniques. In contrast, the Chemistry degree places more emphasis on advanced instrumental analysis, quantum mechanics, spectroscopy, and inorganic chemistry.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for Bachelor of Arts Degree in Chemistry
1. PHYS 121, 122;
2. MATH 180, 181, 280;
3. CHEM 115, 230; or CHEM 110, 120, 231;
4. CHEM 250, 251, 340, 341, 420
5. One-half unit Chemistry elective at the 300 or 400 level;

Requirements for Bachelor of Science Degree in Chemistry

1. PHYS 121, 122;
2. MATH 180, 181, 280;
3. CHEM 115, 230; or CHEM 110, 120, 231;
4. CHEM 250, 251, 330, 340, 341, 420, 490 (1 unit)
5. One-half unit Chemistry elective at the 300 or 400 level;

Requirements for Bachelor of Science Degree in Biochemistry

1. PHYS 121, 122
2. MATH 180, 181, 280
3. CHEM 115, 230; or CHEM 110, 120, 231;
4. CHEM 250, 251, 340, 460, 461;
5. BIO 111, 212, 213
6. One of CHEM 330, 341 or 420
7. One unit of a 300- or 400-level CHEM or BIOL elective (BIOL 361 may not be used to satisfy this requirement).

Requirements for the Minor

1. CHEM 115, 230; or CHEM 110, 120, 231;
2. CHEM 250;
3. Two units of Chemistry electives numbered 251 or above.

Notes

1. The student must earn a grade of C or higher in all courses for the major or minor.
2. Students wishing to obtain an American Chemical Society certified degree should complete the BS requirements and include CHEM 460 as an elective.
3. The Chemistry Department reserves the right to determine a time limit, on an individual basis, for the acceptability of courses into a major or minor program.
4. Majors in Biochemistry are encouraged to participate in undergraduate research in the Chemistry or Biology Departments.
5. Biochemistry majors may not earn additional majors in Chemistry or in Molecular and Cellular Biology.
6. BS Chemistry majors may not use CHEM 390 to fulfill the chemistry elective requirement.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

110/120 General Chemistry I, II 1 unit each A two-semester, introductory course designed to give a solid introduction to chemical principles. The first semester covers topics of atomic structure, stoichiometry, thermochemistry, atomic theory, bonding, intermolecular forces, phase changes, introduction to reactions, gases, and thermodynamics. Second semester topics include equilibria, kinetics, acids and bases, buffers, oxidation-reductions, electrochemistry, and aspects of inorganic chemistry, organic chemistry, and biochemistry. Both CHEM 110 and CHEM 120 satisfy the Natural Scientific Approaches core requirement. CHEM 110 offered Fall term only; CHEM 120 offered Spring term only.

115/230 Integrated Chemical Principles and Analytical Chemistry 1 unit each An accelerated track designed for well-prepared students, particularly those planning to major in the molecular sciences (chemistry, biochemistry, molecular and cellular biology). The first semester topics include nuclear chemistry, atomic structure, stoichiometry, bonding, intermolecular forces and phase changes, reactions, gases, inorganic chemistry, thermochemistry, thermodynamics, and kinetics. The second semester topics emphasize quantitative chemical analysis, advanced equilibria, acids and bases, buffers, electrochemistry, and separation techniques. Prerequisite: Successful completion of a rigorous high school chemistry program (in the junior or senior year). Both CHEM 115 and CHEM 230 satisfy the Natural Scientific Approaches core requirement. CHEM 115 offered Fall term only; CHEM 230 offered Spring term only.

231 Analytical Methods 0.5 unit This course is designed for students who have previously taken a one-year course in introductory chemistry (CHEM 110/120 or equivalent) but who have not had a detailed introduction to quantitative chemical analysis. Topics include the statistical treatment of data, the use of standards, advanced equilibria, and separation techniques. This course is exempt from tuition overload. Credit for CHEM 231 will not be granted to students who have completed CHEM 230. Prerequisite: CHEM 120 or equivalent. Offered Spring term only.

250/251 Organic Chemistry I, II 1 unit each These courses cover the basic chemistry of carbon-containing molecules. Modern principles of chemical bonding are used to develop an understanding of the structure of organic molecules and the reactivity of organic compounds. Thus, the course is organized along the lines of reaction mechanisms rather than by functional groups. The laboratory portion of the course introduces the student to the various techniques involved in the isolation, identification, and synthesis of organic compounds. The laboratory parallels the course lectures so that there is a practical application of theoretical principles. Extensive use is made of chromatographic and spectroscopic techniques. Prerequisite: CHEM 120 or 230 or equivalent. Each course satisfies the Natural Scientific Approaches core requirements. CHEM 250 offered Fall term only; CHEM 251 offered Spring term only.

320 Chemistry of the Elements This course focuses on the elements and their organization into the periodic table. Students examine the origin of the elements, the periodic and group relationships, and the role of the elements and their compounds in medicine, materials, and society. Much of the course material is directly drawn from the scientific literature. Prerequisite: CHEM 251. Offered occasionally.

330 Instrumental Analysis Introduction to basic theory and applications of modern instrumental methods of analysis. Includes an introduction to electronics, x-ray, ultraviolet, visible, infrared, Raman, mass, and nuclear magnetic resonance spectrometry; atomic absorption and plasma emission; chromatography, thermal, and electrochemical methods. Prerequisites: CHEM 230 or 231, and PHYS 122. CHEM 251 is strongly recommended. Offered Fall term only.

333 Environmental Analytical Chemistry The course emphasizes the analytical process in making environmental chemistry measurements. An overview of methods used for the chemical analysis of air, soil, and water will be covered. Special attention will be given to sampling, quality assurance, spectroscopic measurements and chromatographic separations with mass spectral determination. This course will build on the analytical techniques presented in the prerequisite courses and apply them to the specific challenges when dealing with complex environmental systems. This course will have a laboratory component to give hands on experience to illustrate some of these analytical challenges. The lab meets during the regularly scheduled course periods. This class will have field trips to local and state laboratories and environmental facilities. Prerequisites: CHEM 230 or 231 and 250. Offered occasionally.
338 Biochemical Analysis: The Lipid Membrane This course introduces analytical techniques and instrumental methods that are commonly used to characterize biological systems. Techniques surveyed may include chromatography, mass spectrometry, X-ray diffraction, NMR, circular dichroism, fluorescence spectroscopy, and molecular dynamics simulations. The course focuses on applications of these methods to a specific system or research area, which may vary from year to year, e.g., lipid membrane, toxicology, proteomics, etc. This course does not require but is complimentary to CHEM 330 and CHEM 460. Prerequisite: CHEM 250 and CHEM 230 or 231 or permission of instructor. Offered occasionally.

340 Physical Chemistry I Chemical thermodynamics and its applications to macroscopic systems. Analysis of microscopic properties of atoms and molecules using kinetic molecular theory with emphasis on Maxwell-Boltzmann distribution functions. Prerequisite: CHEM 230 or 231, MATH 181, PHYS 121. MATH 280 is strongly recommended. Offered Fall term only.

341 Physical Chemistry II Introduction to quantum mechanics with applications to molecular spectroscopy. Statistical thermodynamics linking microscopic and macroscopic chemical behavior. Laboratory experiments emphasize fundamental instrumentation and theory associated with physical chemistry. Prerequisite: CHEM 230 or 231, MATH 280. Offered Spring term only.

345 Chemistry and Physics of Atmospheres The main work of the course is to understand the Earth’s atmosphere from the perspective of physical chemistry. Tools include the use of thermodynamics to understand global atmospheric circulation, and quantum mechanics to interpret the spectra of atmospheric gases and aerosols. Applications include the interpretation of remote sensing data, with a focus on selected topics in the Earth climate system, including anthropogenic influences. The course concludes with a brief survey of other planetary atmospheres and atmospheric evolution. Prerequisite: CHEM 230 or 231, MATH 181. CHEM 340 is strongly recommended. Offered occasionally.

347 The Devil’s Playground: The Chemistry of Surfaces Surfaces play an important role in our lives. Enzymatic reactions at biological interfaces, heterogeneous catalysis, transport of contaminants in soils, and atmospheric aerosol chemistry are all controlled by interactions at surfaces. This course explores the physical and chemical phenomena that occur between the three states of matter-solid, liquid, and gas. Particular emphasis is placed on interactions with solid surfaces. Topics include, but are not limited to, reactions on surfaces, kinetics of surface reactions, binding of molecules to surfaces, and techniques of surface analysis. The importance of surface phenomena to environmental and catalytic chemistry is discussed. Prerequisite: CHEM 251; recommended co-requisite of CHEM 340. Offered occasionally.

356 Organic Synthesis This course explores methods and strategies that are used in the analysis and synthesis of moderately complex organic molecules. The first part of the course focuses on the use of advanced spectroscopic techniques (with a particular emphasis on 2D NMR techniques) in structure determination. The second part of the course focuses on the use of modern synthetic methods in organic synthesis, with emphasis on the formation of carbon-carbon bonds and the control of stereochemistry. These methods are applied to the synthesis of natural products through application of retrosynthetic analysis. Prerequisite: CHEM 251. Offered occasionally.

357 Organometallic Chemistry This course focuses on the fundamental reactivity of organotransition metal complexes. Topics include oxidative addition, reductive elimination, and the unique behavior of compounds possessing metal-carbon bonds. Applications of organometallic chemistry to industrial catalysis and organic synthesis are also discussed. Prerequisite: CHEM 251. Offered occasionally.

363 Materials Chemistry This course emphasizes the synthesis, characterization, and properties of organic materials. In particular, the focus is on the impact of structural changes upon macroscopic properties (mechanical strength, optical behavior, etc.). The first part of the course focuses on polymer science and draws heavily on students’ knowledge of synthetic and mechanistic organic chemistry. The second part of the course emphasizes liquid crystals and other related materials. Specific applications of materials to areas such as microlithography (patterning of computer chips), liquid crystal displays, and drug delivery are discussed, with many examples coming from the primary literature. Prerequisite: CHEM 251. Offered occasionally.

371 The Chemistry of Food This course explores the science of food and cooking. Topics include flavor, physical properties, nutrition, cooking methods, and reactions. In-class demonstrations and hands-on experiments allow for a tactile and sensory experience. Modern issues in food are discussed, including organic farms, GMO food, and the science behind recent dietary fads. Optional field trips occur throughout the semester. Prerequisite: CHEM 230/231 and CHEM 251. Offered occasionally.

377 Biomolecular Interactions The course emphasizes intermolecular interactions of biological macromolecules such as proteins with other molecules. The first part of the course addresses fundamental chemical concepts underlying these types of noncovalent interactions, description of various protein complexes, and a hands-on application of molecular docking protocols to calculate structures of complexes using data from the biochemical literature. The second part of the course focuses on student independent projects utilizing protein structures and data from the literature. Molecular docking is used as a tool to test predictions about the wider biological implications of altering biomolecular interactions. Prerequisite: CHEM 251 and 460 preferred, or permission of instructor. Offered occasionally.

390 Directed Research Credit, variable up to 1 unit Theoretical or experimental research done in an area of chemistry, with guidance from a mentor in the Chemistry department. Prerequisite: a research contract must be completed prior to registration.

420 Advanced Inorganic Chemistry This course presents both theoretical and descriptive concepts related to inorganic chemical compounds including periodic relationships, structure and bonding, molecular symmetry, acid base chemistry, electrochemistry, and inorganic reaction mechanisms. Laboratory experiments illustrate common synthetic and characterization processes for inorganic compounds. These concepts and techniques are brought together through the topics of coordination chemistry, organometallic chemistry, bioinorganic chemistry, and solid state chemistry. Prerequisite: MATH 181, CHEM 230 or 231, CHEM 340, PHYS 122. Offered Spring term only.

455 Computational Organic Chemistry This course uses computer-based molecular modeling as a tool for understanding and predicting the structure, stability, and reactivity of organic compounds. Practical topics, such as selecting appropriate calculational methods, visualizing and analyzing results of calculations, and interpreting results in terms of the chemical behavior of the system under study are emphasized. The theoretical principles underlying various computational methods are discussed. Prerequisite: CHEM 251. Offered occasionally.
460 Physical Biochemistry  This course applies concepts of physical chemistry to the study of biological processes. The topics covered include protein and nucleic acid structure and stability, thermodynamics of protein folding, enzyme kinetics and instrumental techniques such as x-ray crystallography, NMR and mass spectrometry. Prerequisites: CHEM 230 or 231, CHEM 251, and permission of instructor. Offered Spring term only.

461 Metabolic Biochemistry  This course explores the chemistry of various metabolic processes including glycolysis, citric acid cycle, oxidative phosphorylation, electron transport, fatty acid and amino acid synthesis and degradation, DNA synthesis, RNA synthesis and processing, and protein synthesis and processing. Particular attention is paid to the experimental approaches that have provided information about these processes. Prerequisite: CHEM 460. Offered Spring term only. Credit for CHEM 461 will not be granted to students who have completed BIOL 361.

490 Senior Research Thesis  0.5 or 1 unit  Theoretical and/or experimental research done in an area of chemistry over two semesters (~150 research hours). The topic depends upon the student’s interest; however, it should be compatible with a faculty member’s area of expertise. Students must write and orally defend a thesis. In special cases, a student may register for 0.5 unit for each of two semesters.

493 Seminar  No credit  This course offers the student the opportunity to hear guest speakers discuss a variety of subjects within the general discipline of chemistry.

495 Independent Study  Credit, variable  Course offered to individual students and designed to meet their needs. The student may contact an instructor to arrange a program of study. Registration is confirmed by a written contract between the student and the instructor.

---

**CHINESE**

Students interested in a major or minor in Chinese language and culture should consult the Asian Languages and Cultures section in this Bulletin.

---

**CLASSICS**

Professor: William Barry; Aislinn Melchior; Eric Orlin, Chair

Associate Professor: Brett M. Rogers

About the Department

The pioneer of the interdisciplinary approach, the field of classics encompasses the languages, literature, philosophy, and history of the Mediterranean from the second millennium BC to the fifth century AD. The Classics Department presents as wide a range of courses as possible in this diverse but fundamentally unified field.

In each of the course offerings in the Classics Department students explore cultural phenomena that lie at the root of our own experience. Modern Western languages, literature, philosophy, and history have carried within them the deep grain of a classical past, which is at once surprisingly familiar and intriguingly alien. In courses in ancient history, culture, and literature based on texts in translation, students use a wide range of sources and methods to work towards an understanding of the ancient Mediterranean, both on its own terms and in its relation to later cultures.

The Classics Department also offers courses in Latin and ancient Greek each year. Students learn the sounds and structures of the language and a basic reading vocabulary in introductory courses; in intermediate and advanced courses students develop their fluency and accuracy in reading and deepen their appreciation of style, rhetoric, and nuance. In all Latin and Greek courses, students also use the languages as a way of entering the heart of the vibrant world of classical antiquity. As an added bonus, students should gain from their study of either language valuable insights into the substance and structure of English and the modern European languages.

Students who complete a major or minor in Classics will progressively build a more complex and comprehensive understanding of the cultures of ancient Greece and Rome by studying them from a variety of angles, and by bringing a growing body of knowledge to bear on their studies. Students who major in Classics learn to conduct research and to develop a sustained argument on a focused topic informed by a broad understanding of the field.

**General Requirements for the Major or Minor**

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

**Requirements for the Major**

Students considering applying to graduate school in Classics or a related field should consult with a member of the Classics faculty as soon as possible. Such students are strongly encouraged to choose the Language track and to take additional units of Greek and Latin.

I. **Classical Languages Track:** (10 or 11 units)

Six units of either Greek or Latin

OR

Five units of study in one language and two units in the other;

CLSC 200, 201, 210, or 231;

CLSC 211 or 212;

One additional course in Classical Civilization (see list below) numbered 299 or above;

Senior Thesis (CLSC 490), to be taken after both the required 200-level Classical Civilization courses and Latin or Greek 201 or equivalent have been completed. In the semester prior to registration for CLSC 400, students must complete a Thesis Proposal Form and submit it for approval to their thesis advisor and the Classics Chair. For more information on the thesis and the approval process, contact the Classics Chair.

At least five major units must be completed at Puget Sound.

**Note:** Since the Greek or Latin Language track requires at least five terms of Greek or Latin, students who begin the study of classical languages at Puget Sound must normally begin by the first semester of the sophomore year in order to complete the major by the end of their fourth year. Students who enter Puget Sound with some Latin or Greek should consult with the Classics Department about placement.

II. **Classical Studies Track:** (10 units)

CLSC 200, 201, 210, or 231;

CLSC 211 or 212;

CLSC 280 or ARTH 360 or 361;

Three courses in either Greek or Latin;

Three additional courses in Classical Civilization (see list below), Greek, or Latin, at least two of which must be numbered 299 or above;
Senior Thesis (CLSC 490) to be taken after both the required 200-level Classical Civilization courses and Latin or Greek 201 or equivalent have been completed. In the semester prior to registration for CLSC 400, students must complete a Thesis Proposal Form and submit it for approval to their thesis advisor and the Classics Chair. For more information on the thesis and the approval process, contact the Classics Chair. At least five major units must be completed at Puget Sound.

**Note:** Classical Studies Majors may meet no more than one unit of their Classical Studies requirements with coursework from a minor or second major. Majors may satisfy no more than one Classical Studies requirement with coursework from the university core.

### Requirements for the Minor (6 units)

Three courses in either Greek or Latin;

Three courses in Classical Civilization (see list below), Greek, or Latin, two of which must be numbered 299 or above;

**Note:** A student may use no more than one unit from his/her major field or another minor field to fulfill the requirements of the Classics minor. Minors may satisfy no more than one Classics minor requirement from university core requirements.

### Courses in Classical Civilization

- ARTH 360 Art and Architecture of Ancient Greece
- ARTH 361 Art and Architecture of Ancient Rome
- CLSC 200 Introduction to Classical Literature
- CLSC 201 Ancient Tragedy
- CLSC 210 Classical Mythology
- CLSC 211 Greek History
- CLSC 212 Roman History
- CLSC 231 Greek and Roman Epic
- CLSC 280 The Archaeology of the Mediterranean World
- CLSC 304 The Ancient Novel
- CLSC 308 Ancient Cities
- CLSC 309 The Roman Revolution
- CLSC 310 Theories of Myth
- CLSC 311 Ancient Comedy
- CLSC 318 Greek and Roman Religion
- CLSC 325 Sex and Gender in Classical Antiquity
- CLSC 334 The Archaeology of Power
- CLSC 339 Sci-Fi, Fantasy, and the Classics
- CLSC 375 Special Topics in Classics
- CLSC 390 Late Antiquity and the “Fall” of the Roman Empire
- CONN 377 PTSD in the Ancient World
- PHIL 215 Ancient Philosophy
- PHIL 361 Aristotle
- PHYS 399 The History and Practice of Ancient Astronomy
- PG 340 Democracy and the Ancient Greeks

### Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

### Seminars in Scholarly Inquiry

See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

- CONN 377 Caesar in Vietnam: PTSD in the Ancient World
- SSII/SSI 103 Alexander the Great
- SSII/SSI 106 Cleopatra: History and Myth
- SSII 131 Athens, Freedom, and the Liberal Arts

- SSII 131 Social Justice and Radical Politics in Early 20th Century America

**Other courses offered by Classics Department faculty.** See Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24):

- **HON 211 Metamorphosis and Identity**
  
  Satisfies the Humanistic Approaches core requirement.

- **HUM 121 Arms and Men: The Rhetoric of Warfare**

- **HUM 210 Power and Culture in Periclean Athens and Augustan Rome**
  
  Satisfies the Humanistic Approaches core requirement.

- **HUM 304 Ancients and Moderns**

**100 Classics Proseminar** 0.25 activity unit

Students become familiar with the range of sub-specialties and sub-disciplines within the field of Classics, share their own thesis research, and comment on that of others. The proseminar is open to all levels, but junior and senior majors and minors are especially encouraged to enroll in the course. **Offered every semester. May be repeated for credit.**

**200 Introduction to Classical Literature**

This course is a true survey—a dizzying whirl through first Greek, then Roman writings. A central and unifying concern will be how the various works we read in part react to the earlier Homeric material as well as how they expand and/or contradict Homeric notions of heroism, right action, knowledge, poetic ambition, the roles of gods, women, and slaves, authority, justice, etcetera. Texts from the time of Homer to the late Roman Empire will be studied with an eye to how they echo and reshape the world of ideas within Homer’s Iliad to speak to their own time period. **Satisfies the Humanistic Approaches core requirement. Offered every other year.**

**201 Ancient Tragedy**

This course explores the nature and meaning of ancient Greek and Roman tragedy. It begins by examining the social, political, and physical contexts in which tragedies were performed in classical antiquity. Students then read and discuss select plays by the three great surviving tragic dramatists of fifth-century Athens (Aeschylus, Sophocles, Euripides) and the only surviving dramatist of Imperial Rome (Seneca). Attention is given to understanding how these plays might have been performed and interpreted within the Athenian and Roman cultures in which they were produced. Throughout the course students also discuss modern critical approaches to the plays and attempt to generate their own approaches. Thus this course aims to raise a greater understanding of both ancient drama in its historical context and its imaginative and transformative potential in the modern world. **Satisfies the Artistic Approaches core requirement. Offered every other year.**

**209 History of the Ancient Near East**

This course will study the growth and development of the ancient Near East with particular focus on the two great cultural empires, Mesopotamia and Egypt, as the foundations of the ancient Mediterranean civilizations. The ancient Near East produced the oldest written texts in the world, and these provide a window into the ways of life, rituals, beliefs, hopes, and fears of people living 2,500 to 5,000 years ago. Students use these texts to explore some of the most fundamental transformations in human history—the emergence of cities, the invention of the state, the creation and destruction of empires, and, overlooking it all, the gods who brought hope and terror to the inhabitants of the ancient Near East. **Satisfies the Humanistic Approaches core requirement.**

**210 Classical Mythology**

This course explores myths and legends from classical antiquity and the light they cast on ancient conceptions of men and women, civilization, nature, and the divine. The embodiment
of myths in ancient literature and art is the central focus of the course, as is the role of myth in Greek and Roman religious ritual and belief. The course also takes note of the subsequent life of Greek myths in Roman, medieval, Renaissance and modern literature, art, and society and examines some of the principal modern theoretical perspectives on myth in general and Greek myth in particular. Satisfies the Humanistic Approaches core requirement. Offered every other year.

211 Greek History This course makes an odyssey through Greek political, social, cultural, and economic history from the Bronze Age (c. 1200 BCE) to the death of Alexander the Great (323 BCE). The emphasis is less on the chronicle of events than on understanding the changing nature of Greek society during this period. Major topics to be explored include the development of the city-state as a political unit; notions of equality in ancient Greece; and the simultaneous flourishing of the arts and building of an empire at Athens under Pericles. Students learn to use both archaeological remains and literary texts, including histories and poetry, to reconstruct the nature of Greek society. Satisfies the Humanistic Approaches core requirement.

212 Roman History How did a small farming village on the banks of the Tiber River become mistress of an empire stretching from Britain to Egypt? This course explores the political institutions, social structures, and cultural attitudes that enabled Rome to become the world's only superpower at the time. One theme of the course is how that rise to power affected the lives of the Romans and how the Romans affected the lives of all those they encountered. Roman constitutional developments, the religions of the Roman world, and the connection between Roman culture (including art, literature, and popular entertainment such as gladiatorial games) feature prominently among the topics covered. Satisfies the Humanistic Approaches core requirement.

231 Greek and Roman Epic This course introduces the epic genre in Greece and Rome. The course concentrates on a selection of ancient epic poems including Homer’s Iliad and Odyssey and Vergil’s Aeneid. Students consider each epic as an individual cultural and artistic product, but also how later epics draw upon and respond to earlier ones. The gradually more complex understanding of the epic genre built into the class allows students to investigate how the Greek and Roman epics combine cosmology and human narratives in order to explore the place of human beings in the universe; the relationship between gods and mortals; and the connection between moral, social, or historical order and cosmological order. Satisfies the Humanistic Approaches core requirement. Offered every other year.

280 The Archaeology of the Mediterranean World This course introduces students to the field of classical archaeology, both describing “how to do” archaeology (that is, the techniques of locating, retrieving, and analyzing remains) and reflecting upon how the nature of these techniques influences our understanding of the past. Students discuss specific archaeological sites in their historical, social, anthropological, economic, religious, and architectural contexts. Students explore these sites not as monuments to be admired, but as a means to understand archaeology as a discipline. Attention is given to issues relevant to classical archaeology today, including the looting of ancient sites, issues of cultural property, and ethics in archaeology. Students thus gain an appreciation of the complexities of present-day archaeological research and to both the benefits and limitations of the role of archaeology in creating our images of the past. Offered every other year.

304 The Ancient Novel This course explores the Greek and Roman ancestors of the modern novel. Ancient prose fiction opens many windows onto ancient attitudes towards gender, love and sexuality, religious belief and practice, and social relations. The ancient novels also happen to be fun to read, full of hairbreadth escapes, wide-ranging travel, intense and often conflicting emotions, complex and surprising events, and humor, sometimes delicate, sometimes shocking. Offered every third year.

305 Race and Ethnicity in the Ancient World Students in this course explore ancient Greek and Roman ideas about race and ethnicity and reflect upon how that thinking remains influential today. Students investigate how categories of race and ethnicity are presented in the literature of the Ancient Mediterranean through reading such authors as Homer, Herodotus, Aristotle, Vergil, Caeser, and Tacitus and through examining visual evidence. They study concepts such as racial formation and origin; ancient theories of ethnic superiority; and linguistic, religious, and cultural differentiation as a basis for ethnic differentiation. They also examine ancient racism as seen in such social processes as colonization, migration, assimilation, and imperialism. Students have to consider the impact of a number of divergent factors on conceptions of race and ethnicity, including: power (who defines the categories?); source (do all authors treat these terms the same way?); and context (in what ways do identities shift due to historical events and changing political or social contexts?).

308 Ancient Cities This course examines the history and architecture of the central institution of the Greco-Roman world, the city. The course focuses on the archaeological remains of cities throughout the ancient Mediterranean and addresses issues of the use of space in ancient town-planning and the political and ideological statements made by urban art and architecture. In addition to tracing historical changes in urban development, major topics of study include the city as an institution, the effect of urbanization on the lives of the inhabitants, and the interpretation of material remains. Offered every third year.

309 The Roman Revolution This course explores the period encompassing the disintegration of the Republic and the emergence of autocracy in the Roman world (133 BCE – 14 CE). Students study some of the most powerful personalities of Roman history (Sulla, Caesar, Cicero, Antony, Augustus) and some of its most tumultuous events (civil war, rebellion, riot, reigns of terror, and assassination). Students not only acquire a solid understanding and knowledge of the narrative of the period but also become familiar with its basic controversies, including the relative importance of both individuals and groups in the breakdown of the Republic and the problem of consolidation and institutionalization of autocracy. Offered every third year.

310 Theories of Myth This course examines classical, world, and contemporary mythologies, with a particular emphasis on the history of theories used to study mythology. The course starts with Greco-Roman theories for analyzing classical myths, then analyzes in detail theories that have arisen since the end of the eighteenth century: comparative approaches, linguistics, psychology, structuralism, religion and ritual, class-, race-, and gender-based approaches. It is recommended that students have previously taken a course in myth or literary/gender theory (e.g., CLSC 210, ENGL 370, GQS 201, etc.). Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every three years.

311 Ancient Comedy This class surveys the surviving plays of Aristophanes, Menander, Plautus, and Terence. The class discusses the structural features of Old Comedy (such as the chorus and the parabasis), the canonical definitions of Old, Middle, and New comedy, as well as the revolution of style and taste that differentiates Menander from Aristophanes. In the mythic world of tragedy, mortal trespass results in tragic consequences. In comedy, on the other hand, the mortal realm—
flawed, confused, and rudely physical—arrives at the curtain both
victorious and fecund. The class looks at the ways in which comedy
transgresses social norms and the role of the carnivalesque in ancient
culture. Students need not know Greek or Latin but must be willing to
perform in front of their classmates. Offered every other year.

318 Greek and Roman Religion Students examine the religions of
ancient Greece and Rome and the ways in which these religious sys-
tems functioned within the context of their societies. “Religion” meant
something very different to the Greeks and Romans than it does to
modern Americans: it penetrated daily life, politics and law in ways that
can seem foreign to us. The course utilizes literary, archaeological and
artistic evidence to understand religious practices from the time of the
Greek city-states to the establishment of Christianity as the Roman
state religion. Topics covered include Greek and Roman conceptions
of divinity, temples and sanctuaries, rituals, personal or family religion,
gender roles within ancient religion, and the existence of mystery cults.
Students read both primary and secondary works to understand Greek
and Roman religion as a system of “things done” (ritual) and “things
said” (prayer, myth, etc.) and discuss the extent to which it is proper to
add the phrase “things believed.” Offered every three years.

325 Sex and Gender in Classical Antiquity This course examines
sex, gender, and sexualities in ancient Greece and Rome. Building
upon foundational readings in feminist and queer theory, this course
examines critically both historical evidence for and representations of
love, gender, sex, & sexuality in a wide range of ancient literary texts,
as well as epigraphic, art historical, and archaeological sources. Through
this combination of using both Greek and Roman primary sources and
modern gender theory, this course aims to make sense of such topics
as women’s lives, marriage, prostitution, sexual violence, medicine,
peederasty, sex manuals, and non-normative or ‘Other’-bodied (e.g.,
transgendered) individuals. This course has no pre-requisites, but it
is strongly recommended that you have taken at least one 200-level
course in Classics or a course on gender theory (e.g., GQS 201). Offered
every three years.

334 The Archaeology of Power This course takes a large-scale
approach to the archaeological remains of empires and states in the
Mediterranean and Near East in the first millennium BCE. In this course,
students learn, through studying material remains of various states and
empires, how to (1) outline and investigate the diverse configurations,
 enactments, and experiences of power in human history, and (2) situ-
ate the development of the Greek city-states and the Roman Empire
within larger Mediterranean and Near Eastern imperial systems. Cultural
groups to be considered include the Greeks and Romans as well as
the Assyrians, Babylonians, Lydians, Phrygians, Persians, Egyptians,
Israelites, Etruscans, and Phoenicians. Sources to be examined include
the development and layout of cities as they relate to social stratification
and power structures, funerary monuments, art and symbolism and their
intersections with ideologies of power, the materiality of violence and re-
sistance, and primary written sources in translation. As well, various theo-
retical approaches to imperialism, colonialism, identity, and resistance are
considered and evaluated. Overall, students will practice analyzing and
evaluating both primary and secondary sources for the purposes of under-
standing state and empire formation in the ancient world.

339 Sci-Fi, Fantasy, and the Classics This course examines the an-
cient history of the future and the might-have-been—the role of Greco-
Roman antiquity in modern science fiction and fantasy. This course be-
gins with discussion about definitions, histories, and theories of ‘science
fiction’ and ‘fantasy,’ with emphasis on their roots in and relations to
ancient classics. Students then focus on representative modern texts in
various media (e.g., short stories, novels, films, comics); such texts may
include Mary Shelley’s Frankenstein, Franz Kafka’s Metamorphosis, J. R.
R. Tolkien’s The Hobbit, episodes of Star Trek, the works of Ridley Scott,
or J. K. Rowling’s Harry Potter novels. Students focus on themes of pe-
rennial human significance (e.g., the uses of history, technology, fantastic
voyages, metamorphosis, knowledge/wonder, etc.) and consider critical
approaches that may help us understand more deeply the similarities
and differences between classical and speculative thinking. To engage
in this work, students will learn the basic concepts, tools, and research
techniques of studies in the ‘classical tradition’ and ‘classical reception;’
a still-emergent but increasingly important field within the discipline of
Classics.

375 Special Topics in Classics This seminar involves an in-depth ex-
amination of selected topics in the classical world. A different topic may
be selected each time the class is offered in accord with the interests
of the students and the expertise of the faculty. Relevant theoretical
approaches and current research are explored. Students are responsible
for research papers and presentations under close supervision of the
faculty. Prerequisite: two Classics courses numbered 200 or above, or
permission of the instructor. Offered every third year or as needed.

390 Late Antiquity and the “Fall” of the Roman Empire This course
explores the world of Late Antiquity and the problem of the “fall” of
the Roman Empire. Students encounter a variety of perspectives on
this period, but examine in some detail the impact of Christianity on the
Empire, the Germanic invasions into the Western Empire in the fourth
and fifth centuries, and the place of “moral decadence” in theories
about the fall of the Empire. Offered every third year.

490 Senior Thesis This course is to be taken after both the required
200-level Classical Civilization courses and Latin or Greek 201 or equiva-
 lent have been completed. In the semester prior to registration for CLSC
490, students must complete a Thesis Proposal Form and submit it for
approval to their thesis advisor and the Classics Chair. For more informa-
tion on the thesis and the approval process, contact the Classics Chair.

495/496 Independent Study

Greek

101 Introduction to Ancient Greek I This course is an introduction
to the classical Greek of Athens in the fifth and fourth centuries BCE
and is primarily designed to provide students a foundation for reading
Greek tragedy, philosophy, and history in the original. Special emphasis
is placed on the sound of Greek. Students also become familiar with
some of the fundamental characteristics of Greek civilization. Successful
completion of this course and Greek 102 satisfies the university’s foreign
language requirement.

102 Introduction to Ancient Greek II This course is a continuation of
101. Students further their study of the basic grammar and vocabulary
of classical Greek with the aim of reading Greek tragedy, philosophy,
and history in the original. Special emphasis is placed on the sound
of Greek. Students also become familiar with some of the fundamen-
tal characteristics of Greek civilization. Successful completion of this
course and Greek 101 satisfies the university’s foreign language require-
ment. Prerequisite: 101 and 102 are sequential courses; 101 with grade
of C- or higher or permission of the instructor required for 102.

201 Intermediate Greek Review of grammar, readings of ancient
authors. Prerequisite: GRK 102 or permission of instructor. Offered Fall
term only.
301 Advanced Greek Reading  Students read substantial selections from ancient authors. The majority of class time is spent on the study of the syntax, semantics, and stylistics of those readings in order to build students’ speed and accuracy in reading Greek, and to facilitate appreciation of the texts. In addition, students become familiar with the cultural contexts of their readings through discussion, brief lectures, secondary readings, and student reports and papers. Reading selections vary: they may be centered on the production of a single author, or organized around a cultural theme, literary genre, or historical event. Authors and topics are changed each semester; contact the professor for specifics. Prerequisite: GRK 101, 102, and 201, or equivalent. May be repeated for credit.

Latin

101 Elementary Latin I  This course is an introduction to classical Latin (particularly as spoken, written, and read in the first centuries BCE and CE) and provides students a foundation for reading Roman poetry, drama, oratory, and history in the original. Special emphasis is placed on the pronunciation of Latin. Students also become familiar with some of the fundamental characteristics of Roman civilization. Successful completion of this course and Latin 101 satisfies the university’s foreign language requirement. Prerequisite: 101 and 102 are sequential courses; 101 with grade of C- or higher or permission of the instructor required for 102.

201 Intermediate Latin  This course is a continuation of first-year Latin. After a brief grammatical review, students read selections from ancient authors. Prerequisite: LAT 102 or permission of instructor. Offered Fall term only

301 Advanced Latin Reading  Students read substantial selections from ancient authors. The majority of class time is spent on the study of the syntax, semantics, and stylistics of those readings in order to build students’ speed and accuracy in reading Latin, and to facilitate appreciation of the texts. In addition, students become familiar with the cultural contexts of their readings through discussion, brief lectures, secondary readings, and student reports and papers. Reading selections vary: they may be centered on the production of a single author, or organized around a cultural theme, literary genre, or historical event. Authors and topics are changed each semester; contact the professor for specifics. Prerequisite: LAT 101, 102, and 201, or equivalent. May be repeated for credit.

COMMUNICATION STUDIES

Professor: Kristine Bartanen, Provost; Derek Buescher; Dexter Gordon; Renée Houston, Associate Dean for Experiential Learning and Civic Scholarship; James Jasinski; A. Susan Owen

Associate Professor: Bianca Wolf, Chair

Assistant Professor: Nicholas Brody

Visiting Assistant Professor: Sonia Ivancic

About the Department

Students majoring in Communication Studies examine the human, social, political, institutional, and mediated dimensions of human communication practices and processes. In every course in the program, students learn how these communication practices and processes construct and reconstruct meanings, enable and constrain social interaction, and interact with institutional structures and cultural, historical, and political forces. Students choosing a major in Communication Studies develop analytic and interpretive skills that enhance their capacity for critical thinking, intellectual curiosity about human communication, and proficiency in basic critical/interpretive and social science methods of communication research. Students demonstrate their command of this material by the capacity to (1) conduct critical inquiry and social scientific research, (2) locate and interpret primary materials when formulating original conclusions, and (3) communicate the results of their research to diverse audiences, both orally and in writing. The competencies emphasized within the Communication Studies program are integral to postgraduate study, a wide range of occupations, and the full and open discourse essential for democratic citizenship in the twenty-first century.

In consultation with their advisor, students typically concentrate their major course work in one of four emphasis areas: Relational Studies (interpersonal, persuasion, health, technology), Rhetorical Studies (political communication, argumentation, rhetorical theory and criticism, rhetoric and the law), Media Studies (television studies, film criticism, visual communication), and Organizational Communication. The department encourages students to complement their Communication Studies major with either a minor in a related discipline or a minimum of five courses in a supporting field, selected in consultation with their department advisor.

Cocurricular Activities

The Department of Communication Studies sponsors activities that include a competitive forensics program, including participation in policy and parliamentary debate within the Cross Examination Debate Association (CEDA), National Debate Tournament (NDT), National Parliamentary Tournament of Excellence (NPTE) and the National Parliamentary Debate Association (NPDA). The department also sponsors the Washington Alpha Chapter of Pi Kappa Delta, a national forensic honorary. Participation in these projects is open to all university students. Activity credit may be granted with prior approval of the department. The department sponsors a chapter of Lambda Pi Eta, the national undergraduate honor society.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Bachelor of Arts in Communication Studies

1. One unit selected from COMM class numbered 150-199;
2. COMM 230 and 240;
3. One unit selected from COMM 343, 344, or 373
4. One unit selected from COMM 330 or 331;
5. Five elective units selected and approved through advising from COMM 252, 291, 299, 308, 321, 322, 346, 347, 348, 350, 351,
360, 361, 368, 370, 381, 384, 399, 422, 444, 450, 460, 461, 482, 498 to include at least one elective unit at the 400-level; once requirements for #3 and #4 above have been met, additional courses from 330, 331, 343, 344, or 373 may be counted as an elective.

6. Only one 200 level elective and one unit from COMM 498 may be counted toward the major. In certain instances, one unit of INTN 497 may be counted toward the major with the approval of the department chair.

Requirements for the Minor in Communication Studies

Completion of 5 units, to include: COMM 230 and 240; three additional elective units from the 100-, 200-, or 300-level courses (at least two of which are 300-level courses). Theory (343, 344, 373) and Methods (330, 331) courses can also count as elective units. A single unit of COMM 150-189 elective can count toward the minor if completed in the freshman or sophomore year. Students who have not completed COMM 150-189 by the beginning of their junior year should start the minor with either COMM 230 or 240.

Notes on the Major and Minor

1. Students majoring or minoring in Communication Studies must earn a grade of C- or higher in all courses which are taken in fulfillment of a major or minor requirement.

2. 400-level courses are for majors only.

3. The Communication Studies Department reserves the option of determining, on an individual basis, a time limit on the applicability of courses to a major or minor.

4. Students may apply no more than one course to both core and Communication Studies minor requirements.

5. Students may apply up to two approved courses of study abroad credit toward their Communication Studies major.

6. Minors are required to have a secondary advisor in Communication Studies and meet with their advisor upon declaration of the minor.

Course Offerings in Communication Studies

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

SS1/SS2 109 Rhetoric, Film, and National Identity
SS1/SS2 116 Communicating Forgiveness and Revenge
SS1/SS2 118 Doing Gender
SS1/SS2 143 Controversies of Communication and Technology
SS1/SS2 144 Constitutional Controversies
SS1 162 Colonialism and Films

Other courses offered by Communication Studies Department faculty. See Connections in the Core Curriculum section of this Bulletin for Connections course descriptions (page 24).

AFAM 346 African Americans and American Law
Satisfies the Connections core requirement.

CONN 340 Gender and Communication
Satisfies the Connections core requirement.

HUM 320 Digital Humanities
Satisfies the Connections core requirement.

156 Introduction to Interpersonal Communication This course is designed as an introductory course on face-to-face communication in our social and personal relationships – our acquaintances, friendships, romantic partnerships, and relations with other loved ones. The basic premise of the course is to position one to maximize communicative effectiveness in these relationships with knowledge about how communication functions combined with analysis about one’s own and others’ communication practices and experiences. As a social scientific approaches course, this class will emphasize an understanding and application of various theories of interpersonal communication. Satisfies the Social Scientific Approaches core requirement. Prerequisite: Freshman or sophomore class standing. Offered frequently.

160 Introduction to Organizational Communication This course provides students with an introduction to the field of organizational communication as it exists within the discipline of Communication Studies. Through a survey of traditional and contemporary theories used to study the relationship between communication and organization, students are asked to analyze, compare, and apply theory to gain an appreciation for how communication scholars ask questions and study modern organizations in contemporary society. Specific theories covered include bureaucracy, rationality, power, systems, culture, conflict, race, gender, work-life balance, and technology. Throughout the course, theory will be applied to examples from a range of organizations including for-profit, government, educational institutions, civil sector, and virtual organizations. Satisfies the Social Scientific Approaches core requirement. Prerequisite: first-year or sophomore only, or by instructor permission. Offered frequently.

170 Introduction to Media Studies: Governmentality and Torture This course introduces the discipline of Communication Studies through the allied fields of media and cultural studies. Students gain foundational understanding in methods and critical approaches to contemporary media. The course begins with a survey of media structures and institutions (questions of media role in democracy), media texts and genres (questions of media form), and media and identity (questions of representation). The course transitions from this overview into topical or thematic views of media. Topics may include: (1) representation and ideology with attention to race and gender; (2) trauma and torture pre and post 9-11; (3) memories of war, trauma, and immigration with attention to imperialism, race, and gender; (4) media and social/economic systems; (5) public sphere deliberation and media as democratic processes; or (6) Disney Culture. Satisfies the Humanistic Approaches core requirement. Prerequisite: first-year or sophomore only, or by instructor permission. Offered frequently.

171 Introduction to American Civic Rhetoric This course uses rhetorical and argumentation theory to introduce students to the discipline of Communication Studies. Students gain foundational understanding of the concepts, theories, and methods related to the study of American civic rhetoric. The course begins with a brief introduction to key concepts in rhetorical studies and then examines key examples of American civic rhetoric that have shaped the political culture of the United States throughout its history. Satisfies the Humanistic Approaches core requirement.

180 Introduction to Critical Issues in Public Culture: Democracy and Identity in US Public Discourse This course uses critical and cultural studies approaches to introduce students to the discipline of Communication Studies. Students gain foundational understanding in methods and critical approaches to public culture, including media. The course begins with a survey of key concepts, public culture, democracy, identity, and communication, and then moves to a topical study of discourse as part of public culture in the struggle to maintain or advance
concepts of democracy within the context of competing identities related to issues of race, class, gender, and political affiliation. Satisfies the Humanistic Approaches core requirement. Prerequisite: first-year or sophomore only, or by instructor permission. Offered every other year.

181 Introduction to Online Communication This course provides an introduction to the field of computer-mediated communication (CMC) as it exists within the discipline of Communication. The course covers a broad range of CMC theories and applies them to modern use of existing technologies (e.g., email, mobile telephony) and newer media (social media and Web 2.0 systems such as Facebook, Twitter, and online dating) in an effort to uncover how these technological systems affect today’s communication climate. Specific areas may include the following: online impression formation, online self-presentation, personal relationships, political campaigns, habitual media use, e-commerce, brand management, and online advertising. Students will be introduced to social science research, scholarly argument, and empirical observation. Prerequisite: first-year or sophomore only, or instructor permission. Satisfies the Social Scientific Approaches core requirement. Offered frequently.

230 Communication Theory This course is designed to introduce students to the role that theory plays in different types of communication research. The course looks at the different motives scholars have for studying communication and the different types of theory they develop to pursue these motives. In addition, the main areas of communication scholarship are reviewed with respect to the theories that can inform research in those domains. The class is divided into six general, topical foci: Individual/sender processes, receiver-based processes (message processing), relational processes (dyads and social networks), media, gender/culture/society, and organizations/groups. Students are expected to engage in practices of close reading, critique, and evaluation of these theories within the communication tradition. Prerequisite: one unit selected from COMM 150-199; may be taken concurrently. Offered every semester.

240 Introduction to Communication Criticism Academic communication criticism (or critical inquiry) typically differs from popular forms of criticism in the amount of attention it devotes to descriptive analysis. Rigorous descriptive analysis is the foundation of critical inquiry in communication studies. This course introduces students to some of the basic analytic concepts that communication critics employ to analyze film, prose discourse (essays, speeches), and visual images. Course concepts include media grammars and styles, figurative language and visual tropes, narrative forms, and genre. Throughout the course students will learn how to prepare close readings of multiple texts. Prerequisite: one unit selected from COMM 150-199; may be taken concurrently. Offered every semester.

252 Health Communication Campaigns Health communication campaigns are coordinated, large-scale efforts to promote health and reduce health risks. Campaigns are traditionally rooted in 1) persuasive approaches which focus on altering attitudes, beliefs, and behaviors and 2) communicative approaches that evaluate multiple levels of communication, different channels, and diverse communication technologies. This course introduces the historical perspectives of health campaigns, provides insights into various theories which inform campaign work, and reviews the methodological considerations of researching, implementing, and evaluating health campaigns. In this course students explore the design and analysis of health campaigns blending theory, practice and methods to critique past, present, and future campaigns. This course stresses practical application as students develop a hypothetical health campaign by which they come to fully understand the ways that campaigns are planned, organized, executed, and evaluated. This course covers a wide range of theories and topics on health campaigns including but not limited to: Agenda Setting, Agenda Building, Uses and Effects, Cultivation, Parasocial Interaction, Edu-tainment, Social Marketing, Diffusion of Innovations, Health Belief Model, Social Norms, Stages of Change, and Knowledge Gap. Offered occasionally.

291 Film Culture This course uses film as its text to examine diverse and competing views of full and equal membership in human communities, and the perceived worth of marginalized groups as members of those communities. Course materials examine the role of film and film genre in constructing and challenging cultural identity with special emphasis on race, gender, and sexuality. The course explores African American cinema and feminist film sensibilities in the context of historical and contemporary film genre. The course examines the role of human tragedy, comedy, film noir, and postmodern drama in the cinematic articulation of human identity and cultural values. The course is particularly focused upon tensions in cinema that address competing notions of “stable” and “fluid” human identity. The course offers students an opportunity to reflect upon a broad range of historical and contemporary film texts that address issues of cultural identity, belonging, and resistance in the human community. Satisfies the Humanistic Approaches core requirement. Prerequisite: sophmore standing required. Offered frequently.

292 Forensics 0.25 activity unit Participating in intercollegiate forensics. May be repeated for credit.

299 Supervised Research credit variable up to 0.5 unit This course provides research experience in either social science or the critical/interpretative research tradition for advanced sophomores and juniors. Students assist a department faculty member in various aspects of the research process (e.g. reviewing literature, gathering and analyzing data, etc.). Students must prepare and submit a written summary of their research work for a final grade. Interested students should contact the department chair to see what research opportunities are available in a given semester. May be repeated for a maximum of one unit of credit. Prerequisite: one course selected from COMM 150-199; completion or concurrent enrollment in COMM 240 and 330 or 331.

308 Organizational Communication Theory This course offers a focused review of organizational communication in terms of historical roots, metatheoretical commitments, conceptual and theoretical approaches, and contemporary research. The first half of the course is devoted to a consideration of the organizational communication discipline in terms of history, metatheory and methodology, and important conceptual and theoretical approaches to understanding organizing and organizations. The second half of the course is devoted to discussions of a range of contemporary research on specific topics that are currently of interest to organizational communication scholars. Topics include, but are not limited to work-life balance, emotional labor, power, and resistance in organizations. Prerequisite: COMM 160 recommended. Offered frequently.

321 Film Criticism This is a critical writing course in media literacy which focuses on how popular film narratives (independent and mainstream) function in American culture. Students study visual and narrative composition of film, the politics of film aesthetics and production, and the competing rhetorics of American film directors and genres. The discussion of each film is contextualized through attention to visual and narrative construction of gender, race, ethnicity, nationality, sexuality, and social class. Prerequisite: completion of COMM 240, junior or senior standing required; COMM 291 recommended. Offered frequently.
322 Television Culture  This advanced course addresses the cultural influences of American television from 1946 to present day. In particular, the course examines the intersections of the television medium with politics and government, social movements, cultural conflicts, film aesthetics, advertising and consumerism. Some of the topics covered in the course include the changing character of broadcast news (from Edward R. Murrow to Jon Stewart), women and feminism in television, television genres, and television and race. Prerequisite: junior or senior standing required, and completion of or concurrent enrollment in COMM 240 or 373. Offered frequently.

330 Quantitative Research Methods  The main goal of the course is to introduce students to the social scientific tradition of communication research. Over the course of the semester, students will be responsible for developing an interesting and novel research question and/or hypothesis based on scientific literature and communication theory. Students will learn how to critically evaluate empirical research and employ the scientific method to investigate issues and questions that arise within the study of human communication. Students will become familiar with survey research, experimentation, and techniques for data analysis. Prerequisite: completion of or concurrent enrollment in COMM 230; junior or senior standing, or permission of instructor. Offered frequently.

331 Qualitative Research Methods  This course introduces students to the ideology, designs, implementation, and analytic techniques of qualitative research that enable them to describe and explain social phenomena related to social and personal relationships and health. Students will learn experientially throughout the semester and, upon successful completion of this course, will be able to draw on the appropriate qualitative methodological tools to best answer original research questions. Prerequisite: completion of or concurrent enrollment in COMM 230, junior or senior standing, or permission of instructor. Offered frequently.

343 Argumentation Theory  This course examines theories of argumentation to explore how communities arrive at decisions. To that end, this course develops the skills of reason-giving and critical evaluation that are central to competent participation in a democratic society. In this course, students actively engage the formal structure of arguments. Students learn to evaluate the rhetorical claims of others while constructing their own claims with reasoning adapted to the constraints of the situation. Students learn to question, analyze and critically engage the claims, grounds, warrants, evidence and reasoning of public discourse and will grasp the major theoretical trends in the field of argumentation. While the course focuses on the major theoretical trends of argumentation, it does so through grounded topic areas to understand the relationship between theory and praxis. Prerequisite: junior or senior standing or permission of instructor; COMM 240 recommended. Offered every third year.

344 Rhetorical Theory  Rhetorical Theory is an advanced course that examines the evolution of rhetorical theory during the past twenty-five hundred years and the cultural forces that have given rise to variations in the classical paradigm. Students of the language arts, classics, philosophy, as well as communication, should find the course a useful cognate in their academic programs. Prerequisite: junior or senior standing or permission of instructor; COMM 240 recommended. Offered frequently.

346 Rhetoric and the Law  For most of recorded history, the study of law and the study of rhetoric were linked. The professionalization and specialization of legal education in the late nineteenth and early twentieth centuries severed a connection that had persisted for two thousand years. Over the past few decades, rhetorical scholars in communication departments and scholars in other academic disciplines (including political science, literary studies, and the law itself) have begun to forge a new link among the law, legal advocacy, and rhetoric, and this course introduces students to this relatively new interdisciplinary movement. The course concentrates on three intersecting themes: the law as language, the law as argument, and the law as constitutive rhetoric. Recommended: COMM 240. Offered occasionally.

347 Studies in Public Discourse  Contemporary Public Discourse  This course analyzes the creation, reception, and impact of American public discourse over the last five decades. Course material focuses on the process of rhetorical advocacy as it occurs in key political and cultural events and significant public controversies. Through detailed analysis of message construction, the course enhances students’ appreciation of the range of strategic choices available to public advocates, increases students’ understanding of the limitations and constraints that confront public advocates, and nurtures students’ ability to analyze and evaluate public discourse. Through the reconstruction and analysis of important episodes and controversies in recent American history (including decisions to drop the atomic bomb, the cold war, Vietnam, civil rights, and feminism), the course develops students’ knowledge of the role of public discourse in historical events and illustrates the relationship between rhetorical practice and American public culture. Recommended: previous work in rhetorical studies (COMM 240, 343 or 344). Offered every three years.

African American Public Discourse  This course analyzes the tradition of African American public discourse from the late eighteenth to the early twenty-first centuries. Through detailed analysis of message construction, the course enhances students’ appreciation of the range of strategic choices available to African American advocates, increases students’ understanding of the limitations on constraints that have confronted public advocates, and nurtures students’ capacity to analyze and evaluate various forms of public discourse. Course topics include: the emergence of an African American public voice in late eighteenth-century America (e.g. Benjamin Banneker, Absalom Jones), African American abolitionist voices (e.g. David Walker, Frederick Douglass, Henry Highland Garnett), the advocacy efforts of African American women (Maria W. Stewart, Sojourner Truth, Ida B. Wells), African American public discourse in the reconstruction and post-reconstruction era (e.g. Joseph Rainey, Booker T. Washington, W.E.B. DuBois), the twentieth-century civil rights movement (the Brown decision, Martin Luther King, Jr., Malcolm X, “black power” advocates), and various contemporary civic controversies (e.g. reparations, affirmative action). Recommended: previous work in rhetorical studies (COMM 240, 343 or 344). Offered occasionally.

348 Political Communication  This course examines the historical development of “the rhetorical presidency,” the genres of presidential discourse, and the process of policy deliberation in the legislative branch. The course also explores the idea that political communication constructs or “frames” our culture’s “social reality” (our shared values, traditions, behavioral norms, etc.). The course prepares students to become more sophisticated and literate consumers of political communication. Recommended: COMM 240. Offered occasionally.

350 Family Communication  Many orientations to the social world are formed from our experiences that extend from family identities; in particular, the ways individuals relate and communicate with others are profoundly affected by our familial relationships. Furthermore, understanding the family as a communication system is imperative in
an era when family issues are at the forefront of national concerns in governmental, educational, health, and religious arenas. This class regards the examination of “family” as fundamental to a comprehensive understanding of relational communication. This upper level course is intended to help students understand how communication helps people develop, maintain, enhance, or disturb family relationships. Students learn to think, write, and speak critically about what “family” means, and about the various forms, functions, and processes of family communication. This course is designed to help students better understand family communication in their own lives, both theoretically and practically. Offered occasionally.

351 The Dark Side of Interpersonal Communication This is an advanced relational course, ideal for students who have previous exposure to relational theory and constructs. This course introduces a variety of “dark side” topics and issues that are often neglected as important phenomena in the scope of human relationships. The course includes a critical examination of the “dark side” of communication moving beyond the Pollyanna-like perspectives that pervade much of interpersonal communicative research, (i.e., be attractive, open, honest, good-humored, etc.) in an attempt to achieve a more realistic and balanced view of human interaction. Offered occasionally.

360 Contemporary Issues in Organizational Communication Using a variety of different organizational lenses (i.e. culture, workgroup, and agent), students learn to think through issues in modern organizations. Course materials encourage students to take the role of organizational agents as they face ethical dilemmas in examining contemporary organizational issues such as gender, language, class, and technology. Students can expect a variety of theory and application, integration through intensive class discussion, ethics case papers, and an in-depth group project, which includes a 40-minute professional presentation. Other assignments focus on developing writing skills that are appropriate for typical business and professional settings. The goal of the course is to encourage student reflection on how everyday communication (e.g. writing a simple memo) can affect and construct a system of interaction with profound organizational and social consequences. Prerequisite: junior standing or instructor permission. Offered every other year.

361 Organizing Difference Using a variety of different organizational lenses (e.g. culture, workgroup, and agent), students learn to think through social identity issues materialize in modern organizational policy and practice. Course materials encourage students to take the role of diverse organizational agents as they face ethical dilemmas in examining contemporary social identity issues such as gender, race, class, and age. Students can expect a variety of theory and application integration through intensive class discussion, reflective and analytic writing assignments and a final research project. The goal of the course is to encourage students to identify issues of organizational power and practices of oppression, particularly as these practices may result in disparate material consequences of economic health and well-being. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered occasionally.

368 Environment and Organizational Practice Since organizations cannot exist without communication and interaction, organizational life is filled with communication activities that intersect with personal boundaries. Management and coordination, training, decision-making, and conflict are only a few examples. On another level, organizations are themselves the products of the constant processes of organizing. Thus, communication forms and maintains organizations by enabling the process of organizing. This course is designed to give students an intensive inquiry into systems theory as a way of understanding organizations as a function of communication and environment. Initially students review a variety of approaches which inform their understanding of organizational communication as it is practiced in the everyday life of organizations; however, the lion’s share of the semester is spent studying intersections of communicating about and across systems and considering the impact of that communication on stakeholders. The course closes by considering the very basis for which the use of systems theory began—to understand the relationship of organizations to the environment. Of course how people conceptualize what counts as environment changes over the years so in particular the course focuses on the impacts organizational practices impose on our natural environment and how management might change those practices to create a sustainable environment. Usually offered every other year.

370 Communication and Diversity The purpose of this course is to enhance students’ understanding of diversity issues as they relate to the study of communication. The course looks at how the media, its images and discourses, shape one’s understanding of experiences, shape the experiences of women, and the experiences of people of color. The course also explores the ways in which elements of the media socially reproduce prejudice and foster resistance to prejudice. As a result of engagement in the course, students gain the ability to critically analyze and evaluate media products. They also become aware of critical professional issues in relation to a diversified workforce as it relates to the production, distribution, and consumption of media products. Cross-listed with AFAM 370. Prerequisite: junior or senior standing. Offered frequently. Satisfies the Knowledge, Identity, and Power graduation requirement.

372 Contemporary Media Culture: Deconstructing Disney The course focuses on critical understanding and evaluation of Disney as a constitutive element of contemporary culture both in the United States and globally. Through analysis of Disney animated films, Disney corporate reach and marketing, and Disney theme parks (“Where dreams come true”) students engage questions highlighted by Henry Giroux about Disney, “as what role [Disney] plays in (1) shaping public memory, national identity, gender roles, and childhood values; (2) suggesting who and what qualifies as an agent; and (3) determining the role of consumerism in American Culture and around the globe” (The Mouse that Roared, p. 10, 2010). The course draws heavily on literature and theory from rhetorical criticism, media criticism, and cultural studies to engage the textual productions of Disney, Disney’s historical location in U.S. culture, Disney’s corporate structure and self-presentation, and its experiential vacation through theme parks, resorts, and vacation clubs. Disney broadly, and its theme parks specifically, offers highly orchestrated and managed immersive entertainment spaces. A clearer understanding of Disney cultural reach allows the course to enter discussions about citizenship, identity production including race, gender, ethnicity, and nationalism, labor and capital flow, ideology and interpellation, cultural appropriation and homogenization, consumerism and commodification, hyperreality, narrative, and resistance. Satisfies the Knowledge, Identity, and Power graduation requirement. Prerequisite: COMM 240. Offered occasionally.

373 Critical Cultural Theory This course introduces students to the methodological and theoretical approaches of cultural studies and does so with attention to both the interrelationships of race, gender, and class as well as the contemporary politics of social justice. Although this course is, in general, not canonical in its orientation, the suggested readings do point students toward some key scholarship in cultural studies. Beyond seeing cultural studies, as traditionally viewed by academics, as developing out of Western academic critiques of culture and philosophy, this course examines the multiple locations, and politics of these
locations, that gave rise to cultural studies. The course has many goals: to introduce the nascent field of cultural studies scholarship, to encourage analysis of the “politics of location” of cultural studies research, to provide a broad understanding of the history of cultural studies, and to help students ground their own perspectives within an area of cultural studies scholarship with particular and particularistic assumptions, perspectives, and approaches. Prerequisite: COMM 240; COMM 321, 322, 343 or 344 recommended. Offered frequently.

381 Communication and the Internet This course is part of the human communication and technology curriculum. This course explores issues and questions about computer-mediated communication in multiple contexts, in order to understand the psychological, interpersonal, professional, social, and cultural implications of computer-mediated communication. The objective of Communication and the Internet is to develop a critical view of online communication by applying the processes and principles of social scientific theories and research to issues and patterns of Internet communication. Lectures, discussions, and assignments are designed to give students insight into the way technology currently impacts their daily lives, and how it may affect them in the future. Prerequisite: completion of or concurrent enrollment in COMM 230 or 330. Usually offered every other year.

384 Topics in Communication Upper level courses in various areas of the communication discipline. Course content varies with each offering. May be repeated for credit. Maximum one unit applied to major requirements. Prerequisite: completion of or concurrent enrollment in COMM 230 or 330. Offered occasionally.

399 Supervised Research credit variable up to 0.5 unit This course provides research experience in either social science or the critical/interpretative research tradition for juniors and seniors. Students assist a department faculty member in various aspects of the research process (e.g. reviewing literature, gathering and analyzing data, etc.). Students must prepare and submit a written summary of their research work for a final grade. Interested students should contact the department chair to see what research opportunities are available in a given semester. May be repeated for a maximum of one unit of credit. Prerequisite: COMM 230 and 240. Offered each semester.

422 Advanced Media Studies This course is the capstone of the media studies curriculum. Students have the opportunity to study the historical, technological and economic contexts within which images of the human body have been circulated, regulated, and negotiated. Counts toward a minor in Gender and Queer Studies. Prerequisite: COMM 240 and 321 or 322 or permission of instructor. Offered every other year.

444 Advanced Rhetorical Studies This course is the capstone of the rhetorical studies curriculum. As such, it presupposes that students grasp the analytic techniques introduced in COMM 240 and the conceptual issues introduced in COMM 344. Its purpose is to examine exemplary forms of scholarly inquiry in rhetorical studies in order to better prepare students to engage in independent and creative scholarly inquiry. Prerequisite: junior or senior standing or permission of instructor. Offered occasionally.

450 Health and Relationships This course is the capstone of the relational and behavioral studies and health communication curricula. Students will review current research that intersects interpersonal, family and health communication, considering its methodological, critical, and practical implications. Students taking this course should be knowledgeable about relational and health theories and research reviewed in other related courses. Prerequisite: junior or senior standing or permission of instructor. Offered occasionally.

460 Technology, Organization, and Globalization This course is one possible capstone of the organizational studies curriculum. Students consider how communication and collaboration technologies influence the creation, content, and pattern of knowledge networks within and between organizations. The course focuses special attention on recently emerging organizational forms including the virtual organization, the network organization, and the global organization. The remainder of the course examines how communication technology systems are changing the very fabric of our work experience in the twenty-first century. Discussion focuses on the relationships between technologies and social practices at the individual, group, organizational, interorganizational and global levels, as well as organizational and societal policy issues. Prerequisite: COMM 308. Offered occasionally.

461 Advanced Organizational Communication This course is a capstone of the Organizational Studies Curriculum. Students have the opportunity to explore a variety of qualitative inquiry methods as applied to the study of anticipatory socialization, entry, assimilation, and expectations of work-life balance in organizations. Prerequisite: COMM 308 or permission of instructor. Offered occasionally.

482 Communication In Personal Relationships This advanced course focuses on describing, explaining, and predicting communication processes that occur within the context of close relationships. The field of personal relationships is interdisciplinary, with scholars from areas such as communication, family studies, and social psychology all contributing to knowledge about communication in relationships. Therefore, this course emphasizes communication but also includes concepts and theories from other fields. The overall goal of the class is to help students better understand some of the factors affecting relationships and to appreciate the impact of communication on their relationships in a variety of contexts. Prerequisite: junior or senior standing or permission of instructor. Offered occasionally.

498 Internship Tutorial Students who enroll in this course work with a faculty member in the Communication Studies department to develop an individualized learning plan that connects the actual internship site experience to study in the major. The learning plan will include required reading, writing assignments, as well as a culminating project or paper. Prerequisite: approval of tutorial professor and the Internship Coordinator.

---

**COMPUTER SCIENCE**

Students interested in a major or minor in Computer Science should consult the Mathematics and Computer Science section in this *Bulletin*.

---

**ECONOMICS**

Professor: D. Wade Hands; Bruce Mann (emeritus); Garrett Milam, Chair; Kate Stirling (on leave Fall 2018); Matt Warning (on leave Spring 2019), Assistant Professor: Lea Fortmann; Andrew Monaco; Isha Rajbhandari; Peter Sullivan

Visiting Assistant Professor: Lisa Nunn

**About the Department**

Economics focuses on decision making and problem solving. It concerns itself with making intelligent individual and social choices in a world of scar-
city. The department believes that a student who spends four years wrestling with economic issues and developing the analytical tools necessary to resolve them will emerge with sharpened reasoning and communication skills and will be more alert to the complexities of the world.

The mission of the economics program is to educate undergraduates in the fundamental concepts and methods of economics and to help them become better informed and more productive citizens. Learning outcomes for students include the development of sufficient facility with the tools of economics to critically analyze private and public decision-making processes, contemporary and historical socioeconomic issues, and the fundamental role that economic forces play in society.

The programs in economics are designed to provide students with a strong background in economic theory and applied analysis. The department offers majors leading to both the Bachelor of Science and Bachelor of Arts degrees in economics, as well as a minor. The BA degree is designed for students seeking broad preparation in more than a single area and is often combined with second majors in international political economy, politics and government, or business. The BS degree is designed for students with strong quantitative skills or those with an interest in graduate study in economics or applied mathematics.

All economics students should: (1) develop sufficient facility with the tools of economics to be able to critically analyze private and public decision-making processes and contemporary and historical socioeconomic issues, and (2) understand the fundamental role that economic forces play in society.

Economics majors should demonstrate the ability to: (1) understand and manipulate complex economic models and draw meaningful connections between these models and empirical applications; (2) conduct an empirical economic research project and convey the findings effectively, both orally and in writing; (3) develop the implications of alternative policy choices by application of microeconomics and macroeconomics; (4) understand and critique recent economic research; (5) be aware of recent developments in the U.S. and world economy; and (6) acquire skills appropriate to their career goals.

Economics majors should develop excellent communications skills, including the ability to communicate effectively both orally and in writing. Using these skills, they should be competent to convey: (1) their understanding of the technical aspects of economics, (2) the results of empirical analysis and applied theory, and (3) their familiarity with economic events.

In addition, economics majors planning to undertake graduate study should develop expertise in mathematics, mathematical economics, and econometrics.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major

**Bachelor of Arts Degree**

1. Completion of a minimum of nine units to include
   a. ECON 101, 102, 284, 301, 302, and 411;
   b. Three economics electives at the 200-level or above, at least one of which must be 300-level or above. BUS 431 or BUS 432 may be counted as one of the three electives;
2. MATH 160 or 260 (or an equivalent statistical methods course with approval of the Economics Department).

**Bachelor of Science Degree**

1. Completion of a minimum of nine units, to include
   a. ECON 101, 102, 284, 301, 302, 391, and 411;
   b. Two economics electives at the 200-level or above, at least one of which must be 300-level or above. BUS 431 or BUS 432 may be counted as one of the two electives;
2. MATH 160 or 260 (or an equivalent statistical methods course with approval of the Economics Department);
3. Calculus through multivariate, MATH 280.

**Requirements for the Minor**

Completion of five units to include
1. ECON 101 and 102;
2. Three 200-level or above economics electives, to include at least one course at 300-level or above.

**Notes for Majors and Minors**

1. With prior approval from the Economics Department, one unit of ECON 495/496 may be counted toward the electives.
2. Only courses for which the student has received a C or better can count for the major or minor.
3. The economics department reserves the option of not applying courses more than 6 years old to a major or minor.
4. Students who study abroad may apply two approved electives toward their Economics major.
5. Students contemplating graduate school in economics should take three semesters of calculus and linear algebra at a minimum and should include probability theory and differential equations if possible.
6. Students should take at least one 200-level economics course before enrolling in ECON 301 or 302.

**Course Offerings**

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

**Seminars in Scholarly Inquiry.** See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

**SSI1 173 Alexander Hamilton’s America: The Political Economy behind the Musical**

**Other courses offered by economics department faculty.** See Connections in the Core Curriculum section of this Bulletin for Connections course description (page 24). Note: Connections courses offered by economics faculty do not count for the major or minor.

**CONN 345 Economics of Happiness**

Satisfies the Connections core requirement.

**CONN 481 Gamblers, Liars, and Cheats**

Satisfies the Connections core requirement.

**CONN 410 Science and Economics of Climate Change**

Satisfies the Connections core requirement.

**101 Introduction to Markets and Macroeconomics** This is the first course in the economics two-semester introductory sequence. It introduces students to the market model and macroeconomics. Topics explored in the market model unit include supply and demand, incentives, opportunity cost and comparative advantage. Topics in macroeconomics
include national income determination, inflation, unemployment, fiscal and monetary policy and key macroeconomic institutions. Satisfies the Social Scientific Approaches core requirement.

102 Introduction to Behavior and Choice This is the second course in the economics two-semester introductory sequence. It introduces the student to the microeconomic concepts of consumer choice, demand theory, consumer and producer surplus, the theory of the firm, perfect competition and market failure. Prerequisite: ECON 101. Offered each semester.

199 Sound Economics 0.25 unit activity credit. This course is an activity credit where students participate in Sound Economics, a student-run economics blog. Students become familiar with the style and technique for academic blog writing, ultimately producing weekly articles which generate novel content, engage in current economic events, and synthesize economic ideas from the literature and the broader economic blogosphere. Weekly meetings are required to promote economic discussions, participation in peer review, workshopping writing skills, and the promotion and management of Sound Economics itself. Prerequisite: ECON 101 and 102 (can be concurrent) and permission of instructor. Course can be repeated for credit. Offered each semester.

218 American Economic History This course utilizes the tools of elementary economic analysis to explain basic issues in American economic history. In general, the course is organized chronologically. The course begins with discussions of the colonial and revolutionary periods, then continues with analysis of banking development, slavery, the Civil War, and industrial and labor market changes in the later nineteenth century. The course concludes with an analysis of the causes and effects of the Great Depression. Prerequisite: ECON 101 or permission of the instructor.

221 History of Economic Thought The development of economic thought from late eighteenth century to the early twentieth century. The relation of economic thought to other social, political, and scientific thought is emphasized. The class focuses primarily on seven major figures in the history of economic thought: Smith, Ricardo, Mill, Marx, Marshall, Veblen, and Keynes. Readings are from original and secondary sources. Prerequisite: ECON 101 and 102 or permission of instructor. Offered each year.

225 Environmental and Natural Resource Economics This course introduces economic perspectives on modern environmental issues. Students study economic theories related to natural resources and the environment. The first half of the course focuses on general concepts and theory, including markets and market failures, non-market valuation, benefit-cost analysis, and dynamic optimization of resource use over time. The second half shifts to applications including renewable and non-renewable resources, pollution, global climate change, fisheries, water, and concepts of sustainability. Prerequisite: ECON 101 or permission of the instructor. Offered each year.

241 Regional and Urban Economics The tools of microeconomics are applied to understand the theoretical and empirical topics in urban and regional economics. The course begins with a discussion about the different definitions of regions, followed by topics on location theory of firms, labor markets, and household migration decisions. The second part of the course focuses on the urban sector of the economy exploring urban growth, land-use patterns, and externalities associated with urban areas. The final section of the course includes a discussion on regional economic policies and its implications on economic growth. Prerequisite: ECON 101 and ECON 102 or permission of the instructor. Offered each year.

244 Gender and the Economy This course is an analysis of changing roles of women, using theoretical and empirical tools of economics. Topics include work and family issues, the labor market, occupational segregation, and discrimination. Although the primary focus is on women in the U.S., this course devotes a substantial amount of time to issues related to women from other countries. Students gain an understanding of what the economy and economic policy can do, how they can affect men and women differently, and how economic policy can lead to greater gender (in)equality. Prerequisite: ECON 101 and 102 or permission of instructor. Offered each year.

261 Public Finance and Tax Policy This course presents an overview of the theory and practice of public sector economics in the United States. Topics that receive special attention include the government expenditure and social welfare policies, federal-state-local tax principles and policy, government budgets and deficit finance, and issues associated with public finance in a federal system. Prerequisite: ECON 101 or permission of the instructor. Offered each year.

268 Development Economics In this course, students acquire empirical skills to analyze critical issues in global development. Students apply simple quantitative tools to data from low-income countries to examine the economic strategies of households and the policy choices of governments. Examples range from using household-level data to identify the effect of central government policies on poverty and inequality in Mexico to examining how market failures and unremunerated household labor lead to underinvestment in the education of girls and women. Other topics covered include how the choice of a human development measure affects economic policy, how individuals and households make migration decisions, how population policy affects— or doesn’t affect—fertility choices, how to accurately identify the causal impact of development projects and whether microfinance helps participants escape poverty traps. The course draws heavily on the book Poor Economics for rich narratives about the lives of the poor and for recent insights from behavioral economics that can inform development policy. While Microsoft Excel is the main empirical tool, no experience with Excel is assumed. Prerequisite: ECON 101. Offered Spring term.

270 The Economics of Money and Banking This course examines the role of money in a modern economy. The focus is on the role of money and financial institutions. Topics covered include interest rate determination, asset and liability management, the role of the Federal Reserve System, and the importance of monetary policy in the macroeconomy. Prerequisite: ECON 101 or permission of the instructor. Offered each year.

271 International Economics This course surveys the theories, policies, and controversies in international trade and international finance. Students explore various models that attempt to explain the observed patterns of trade and the instruments used by governments to affect trade patterns. Students also examine the determination of exchange rates, the balance of payments and international macroeconomic policy. Prerequisite: ECON 101. Offered each year.

284 Introduction to Econometrics This course concerns application of statistical theory to the analysis of economic questions. Students learn the tools of regression analysis and apply them in a major empirical project. Prerequisite: ECON 101, 102, at least one 200-400-level economics course, and MATH 160. Offered each semester.

291 Behavioral Economics This course uses tools from economics and psychology to address individual decisions which are hard to account for with traditional, rational economic theory. Using both theo-
Game theory is a technique for from a variety of theoretical perspectives. The theory of the firm is
Behavior

351 Industrial Organization: Market Structures and Strategic

nalities, and matching markets. The course emphasizes microeconomic

applied economic principles including adverse selection, network exter

market are explored to simultaneously provide insight on more broadly

on risk attitudes, and heuristics. Students participate in and develop con-
trolled experiments to examine these issues empirically. Prerequisite: ECON 101 and 102. Offered each year.

301 Microeconomic Theory  This course develops and extends the
methods of microeconomic analysis. Topics include consumer-choice
theory, models of exchange, the theory of the firm, pricing models, and
general equilibrium analysis. Prerequisite: ECON 101 and 102 or permis-
sion of the instructor. Offered each semester.

302 Macroeconomic Theory  The basic principles of national income
determination are studied from a theoretical perspective. Various mod-
els of macroeconomics are analyzed with emphasis on effects of mone-
tary and fiscal policy. Particular emphasis is placed on understanding the
causes and consequences of unemployment, inflation, and economic
growth. Prerequisite: ECON 101 and 102 or permission of the instructor.
Offered each semester.

327 Climate Change: Economics, Policy, and Politics  Global climate
change is considered by many to be the most significant environmental
challenge of the 21st century. Unchecked, the continued accumulation of
greenhouse gases over this century is projected to eventually warm the
planet by about 8 to 14°F, with associated impacts on the envi-
ronment, economy, and society. This course explores the economic
characteristics of the climate change problem, assesses national and
international policy design and implementation issues, and a survey of
the economic tools necessary to evaluate climate change policies. It is
largely discussion-oriented and thus requires a high degree of participa-
tion by students in the classroom. Prerequisite: ECON 101. Crosslisted as ENVR 327. Offered every other year.

330 Law and Economics  The major focus of this course is on the
application of microeconomic tools to legal issues. The course con-
siders the general issues of legal analysis and microeconomic theory
as applied especially to the areas of tort, property, and contract law.
Prerequisite: ECON 101 and 102. Offered fall semester only.

335 Modern Labor Economics  This course is devoted to a microeco-
nomic analysis of the labor sector in the U.S. economy. The emphasis is
on the allocation and distribution of time as an economic resource.
Topics to be discussed include demand for labor, supply of effort,
non-market time allocation, market imperfections, human capital theory,
and models of wage determination. Prerequisite: ECON 101 and 102 or
permission of the instructor. Offered frequently.

341 The Economics of Online Dating  This course develops the
connections between economic theory and the online dating market.
Economic techniques are used to examine unique features of the online
dating market, such as the significance of market thickness, the pre-
valence of cheap talk, and search theory. Features of the online dating
market are explored to simultaneously provide insight on more broadly
applied economic principles including adverse selection, network exter-
nalities, and matching markets. The course emphasizes microeconomic
theoretical techniques to model these phenomena. Prerequisite: ECON
101 and 102 or permission of instructor. Offered frequently.

495/496 Independent Study
Students interested in teaching should complete a major or minor or five units of coursework for an endorsement in a teaching field. Students are strongly encouraged to acquire a second endorsement through a minor or additional study. Information on essential areas of study in each endorsement is available through the School of Education, academic departments, Office of Admission, or Office of Academic Advising.

The following is a list of available endorsements offered by the University of Puget Sound and approved by the state of Washington.

- Biology
- Chemistry
- Elementary Education
- English/Language Arts
- History
- Mathematics
- Music-Choral
- Music-General
- Music-Instrumental
- Social Studies

Students must have a cumulative grade point average of 2.5 or higher in each endorsement area.

For information concerning graduate programs in Education, including teacher certification, see the Graduate Programs Bulletin.

Title II Reporting

Institutional information required by Section (f)(2) of Title II of the Higher Education Act is available from the School of Education.

Education Studies Minor

Advisory Committee: Terence Beck, Education; Tim Beyer, Psychology; Dexter Gordon, African American Studies; Frederick Hamel, Education; Robin Jacobsen, Politics and Government; Margaret Nowak, Sociology and Anthropology; Amy Ryken, Education

About the Program

The Education Studies minor is grounded in social justice and teaches students to question their own biases and social location and inequities that shape individuals, interpersonal interactions, and institutions, in order to acknowledge the full humanity of students, families, educational personnel and other stakeholders. Students experiencing the Education Studies minor use theory and experience to critically consider how educational policy and classroom practices materially impact the learning opportunities available to P-12 students. The Education Studies minor is appropriate for students who want to explore the possibilities in educational careers or who hope to pursue careers in social work, community activism, or providing training in various settings.

General Requirements for the Minor

General university degree requirements stipulate that 1) three units of the minor be taken in residence at the University of Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the minor; and 3) all courses taken for the minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the minor degree requirements listed below.

Requirements for the Minor Completion of at least 5.5 units to include:
1. Any two of EDUC 290, 292, 294, 296, and 298 (0.5 units)
2. EDUC 419 and 420 (2.0 units)
3. EDUC 493* (1 unit)
4. At least two units from among the following courses:
   - AFAM 201 Methods in African American Studies
   - AFAM 346 African American’s and the Law/Constitution

About the School

The School of Education engages in the preparation and continuing development of competent professionals in education. It offers undergraduate students of the university a minor in Education Studies. The Education Studies minor is grounded in a social justice perspective with many courses that engage students in working in local public schools.

Students wishing to pursue Teacher Certification should contact the School of Education or Office of Admission for information on the Master of Arts in Teaching program. The School of Education also offers the Master of Education degree in Counseling that qualifies graduates for the Educational Staff Associate Certificate in school counseling and/or work in social service and mental health agencies. Programs leading to professional certification of teachers and school counselors are approved by the Professional Educator Standards Board. Information on these programs appears in the Graduate Programs Bulletin.

Master of Arts in Teaching

The School of Education offers teacher certification as part of a Master of Arts in Teaching (MAT) program for students who have completed a liberal arts baccalaureate program. Students preparing to enter the MAT program for secondary teaching should major or minor in an endorsable area (see list of endorsements in this section). All students preparing to enter the MAT program should complete the following prerequisite courses: EDUC 419 and EDUC 420. Teacher certification is not offered at the undergraduate level.

University of Puget Sound Education Studies minors and/or Bachelor of Music in Education majors in good standing will be reviewed through a streamlined admission process. These applicants should submit only the application (leave essay questions blank) and supplemental testing requirements described in the Graduate Programs bulletin. Additional materials may be requested by the School of Education admission committee at its discretion.

Master of Education in Counseling

The School of Education offers a Master of Education program designed for those wishing to enter the counseling profession in one or more settings. The school counseling track leads to the K-12, Educational Staff Associate (ESA) Certificate in Washington State. Coursework in the mental health track can be used to begin the certification process as a mental health counselor in Washington State.

Endorsements

Students interested in teaching should complete a major or minor or five units of coursework for an endorsement in a teaching field. Students are strongly encouraged to acquire a second endorsement through a minor or additional study. Information on essential areas of study in each endorsement is available through the School of Education, academic departments, Office of Admission, or Office of Academic Advising.

For information concerning graduate programs in Education, including teacher certification, see the Graduate Programs Bulletin.

Economics/Education

498 Internship Tutorial

Students who enroll in this course work with a faculty member in the Economics department to develop an individualized learning plan that connects the actual internship site experience to study in the major. The learning plan will include required reading and writing assignments, as well as a culminating project or paper.

Prerequisite: approval of tutorial professor and the Internship Coordinator.

EDUCATION

Professor: Terence Beck; Frederick Hamel; Grace Kirchner; Amy Ryken, Dean

Assistant Professor: Heidi Morton

Instructor: Betsy Gast

Clinical Instructor: Molly Pugh; Mary Kokich Boer

About the School

The School of Education engages in the preparation and continuing development of competent professionals in education. It offers undergraduate students of the university a minor in Education Studies. The Education Studies minor is grounded in a social justice perspective with many courses that engage students in working in local public schools.

Students wishing to pursue Teacher Certification should contact the School of Education or Office of Admission for information on the Master of Arts in Teaching program. Education Studies Minor

Advisory Committee: Terence Beck, Education; Tim Beyer, Psychology; Dexter Gordon, African American Studies; Frederick Hamel, Education; Robin Jacobsen, Politics and Government; Margaret Nowak, Sociology and Anthropology; Amy Ryken, Education

About the Program

The Education Studies minor is grounded in social justice and teaches students to question their own biases and social location and inequities that shape individuals, interpersonal interactions, and institutions, in order to acknowledge the full humanity of students, families, educational personnel and other stakeholders. Students experiencing the Education Studies minor use theory and experience to critically consider how educational policy and classroom practices materially impact the learning opportunities available to P-12 students. The Education Studies minor is appropriate for students who want to explore the possibilities in educational careers or who hope to pursue careers in social work, community activism, or providing training in various settings.

General Requirements for the Minor

General university degree requirements stipulate that 1) three units of the minor be taken in residence at the University of Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the minor; and 3) all courses taken for the minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the minor degree requirements listed below.

Requirements for the Minor Completion of at least 5.5 units to include:
1. Any two of EDUC 290, 292, 294, 296, and 298 (0.5 units)
2. EDUC 419 and 420 (2.0 units)
3. EDUC 493* (1 unit)
4. At least two units from among the following courses:
   - AFAM 201 Methods in African American Studies
   - AFAM 346 African American’s and the Law/Constitution

84 2018–19 GRADUATE BULLETIN UNIVERSITY OF PUGET SOUND
Teaching reading has never been politically neutral because reading instruction, when it is done well, requires that we read something. Underlying this course is an assumption that the selection of what students read should consider the promotion of American ideals of liberty and justice for everyone. Together students think about the messages children’s and young adult books send and how to select books that promote social justice. Students read children’s and young adult books that include people from different racial groups, and books that open up ideas of gender and sexuality. Students consider how to best use such books with pre-college students.

For Requirement 4, students may choose to take both courses in the same department or select courses across departments. Students are encouraged to take more than two courses from the list as a way of broadening their perspectives on educational issues.

Streamlined Admission Process to Master of Arts (MAT) in Teaching Program
University of Puget Sound Education Studies minors, Bachelor of Music in Education majors, and majors in other areas, see information in the Graduate Bulletin about the streamlined admission process for students in good standing.

Streamlined Admission Process to Master of Education in Counseling (MEd) Program
University of Puget Sound graduates should review information in the Graduate Bulletin about the streamlined admission process for students in good standing.

Course Offerings
EDUC 290, 292, 294, 296, and 298 rotate over a three-year period with one offered each semester. EDUC 419 and 420 are offered each semester of the academic year. The capstone sequence course EDUC 493 is offered in the Spring term only.

Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI 2 117 Coming Out! The Gay Liberation Movement

292 Literacy in Schools: An Introduction 0.25 unit  Teaching students to read is a fundamental task of teachers in every class and grade level. This course examines the nature of reading and provides an introduction to well–balanced reading instruction in grades K–12. Through readings, writing, discussion, and time spent in schools, students are introduced to the nature of reading, how young people learn to read, and instruction that fosters lasting literacy. Successful completion of this course requires a commitment to spend regular time in schools, participating in the teaching of reading or writing. Offered every other year.

294 Schools & Poverty 0.25 unit  Educating children living in poverty poses significant challenges to schools and teachers. This course is designed to allow individuals interested in schools to develop a greater understanding of poverty and to examine what teachers can do to provide the best possible education for students experiencing poverty. This course examines and confronts the American stories of rugged individualism and of the United States as a place where class and race are irrelevant, while maintaining a focus on what teachers can do for the children with whom they work and the society in which they live. Successful completion of this course requires a commitment to spend 14 hours outside of class interacting in educational settings with students living in poverty. Offered every other year.

296 Using Children’s and Young Adult Literature to Teach for Social Justice 0.25 unit  Teaching about the past tells us where we came from and provides a narrative that communicates who “we” are. Using primary sources with K-12 students is often touted as one of the best ways to shape inclusive narratives while developing reading, writing, and critical thinking. And yet, primary sources are rarely used at the pre-college level. This class is designed to introduce students to using primary documents to help K-12 students understand alternative perspectives of the past. While many perspectives are marginalized in K-12 classrooms, few experience the silence that surrounds LGBTQ people. By using the Archive of Sexuality and Gender, students learn about LGBTQ history and discover valuable primary sources for use with K-12 students, and create a plan for using these sources with K-12 students. Successful completion of this course requires a commitment to spend regular time working with youth. Offered every other year.

298 Using Primary Sources to Teach for Social Justice 0.25 unit  Teaching about the past tells us where we came from and provides a narrative that communicates who “we” are. Using primary sources with K-12 students is often touted as one of the best ways to shape inclusive narratives while developing reading, writing, and critical thinking. And yet, primary sources are rarely used at the pre-college level. This class is designed to introduce students to using primary documents to help K-12 students understand alternative perspectives of the past. While many perspectives are marginalized in K-12 classrooms, few experience the silence that surrounds LGBTQ people. By using the Archive of Sexuality and Gender, students learn about LGBTQ history and discover valuable primary sources for use with K-12 students, and create a plan for using these sources with K-12 students. Successful completion of this course requires a commitment to spend regular time working with youth in a volunteer setting. Offered every other year.

419 American Schools Inside and Out  This course focuses on the ways in which educators, politicians, and the public view the state of American schools. This course contrasts central issues of schooling as seen from the “outside” political domain and the “inside” experience of students. In particular, the course addresses how issues of race and social as well as economic inequality surround current debates over the best way to improve schools in the 21st century. This course is intended both for prospective teachers and for students interested in examining critically the policies that shape one of the key institutions in American society. Required for the Education Studies minor and for admission to
the MAT program. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered each semester.

420 Multiple Perspectives on Classroom Teaching and Learning
The central topic of this course is the ways teachers view learning, instruction, classroom organization, and motivation. This course takes a micro-analytical approach focusing on classroom interactions and how a teacher plans for a range of student interests, experiences, strengths, and needs. Students in the course consider 1) how the teacher inquiry cycle of planning, teaching, and reflecting supports teacher identity development and improves instruction, and 2) how the interactions between teachers and students, and amongst students, are located at the intersections of issues of knowledge, identity, and power. Satisfies the Knowledge, Identity and Power graduation requirement. Offered each semester.

493 Teacher Research Practicum
This is a required, school-based placement that students typically take in their senior year. Students are placed in classrooms with a teacher who is examining a “problem of practice”. Students assist the teacher by gathering data related to the teacher’s question(s), analyzing the data, and presenting what they find to the teacher. The School of Education builds off of decades of contacts with local districts to individually tailor placements. Students meet on a regular basis to discuss their placements and their work in the schools. Offered spring term only.

ENGINEERING, DUAL DEGREE PROGRAM

Director: Rand Worland, Physics

About the Program
To meet the educational needs of students interested in becoming engineers and who also want a significant liberal arts component to their education, the University of Puget Sound has responded with a Dual Degree Engineering Program. The program is administered by the Director of Dual Degree Engineering. Students in the program spend their first three or four years at Puget Sound taking a course of study prerequisite to engineering. Qualified students may then transfer to one of our affiliated institutions and complete an additional two years of study in professional engineering courses. Transfer to non-affiliated institutions is also possible; however, those institutions treat the incoming student as a transfer student and impose their own additional graduation requirements. Upon successful completion of the required coursework at both institutions, the student receives two bachelor degrees, one from the University of Puget Sound for the core and major covered by our coursework, and the second from the Engineering School in the discipline covered by their coursework. Should the student not transfer at the end of three years, he or she may simply complete the Bachelor of Arts or Science degree in a selected discipline at the University of Puget Sound.

Currently the University has entered into agreements with the engineering schools at Washington University (St. Louis), Columbia University, and the University of Southern California.

Students should be aware that entrance to an engineering school for some institutions is on a competitive basis and requires a minimum GPA. Students interested in learning more about the program are invited to contact Professor Rand Worland, the Dual Degree Engineering Director.

To obtain a degree from the University of Puget Sound, the Dual Degree Engineering student must complete at least 16 units in residence and have credit for 24 units prior to transferring to an engineering school. These units must cover Puget Sound core requirements and the courses needed to fulfill the requirements of the student’s major. In order to meet the 32 units required for graduation, up to eight units of engineering credit are accepted as elective coursework towards the student’s degree at Puget Sound. Credits for core requirements may not be transferred back from the engineering school.

In addition, to qualify for entry into an engineering school, the student must complete specific coursework that the engineering school requires. Most science majors fulfill much of this coursework in completing a major at Puget Sound, and can do so within three years. Non-science majors can also participate in the program, but to complete the necessary coursework four years are needed. Whether they fall within the major or not, the student must complete the following:

Chemistry*: 2 units
110 General Chemistry I, or 115 Integrated Chemical Principles and Analytical Chemistry I
120 General Chemistry II, or 230 Integrated Chemical Principles and Analytical Chemistry II

Computer Science: 1 unit
161 Introduction to Computer Science, or equivalent

Mathematics*: 5 units
180/181 Calculus and Analytic Geometry I, II
280 Multivariate Calculus
290 Linear Algebra
301 Differential Equations

Physics: 2 units
121/122 General University Physics I, II

Recommended for Biomedical Engineering
CHEM 250 Organic Chemistry

Recommended for Electrical Engineering
PHYS 221/222 Modern Physics I, II
PHYS 231 Circuits and Electronics
Introduction to Electrical Engineering (not offered at Puget Sound)

Recommended for Chemical Engineering
CHEM 250/251 Organic Chemistry I, II

Recommended for Mechanical Engineering
PHYS 305 Analytical Mechanics
Statics (not offered at Puget Sound)

Note
Some of the affiliate schools have particular course requirements that must be met. These can usually be satisfied by careful selection of core and major coursework. Information about affiliates is available on the Dual Degree Engineering Program website: pugetsound.edu/academics/departments-and-programs/undergraduate/dual-degree-engineering/.

Students should work closely with Dual Degree Engineering Director to ensure that all requirements are met.

*Students with sufficient background and preparation in high school chemistry and calculus may test out of Chemistry 110 and/or Mathematics 180/181.

ENGLISH

Professor: Julie Nelson Christoph, Associate Dean; Denise Despres; George Erving (on leave Spring 2019); Priti Joshi, James Dolliver National Endowment for the Humanities Distinguished Teaching
About the Department

The English Department combines the traditional study of literature with current developments in rhetorical, cultural, and new media work. In addition to substantial courses in English, American, and Anglophone literatures, offerings include graphic novels, ecocriticism, Bollywood film, and medical discourse. English majors are not merely scholars and critics; they are producers and practitioners as well. Many students choose to complete a Focus in Creative Writing, honing their craft in small workshops, while analytical courses incorporate both traditional essays and creative or non-traditional assignments, often using digital tools.

In addition to providing an enduring humanistic education, the program fosters the analytical skills, effective writing, and intellectual adaptability essential to students’ individual development, civic engagement, and personal and professional success beyond graduation. English majors complete the program skilled in the analysis and production of a variety of print, visual, and digital texts, and with the practical skills, critical consciousness, and creative insight necessary to face the pressing collective and individual challenges of our times. As a result, English graduates pursue a wide range of graduate programs and career paths, including law, publishing, business, education, communications, technology, government, philanthropy, and much more. As a complement to study in English, the Department strongly urges its students to obtain speaking and writing competence in a foreign language.

A student who successfully completes a major in English at the University of Puget Sound is prepared to

1. Read perceptively and critically:
   a. recognize and characterize different literary and rhetorical styles
   b. apprehend the relationships between aesthetic form and content
   c. pursue connections between texts and their political, social, and cultural contexts

2. Write with clarity and sophistication:
   a. conduct scholarly research and write original, self-directed projects that integrate multiple texts
   b. analyze texts critically across genres and media
   c. respond appropriately to the unique demands of different writing situations

3. Speak persuasively and from a position of knowledge:
   a. approach literature from perspectives of both craft and analysis
   b. engage ethically with a diversity of perspectives c. present academic research orally and engage in relevant scholarly discussion

The English Department’s website (pugetsound.edu/english) includes more information about the curriculum, professors’ expertise and interests, careers open to English majors, and our alumnae.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major

1. Foundations: ENGL 220 plus three (3) additional courses from ENGL 221-249.

2. Constructing Knowledge: Four (4) courses from ENGL 321-389. Students must have completed ENGL 220 and at least one other 200-level requirement to register for courses at the 300 level.

3. Senior Seminars: Two (2) courses from ENGL 430-497. Students must have completed all 200-level requirements toward the major and a minimum of two courses at the 300 level before registering for a senior seminar.

4. Works before 1800: Two of the 10 units taken for the English major must focus primarily on texts written before 1800. The following courses usually fulfill the pre-1800 requirement: English 231, 232, 234; 330 when taught by Prof. Hale; 332 when taught by Prof. Erving; 335 when taught by Prof. Wesley; 245, 353, 349, 366, 371, 372, 381 Geoffrey Chaucer, 381 William Shakespeare, 381 John Milton, 381 William Blake; 383 Studies in Medieval Literature, 383 Studies in Sixteenth-Century British Literature, 383 Studies in Seventeenth-Century British Literature, 383 Studies in Eighteenth-Century British Literature, 383 Studies in Seventeenth- and Eighteenth-Century American Literature; ENGL 431 when taught by Professor Hale; ENGL 432 when taught by Professors Despres, Erving, or Wesley. Please consult the department website for the most up-to-date list of courses that fulfill this requirement each semester; the Registrar or department can also be consulted.

Requirements for the Major with Creative Writing Focus

Students who complete four courses from among the Department’s Creative Writing offerings (ENGL 227, 228, 325-328, 434) will receive a B.A. in English with a Focus in Creative Writing noted on their transcripts.

Requirements for the Minor

1. Foundations: ENGL 220 plus three (3) additional courses from ENGL 221-249.

2. One course from ENGL 321-389. Students must have completed ENGL 220 and at least one other 200-level requirement to register for courses at the 300 level.

Notes

1. The student must have a grade of C- or above in each course applied to a major or minor.

2. There is no time limit on courses applicable to an English major or minor.

3. ENGL courses that fulfill the University Core (Artistic Approaches or Humanistic Approaches) cannot be applied towards the major or minor.

4. Non-majors who wish to enroll in English courses at the 300-level or above need upper-division standing or permission of the instructor.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.
Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

- SS11 104 Why Travel?: Tales from Far and Wide
- SS12 104 Travel and The Other
- SS11/SS12 105 Imagining the American West
- SS11/SS12 126 Gender, Literacy, and International Development
- SS11/SS12 132 Wild Things
- SS11/SS12 133 Not Just Fun and Games: Sport and Society in the Americas
- SS11/SS12 134 Dreams and Desire: The Liminal World
- SS11 136 Urban America: Problems and Possibilities
- SS12 136 Suburbia: Dream or Nightmare
- SS11/SS12 138 The Cosmology of Comedy
- SS11/SS12 141 Architectures of Power
- SS12 148 Journalism and Democracy
- SS12 148 Medical Narratives
- SS11 158 The Digital Age and Discontents
- SS12 160 Modernist Literature
- SS12 169 A Year in the Life of William Shakespeare
- SS11 171 Medical Discourse and the Body
- SS11 175 Utopia and the Imagination
- SS11/SS12 176 American Autobiography from Franklin to Facebook
- SS11 177 Marriage in History and Literature: An Inquiry into What this Institution is For
- SS12 177 The Digital Present and Our Possible Techno Futures
- SS12 179 A Russian Mystery: Casting Shadows, Casting Light
- SS12 182 Against Equality? The Marriage Equality Movement and its Queer Critics
- SS11 193 An Investigation of Literary Naturalism

Other courses offered by English Department faculty. See Connections in the Core Curriculum section of this Bulletin for Connections course description (page 24)

- AFAM 375 The Harlem Renaissance
  Satisfies the Connections core requirement.
- CONN 304 Invention of Britishness
  Satisfies the Connections core requirement.
- CONN 372 The Gilded Age: Literary Realism and Historical Reality
  Satisfies the Connections core requirement.
- CONN 379 Postcolonial Literature and Theory
  Satisfies the Connections core requirement.
- HON 211 Literature and the Construction of the Self
  Satisfies the Humanistic Approaches core requirement.
- HUM 201 Arts, Ideas, and Society
  Satisfies the Humanistic Approaches core requirement.
- HUM 290 Introduction to Cinema Studies
  Satisfies the Artistic Approaches core requirement.
- HUM 303 The Monstrous Middle Ages
  Satisfies the Connections core requirement.
- HUM 340 Film Genres

In addition, several courses in English serve as electives in the African American Studies Program, the Environmental Policy and Decision Making Program, or the Gender and Queer Studies Program: See ENGL 363, 365, and 381.

197 Events in English 0.25 unit activity Under faculty supervision, students create academic and community programming to strength-enupport the English major. Pass or fail grading.

198 Campus Book Club 0.25 activity unit Students enrolled in the Campus Book Club attend weekly meetings and discuss a selection of books. The books (three or more, depending on their length and format) each follow a particular theme, genre, and/or issue chosen for that term, with a new theme introduced each term by the discussion leader/s in consultation with a faculty advisor. Students are responsible not only for attendance and preparation, but also for inviting guest speakers, organizing campus events related to the club (and perhaps to issues raised in the readings), and being active, informed members of the weekly discussion. Pass/fail grading.

199 Crosscurrents Review 0.25 activity unit Participation in Crosscurrents, the student literary and visual arts magazine, requires reading manuscripts, discussing submitted work, and collaboratively selecting the literature and visual art work that will appear in each semester’s issue. Required weekly meetings also involve active promotion and publicizing of Crosscurrents and managing the Crosscurrents organization as a whole. Pass/fail grading.

University Core

Texts and Contexts: Introduction to Literature and Cultural Studies

204 The American Dream: Loss and Renewal This course for non-majors takes as its starting point the question: “What is the American Dream?” Who has achieved it and who hasn’t? Is it a singular dream or a tapestry of dreams made of many threads? By reading texts from a variety of genres and cultural perspectives, the course examines the themes of identity, betrayal, and redemption. The course will examine the ways these most central of human experiences can be viewed as distinctly American. Authors studied may include Franklin, Thoreau, Whitman, Twain, as well as Morrison, Silko, and Otsuka. Satisfies the Humanistic Approaches Core requirement.

206 Literature by Women This course for non-majors examines the work of women writers anywhere from the Medieval Period to the present, with attention to the historical and cultural context of texts. It asks such questions as the following: what are the canonical issues that arise from a study of women’s literature? Is women’s literature different from literature by men in some essential way? What forces have worked against women writers and what strategies have they often employed to make their voices heard? How have those strategies shaped the literature that women have produced? Satisfies the Humanistic Approaches Core requirement and cross-listed in Gender and Queer Studies.

Content in Form: Studies in the Literary Aesthetic

212 The Craft of Literature This course provides an introduction for non-majors to the craft of literature, engaging both critical and creative faculties. Studying and practicing methods of aesthetic and formal analysis of literary texts, students will consider the artistic choices writers make to create an imaginative experience. Students will also have the opportunity to participate in the creative process. Satisfies the Artistic Approaches core requirement.

213 Biography/Autobiography/Memoir This course for non-majors focuses on the genre of biography, autobiography, and memoir, and on the writer as subject. Students will examine this genre critically and creatively, considering how the self both creates and is created by the text. Students will explore connections and differences among autobiography, biography, and memoir, as well as the problem of objectivity. Satisfies the Artistic Approaches core requirement.
Foundations

220 Introduction to English Studies This course serves as an introduction to the English major and minor and provides a foundation for the study of literature through reading, analyzing, and writing about a variety of literary and non-literary texts. Focusing on the relation between form and content in a range of genres including poetry, fiction, drama, memoir, graphic texts, and film, students develop a critical vocabulary and interpretive frameworks to engage meaningfully with literature. Students are also introduced to basic literary research tools, literary criticism, and disciplinary scholarship. Course content varies by instructor, but all sections include a play by Shakespeare. Required of all majors and minors. Offered each semester.

Creative Writing Courses

227 Introduction to Writing Fiction Combining seminar and workshop formats, the course introduces students to the interstices of imagination and narrative theory. Students read examples of literary fiction and write several short stories of their own. Students also take one or more stories through deep revision. Offered each semester.

228 Introduction to Writing Poetry Combining seminar and workshop formats, the course introduces students to the art and craft of writing poetry. Students experiment with a variety of poetic forms, read the work of poets from many eras, study versification and free verse, expand their range of subjects, and explore different strategies of revision. By the end of the semester, students will assemble a portfolio of their original poetry. Offered each semester.

Works, Cultures, Traditions

231 Medieval and Renaissance Literature This course introduces students to some of the major works of literature written in Britain from the Anglo-Saxon invasion to the aftermath of the English Civil War in the 17th century. The surviving stories from these centuries are richly diverse in language, form, and genre, and register great shifts, yet also surprising continuities in conceptions of heroism and honor, theories of family and nation, the relationship between the church and the individual, the nature of authority, and humanity’s place in the universe. Thus, strategies for thinking critically about this period’s literature emerge from a combination of close textual analysis and historical context. Readings may include works by the Beowulf-poet, the Gawain-poet, Chaucer, Kempe, the Sidneys, Spenser, Shakespeare, Donne, and Milton.

232 British Literature and Culture: Restoration to Reformation This course surveys British literature from the Restoration of the monarchy in 1660 to the first Reform Bill in 1832. During this interval, known as “the long 18th Century,” Britain emerged as the world’s first commercial and industrial superpower while it also experienced an immense artistic transformation from the aesthetics of Neoclassicism to those of Romanticism. The course examines the ideas and the aesthetics of Restoration Comedy, Augustan Satire, and Romantic lyrical poetry in relation to their political, philosophical, and literary contexts.

233 British Literature and Culture: From Victoria to the Present This course explores the literature and culture of the British Isles from the 1830s to the present. Covering three broad and rich periods—the Victorian era, Modernism, and Postmodernism—the roughly two centuries under study will be brought into focus by a significant theme (to be determined by the professor) as it manifests itself across the three periods and through particular writers, genres, and movements. Writers under study may include poets such as Tennyson, Browning, Barrett Browning, Yeats, Walcott, and Boland; novelists such as Brontë, Dickens, Woolf, and Rushdie; and playwrights such as Wilde, Osborne, Friel, and Churchill.

234 American Literature and Culture: Colonial to Early National This course offers a thematic introduction to significant developments in American literary history from European contact through the early-national era of the late-18th and early-19th Century. Focusing on literary works in relation to their socio-historical contexts and drawing upon a variety of genres and voices, this course provides students with a foundational understanding of important traditions and transformations in literary history and aesthetics. Themes and readings vary by semester; consult the department for current information.

235 American Literature and Culture: Long Nineteenth Century This course offers a thematic introduction to significant developments in American literary history from the long 19th Century, spanning the post-Revolutionary era to World War I. Focusing on literary works in relation to their socio-historical contexts (e.g., Transcendentalism), U.S. Expansionism, the Civil War and Reconstruction, the Gilded Age and drawing upon a variety of genres, this course provides students with a foundational understanding of important traditions and transformations in literary history and aesthetics. Themes and readings vary by semester; consult the department for current information.

236 American Literature and Culture: Modern and Contemporary This course offers a thematic introduction to significant developments in American literary history from the early 20th century through the contemporary moment. Focusing on literary works in relation to their socio-historical contexts (e.g., WWI and WWII, the Great Depression, the Civil Rights Movement, the fall of the Berlin Wall) and drawing upon a variety of genres, this course provides students with a foundational understanding of important traditions and transformations in literary history and aesthetics. Themes and readings vary by semester; consult the department for current information.

237 American Literature and Culture: Beyond Borders This course engages with developments in American literary history that precede, complicate, or challenge nationalist frameworks. It focuses on the U.S. nation and/or its colonial antecedents through a lens that is transnational or multinational, considering the space we now identify as “America” (U.S.) in relation to a variety of identities, traditions, and cultures that have circulated within and around it. The course thus emphasizes an anti-exceptionalist approach to American literature, focusing instead on the circulation of ideas about or in relation to the American U.S. within larger cultural or global contexts. Historical periods and themes vary according to instructor and may include comparative colonial or imperial literatures, trans-Atlantic traditions, or America in its various international, multi-national or post-national contexts. Course sub-topics might include but are not limited to the following: Anglo-American literary relations, narratives of colonization, Caribbean-American contexts, the Atlantic slave trade, U.S.-Mexico or hemispheric relations, literatures of transnational or international migration, the U.S. in a global world. Offered every third year.

240 Multimodal Composition This course offers students an introduction to multimodal composition. Building upon its theoretical foundation, the course allows for composition across various mediums. Assignments could include soundscapes using digital content, short documentary films, and reimagined commonplace books for the interpretation and analysis of multimodal texts. Modes of communication under study and production include linguistic, visual, spatial, gestural, and aura.

242 Introduction to Native American Literature This course is a survey of Native American literature from beginnings to the contempo-
rary moment. Students gain awareness of tribal distinctions and points of critical and socio-political concern within the field of study. Satisfies the Knowledge, Identity, and Power requirement.

245 Shakespeare: From Script to Stage This course offers students an introduction to the development of Shakespeare’s plays in an early-modern cultural context. Students learn to appreciate Shakespeare’s rhetoric and poetics; approaches to genre and literary convention; exploration of political, intellectual, theological, cosmological, epistemological, moral and social constructs; treatment of gender, sexuality, and early modern identity; and creative use of the physical space of various “play spaces” (both public and private) that inspired his dramatic imagination.

247 Introduction to Popular Genres This topics course offers an introduction to the fiction of a designated popular genre (fairytale, sci-fi, detective fiction, romance, etc...), covering constitutive elements of the genre and its history. Readings explore both conventional and experimental iterations of the genre, and consider the relationship between individual works, the conventions of genre, and their specific social contexts. In this course students think about the relationship between formal conventions, subject positions, and historical context, to gain a better understanding of the ways in which popular fiction reflects, refracts, or even challenges popular mores. Satisfies the Knowledge, Identity, and Power requirement.

Sleuthing Justice: Multi-Racial Detective Fiction This course examines the ways in which writers from diverse backgrounds utilize the detective fiction genre to speculate about the nature of justice, agency, and social structure. The course will briefly limn the origins and initial conventions of detective and noir fiction of the 19th century before turning its focus to the 20th and 21st centuries, with an emphasis on the formal and thematic features that undergird the genre. Exploring specific social histories that these fictions describe – and from which they arise – students will explore the myriad ways in which the figure of the detective evolves in response to historical vagaries, factors which may include labor antagonisms, anti-communism, the Civil Rights Movement, the transition in the U.S. to a consumer and information economy, immigration and the rise of multiculturalism, the proliferation of corporate culture, and the increase in class stratification.

Constructing Knowledge

Creative Writing Courses

325 Playwriting The course introduces students to the art and craft of playwriting by combining seminar and workshop formats in which members write, present, and revise monologues, dialogues, and sketches. Students work toward a final portfolio of this material as well as the completion of a short one-act play. The course also involves the analysis and discussion of published, produced plays; of conflict, suspense, characterization, plot, and other elements of drama; and of writing with actors, directors, producers, dramaturgs, and theatre audiences in mind. Prerequisite: ENGL 220 and either 227 or 228. Satisfies a requirement in Theatre Arts. Cross-listed as THTR 325. Offered every third year.

327 Advanced Fiction Writing In this intensive fiction workshop students produce a portfolio of original fiction which undergoes many revisions, building upon techniques introduced in ENGL 227: plot and structure, point of view, character, setting, tone, voice, metaphor, motif. Students explore techniques of published short stories from the writer’s perspective as they develop their own techniques and writing. Because good writing does not happen in the absence of obsessive, persistent, close readings, this is a reading and writing intensive course.

Satisfies the Knowledge, Identity, and Power requirement.

P

Prerequisite: ENGL 220 and 227; registration code required from the professor. Offered every semester.

328 Advanced Poetry Writing This intensive poetry workshop builds upon the skills and concepts introduced in ENGL 228, culminating in a substantial final portfolio of student work. Readings in this course highlight the craft issues to be mastered by studying canonical and contemporary poems, from Shakespeare to spoken word. By revising multiple drafts of their poems, seminar participants develop the advanced skills needed to become more effective writers of poetry. The workshop format stresses writing as a process and includes weekly exercises, self-assessment essays, in-class discussions, and peer reviews. The workshop may conclude with a public reading of student work or other cumulative project. Prerequisite: 220 and 228; registration code required from the professor. Offered every semester.

Studies in Genre

330 Genre: Novel This course explores the aesthetics and politics of the novel form. The course may focus on a particular national iteration or cultural tradition of the novel (e.g., British, American, Postcolonial), a specific formal approach or subgenre (detective fiction), or a historical or thematic subset of the genre (the rise of the novel, the sentimental novel, the roman à clef). In addition, the course may emphasize the theoretical underpinnings of the genre as a specific category of historical production, engaging theories of the novel and issues raised by the novel’s formal and historical particularity. Themes and texts vary by instructor; please see department website for current information. Recent topics include the following:

Rise of the Novel in the U.S. This course investigates the relationship between the emergence and increasing significance of the novel and the development of the United States as a nation from the late-18th century through the mid-19th century and beyond. Beginning with a brief grounding in the precursors to and origins of the British novel, the course emphasizes works produced in the early United States and explores the form’s evolution into an influential socio-political medium. The course addresses the novel’s formal development, its aesthetic divisions into subgenres like the sentimental and gothic forms, its self-conscious relationship to reality and the representation thereof, and its intentional intervention into the larger social and political questions that animated the American nation.

Prerequisite: 220 and 228; registration code required from the professor. Offered every semester.

331 Genre: Autobiography This course examines the genre of autobiography as it has evolved over time. Students consider how autobiographies written at specific points in history relate to the social, political, and aesthetic trends of the period; how the “non-fictional” genre of autobiography may be distinguished from fictional forms such as the Bildungsroman; and what characterizes major subgenres such as spiritual autobiography, slave narrative, autoethnography, and memoir. Themes and texts vary by instructor; please see department website for current information.

332 Genre: Poetry This course provides advanced study of lyric, narrative, and dramatic poetry. Specific forms studied include the sonnet, ballad, villanelle, and other stanza-forms; the epic, ode, and elegy; and free verse. The course also involves the study of prosody and examines poems from different historical periods, nations, and cultures. Themes and texts vary by instructor; please see department website for current information.

335 Genre: Drama This course studies a selection of plays in light of the history and theory of the genre, the relationship between per-
formance and text, cultural context, and literary scholarship. While the course may incorporate acting, dramaturgy, as well as the analysis of live or filmed performance, its emphasis is on how drama is and has been interpreted as a literary artifact. Through the careful study of language and form students develop the skills for analyzing drama chiefly in terms of its place in the discipline of English studies, without losing sight of the productive interaction between the literary and theatrical. Themes and texts vary by instructor; please see department website for current information.

338 Genre: Popular Literature This course focuses on one or more genres of popular writing. Examples include detective fiction, science fiction, fan fiction, westerns, romance novels, fantasy, or non-fiction. Students engage popular texts through rigorous literary analysis to ponder how such “light entertainments” are inextricably linked to aesthetic, historical, and social circumstances. Possible topics include the relationship between popular literature and “the literary”; the relationship between popular literatures and their historical or cultural contexts; the ideological work of genre fiction; the possibilities, limitations, and permeability of genres; as well as the politics of race, class, and/or gender in popular genres. Themes and texts vary by instructor; please see department website for current information.

339 Genre: Print Media This course explores diverse genres of print media and considers topics such as how facts are constructed in news reporting, how print and electronic media relate to each other, how ethical guidelines affect print media, how different publications represent similar events, and how social forces and journalistic writing shape each other. Readings include genre theory, journalistic writing in current print and electronic publications, and case studies involving ethics and representation. Themes and texts vary by instructor; please see department website for current information.

340 Film Genres This course explores some of the major theoretical and cinematic approaches to film genre, and provides the opportunity for students to produce a short film project based upon this exploration. The specific genre (e.g., documentary, horror, melodrama, film noir, etc.) under study for any given semester is at the discretion of the professor. Through the analysis and subsequent production of the selected film genre, students interrogate the ways that industrial, social, technological, and aesthetic factors shape the development, circulation, and reception of a film genre over time. In addition to regular class time, evening film screenings are required. Cross-listed with HUM 340. Prerequisite: HUM 290 or permission of instructor.

Textual Explorations

346 Jane Eyre and Its Afterlives This course is concerned with the endurance of the “Jane Eyre” story (itself an elaboration of the Cinderella myth). Beginning with Charlotte Brontë’s Jane Eyre (1847), students examine a variety of stories, novels, and films that rework aspects of Brontë’s vision. Students study the context of each revision and its commentary on the original text and examine shifts in the critical and feminist reception of these texts. Texts vary, but are selected from the following: Braddon, Gissing, James, Woolf, Forster, du Maurier, Rhys, Kincaid, Balasubramanyam, Winterson. Students produce both creative and analytic work.

347 Gothic American Literature This course explores the theoretical, political, and aesthetic dimensions of the gothic literary tradition in the U.S. from its late 18th-century inception to the current day. Along with a variety of primary literature, students consider foundational theoretical texts (Freud, Lacan) and secondary sources relevant to the uniquely American iteration of the Gothic, particularly those that interrogate the tradition’s functions as dark counter-narrative to progressive U.S. ideology. Authors may include the following: Brown, Poe, Hawthorne, Crane, James, Wharton, O’Connor, Faulkner, Jackson, Capote, Whitehead.

348 Illness and Narrative: Discourses of Disease The discursive negotiation between illness (its politics, histories, and personalities) and language is at the heart of this course. Through a close examination of a variety of texts (novels, plays, comics, film, etc.) that take illness as their central subject matter, students explore a series of questions including: What influence does illness (epidemic or personal) have on narrative? What is the relationship between social and political attitudes toward disease and the way texts characterize healthy and sick? What are the recuperative or reformatory functions of narrative? Texts under study will be drawn largely from the 20th and 21st centuries and will include a number of theoretical and critical readings on illness and narrative.

349 Captivity and American Identity Beginning with the genre’s origins in colonial America, this course historicizes and contextualizes the captivity narrative—a category first constructed around white men and women living among Indians, or kidnapped by Barbary pirates and held captive in Africa—in relation to the emergence of ideological American-ness in the colonial and early national periods. The course investigates the rise and function of emblematic captivity stories like those of Mary Rowlandson, Elizabeth Hanson, and Mercy Short as they constituted a particular racial and cultural notion of white identity in contrast to a “savage” Other. In addition to such conventional readings, however, this course also incorporates works by Native Americans (such as William Apeess and Zitkala-Ša) and African Americans (David Walker, Harriet Wilson, Harriet Jacobs) who frame their experiences with white America as a kind of captivity, in order to examine how their works complicate the ideological assumptions of the genre and offer contradictory perspectives on the nature of captivity, race, and identity. Offered every third year.

353 The Bible and the Literary Tradition The Christian Bible, comprising the Hebrew Bible (or Old Testament) and New Testament, continues to shape imaginative literature, which in turn has a long and dynamic history of engaging scripture in response to various social and ideological issues. A study of the interaction between the Bible and literature is therefore not simply an analysis of what the Bible says, but also of how the Bible has been understood or interpreted by various cultures, an examination that may include an introduction to the traditions that shaped the very composition of certain Hebrew and Christian texts. Instructors may focus on a specific period and translation—for example, the literature that shaped and responded to the King James translation of the 17th century—or provide a comprehensive survey of Biblical texts in relation to literature both ancient and modern.

354 Literatures of Empire This course studies the British empire of the 19th Century and its slow dissolution during the course of the 20th century. The primary emphasis is on Britons’ engagement with and responses to the idea of empire, as reflected in literary and non-literary texts of the time, and is informed by contemporary political and postcolonial theory. Students consider debates about imperialism, the role of culture in imperial expansion, the conception of national character, and the process of decolonization are studied, as the class traces the theory of empire in the metropole and its practice in the colonies. Writers may include Hasnig, Macaulay, Kipling, Schreiner, Anand, Conrad, Yeats, Joyce, Forster, Greene, Achebe, Gordon, Rushdie, Chandra, and Friel.

355 Books of the Booker Prize From 1968 to 2013, the Man Booker prize was awarded annually to the “finest” full-length novel written by a citizen of the British Commonwealth or the Republic of Ireland, and
bestowed honor, recognition, and controversy upon the winning author. The Booker inhabits an uneasy intersection of high art and mass cultural approbation, and while the judges would likely assert that the prize considers aesthetic matters only, a more realistic assessment would suggest that issues of historical contingency inevitably inflect the selection process. By studying winning novels by such authors as J. G. Farrell, Salman Rushdie, A. S. Byatt, and Ben Okri and considering relevant literary criticism and scholarship on the marketing of literary fiction, this course explores what the Booker Prize reveals about changing notions of postcolonial politics, economic structure, and gender roles—in short, of British national identity and Commonwealth affiliation.

364 Asian American Literature This course explores important works of Asian American literature, including poetry, novels, nonfiction, and drama. This course considers Asian American literature’s historical emergence and relationship to canonical American Literature, attending to the way that literary form mediates authors’ responses to socio-historical circumstances like migrant labor, exclusion, immigration, forced internment, assimilation, and racialization. At the fore are theoretical questions about how these works engage and challenge notions of identity in light of pervasive social stereotypes and the ways the investments and injuries of identity inform the form and function of chosen works, even contesting the idea of an Asian American Literature. The course studies the work of such writers as Carlos Bulosan, Jessica Hagedorn, Theresa Hak Kyung Cha, Fae Myenne Ng, John Okada, Chang-Rae Lee, Sigrid Nunez, and Karen Tei Yamashita.

365 Gender and Sexualities This course explores the dynamics of gender, sexuality, and sexual identity as expressed in literature. Students explore literary texts that address the intellectual, social, cultural, political, and philosophical contexts from which gendered and sexual identities emerge and in which they are contested or negotiated. The course addresses some or all of the following topics in any given semester: sexual politics and power; the relation of imperialism and racism to questions of gender; and the influence of gender on writing as an act of self-definition and political or social identification. The course may emphasize material from the historical literary tradition or contemporary authors. It may also address identities comparatively or focus on a specific category of identity as it emerges or develops over time. Satisfies a Gender and Queer Studies elective. Themes and texts vary by instructor; please see department website for current information. Recent topics include the following:

Sex/Gender in Early America This course asks what forms and understandings of gender identity and/or sexual identities, masculine and feminine, were extant or emergent in the U.S. from colonial times to the mid-19th century. Students consider literary and historical texts, as well as sermons, essays, and autobiography, as they provide insight into how early Americans constructed and negotiated their roles as sexual and gendered beings and how they produced spheres of influence as masculine and feminine. The course addresses how literary and other works produced and enabled understandings of personhood that were specific to the historical era, and considers as well how those definitions of sexual identity interacted with larger questions of politics, race, and nationhood.

Early American Masculinities This course considers the emergent and contested notions of manhood as it shaped and was shaped by the development of a national American identity. Focusing primarily on the revolutionary, early national, and antebellum eras, students read primary works that foreground masculinity as a category of being—that is, as a subjectivity that facilitates and negotiates personal, national, political, sexual, and racial identities. The course attends specifically to the racialized and heteronormative functions of white manhood and to key figures such as William Apess and Frederick Douglass who challenged that narrow definition.

92 2018–19 GRADUATE BULLETIN UNIVERSITY OF PUGET SOUND
Theoretical Perspectives

370 History of Literary and Critical Theory  Ranging in breadth from antiquity to the present, this course familiarizes students with a tradition of literature and debates about the meaning and meaningfulness of literature. Core concerns may include: the changing definitions of the literary, arguments about the value of art and literature, methodological approaches to the study of interpretation, the relationship between art and culture or society, theories of language and representation, and the relationship between representation and identity. These works address such fundamental questions as how and why do we read literature? How does literature work and what might it mean? And what is the connection between literature and the extant world? Because the field of criticism and theory is so broad and varied, particular emphases vary by instructor. Areas covered might include: Classicism, Neoclassicism, Romanticism, Hermeneutics, New Criticism, Reader-Response, Marxism, Psychoanalysis, Structuralism, Post-Structuralism, Cultural Criticism, New Historicism, Cognitive Theory, Speculative Realism, and Narrative Theory.

371 History of the English Language  The aim of this course is to come to an understanding of our English-language ancestors and to develop a critical appreciation for the lexicons that we carry with us in every utterance or essay, text, or tweet. This offering is unlike other English courses, and in fact more closely resembles courses in history, foreign language, and science. Students examine the development of the English language from its Indo-European roots to the present day, gain the knowledge to approach pre-modern texts with confidence (including the rudiments of Old English and Middle English), develop sensitivity to the ways language functions and changes, and explore the current state of English as a world language.

372 History of Rhetorical Theory  This course examines major concepts and theorists within the rhetorical tradition from antiquity to the present. Issues central to the course include whether the goal of rhetoric is necessarily persuasion, and whether the mode of presentation in speech or writing alters the meaning of rhetoric. Students explore the implications of rhetorical theory for daily life, particularly through the intersections of rhetorical theory and writing instruction, political and social activism, and visual media. Satisfies the Knowledge, Identity, and Power graduation requirement.

373 Writing and Culture  This course investigates the enigmatic and shifting term “culture” by examining how writers, theorists, and artists express themselves when responding to a variety of circumstances, events, or existing forms of expression. Texts under study include literature, journalism, critical theory, photography, and film, as well as the places that mediate these texts (bookstores, museums, cinema houses, the classroom, the Internet). In approaching culture through these different mediaters and media, students also investigate strategies to express such encounters in their own writing. Because this course requires students to experience culture in a hands-on way, attendance at a number of activities (including a museum visit and film viewing) is expected.

374 Literature and the Environment  This course studies the development of environmental writing in English-language texts with an emphasis on 20th- and 21st-century fiction, poetry, and memoir. Covering a wide range of geographical settings and literary genres, this course investigates each text as an argument for a particular “reading” of the environment and further considers the real-world consequences of that reading. Informed by recent ecocritical scholarship on topics ranging from animal studies to embodied nature to “Dark Ecology,” ENGL 374 explores works by authors such as Henry David Thoreau, Barbara Kingsolver, Octavia Butler, Gary Snyder, and Helon Habila as it considers the intersection of aesthetic practice and ethical intervention.

375 Rhetoric of Literacy  Challenging the seemingly straightforward idea of literacy as the ability to read and write, this course asks what literacy means at particular social and political moments, emphasizing the ways these meanings are rhetorically constructed. Course readings include theoretical and critical readings from the New Literacy Studies, ethnographic and narrative accounts of literacy practices within specific cultures, and debates about literacy in the popular press.

376 Narrative: Literature/Film  This course explores the nature, form, and function of a selection of narratives, reflecting on how a story unfolds depending upon the medium through which it is told. Drawing on theories of narratology, students consider the techniques that writers employ to convey their stories and, in turn, how filmmakers translate these techniques for cinema audiences. To facilitate this exploration, concentration is placed on the narrative mechanics that are unique to specific genres, auteurs, or movements. The particular approach will be determined by the professor; please check the department website for the most current information.

377 The Book and the Marketplace  This course investigates the external forces that shape what authors write and how readers read. Rather than study the stories contained within the pages of a book, students concentrate their analyses on the economic and cultural influences that affect the production and reception of books, whether the stories they tell are old or new, fiction or nonfiction, bestsellers or cult hits. Although there are opportunities in this course to study the internal mechanics of the books in question, such investigations serve and are subordinated to inquiries involving the culture of the book in the marketplace. Topics for such inquiries might include the history of the book, the publishing trade, the forms in which texts are transmitted, censorship, intellectual property, marketing and marketability, booklists and book clubs, professional and amateur reviews, and the politics of prize selection.

378 Visual Rhetoric  This course investigates how texts might generate and require a literacy that is visual before it is lexical. By tracing the relationship between words and images in a variety of genres including illustrated novels, photographic essays, comic books, film, and zines, students explore how images convey, argue, and narrate cultural, political, and personal stories. In addition to these primary texts, readings include seminal essays in semiotics and cultural studies that enable students to examine the distinctions between visual literacy and print literacy, the relationship between word and image, and what it means to be visually literate.

379 Special Topics in Theory  Courses under this number may explore either a single theory or small group of literary theories, as well as their application. As opposed to a broad survey of theory, this course aims to give students a deep knowledge of particular theoretical fields, resulting in conceptual and lexical fluency that will contribute to literary analysis across the curriculum.

Authors, Movements, Eras

381 Major Author(s)  This course number is reserved for the study of specific authors. Specific content, emphases, materials, and methods are determined by the instructor offering the course. Themes and texts vary by instructor; please see department website for current information. Recent topics include the following:

Geoffrey Chaucer  This course introduces students to the major and minor poems of Geoffrey Chaucer (c. 1343-1400), including
his dream visions, *Troylus and Criseyde*, and *The Canterbury Tales*. Students study the art of poetry as it developed in a manuscript culture (as opposed to a print culture) and learn to read Middle English. Chaucer’s works are placed against the rich and complex backdrop of fourteenth-century war, politics, social struggle, and cultural development.

**William Shakespeare** This course explores the formal aspects of William Shakespeare’s (c. 1564–1616) language and the ways in which his drama engages cultural issues, conventions, and developments particular to his age, also known as the English Renaissance. Through the analysis of plays, cultural texts, critical readings, and film and live performance (depending on local offerings), students gain an appreciation for the ways these plays are shaped by 16th- and 17th-century debates about religion and court politics; conceptions of family, race, and gender; notions of authority and the individual; the theatrical practices of London’s first public stages; and by subsequent cultures and stages, including our own.

**John Milton** This course studies the works of John Milton (1608–74) both biographically and historically, and situates the analysis of poetry and prose within the tumultuous religious and political contexts of 17th-century England, including Milton’s own radical views on Christianity, marriage, monarchy, and freedom of the press. Texts explored may include selections from his prose works, including *Areopagitica*, “The Second Defense of the English People,” and “Of Education,” while early works of poetry such as the Sonnets, “Lycidas,” and *Comus* provide the foundation for studying Milton’s epic, *Paradise Lost*.

**William Blake** This course studies the illustrated works of William Blake (1757–1827), British Romantic period poet, painter, engraver, philosopher, political radical, religious nonconformist, and visionary genius. Emphasis is primarily upon his illustrated poems and “minor prophetic” of the 1790s whose interlocking aesthetic, political, and philosophical registers reveal the fascinating worlds Blake inhabits. These include the mysterious subculture of London’s artisan class, a British nation at war with France and with itself over the political ideals advanced by the French Revolution, and the visionary worlds of his “prophecies” where imaginative energy does battle with the forces of social injustice and intellectual oppression.

**Jane Austen** This course takes as its focus the novels of Jane Austen (1775–1817) and the social, political, literary, and domestic contexts that influenced her craft. While recent cinematic and literary adaptations have promulgated the idea that Austen’s novels are easily digestible romances, her “home-bound” perspective on issues including marriage, dandyism, colonialism, healthcare, and class showcase an intricate discursive exchange between domestic and political spheres that demands engaged and nuanced reading. In identifying how Austen’s novels showcase ambivalent movements between these spheres, students explore the unique and groundbreaking narrative stylings that have made Austen a cultural and literary touchstone. This course satisfies an elective in Gender and Queer Studies.

**Herman Melville** While he is often designated America’s first world-class novelist, only Melville’s early novels won him much literary, popular, or financial success. His magnum opus, *Moby Dick*, sold fewer than 3,000 copies in his lifetime before disappearing from view, and he spent much of his time writing poetry that most of his contemporaries found at least somewhat unreadable. Melville (1819–1891) experienced and wrote about some of the most cataclysmic issues and fascinating chapters in U.S. history—slavery, the rise of industrial capitalism, American exploration and imperialism, waves of economic and cultural globalization, exotic paradises, the aesthetics and politics of sentimentalism and popular culture, and, of course, the maritime and economic adventure of whaling. This course introduces students to a sampling of the finest and most compelling of Melville’s work, including, of course, *Moby Dick*, some of Melville’s best-known short fiction, his early “popular” works, and his poetry.

**Henry James** Henry James (1843 - 1916) is widely regarded as the master of American literary Realism. The course examines thematic preoccupations of James’s oeuvre, for example, social subjectivity, “Americanness,” socio-economic class, sexuality, and gender. It also addresses developments in James’s narrative style, with attention to innovations that reflect and respond to the author’s commitment to English letters as much as his interests in companion fields like philosophy, psychology, and biology. As students gain familiarity with James’s major and minor works of literature and criticism, they develop a framework for understanding his cultural impact and ongoing significance.

**James Joyce** This course explores all of Joyce’s major texts, beginning with the “scrupulous meanness” of his short story collection *Dubliners* (1914), working through his Künstlerroman *A Portrait of the Artist as a Young Man* (1916), studying in depth his masterpiece *Ulysses* (1922), and dipping its toes into the waters of the *Lifey* with a selection from *Finnegans Wake* (1939). Along the way, the course will consider portions of lesser-taught texts such the poetry collections *Chamber Music* (1907) and *Pomes Pennywise* (1927), as well as Joyce’s only play, *Exiles* (1918). The reading of Joyce’s texts will be enriched by engagement with historical and aesthetic contexts, and it will also be illuminated by the reading of theoretical texts drawn from gender studies, postcolonial studies, queer theory, and ecocriticism.

**382 Movements** Courses under this category organize texts into the study of particular and discrete movements. These movements may be defined literally, historically, politically, or culturally, among other possible groupings. The course may focus on self-defined literary movements or movements that have been defined retrospectively. Themes and texts vary by instructor; please see department website for current information. Recent topics include the following:

**Irish Literary Revival** The period in Ireland from the late 19th through the early 20th century saw the creation of a remarkable body of literature that shaped both the island’s politics and its sense of national identity. This course explores Irish literary and cultural history from the Fenian uprisings in 1867 to Irish neutrality in World War II, with particularly emphasis on the armed rebellion against Britain between 1916 and 1921. Students examine the development of Irish literature written in English during this period through the study of poetry, drama, fiction, and nonfiction. Course material considers a wide range of writers, but particular emphasis is given to J. M. Synge, Lady Augusta Gregory, W. B. Yeats, Sean O’Casey, and James Joyce.

**383 Eras** This category designates courses that organize the study of literature into discrete historical eras and their significant cultural, aesthetic, or political concerns. “Eras” courses differ from historical surveys in that they focus on a single historical period, rather than bridge multiple historical periods, thus emphasizing depth within the period.
over breadth encompassing multiple periods. The emphasis on literary texts is balanced with attention to secondary sources and literary scholarship. The course also includes perfecting methods of literary analysis, instruction on writing about literature, and challenging writing assignments. Specific themes, authors, and texts vary by semester; please see department website for current information. Themes and texts vary by instructor; please see department website for current information. Recent topics include the following:

**Studies in Medieval Literature**  The course explores medieval literary genres and writers in a historical context, situating the production of literature in a manuscript culture, asking students to explore the politics of literacy, writing, and audience. This course necessarily negotiates the idea of shifting epistemologies and cultural values. Cultural constructs explored include the idea of courtly love, individualism, gender, authorship, mystical experience, and the conflicting worldviews of paganism and Christianity. Students are asked to engage these issues in seminar discussion, direct discussion, write abstracts, produce a contextual study on the writer of their choice. Authors studied may include Chaucer, Langland, the Pearl Poet, Julian of Norwich, Christine de Pizan, Marie de France.

**Studies in Sixteenth-Century British Literature**  The course addresses the work of English writers of the 16th century, especially More, the Sidneys, Spenser, Marlowe, and Shakespeare. At different times it focuses on such issues as the consequences of the introduction of the printing press; the status of the poet and the courtier; writing by women; the cult of love and the development of the sonnet; the literature of the “Renaissance” of Humane Learning and the Reformation of the Church; the Bible in English; politics in the Elizabethan drama and epic; and competing styles of comedy and tragedy on the stage.

**Studies in Seventeenth-Century British Literature**  This course examines British literature of the “early” 17th century (1603-1660), from the death of Queen Elizabeth to the restoration of the monarchy under Charles II. The period is marked by severe political and religious conflicts that led to the Civil War (1642-51), daring experiments in representative government, colonization of the Americas, and new conceptual systems for understanding humankind’s place in the universe. The course examines how writers of the period (for example, Bacon, Donne, Wroth, Herbert, Hobbes, Browne, Milton, Marvell, Dryden, Behn, Bunyan, Newton, and Locke) responded to such issues as the cultures of the court and the town, the representation of authority in religion, politics, and art, the development of Baroque and Classical styles, the emergence of “modern” perspectives in the physical sciences, and the political concept of the individual. The kinds of literature under investigation may include the letters, tracts, and pamphlets of Anglicans, Catholics, Puritans, and Quakers, writings by women, Metaphysical and Cavalier poetry, Jacobean and Restoration drama, and the Miltonic epic.

**Studies in Eighteenth-Century British Literature**  This course examines British literature from the “long” 18th century (1660-1800). The course focuses on poetry, drama, and/or prose in the context of literary, cultural, philosophical, scientific, social, economic, or political movements of the period. Subjects to be investigated may include Restoration literature, the Enlightenment, Neoclassicism, Sensibility, Early Romanticism, empire, or revolution. Authors studied may include John Dryden, William Congreve, John Wilmot, Aphra Behn, Jonathan Swift, Daniel Defoe, Joseph Addison, Alexander Pope, Samuel Richardson, Eliza Haywood, Henry Fielding, Samuel Johnson, Fanny Burney, James Thomson, Thomas Gray, Oliver Goldsmith, William Cowper, and Anna Laetitia Barbauld.

**Studies in Nineteenth-Century British Literature**  This course considers late 18th- and 19th-century British literature, the Age of Sensibility through Romanticism to Victorianism. In one iteration, the course may focus on the Gothic novel, the sentimental novel, the revolution in English poetry during the Regency, and the transition to Victorianism in the early years of the reign of George IV. Another may emphasize ideas of Englishness and of empire during the Victorian era. Radcliffe, Edgeworth, Austen, Scott, Wordsworth, Keats, Byron, Peacock, Gaskell, Hardy, Dickens, Collins, and Carlyle are among the writers that the course may study.

**Studies in Twentieth- and Twenty-first-Century British Literature**  A study of important British and Commonwealth literary artists from 1900 through the present. Students study a range of critical methodologies that help them explore canonical and non-canonical works. Among the topics to be investigated are emerging themes of aestheticism, feminism, romanticism, and postcolonialism. The course also includes an examination of important literary periods and movements—including Edwardianism, modernism, and postmodernism—through the works of major writers of the period. Authors to be studied may include H. G. Wells, Rebecca West, James Joyce, W. B. Yeats, Stevie Smith, Philip Larkin, Sam Selvon, Salman Rushdie, and Zadie Smith.

**Studies in Seventeenth- and Eighteenth-Century American Literature**  This course considers early American literature from the 17th and/or 18th centuries. The course may address literary, cultural, or political movements of the period, including Calvinism, the Great Awakening, the American Revolution, and Federalism. Possible course topics include Early American autobiography, Puritan poetry, literature of the Early American Republic, and literature of crime and punishment. Authors studied may include Mary Rowlandson, Increase and Cotton Mather, Olaudah Equiano, Phillips Wheatley, Hannah Webster Foster, Susanna Rowson, Charles Brockden Brown, Benjamin Franklin, and Judith Sargent Murray.

**Studies in Nineteenth-Century American Literature**  This course considers American literature from the 19th century. The course may address literary, cultural, or political movements of the period, including nationalism, Transcendentalism, the American Renaissance, sentimentalism, revivalism, abolitionism, feminism, Realism, and Naturalism. Possible course topics include the literature of reform, literature of the frontier, American Romanticism, expansionism. Authors studied may include Edgar Allan Poe, James Fenimore Cooper, William Apess, Catherine Maria Sedgwick, John Rollin Ridge, Frederick Douglass, Harriet Jacobs, Nathaniel Hawthorne, Herman Melville, Walt Whitman, Emily Dickinson, Mark Twain, Charles Chesnutt, Zitkala-Za, Paul Laurence Dunbar, Sui Sin Far, Henry James, and Edith Wharton.

**Studies in Twentieth- and Twenty-first-Century American Literature**  A study of specific historical, literary, and cultural topics in 20th-century American literature. Topics may include war and peace, political and economic change, ethnicity and gender, marginalization, canonical and extra-canonical texts, and modernism and postmodernism. Authors discussed may include T.S. Eliot, Ezra Pound, H.D., Djuna Barnes, Zora Neale Hurston, Marianne Moore, W.C. Williams, Flannery O’Connor, Ralph Ellison, James Baldwin, Jack Kerouac, Allen Ginsberg, Ishmael Reed, Louise Erdrich, and Toni Morrison.
Studies in Contemporary American Literature  This course explores the diverse aesthetics and cultural locations of U.S. literature written from 1945 to the present. Situating contemporary U.S. literature in the aesthetic, historical, and cultural contexts pertinent to its creation, the course may emphasize any number of issues, among which might be canon debates, postmodernism, the relation of history and literature, the politics or history of literary form, the increasing prominence of literature by women and writers of color (e.g. feminist, black nationalist, Chicano/a, Asian American, Native American, gay and lesbian), the institutional conditions of literary production, or other developments of cultural importance (such as environmentalism, digital media, and post-industrialism, to name a few). By situating the movements in broader contexts, the course considers whether contemporary literature requires new categories of analysis. Genre emphasis (e.g. poetry, fiction, drama) is at the discretion of the instructor, and different iterations of the course will focus on different genres and/or media. Authors studied may include Junot Diaz, Jorge Anaya, Colson Whitehead, Victor LaValle, Don DeLillo, Joan Didion, Robert Stone, Theresa Hak Kyung Cha, Gayl Jones, Octavia Butler, Philip Roth, Randall Kenan, Philip Levine, Ai, Joy Harjo, and Cathy Park Hong.

Senior Seminars
The senior seminars are designed to facilitate advanced study and the production of substantial work on topics related to the student’s interest. Please consult the English department website to determine the specific topics offered in a given semester. All senior seminars must be completed on the Puget Sound campus. Senior seminars are offered both for students pursuing an analytical or scholarly project and those pursuing a substantial project in creative writing.

Seminars in literary scholarship or cultural and rhetorical analysis involve students in an in-depth examination of a specific topic, and guide them in crafting a scholarly project that engages the critical literature on that topic. The early part of the semester emphasizes building a shared base of knowledge that will inform the independent projects, while the latter part emphasizes independent research, and the production of a substantial piece of scholarly analysis.

The creative writing senior seminars facilitate the writing and revision of an original work: a collection of short stories, a novel or novella, a chapbook or volume of poems, a play, a film script, or other substantial piece of student writing. Like the literary scholarship seminars, the creative writing seminars devote the early part of the semester to building a shared expertise that will inform creative projects in multiple genres; the latter part of the semester the production of a polished manuscript.

The Writing Internship has two components, fieldwork and coursework. Students work as writing interns in advertising, public relations, journalism, television, and other areas. The classroom component is conducted as a senior seminar in which students make presentations on a variety of topics, discuss internship experiences, and receive information on career and professional development.

431 Senior Seminar: American Literature  An advanced seminar. Open to students of advanced standing by permission of instructor. Individual course topics and emphases vary by instructor. Consult the department website for current offerings.

432 Senior Seminar: British Literature  An advanced seminar. Open to students of advanced standing by permission of instructor. Individual course topics and emphases vary by instructor. Consult the department website for current offerings.

433 Senior Seminar: Rhetoric and Literacies  An advanced seminar. Open to students of advanced standing by permission of instructor. Individual course topics and emphases vary by instructor. Consult the department website for current offerings.

434 Senior Seminar: Advanced Projects in Creative Writing  An advanced workshop. Open to students of advanced standing by permission of instructor. Individual course topics and emphases vary by instructor. Consult the department website for current offerings. Prerequisites: ENGL 227, 228, 327, and 328 or permission of instructor.
with work in another major area of study. Students should consult with a second advisor familiar with the program. Advisors will help students to design a major or minor program that will complement their majors and help them to focus their studies in areas of interest to them.

General Requirements for the Major or Minor
General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major
1. The Environmental Policy and Decision Making major is a secondary major that can be chosen only after a primary major in another field is chosen. A major in Environmental Policy and Decision Making cannot be completed unless a primary major in another department or program is also completed.
2. Completion of the following eight units:
   a. ENVR 200*
   b. ENVR 201
   c. ENVR 202 (0.5 units) or any three courses in the natural sciences (BIO, CHEM, GEO, PHYS)
   d. ENVR 203 (0.5 units)
   e. ENVR 400
   f. A minimum of one policy elective unit (see list below)
   g. Three additional elective units from the lists of policy or general electives (see list below)
3. At least two of the courses used to fulfill the electives for the Environmental Policy and Decision Making major must be outside of the student’s primary major department or program.
4. A maximum of two courses used to meet the requirements of the Environmental Policy and Decision Making major may also be used to satisfy the core curriculum, the requirements of another major, or the requirements of a minor.
5. Seven requirements for the Environmental Policy and Decision Making major must be completed on campus at Puget Sound, including ENVR 200, ENVR 201, ENVR 202 (unless 202 is replaced by three courses in the sciences), ENVR 203, the policy elective, and ENVR 400.
6. Completion of an experiential education requirement, to be approved by the program. Examples of experiential education include, but are not limited to, the following: a study-abroad experience, the field school in conservation development (e.g., ENVR 342A), a summer research experience, an environmentally related internship, an ENVR block semester program, and the Food Systems Northwest summer course (ENVR 360).

   * ENVR 200 (Note: Prior to 2018-19, this course was numbered ENVR 101.)

Requirements for the Minor
1. Completion of the following five units:
   a. ENVR 200*
   b. A minimum of one policy elective unit (see list below) or ENVR 201
   c. Two additional elective units from the lists of policy or general electives (see list below). ENVR 202 and/or ENVR 203 can count towards this requirement.
   d. ENVR 400
2. A maximum of one course used to meet the requirements of the Environmental Policy and Decision Making major/minor may also be used to satisfy the core curriculum, the requirements of another major, or the requirements of another minor.
3. Four requirements for the Environmental Policy and Decision Making minor must be completed on campus at Puget Sound, including ENVR 200, the policy elective, and ENVR 400.

   * ENVR 200 (Note: Prior to 2018-19, this course was numbered ENVR 101.)

Note: It is strongly recommended that at least two of the courses used to fulfill the electives for the Environmental Policy and Decision Making minor be outside of the student’s major department or program.

Policy Electives
One unit selected from the following policy courses.

- CONN 410 Science and Economics of Climate Change
- ECON 225 Environmental and Natural Resource Economics and Policy
- ENVR 201 Environmental Policy Tools and Topics (required, not an elective for major; can count as elective in the minor only)
- ENVR 210 Fundamentals of U.S. Environmental Law and Policy
- ECON/ENVR 327 Climate Change: Economics, Policy, and Politics
- ENVR 310 Environmental Decision Making
- ENVR 322 Water Policy
- ENVR/PG 326 People, Politics, and Parks
- ENVR 328 Nuclear Narratives of the American West
- ENVR/PG 382 Global Environmental Politics
- IPE 331 International Political Economy of Food and Hunger
- PG 305 U.S. Environmental Policy PG 309 Applied Environmental Politics and Agenda Setting

General Electives

- BIOL 211 General Ecology
- BIOL 370 Conservation Biology
- ENGL 374 Literature and the Environment
- ENVR 201 Environmental Policy Tools and Topics (required, not an elective for major; can count as elective in the minor only)
- ENVR 204 Learning in Nearby Nature (0.25 units)
- ENVR 315 Energy Resources
- ENVR/GEOL 324 Biogeochemical Approaches to Environmental Science
- ENVR 325 Geological and Environmental Catastrophes
- ENVR 335 Thinking about Biodiversity
- ENVR 343 Buddhist Environmentalisms
- ENVR 350 Puget Sound Environmental Issues I: Politics and Public Participation (0.25 units)
- ENVR 351 Puget Sound Environmental Issues II: Laws and Land UseDesignations (0.25 units)
- ENVR 352 Sustainability in Everyday Life (0.25 units)
- ENVR 353 Environmental Careers and Callings (0.25 units)
- ENVR 354 Contemplative Environments (0.25 units)
- ENVR 355 Sacred Ecology (0.25 units)
- ENVR 495/496 Independent Study
- ENVR 498 Internship Tutorial
- ENVR/PG 382 Global Environmental Politics
- IPE 331 International Political Economy of Food and Hunger
- PG 305 U.S. Environmental Policy PG 309 Applied Environmental Politics and Agenda Setting

- INTN 497 Internship Seminar
PHIL 285 Environmental Ethics
SOAN 230 Indigenous Peoples: Alternative Political Economies
SOAN 316 Social and Cultural Change

STS 344 History of Ecology

Course Offerings
Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see "Frequency of Course Offerings" on page 10.

Connections courses. See Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24).

ENVR 325 Geological and Environmental Catastrophes
ENVR 335 Thinking about Biodiversity

105 Environmental Science  In this course, students examine the Earth as a system of integrated biogeochemical cycles (such as water, carbon, nitrogen, and sulfur). Students come to understand these cycles by integrating relevant aspects of biology, geology, chemistry, and physics. Students learn how human activities can affect these natural biogeochemical cycles and inquire into potential system reaction to such impacts. This course also introduces students to the ways in which science is integrated into the interdisciplinary process of environmental studies. Satisfies the Natural Scientific Approaches core requirement. Offered occasionally.

200 Introduction to the Environment  This is the required introductory course for the Environmental Policy and Decision Making Minor, an interdisciplinary program designed to help students integrate their major area of study with an understanding of how individual and collective decisions interact with the environment. The course uses approaches from the natural sciences, social sciences, and humanities to introduce the ways in which human social, political, economic, and cultural systems interact with systems in the non-human environment. The concept of "sustainability" is explored by considering the tension between the limiting principles in our world and competing human values over the question of what should be sustained for the future. This course includes a required overnight weekend trip early in the term. Offered Fall term only.

201 Environmental Policy Tools and Topıcs  This course provides a foundation for upper-level policy electives in the Environmental Policy and Decision-Making Program by focusing on institutions and participation in environmental policy. Students examine both domestic and international arenas, with particular attention to the ways in which citizens engage with environmental issues in both familiar and unfamiliar places. Students in the course also learn tools and strategies for understanding environmental issues in diverse contexts, including discussion of different values and perspectives as well as changes in policies over time. Offered spring term only.

202 Tools in Environmental Science  0.50 academic unit. This course, using a tools-focused approach, provides a foundation in basic environmental sciences. The course emphasizes the following concepts: field skills, environmental sampling, data collection, data analysis, and development of scientific questions. Students gain experience applying these concepts in lab and field-based settings. For example, experiential opportunities may include air quality monitoring, water sampling, ecosystem characterization, biodiversity assessment, and spatial analysis. This course is intended for students not majoring in mathematics or the natural sciences. Offered spring term only.

203 Topics in Environmental Science  0.50 academic unit. Writing and presenting science clearly means thinking clearly about science. This course addresses the two main challenges of science literacy: (1) the struggle to understand, and (2) the struggle to communicate that understanding. This course provides students the opportunity to engage with the primary, scientific literature on a range of current interdisciplinary topics relevant to environmental science. Each topic is explored via case studies and review articles. In order to understand and discuss topics and readings, students apply environmental science methods and tools.

210 Fundamentals of U.S. Environmental Law and Policy  This course provides a basic introduction to environmental policymaking in the U.S. system of government, which includes the processes by which laws, rules and regulations, agency guidelines, court decisions, and international agreements are established. The course explores several major areas of environmental concern. For each area, the class considers the human environmental impacts of concern, the political and policy history causing and addressing the concern, the way in which the current policies in this area work at various levels of government, and the way in which new legal interpretations and other forms of policy change might develop. Special attention is given to the way in which policy affects local and regional environmental issues here in the Pacific Northwest. Field trips and guest speakers are often incorporated into this class. Prerequisite: ENVR 101/200.

250 Introduction to GIS (Geographic Information Systems)  Geographic Information Systems (GIS) comprises a complex system of tools that facilitate the collection, display and analysis of geospatial (location-based) data. A GIS is effective in supporting work across the natural sciences, social sciences and humanities. Specific applications include environmental sciences, public health, urban planning, conservation biology, geology, digital humanities, military and education, and continues to increase as technology advances. This course is designed for students who have little or no experience with GIS and want to gain an understanding of the technology. In this course, students gain a deeper understanding of the core concepts of the field and learn how to apply them in specialized areas of study. This course will use ArcGIS for Desktop software and include an introduction to ArcGIS Online tools to support project-based exercises in a hands-on lab environment. No previous experience with GIS is required.

310 Environmental Decision Making  This course focuses on the decision making processes that shape the implementation of environmental policy in the United States. Environmental decisions are no longer the exclusive province of technical experts employed by government bureaucracies. Pioneering efforts to involve groups of environmental stakeholders (such as environmental groups, property owners, business interests, tribes, and officials at all levels of government) in environmental decision making began 30 years ago. Now environmental decisions are often held to a legal and public expectation that deliberations will be public and participatory. Students in this course will develop an understanding of the institutions shaping these decisions, the theory behind various decision making approaches, the relative effectiveness of different approaches, and the skills needed to make decisions in these complex policy contexts. This class includes group work on case-based projects and policy simulations. Offered occasionally.

315 Energy Resources  This course surveys the wide range of modern energy sources, and considers the prospects for their future supply and availability. Each energy source is explored from a wide range of perspectives, including: its origin, geographic distribution, energy density, energy “type” (gravity, chemical, radioactive, solar), processing, refining, or transformation from one form of mass or energy to another,
transport (both pre- and post-processing/transformation), environmental costs (upstream and downstream-lifecycle considerations), and economic costs (cost/unit of energy produced). As ongoing events dictate, energy topics in the news are also considered, including economic, political, and environmental issues of the day. Prerequisites: one course in the Natural Scientific Approaches core, one course in the Mathematical Approaches core, and ENVR 101/200 or permission of instructor. Offered occasionally.

322 Water Policy This course focuses on the management of water resources. More specifically, it addresses the tensions and interactions between hydrological principles, economics, and politics during water management decision making processes. This course challenges students to develop an understanding of the interrelationship between different disciplinary fields of knowledge, including those in the physical and social sciences. Students learn about a wide variety of natural processes that determine the distribution and quality of the world’s fresh-water resources. Students also learn about the many ways that fresh-water resources are affected by human activities at a global, national and local scale. Prerequisite: ENVR 101/200 or permission of instructor. Offered occasionally.

324 Biogeochemical Approaches to Environmental Science This course provides an introduction to biogeochemical methods used in the study of environmental science. The course focuses on isotopic and elemental analyses of geological and biological materials with applications to a range of questions. Examples of topics include: energy flow, nutrient cycling, animal migration, and paleoclimatic conditions. The course readings draw heavily upon case studies from the primary scientific literature. Cross-listed as GEOL 324. Prerequisites: any one of BIOL 111, 112, CHEM 110, 115, 120, 230, ENVR 105, GEOL 101, 104, or 105 and any 200 level or above course in Biology, Chemistry, or Geology.

326 People, Politics, and Parks Conserving wild places through the creation of national parks is not only a reflection of environmental priorities, but a profoundly political undertaking that can bring significant changes to local landscapes. This course examines the intersection of protected areas and political priorities in local, regional, and global context, including discussion of issues such as tourism, human–wildlife conflict, forced displacement, and community–based conservation. Cross-listed as PG 326. Prerequisite: ENVR 101/200 or a PG course. Satisfies the Knowledge, Identity, and Power graduation requirement.

327 Climate Change: Economics, Policy, and Politics Global climate change is considered by many to be the most significant environmental challenge of the 21st century. Unchecked, the continued accumulation of greenhouse gases over this century is projected to eventually warm the planet by about 6 to 14°F, with associated impacts on the environment, economy, and society. This course explores the economic characteristics of the climate change problem, assesses national and international policy design and implementation issues, and provides a survey of the economic tools necessary to evaluate climate change policies. It is largely discussion-oriented and thus requires a high degree of participation by students in the classroom. Prerequisite: ECON 101. Cross-listed as ECON 327.

328 Nuclear Narratives of the American West This course examines the history of the Cold War era nuclear testing and uranium extraction in the American West, in order to understand the environmental, cultural, political, and health ramifications of these activities. Using nuclear history as a case study, it explores interdisciplinary methodologies for gathering and studying narratives about human relationships with the environment. Offered occasionally.

342 Field School in Conservation and Development This course combines a field-based learning opportunity in conservation and development with training in how to conduct research on environmental issues in diverse cultural contexts. This means students will gain exposure to both scientific and social scientific fieldwork on environmental issues at the intersection of conservation and development. The course will include classroom meetings and preparatory research prior to spending 2-3 weeks at a field site of the instructor’s choosing. Prerequisites: ENVR 110 or 101, ENVR 326, instructor permission.

343 Buddhist Environmentalisms This course examines the intersections of a Buddhist worldview with environmentalism, broadly understood. It asks what affinities exist between the two, and what the implications of such affinities might be for engendering a sense of both place and engagement in environmental context. The course explores these inter-sections both philosophically and experientially, engaging with local nature and Buddhist practice, to deepen the possibilities of understanding shared ground between the two. Prerequisite: ENVR 101. Satisfies the Knowledge, Identity, and Power graduation requirement.

345 Community-Based Methods for Environmental Research Investigating issues related to environmental policy and decision-making requires a varied toolkit of interdisciplinary research and analysis methodologies that can be applied at the community level. This course introduces students to major social science methodologies and explores their applicability for EPDM research, including: historical and archival research, folkloric and narrative analysis, community based participatory research, and cultural geography. Each student designs and implements their own community-based field research project, making use of at least two of the methods introduced in the course. Prerequisite: EPDM 110/200 or permission of instructor. Offered occasionally.

350 Puget Sound Environmental Issues Part I: Politics and Public Participation 0.25 unit This course familiarizes students with the variety of ways citizens engage in public decision making on environmental issues central to the health of Puget Sound. The course combines nearly 24 hours of class and field experience over the course of a single weekend (Friday evening to Sunday evening) with additional meeting hours during three weekend meetings. Students study a single regional watershed from source to mouth, gaining an understanding of the role citizens play in shaping the environmental policy of a particular place. The class employs written case materials developed to highlight particularly successful examples of citizen engagement in environmental policy in the watershed, mini-lectures by academic experts on the relevant political and environmental contexts of the cases, discussion panels with key stakeholders and decision makers on these issues, and field experiences designed to reveal the applied context of the issues under consideration. A select number of local community members may participate in the class on a non-credit basis.

351 Puget Sound Environmental Issues Part II: Laws and Land Use Designations 0.25 unit This course is designed to familiarize students with environmental laws and land use designations governing selected environmental issues central to the health of Puget Sound. The course combines nearly 24 hours of class and field experience over the course of a single weekend with additional meeting hours during three weekend meetings. Studies study a single regional watershed from source to mouth to gain a place-based appreciation for the effects of laws and land use designations on the environment. The class employs written case materials developed to highlight particular environmental issues in the watershed, mini-lectures by academic experts on the relevant legal and environmental contexts, discussion panels with key stakeholders and decision makers on these issues, and field experiences designed
to reveal the applied context of the issues under consideration. A select number of local community members may participate in the class on a non-credit basis.

352 Sustainability in Everyday Life 0.25 unit This course is designed to familiarize students with the variety of ways individuals and communities can make choices and take actions that lead to environmental and social improvements in our surroundings. The course includes five 2-hour discussion sessions on sustainability topics, one weekend field trip and one major written project. These sessions include shared readings, facilitated discussion, mini-lectures by guest speakers, and even hands-on applications. Puget Sound students in this class will be joined by a select number of local community members who will participate in the class on a non-credit basis.

353 Environmental Careers and Callings 0.25 unit This course provides students with opportunities to interact with environmental professionals during on-campus panels and job site visits. The course also provides context for reflection on these experiences in ways that link professional development to academic study in environmentally related fields. Class readings and discussion examine the many forces shaping not only opportunities for “green jobs,” but also our views on work and its meaning. Workshops for this course help students develop professional networks as well as job seeking skills and materials.

354 Contemplative Environments 0.25 unit. This course explores the ways in which different spiritual traditions (both secular and religious) consider and practice with the human relationship to the natural environment. In this light, nature is a space worth exploring in both intellectual and experiential ways, and offers the opportunity to consider how connections and relationships are formed between people and the places in which they live.

355 Sacred Ecology 0.25 unit. This course examines examples of ways in which different religions and spiritual systems think about nature as a resource, place, and context for beliefs and practices. How do organized belief systems relate to the natural environment, and what does this mean for the place of humans within it?

356 Garden Practices 0.25 activity unit. This quarter unit activity course is designed to give students the opportunity to gain knowledge in a variety of topics related to gardening and food production. It meets for 2 hours each week beginning three weeks into the semester, 24 contact hours over the entire course. Students also spend an hour each week independently in the garden, gaining further experience and maintaining the plants for which the course is responsible. Contact hours are divided between knowledge sharing, hands-on experience, and field trips to gardens in Tacoma. The course is student led, allowing for a peer-to-peer spread of knowledge, and gives students the opportunity to foster a sense of independence and accountability. Students who participate in the course one year have the opportunity to lead it in future years under the supervision of a knowledgeable faculty member. A select number of local community members may participate in the class on a non-credit basis.

357 Environmental Challenge 0.25 activity unit This course facilitates student teams competing in the Environmental Challenge (EC) program, a student competition to prepare and present an optimal solution to a complex “true to life” environmental problem. The EC is part of the conference hosted by the Pacific Northwest International Section (PNWIS) of the Air and Waste Management Association (AWMA), a professional organization of environmental professionals. The course requires teams of 3-5 students to submit a written proposal addressing the EC question, participation in the PNWIS three-day conference, and oral presentation and defense of the proposal at the conference. The proposals are evaluated by environmental professionals from industrial, regulatory, consulting, and academic fields. The EC problem is of current value, representative of the location of the conference, and requires a multidisciplinary approach for success. To be successful in the EC teams must seek technical and scientific analyses as well as solutions with appropriate regulatory compliance and resolution with political and community stakeholders. To be successful at the competition, student teams must research the problem background, as well as the technical, social, economic, and political aspects of the situation while staying apprised of ongoing current events related to the problem. A diversity of student backgrounds and majors are encouraged to enroll and often produce the most successful teams. May be repeated once for credit.

358 Practice of Meditation 0.25 activity credit. Meditation in many forms is practiced in many religious and secular traditions around the world. In this course, students explore the intersections of mindfulness and awareness, contemplation, and meditative walking and observation as a way to become more aware of their own internal thought processes. Meditation can also help students to be more focused, less stressed, and more aware of others and the place in which they reside.

360 Food Systems Northwest: Circuits of Soil, Labor, and Money Eating food is critical to everyday life, and yet many have the luxury to treat daily sustenance as an afterthought. For some, the connections between food and the larger environmental and social systems that sustain human life are largely invisible. This experiential course explores these interactions through an extensive and intensive investigation of the Northwest food system from farm to fork. For three weeks, the course travels among the campuses of Whitman College, the University of Puget Sound, and Willamette University, tracing the themes of soil, labor, and money across the Northwest foodscape. Beginning at Whitman, students focus on the political economy of the food system, training a global lens on the industrial wheat farms, chicken processing plants, and large-scale dairy operations of the Walla Walla Valley. At the University of Puget Sound, the focus shifts to urban agriculture and food justice, tracing the three themes through questions of poverty and access to food, urban planning, and the challenges of growing food in the city of Tacoma. Finally, the course concludes at Willamette where students will live and work at Zena Forest and Farm, putting the methods of sustainable agriculture into practice and exploring the opportunities and obstacles associated with smaller-scale organic agriculture in the Willamette Valley. Offered occasionally.

382 Global Environmental Politics The course examines the intersection of environmental issues with politics and policy-making on a global as well as a local scale. It explores international structures and efforts to deal with environmental problems, a wide range of particular environmental challenges such as climate change and conservation, and the different experiences of individual countries in trying to use and manage their natural resources. Throughout, the relationships between political and natural systems are explored, with a particular focus on the ways in which politics and policy can both produce effective strategies and new difficulties for handling environmental challenges. Cross-listed as PG 382. Prerequisite: ENVR 101/200 or a PG course or instructor permission.

395 The History, Utility, and Practices of Natural History Museums 0.5 unit This course is designed to provide a general overview of natural history museum uses and practices. Natural history museums were the primary locus for biological research in the 18th and 19th centuries.
They represent invaluable archives of Earth’s biodiversity; their vast collections provide a temporal and geographic record of life unmatched by written or illustrated accounts. They document variation—the foundation of evolution—in time and space and allow biologists to make comparisons that are difficult or impossible to observe in the field. Natural museums are an incredible resource for researchers with interests in evolution, ecology, zoology, botany and environmental change. They are phenomenal venues for teaching and engaging students ranging from young children to senior citizens. And they are sources of inspiration for scientists and artists. In this course students learn the history of natural history collections, engage in the practices of natural history museums, learn the myriad ways that natural specimens have been used in research, and do an independent project. Offered occasionally.

400 Senior Seminar in Environmental Studies This course analyzes one current environmental issue from the perspectives of the sciences, the social sciences, and the humanities. Students collectively examine the case from different disciplinary perspectives in an attempt to understand issues in their full complexity. Students conduct an in-depth research project on issues and present their findings in an open forum. Students formulate their own problem-solving approach to environmental problems and recognize how their approach connects to the work of others. Prerequisites: Environmental Policy and Decision Making major or minor; ENVR 101/200; two elective units including one policy elective; and senior standing. Offered fall term only.

495/496 Independent Study

498 Internship Tutorial Internship placement related to environmental policy and decision making, in areas such as urban planning, nature mapping, and stakeholder analysis. Students who enroll in this course work with a faculty member to develop an individualized learning plan that connects the internship experience to the Environmental Policy and Decision Making minor. Prerequisite: approval of tutorial professor and the Internship Coordinator.

EXERCISE SCIENCE

Professor: Gary McCall, Chair; Barbara Warren

Associate Professor: Jung Kim (on leave fall 2018)

Assistant Professor: Michael Pohl

About the Department

The mission of the Exercise Science Department is to provide a scientific background which promotes critical thinking as it relates to health, wellness and the attainment of human potential. The scientific process and clear articulation of ideas are introduced through a curriculum that investigates the impact of physical activity on the quantity and quality of life.

Departmental Goals

The primary goals of the Exercise Science Department are to:

1. Apply the scientific method of inquiry to issues and questions in the exercise science field;
2. Communicate effectively through discussion, written work, and oral presentation;
3. Demonstrate ability to assess, analyze, and evaluate from observation and sound data collection;
4. Articulate a personal standard of ethics and key values for work in the profession of exercise science;
5. Demonstrate ability to work independently and to assume a leadership role in the field of exercise science;
6. Complete a successful transition to advanced study within and outside the field of exercise science.

The sequencing of courses within the department is a well thought out progression of both knowledge and skills. First-year students often fulfill Chemistry 110/120 or 115/230, Math 160, and Biology 111. These courses provide a foundation of quantitative and scientific background necessary for upper division courses within the Exercise Science major. Second year courses include Introductory Research Methods (EXSC 200), and the year-long Human Anatomy and Human Physiology sequence (EXSC 221/222). Usually, Physics 111 is fulfilled in the second year also. In the third year, students choose three units from four options: Biomechanics, Exercise Physiology, Nutrition, or Neuromuscular Adaptation. In the fourth year, students will complete two units from four advanced course options: Advanced Biomechanics, Advanced Exercise Physiology, Advanced Nutrition or Advanced Neuromuscular Adaptation with each of the advanced classes requiring a thesis activity. Additionally, students will choose two Exercise Science electives from 300-400 level course offerings.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Bachelor of Science Degree

Completion of the following 5 areas:

1. EXSC 200 Introductory Research Methods; EXSC 221 Human Physiology; and EXSC 222 Human Anatomy.
2. Biology 111; Chemistry 110/120 or 115/230; Math 160; and Physics 111. Note: Most Physical Therapy programs require a second semester of physics (Physics 112).
3. Three units from EXSC 301 Nutrition and Energy Balance; EXSC 328 Neuromuscular Adaptation; EXSC 329 Exercise Physiology; and EXSC 336 Biomechanics.
4. Two units from EXSC 401 Advanced Nutrition and Energy Balance; EXSC 428 Advanced Neuromuscular Adaptation; EXSC 429 Advanced Exercise Physiology; and EXSC 436 Advanced Biomechanics.
5. Two units at the 300 level or higher in Exercise Science that are not counted toward the major in another capacity.

Requirements for the Minor

A Minor in Exercise Science requires completion of six courses to include EXSC 200, 221 and 222; two of the following 300 level courses: EXSC 301, 328, 329, or 336; and one of the following 400 level courses: EXSC 401, 428, 429, or 436.

Notes

1. A grade of C or higher must be earned in each course for the major or minor.
2. The Exercise Science Department reserves the option of either excluding courses more than 10 years old from applying to a major or minor or requiring such courses to be repeated.
Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings.”

200 Introductory Research Methods This course is intended to introduce the student to reading and critiquing original research in exercise science. Common research techniques and terms are explored as they pertain to collecting data on human subjects. Students lead discussions, use statistical software for data analysis, and learn lab writing skills. Prerequisite: MATH 160 or permission of instructor. Offered each semester.

221 Human Physiology This course studies the functions of the different human systems including endocrine, muscular, nervous, circulatory, respiratory, and others. Prerequisite: BIOL 111, CHEM 110/120 or 115/210, EXSC 222, all with grades of C or higher. Offered Spring semester only.

222 Human Anatomy This course presents a systemic approach to studying the human body. It includes microscopic and gross anatomy of the circulatory, digestive, endocrine, muscular, skeletal systems and others. Prerequisite: BIOL 111 with a grade of C or higher. Offered Fall semester only.

280 Directed Research This course provides a laboratory research experience for sophomores under the direction of a faculty member. Students may initiate a project or join a research project in the mentor’s lab. Student and mentor fill out a department contract. A written research paper and a reflective summary of the research experience must be submitted for a final grade. Prerequisite: BIO 111, CHEM 110, MATH 160 and instructor permission.

301 Nutrition and Energy Balance This course provides students with the basic concepts of nutrition and energy balance as they relate to health and the prevention of disease. The functions of the six essential nutrients are explored in detail with attention to their roles in metabolism, optimal health, and chronic diseases. The energy values of food and physical activity are quantified while undertaking an in depth case study and written analysis of personal dietary intake and physical activity. Students will read scientific literature, develop informed opinions, and debate controversial issues such as organically grown and genetically modified foods, and dietary supplements. Other potential topics include, nutrition and dieting fads, advertising, weight control and the obesity epidemic, sport nutrition, menu planning, and nutritional needs throughout the life cycle. Prerequisite: BIOI 101 or 111. Offered each fall.

327 Evaluation of Sports Injuries This introductory course explores the management of conditions limiting the functional capabilities of the physically active individual whose activities may range from occupational to recreational sports. Information dealing with the prevention, recognition, and management of these injuries or conditions is presented. Practical application of taping and bandaging techniques is also included. Offered occasionally.

328 Neuromuscular Adaptation This course explores the role of the nervous system in controlling movement and learning coordinated motor tasks such as locomotion and physical activity. A survey of the nervous system and sensorimotor control set the stage for an exploration of topics such as neuromuscular activation and neuromotor control, neuromuscular fatigue, neuroendocrine regulation, endurance and strength training adaptations of the nervous system, and the neuromuscular responses to decreased activity. Other current topics such as the activity-dependent expression of neurotrophic factors and their effects on neurorehabilitation may be explored. Prerequisites: EXSC 200, 221, and 222. Recommended: NRSC 201. Offered each Fall.

329 Exercise Physiology This course explores the body’s acute responses and long-term adaptations to various levels of exercise and modes of activities. Students focus on understanding how the body’s bioenergetic, cardiovascular, respiratory, neuromuscular, and endocrine systems respond to the physiological stress of exercise and how physical activity and exercise training affect health, disease, and the quality of life. Throughout the course, variations in responses between gender and age groups are considered. Lecture and laboratory topics include bioenergetics, cardiorespiratory and neuromuscular function, ergometry, fatigue, body composition, growth and maturation, inactivity-related diseases, and other current topics. Formal laboratory reports and a review of literature are required. Prerequisites: EXSC 200, 221, and 222. Offered each Fall.

330 Sport Nutrition and Ergogenic Aids This seminar reviews the requirements for energy macronutrients (carbohydrates, proteins, and lipids), micronutrients (vitamins and minerals), and fluid intake as well as basic principles of digestion and absorption. The regulations on the sale of dietary supplements in the US is discussed and debated. The specific ergogenic aids covered in the course are determined by the interests of the students in consultation with the instructor. Groups of two or three students work together to locate, select, and lead discussion/presentations of primary research studies that address their topics of interest. Each student also designs a diet plan for a specific athlete and presents the plan to the class. Prerequisites: EXSC 221/222 and 301. Offered occasionally.

331 Scientific Writing in Exercise Science This class is a writing-intensive experience that is designed for those students who anticipate submitting an application for summer research, completing a senior thesis and or continuing to graduate school. The writing includes an application for approval from the Institutional Review Board, a grant proposal, a review of literature, and a poster or oral presentation. Both peer and faculty review the written submissions. Each student will present their results in a poster format. Prerequisites: At least two of the following: EXSC 301, 328, 329, 336, or concurrent enrollment or permission of instructor. Offered each year.

336 Biomechanics This course explores a qualitative and quantitative approach to human movement. Functional anatomy and kinematics are explored. Students may be exposed to a variety of biomechanical equipment including motion analysis, force plate, EMG, isokinetic dynamometers, and others. Each student will complete a review of literature and an analysis of a human motion. Prerequisites: EXSC 222 and PHYS 111. Offered each Spring.

380 Directed Research This course provides a laboratory research experience for juniors under the direction of a faculty member. Students may initiate a project or join a research project in the mentor’s lab. Student and mentor fill out a department contract. A written research paper, a reflective summary of the research experience, and an oral or poster presentation must be submitted for a final grade. Prerequisite: BIOI 111, CHEM 110, MATH 160 and instructor permission.

401 Advanced Nutrition and Energy Balance This course explores the role of dietary factors in health and disease in greater depth and with more critical analyses of current scientific literature. Course topics may include the role of phytochemicals, nutrigenomics, the female athlete triad, eating disorders, hydration and thermoregulation, macronutrient intake, weight loss diets, food-borne illness and safety of the
food supply, clinical dietetics, and other current topics. Students will work in small collaborations to identify a relevant question, research the literature, and design and complete a research thesis. Laboratory experiences include resting metabolism, substrate utilization during rest and exercise, measuring nutrient-related blood markers such as glucose, hemoglobin A1C, and lipoproteins, and conducting original research for theses. Prerequisites: EXSC 200, 221, 222, and 301. Offered every other year.

424 Recent Advances in Cellular and Molecular Mechanisms of Neuroplasticity This course explores the cellular and molecular mechanisms related to neuroplasticity. Topics such as Alzheimer’s, stroke, Parkinson’s, muscular dystrophy, cerebral palsy, multiple sclerosis, aging, spinal cord injury, and others will be discussed. Up-to-date molecular and cellular findings from the topics listed above and their effects on our understanding of neuroplasticity and/or neurorehabilitation will be explored. Prerequisites: EXSC 200, 221, and 222, or consent of instructor. Recommended: NRSC 201. Offered every other year.

428 Advanced Neuromuscular Adaptation This course explores in greater depth and breadth the role of the nervous system in the coordination of physiological systems that support physical activity and exercise. Factors that influence the neural control of motor output and/or cognition such as traumatic injuries to the neural tissue, disease states, microgravity, increased activity, inactivity, and aging are considered in depth. Topics include the effects of neural, molecular, and cellular markers on motor and cognitive functions, activity-dependent plasticity of the nervous system and neurorehabilitation, and alterations in sensorimotor control. Laboratory experiments utilize cellular, molecular and historical techniques to assess changes in skeletal muscle and neural properties using models of increased and decreased activity. Students will work in small collaborations to identify a relevant question, research the literature, and design and complete a research thesis. Prerequisite: EXSC 328. Recommended: NRSC 201. Offered every other year.

429 Advanced Exercise Physiology This course explores in greater breadth and depth the body’s acute responses and long-term adaptations to exercise. Students read original research to explore the cellular and molecular mechanisms by which physical activity and exercise training affect health and chronic disease. Environmental challenges to human activity caused by heat, cold, altitude, hyperbaric conditions, and microgravity are investigated in lectures and/or laboratories. Topics also may include the endocrine control of substrate metabolism, biochemical markers of fitness and metabolism, mitochondrial biogenesis, plasticity of muscle fiber types, and cardiovascular dynamics and autonomic regulation of blood flow, fluid homeostasis, and others. Students will work in small collaborations to identify a relevant question, research the literature, and design and complete a research thesis. Prerequisite: EXSC 329. Offered every other year.

430 Special Topics in Exercise Science This seminar class is structured according to the expertise and research interests of the professor. Each topic will be unique and encompass a current issue in the field of exercise science. Prerequisite: must have completed two of the following: EXSC 301, 328, 329, 336, concurrent enrollment or permission of instructor. Offered as needed. May be repeated.

436 Advanced Biomechanics A scientific foundation of the study of human motion is explored as it relates to the integration of concepts and principles from biology and physics. In particular, mechanical principles are used to study the internal and external forces acting on the human body and the effects produced by those forces. Students become familiar with the equipment commonly used in biomechanics including video, force platforms, motion analysis, and electromyography. Prerequisite: PHYS 111, EXSC 336, or permission of the instructor. Offered every other year.

437 Psycho-Social Issues in Exercise and Sport Participation, performance, and satisfaction in sport and exercise are mediated by social structures, as well as individual psychological traits and states. This seminar examines how psychological and social variables affect learning and performance in all types of physical activity, including leisure recreation, fitness, physical education classes, and competitive sport. Emphasis is placed on integrating sound theory with useful practical applications. Students examine how to implement psychological skills training for peak sport performance, how to create positive social climates, and how emerging sport and exercise trends shape the future. Offered occasionally.

438 Equipment Design This course is intended to familiarize the student with the process of designing sports and/or injury prevention equipment. The course is interdisciplinary in nature, combining exercise science and marketing concepts and theories. This course, students will learn fundamentals concepts related to product development, consumer behavior and market analysis, as well as basic biomechanical skills needed to formulate methodology to test products and make claims based on the results. In this process students build product briefs, gain consumer insights, and develop a go-to-market plan. The culmination of the semester projects will allow the student to formulate go-to-market plans. The students work closely with designers and developers to take a product from inception of idea to prototype development to pilot testing. Ultimately the students decide if the product is ready for mass production and release. Students will gain conceptual and practical knowledge of research methodologies used in both science and business. Prerequisite: Math 160 or equivalent. Offered occasionally.

439 Designing Interdisciplinary Exercise Prescriptions This course will focus on designing programs intended to improve performance or quality of life with special populations. The student will perform a semester long project designing a complete program for a specific client. The student may choose an elite athlete or disease model intended to improve performance or health. A background in nutrition, exercise physiology, biomechanics and neuroscience will help lay the foundation for a well rounded program intended to address all aspects of the individual. Diet, agility, balance, strength, aerobic, anaerobic training, as well as the combination of training effects will be explored. Contraindications to exercise will also be examined as they relate to health. Prerequisite: must have completed three of the following: EXSC 301, 328, 329, 336. Offered occasionally.

440 Biomechanics of Sports Injuries This course is designed to study the mechanical bases of musculoskeletal injury, to better understand the mechanisms that seem to cause injury, the effect injury has on the musculoskeletal structures, and hopefully, to study how injury may be prevented. Many different types of injury will be discussed with the students responsible for leading these discussions. Students will write a review article on an injury condition and present their findings to the class. Prerequisites: At least two of the following: EXSC 327, 336, and 436, or concurrent enrollment, or permission of instructor. Offered Occasionally.

480 Directed Research This course provides a laboratory research experience for seniors under the direction of a faculty member. Students may initiate a project or join a research project in the mentor’s lab. Students and mentor fill out a department contract. A written research paper, a reflective summary of the research experience, and an oral or poster presen-
tation must be submitted for a final grade. Prerequisite: BIO 111, CHEM 110, MATH 160 and instructor permission.

490 Senior Thesis in Exercise Science Experimental research is performed under the guidance and in the area of expertise of a faculty member that may include specialized topics in kinesiology/biomechanics, exercise physiology, nutrition and physical activity or neuroscience. Students must write a proposal that is approved by the department thesis advisor and the Institutional Review Board, carry out the research, write the thesis, and orally defend the thesis at a research symposium. Application details can be obtained from the Scientific Writing instructor, faculty research advisor, or department chair. Prerequisite: EXSC 331 and permission of the advisor.

495/496 Independent Study 0.5 - 1 unit Research under the close supervision of a faculty member on a topic agreed upon. Application and proposal must be submitted to the department chair and research advisor. Recommended for majors prior to the senior research semester. Prerequisite: Junior or senior standing, EXSC major and permission of advisor.

EXPERIENTIAL LEARNING COURSES

106 Community and Self 0.25 activity unit. This course prepares students to be engaged citizens in their new home. The course serves as an introduction to the history of the city of Tacoma and our positionality within the city. Students engage their own values and identity, critically interrogating the social identities and experiences which shape their worldviews. The first half of the course focuses on identity development. The second half focuses on theories and practice of ethical civic engagement, working with community partners, and what it means to be a student member of Tacoma. Out-of-class volunteer hours are required. This course prepares students for future engagement with the Experiential Learning Program, civic engagement and volunteering through the Center for Intercultural and Civic Engagement or Access Programs, and general volunteering as individuals and members of campus philanthropy and civic organizations. Pass/fail grading.

201 Reflective Immersive Sophomore Experience Internship The Reflective Immersive Sophomore Experience (RISE) program offers sophomores the opportunity to connect their academic learning to career exploration and build important personal, social and professional skills. Class sessions will focus on the preparation of career documents for an internship search and help students identify internship opportunities. During the summer, students will participate in a 120 hour internship of their choice. The course culminates in a final ePortfolio project where students reflect on, and articulate the narrative of, their experience via a final project using ePortfolio. Students ultimately build career knowledge in their area of interest and develop the agency to move confidently towards (or away from) a career field.

215 Youth Development for Social Justice 0.25 activity unit. The youth development approach is based in positive youth development research, the commitment to creating and maintaining a safe, supportive, and productive environments for youth. This course empowers volunteers, mentors, coaches, tutors, and youth practitioners to adapt, implement, and scale research validated quality standards in their respective volunteer sites. Students apply standards by working with youth in the Tacoma community in an active and meaningful way. Students are required to volunteer a minimum of 10 hours during the course of the semester working with youth by means of mentorship, tutoring, or coaching. Pass/fail grading.

240 Makerspace Experience 0.25 activity credit Expressly designed as an experiential learning opportunity, this course invites students to dive into the world of making by undertaking, completing and documenting a Makerspace activity. Along the way, students are expected to actively reflect on their learning experiences in the Makerspace and how it enhances their educational experiences at Puget Sound.

350 Internship Seminar The central objective of this course is to provide students with an academic-oriented framework that informs, supports and complements their internship learning experience. There is a strong tradition that field experience—in the broadest sense of the term—can be an important step in a college education. Students in the course participate in an internship that offers them the opportunity to: engage in learning in an off-campus work-related organizational setting, extend knowledge acquired elsewhere in the curriculum, learn how to create observational fieldnotes that lead to an academic analysis of an organizational experience and reflect upon work experience within an academic context.

351 Internship Away The central objective of this course is to provide students with an academic-oriented framework that informs, supports and complements their internship learning experience. There is a strong tradition that field experience—in the broadest sense of the term—can be an important step in a college education. Students in the course participate in an internship that offers them the opportunity to: engage in learning in an off-campus work-related organizational setting, extend knowledge acquired elsewhere in the curriculum, learn how to create observational fieldnotes that lead to an academic analysis of an organizational experience and reflect upon work experience within an academic context.

FRENCH STUDIES

Professor: Diane Kelley, Chair
Assistant Professor: Rokiatou Soumaré
Visiting Assistant Professor: Françoise Belot
Instructor: Steven Rodgers
Dijon Program Administrative Director: Nathalie Choplain

About the Department

Studying a foreign language opens doors to the understanding of other cultures and the world around us. The faculty believes that students should cultivate knowledge of at least one foreign culture through its language as an essential part of a liberal arts education. The French Studies Department offers distinct majors that combine the study of language, culture and literature with international affairs, communications, music, theater and art, as well as a minor. The curriculum promotes oral and written fluency in French, and is designed to give students an in-depth familiarity with the language, culture, and literature of France and the French-speaking world. Faculty members in French Studies are specialists in French literature and culture, and are either native to or have spent considerable time in France and Francophone countries.

By assessment in oral fluency and written exams in all courses, graduating majors in French Studies will:
1. Demonstrate an ability to communicate orally and in writing in French, and be aware of appropriateness of communication with respect to situation and register.
2. Acquire a broad appreciation and deep understanding of cultural
and linguistic differences in France and other French-speaking countries.
3. Read French texts critically and with aesthetic appreciation.
4. Write analytically and interpretively in French, and with knowledge of research protocols and general familiarity with French literary history.
5. Cultivate awareness of important political and cultural issues in countries where French is spoken.

French Theme Houses and the Michel Rocchi International District
The department supports the learning concept of a living-learning residential atmosphere and encourages students to participate in a living-language program. Students have the opportunity to live in university-owned houses on campus and communicate in French in a small group environment. The International District located in Commencement Hall offers cultural programs and activities to students with varied international experiences and backgrounds. Applications for the Michel Rocchi International District, and for language-based theme houses are available from the Office of Residence Life and on the department home page.

Study Abroad Coursework
The department of French Studies is fully committed to the concept of study abroad as a complement to students’ intellectual trajectory as they learn about the culture, history and literature of another country or countries. While all students are strongly encouraged to participate in endorsed study abroad programs in France or a Francophone country, majors in the department are required to complete a semester of study abroad in a French speaking country. Details of these and other study abroad Francophone programs may be obtained from department advisors and the Office of International Programs.

Because not all study abroad programs are suited for French Studies majors and minors, only departmentally-sanctioned coursework earned through university study abroad programs may be counted towards degrees in the department’s majors and minors.

Credit is accepted from endorsed programs in Dijon, Nantes, and Paris. Programs are also offered in Francophone Africa. To ensure that credit will transfer, any student who plans to apply study abroad credit to a major or minor should consult with a department academic advisor prior to enrollment.

Transfer of Units and Placement
Students with previous high school French study may enroll in higher-level language courses by estimating that three to four years of high school concentration are approximately equivalent to one year of college work in French. Other factors such as study abroad, living with exchange students or Francophone parents, and other intensive studies may warrant special consideration on a case-by-case basis. To assure proper placement, all students should consult department advisors in the French Studies Department prior to enrollment.

All transfer students, especially those who have had prolonged periods of time elapsed since their last academic coursework, will be evaluated on an individual basis. Their placement will be based on consultation and observation in courses at the Tacoma campus.

Advanced Placement Examinations (AP) with scores of 4 or 5, or International Baccalaureate (IB) Higher Level Examinations with scores of 5, 6, or 7, apply toward majors or minors for a maximum of one unit at the 200 level. French coursework completed at other accredited institutions may be accepted toward the major or minor subject to the stated requirements for each major or minor.

The university does not give credit for ACTFL exams nor does it accept exams or courses taken via distance learning or hybrid methods toward the foreign language graduation requirement. Similarly, the department does not apply courses taken via distance learning or hybrid methods towards the major or the minor in French.

General Requirements for the Major or Minor
General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Additional stipulations are indicated in the major and minor degree requirements listed below.

A grade of C or higher must be earned in each course for a French Studies major or minor.

Refer to home departments on prerequisites for all courses having other than the FREN designation. For example, PG 321 has a prerequisite of PG 102.

Study Abroad and Senior Portfolio:
All majors in the French Studies department are required to:
1. Complete a semester of study abroad in a French speaking country. Exceptions to the semester study abroad requirement may be made on case-by-case basis in a petition to the department, and in consultation with a department academic advisor. Approved study abroad options and descriptions are available at the Office of International Programs, and linked on the department home page.
2. Compile a portfolio of their work, submitted to the department by April 1 of their senior year. When students declare a French Studies major, they should seek a faculty advisor in the department who will advise them on the creation of their portfolio. The portfolio serves to assess the student’s progress in the curriculum and to synthesize the student’s total experience as a major. An explanation of this requirement is available on the department home page.

Senior Paper:
French Studies majors in any of the Literature emphasis areas (Literary Studies, Cultural Studies, French and the Arts, and Comparative Literature) are required to submit a senior paper to satisfy graduation requirements for the major by April 15. An explanation of this requirement is available on the department home page.

Requirements for the Bachelor of Arts in French Language and Literature
Ten to 12 units (depending on area of emphasis), a senior portfolio, a senior paper, and a semester of study abroad in a French speaking country (see General Requirements above).

I. Basis in French Language and Literature
A. Eight units in French at the 201 level or above, to include:
   1. FREN 300
   2. Three units at the 301 level and above, one of which must be at the 400 level. At least two courses satisfying this requirement must be taken at the Tacoma campus, with at least one during the senior year.

II. Elective Area of Emphasis (Choose Option A, B, C, or D)
A. French Literary Studies (2 units)
   Two additional units at the 301-level or above in French, taken at the Tacoma campus.
B. **French Cultural Studies (4 units)**

One unit taken abroad may be considered to count towards item B in the requirements below.

1. **French in Europe Focus.**
   a. Two units of the following, taken at the Tacoma campus: FREN 220, 235, 240, 250, 270, 380.
   b. Two units of the following: HUM 290, 367; HIST 302, 304, 305, 307, 311, 314, 317, 320.

2. **Francophone Focus.**
   b. Two units of the following: AFAM 210, 401; HIST 291, 293, 392, 394, 395.

C. **French and the Arts (3-4 units)**

All majors in this emphasis must also have an experiential component in art, music, theater, or film/media studies (up to one unit of which may be credit-bearing) to be determined in consultation with the department academic advisor.

1. **Art Focus (3-4 units)**

   Any three units from: ARTH 275, 276, 325, 359, 360, 361, 363, 365; ENGL 212. Two of these Art focus courses must be taken at the Tacoma campus. One unit of studio art will meet the experiential component requirement.

2. **Music Focus (3-4 units)**

   Three units in music from the following: MUS 222, 225, 226, 230, 231, 333. Experiential component requirement options may include: one unit of Applied Music; two semesters in a performing ensemble, or one unit of Music Theory.

3. **Media and Theater Studies Focus (3-4 units)**

   Three units from the following: COMM 291, 321, 322; ENGL 373, 376; HUM 290, PHIL 353; THTR 200, 250, 371, 373. Experiential component requirement options may include one unit of THTR 218, 217, or 300. Non-credit bearing options may include theatre production assignments on campus or at a community theatre.

D. **French and Comparative Literature (3 units)**

Three units from courses in one of the following literatures: American Literature, English Literature, German Literature, or Hispanic Literature, to be determined in consultation with a department academic advisor.

**Requirements for the Bachelor of Arts in French Language/International Affairs (FLIA)**

Fourteen units, a senior portfolio, and a semester of study abroad in a French speaking country (see General Requirements above).

I. **Eight units in French at the 200 level or above to include:**

   A. **FREN 240**
   B. Three units taken at the 300 level and above. Two of the 300-level and above courses must be taken at the Tacoma campus, one during the senior year.

II. **Three units in International Politics**

   A. **PG 103**
   B. Two units from: PG 311, 321, 331, 332, 333, 334, 335, 336, 339, 347, 360 or 361 (but not both), 382, 385 (applies to FLIA for Politics and Government majors and minors only); SOAN 318, 323, 335, 340

III. **Three units in International Business or Economics**

Three units from: ECON 101, 268, 271; BUS 305, 310, 370, 435 (prerequisite 318), 475; IPE 205, 311, 321. Only one IPE course may count toward the FLIA major.

**Requirements for the Minor in French (5 units)**

Completion of a minimum of five units in French at the 201 level or above. One unit must be at the 300 or 400 level taken at the Tacoma campus. No course may count for both the core and the minor.

Students minoring in French may satisfy the university's three (3) unit upper-division requirement by completing French courses 210 or above because such courses have two (2) units prerequisite (201-202).

**Course Offerings**

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” (page 10).

The proper course sequence of foreign language instruction is Elementary Level 101, 102, Intermediate Level 201, 202. A student who has received a C (2.00) grade or better in any course of this sequence or its equivalent cannot subsequently receive credit for a course which appears before it in the sequence.

Other courses offered by French Studies Department faculty.

**Seminars in Scholarly Inquiry.** See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

**SSI 2 180 The French Revolution**

Other courses offered by French Studies Department faculty.

**HUM 260 It’s Only Rock and Roll: Rock from the Cradle to Adolescence**

Satisfies the Humanistic Approaches core requirement.

All of the following courses are taught in French.

**101/102 Elementary French** Introduction to the fundamentals of French and focus on the development of comprehension, speaking, reading, and writing. Emphasis is placed on active communication. The course sequence of foreign language instruction is Elementary Level 101, 102, Intermediate Level 201, 202. A student who has received a C (2.00) grade or better in any course in this sequence or its equivalent cannot subsequently receive credit for a course which appears before it in the sequence. Prerequisite: 101 and 102 are sequential courses; 101 or permission of the instructor required for 102. 101 offered yearly in the Fall term only; 102 offered yearly in the Spring term only.

**201/202 Intermediate French** The course aims to develop oral and written fluency with contextualized, meaningful, and communicative activities, including study of films, multimedia and contemporary texts. Special emphasis is on acquiring the ability to use French in conversational situations, consolidating and expanding familiarity with previously studied grammatical forms, and developing vocabulary. Prerequisite: 201 and 202 are sequential courses; 201 or permission of instructor required for 202. 201 offered yearly in the Fall term only; 202 offered yearly in the Spring term only.

**205 French Current Events** 0.25 unit. This 25 unit course offers students an opportunity to practice their French language skills as well as keep up with current events from the French perspective. The course meets once per week in a conversation hour format. Prerequisite: FREN 202 or its equivalent. Admission to the course will be based on appro-
private level of spoken and reading French. This course alone does not satisfy the post-intermediate language requirement for study abroad in a francophone country.

210 Introduction to Conversational French This course is designed for highly motivated students who wish to refine and improve their oral communication skills in listening, speaking, reading, and writing while gaining more insight into French culture. It entails active participation in class discussion, presentations, projects and conversational activities. Classroom activities include authentic spoken discourse representing a variety of styles to promote the acquisition of spoken proficiency, vocabulary building, and to develop the fluency in French to perform linguistically and culturally appropriate tasks. Intensive work in oral expression, listening and comprehension incorporates a wide variety of cultural topics, such as the French press, comic strips, television and radio broadcasts, contemporary music, as well as selected readings. The course also provides a review of selected advanced grammatical structures and frequent short oral presentations, and makes use of multi-media and interactive computer strategies in the development of conversational and cultural skills. Prerequisite: FREN 201/202 or equivalent. Offered frequently.

220 French Pop Culture This course studies how popular French culture, drawing from a rich and complex tradition heavily influenced by mass media, permeates contemporary French society. It is manifest in various cultural artifacts such as gastronomy, clothing, consumption, and entertainment. This course examines the boundaries between high and low culture, the various postmodern approaches that challenge the definitions of French mass culture, and the claims that pop culture trivializes and commercializes values. Prerequisite: FREN 201/202 or equivalent. Offered every other year.

230 In Other Words: French Translation This course is designed as an introduction to the principles and practice of translation. Through weekly exercises on texts ranging from newspaper articles and ads to contemporary young adult novels and literary fiction, students build up their French vocabulary and grammar skills. Particular attention is paid to the syntactic differences between French and English and to some of the thorniest issues for French language learners (articles, past tenses, relative pronouns etc.). Readings are in French and English with discussion conducted in French only. Prerequisite: FREN 202 or its equivalent.

235 The Paris Connection Through a contextualized exploration of Paris from historical and/or contemporary perspectives, students develop their language skills through intensive grammar review, vocabulary enhancement, written expression, and conversational fluency. The course aims to prepare students for upper-level French courses and study abroad by improving French written and oral fluency though a project-based approach, focusing on different aspects of Parisian life of interest to students, from artistic movements to fashion and food. Prerequisite: FREN 201/202 or equivalent. Offered every other year.

240 French Contemporary Issues Applications of French in non-literary contexts. Expansion and application of French in the areas of economy, politics, media, and international issues. The course may include a multimedia component and a grammar review. Prerequisite: FREN 201/202 or their equivalents. Offered every other year.

250 Culture and Civilization of France Readings, writing, and discussions based upon civilization and culture of France and the French-speaking world. Special emphasis on political and intellectual thought. This course may include a multimedia component. Prerequisite: FREN 201/202 or their equivalents. Offered frequently.

260 Culture of the Francophone World This course is a critical examination of key texts and influential figures coming from, focusing on, or relevant to the Francophone world. The course emphasis will be mainly on various aspects of the cultures of Quebec, Francophone Africa, and the French Caribbean, and will end with an examination of the Francophone postcolonial context. Prerequisite: FREN 201/202. Offered frequently.

270 Conversational French and Film This course combines linguistic functions and structures with culture through an integration of listening, speaking, reading, and writing activities. The raw material derives from twentieth-century French film. The course concentrates on improving oral fluency in French by using the topics of the film as starting points, sources of information, and illustrations of language in a cultural context for class discussions. Prerequisite: FREN 201/202 or their equivalents. Offered every other year.

280 Advanced French Writing The course is a workshop format to improve writing skills, vocabulary development, and an enhanced appreciation and sophisticated command of written French through a variety of texts and frequent writing exercises. Writing formats over the semester may include various styles such as, journalism, creative writing, essays, correspondence, reviews of film, art or books, and translation of French prose and poetry. The course will examine the rhetorical devices and techniques of descriptive, narrative, and argumentative writing, as well as explore some particularly advanced grammar points. Prerequisite: FREN 201/202. Offered frequently.

300 Introduction to French Literary Studies This course is designed to introduce students to the methods of textual analysis through the reading and discussion of works in various genres in French. Emphasis will be placed on the development of analytical skills, in particular, close readings of works by authors from different periods. Prerequisite: FREN 201/202 or equivalent. Offered frequently.

310 Pre-Revolutionary French Literature Introduction to analysis and interpretation of French literature through close readings of major literary genres. Examination of works reflecting the literary and social history of France from the Middle Ages to the Revolution of 1789. Offered occasionally.

320 XIX/XX Century French Literature A study of the major genres of French literature from the revolution to the modern days through techniques of close literary analysis. Readings and discussion of French intellectual thought of recent years. Offered every other year.

330 Literature of the Francophone World A study of modern Francophone literature from the French Caribbean, the Maghreb, Sub-Saharan Africa, and Canada. The course provides an introduction to the literatures that have emerged in the French-speaking countries and regions of the world in recent decades, illustrating their astonishing breadth and diversity, and exploring their constant state of tension with the literature of France. Offered every other year.

340 Francophone Women Writers Close analysis of modern Francophone literature by women. Writings from France, Canada, Africa, and the Caribbean that address issues of personal autonomy, female creativity, social constraints, and clichés of sexual identity are examined. Offered every other year.

350 French Major Authors This course is a critical examination of the works of one French author, or multiple closely related authors, whose works greatly influenced the literary, political or cultural history of their time. Offered occasionally.
**French Literary Themes, Genres & Movements** This course is an in-depth critical examination of one theme, genre, or movement of French literature. Students will approach French literary traditions from a specific standpoint and engage critically with synchronous and asynchronous embodiments of those traditions. Offered occasionally.

**French Nobel Laureate Literature** Through close analysis of literature by key Nobel laureate writers, the course explores aesthetic issues raised by French thinkers and examines how these authors tackled literary concepts and re-thought a redefinition of a new literary language. Offered frequently.

**Advanced Studies in French and Francophone Culture** This course is designed to engage students with various aspects of French or Francophone cultural life in a historical and/or sociological context at an upper-division level. The cultural studies approach of the course will emphasize analysis of primary texts (literary works, historical documents, works of art, etc.) as they relate to cultural constructs. The course allows for either a synchronous or asynchronous historical approach, but will necessarily contextualize iterations of cultural expression in the French or Francophone worlds. Offered occasionally.

**Medieval & Renaissance French Literature** An intensive study of selected literary works reflecting the intellectual, political, philosophical, and artistic changes from 1200 to 1600 AD. Offered occasionally.

**Classicism & Enlightenment** An intensive study of the major literary texts of French Classicism and Enlightenment with emphasis on the philosophical and political transformations of the time period. Offered every other year.

**Romanticism to Symbolism** A study of nineteenth-century French literary movements and close readings of selected texts. Examination of the interplay among the world of ideas and the political scene in France. Offered occasionally.

**French Fiction of the Twentieth Century** An intensive study of the major themes, forms, and techniques in modern French literature. Offered frequently.

**Twenty-First Century French Literature** This course offers a detailed analysis of contemporary French literature, and a general examination of the intellectual currents these texts illustrate or express. Through close analysis of key 21st century French texts, the course explores aesthetic issues raised by French thinkers, examines how writers are tackling literary concepts from the turn of the century, and re-thinks the definition of a new literary language. Prerequisite: FREN 300 or equivalent. Offered frequently.

**Seminar in French Literature** Synthesis of various aspects of literary studies. Topics to meet special needs. Since content changes, this course may be repeated for credit. Offered frequently.

---

**GENDER AND QUEER STUDIES PROGRAM**

Director: Greta Austin, Religious Studies

Advisory Committee: Terry Beck, Education; Regina Duthely, English; Tanya Erzen, Religious Studies; Alison Tracy Hale, English; Suzanne Holland, Religious Studies, Bioethics; Priti Joshi, English; Alisa Kessel, Politics and Government; Laura Krughoff, English; Siddharth Ramakrishnan, Neuroscience; Brett Rogers, Classics; Melvin Rouse, Psychology; Renee Simms, African American Studies; Stuart Smithers, Religious Studies; Jennifer Utara, Sociology and Anthropology; Harry Vélez-Quiñones, Hispanic Studies; Stacey Weiss, Biology; Heather White, Religious Studies/Gender and Queer Studies

**About the Program**

As the home to one of the nation’s first Women’s Studies programs, the University of Puget Sound has a long tradition of exploring issues pertaining to sexuality, identity, and gender. The current Gender and Queer Studies program has the following learning objectives:

1. To understand, apply and critique key concepts and theoretical positions in feminist, gender and queer studies;
2. To use and interrogate gender and sexuality as categories of analysis at various levels, such as individual, interactional, institutional, and global and in specific historical, cultural, and disciplinary contexts;
3. To reconsider and denaturalize identities and experiences as embedded in and produced by interlocking systems of power and inequalities;
4. To integrate feminist, gender and queer analysis into educational and activist practices: in students’ research, writing and classroom interactions and in public scholarship, activism, and everyday life.

**General Requirements for a Minor**

General university degree requirements stipulate that 1) three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the minor; and 3) all courses taken for a minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the minor degree requirements listed below.

**Requirements for the Gender and Queer Studies Minor**

Completion of a minimum of five units to include:

1. GQS 201 (introductory survey)
2. GQS 360 (theory and methods course)
3. GQS 494 (thesis course)
4. At least two elective courses from the list below.

Note: Only one course taken for the major may be used to satisfy the requirements for the Gender and Queer Studies minor.

**Course offerings with credit for Gender and Queer Studies**

- AFAM 210 Black Fictions and Feminism
- AFAM 355 African American Women in American History
- BIOL 102 Evolution and Biology of Sex
- BUS 493 International Management: A Gender-Based Perspective
- CLSC 225 Gender and Identity in Greece and Rome
- COMM/AFAM 370 Communication and Diversity
- COMM 422 Advanced Media Studies
- CONN 332 Witchcraft in Colonial New England
- CONN 340 Gender and Communication
- CONN 354 Hormones, Sex, Society and Self
- ECON 244 Gender and the Economy
- EDUC 290 Making Men: Schools and Masculinity
- ENGL 206 Literature by Women
- ENGL 381 Major Authors (depending on subject; not all sections are GQS approved)
- ENGL 365 Gender and Sexualities
- ENGL 383 Studies in 17th and 18th Century American Literature (depending on subject; not all sections are GQS approved)
- GQS 220 What is Queer? Introduction to Queer Studies
- GQS/HUM 327 Queer Cultures
- GQS 310 Histories and Theories of Sexuality
- GQS 340 Feminist and Queer Methodologies
HIST 305 Women and Gender in Pre-Modern Europe
HIST 349 Women of East Asia
HIST 392 Men and Women in Colonial Africa
MUSC 223 Women in Music
PHIL/PG 390 Gender and Philosophy
PSYC 250 Human Sexuality
REL 215 Religion and Queer Politics
REL 303 Sexuality and Religion
REL 307 Prisons, Gender, and Education
REL 321 Sexuality and Christianity: Then and Now
REL 368 Gender Matters
SOAN 202 Family in Society: Critical Perspectives
SOAN 212 Sociology of Gender
SOAN 315 Identity Politics in Latin America
SOAN 316 Social and Cultural Change
SOAN 318 Women and Global Inequality
SOAN 390 Men and Masculinities
STS 318 Science and Gender

Other courses may be added to this list on a semester-by-semester basis.

Program Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year.

201 Introduction to Gender, Queer, and Feminist Studies  This course serves as an introduction to Gender, Queer and Feminist Studies. It surveys the history of feminisms, and then explores the rise and trajectories of gender studies and queer studies. The course engages with the ways in which gender, sexuality, race, class, ability/disability, and other facets of identity intersect with each other. Students will consider the implications of activism as well as the academic development of these disciplines, and they will engage with the ways that the readings touch upon their own lives. Satisfies the Humanistic Approaches core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every other semester.

220 What Is Queer?  Rather than approaching “queer” as a designated set of identities or a defined area of study, this course explores an ongoing question, asking: what kinds of bodies, desires, histories, and politics does queer describe? This inquiry includes Lesbian, Gay, Bisexual, Transgender, and Intersex (LGBTI) lives and histories. However, students also look beyond these social identities to broadly investigate sexualities and genders that fall outside the cultural norm and analyze how these norms are constructed and contested. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every other year.

291 Gender and Queer Studies Publication  0.25 activity unit  Gender and Queer Studies Publication is an activity credit for participation in a campus publication of literary and artistic materials related to questions of gender and sexuality. The program requires editing, reviewing, criticism, and oral discussion of manuscripts and artwork on a weekly basis. The program also includes active promotion and publicizing of the Publication as well as managing the Publication organization as a whole. The course must be taken as pass/fail grading. Offered each year.

310 Histories and Theories of Sexuality  What does it mean to study sexuality? Does it change over time and space? How does identity affect sexuality? This seminar course addresses these and other questions through an interdisciplinary approach that draws on theoretical perspectives from cultural studies, history, science, sociology, and anthropology. The course pays particular attention to how the category “sexuality” relates to concepts of race, gender, nation, class, globalization, and politics. Through authors such as the Marquis de Sade, Freud, Malinowski, Foucault, Butler, and others, the course explores how terms such as “women” and “men,” “femininity” and “masculinity,” as well as “homosexuality” and “heterosexuality” have structured people’s experiences and their perceptions of sexuality at large and the central position it occupies within culture. The course first covers some critical readings from feminist, queer, and scientific perspectives in relation to sexuality. Then, armed with these tools, students address key topics in the field around science and sexuality, histories of sexuality, reproductive politics, queer theory and pedagogy, health, hook-up culture, body modification, sexual harassment and #MeToo, and global issues in sexuality. Prerequisite: GQS 201.

327 Queer Cultures  Gay, lesbian, bisexual, transgender, queer, questioning (GLBTQ) are categories used to identify sub-groups within the queer community. Yet within these groups, or cultures, exist vastly complex and different experiences. In the struggle for social justice and equity, queers navigate the tension of remaining hidden—to fit into the dominant culture—versus being seen—to change the dominant culture. Main units include: “Science, Sexuality, and Ethics”, “Queering School Curricula”, “Marriage is a Queer Institution” and “The Disappearing Queer: Fear and Desire in Theory”. This course addresses questions such as: How are cultures constituted, experienced, and transformed? How can we interrogate category systems to understand framing assumptions and the ways categories position “majority” and “minoritized” in social contexts? What is the relationship between taking a subversive stance and social transformation? Satisfies the Knowledge, Identity, and Power graduation requirement. Cross-listed with HUM 327. Offered each year.

340 Feminist and Queer Methodologies  This course provides students with an overview of feminist and queer methodological issues and dilemmas and a variety of research techniques and methods. We will investigate the ethics and politics of research; how theories are incorporated into research; how evidence is gathered; and what counts as truth and authority at higher levels of abstraction. We will read collaborative research by women organizing around health issues in India and education in prison, an ethnography of transgender identity, a study of women living with HIV, the graphic novel Fun Home, and scientific studies of lesbian sexuality. Students will come to understand how research methods direct research outcomes. The course will emphasize feminist and queer research as a deeply interdisciplinary endeavor, one that necessitates an appreciation for a variety of research approaches so that students develop the capacity to produce (and to learn from), in the words of Donna Haraway “both vertical deep studies and lateral, cross-connecting ones”.

360 Gender, Feminist and/or Queer Theories  This course surveys the history and development of feminist, gender and/or queer theories, with an emphasis on theories produced in the 20th and early 21st centuries. The course familiarizes students with key feminist, gender and queer theoretical debates and concepts, and requires them to read, think, speak, and write critically about these theories. Students are encouraged to employ these feminist and queer theories and concepts in critical analyses of contemporary institutions and practices, as well as in their own lives. Topics examined include power, privilege, domination, identity, difference, intersectionality, post/colonialism, trans/nationalism, ability/disability, race, discourse, performativity, gender, femininity, masculinity, sexuality, asexuality, and/or embodiment. Offered each year.

365 Indigenous Feminisms  This course is an inquiry into the relevance of Western Feminism and to the pressing new challenges of feminist
theorizing and practices. It is an exploration of how indigenous feminism, which seeks to define, explain, and improve women’s lives within patriarchal regimes of power might enrich this literature. Overall, the course addresses the intersections of race, caste, class, nationality and religion and seeks to provide students with an intellectually rigorous background in the development of South Asian scholarship and activism. GQS 201 recommended but not required.

494 Gender Research Seminar In this course students examine the differences between traditional scholarship and a feminist approach to knowing. Participants engage in an independent research project of their choosing, sharing process and findings with other members throughout the semester. Completion of the class includes participation in the Lewis & Clark Undergraduate Gender Studies Conference in March of each year. Prerequisite: GOS 201, and at least one other course in the program. Offered every fall semester.

495/496 Independent Study

498 Internship Tutorial Placement in a community or government agency dealing with social problems of particular relevance to gender, feminism, or sexuality, such as the Rainbow Center. Students develop an analysis of the group or agency’s work and make a public presentation at the end of the semester. Taken during the senior year. Internship arranged through the Internship Office. Prerequisite: approval of the Gender and Queer Studies Director and the Internship Coordinator.

GEOLOGY

Professor: Barry Goldstein; Jeffrey Tepper; Michael Valentine, Chair
Associate Professor: Kena Fox-Dobbs
Instructor: Kenneth Clark

About the Department

The Geology Department at Puget Sound consists of five faculty members and roughly 40 majors. Our size enables us to offer a broad spectrum of classes while at the same time maintaining a close-knit and collegial learning environment. All of our courses include a field component and these range from day or weekend trips to semester-long projects that integrate field and laboratory analysis. We also believe strongly in the importance of training our students to use analytical instrumentation and are very well-equipped in this regard. By the time they graduate our majors are scientists, trained to collect and interpret their own data, think creatively, and answer real-world questions.

All members of the Geology faculty are actively engaged in research that involves our students. Our research interests span a broad range of topics including the environmental geochemistry of water and sediment from local water bodies, the glacial history of the Puget Sound area, paleomagnetic studies of variations in the earth’s magnetic field and past plate motions, the igneous and structural history of the Olympic Peninsula, stable isotope studies of past and present food webs, and the magmatic and tectonic evolution of the Pacific Northwest. Many of our projects are based here in the Pacific Northwest, but we have also taken students to more distant research locations including Alaska, the American Southwest, Ascension Island, New Zealand, and Africa.

In both teaching and research we take advantage of outstanding facilities and equipment available in the department. Our resources include:

- A Hitachi 3400 scanning electron microscope equipped with x-ray analysis and cathodoluminescence capabilities.
- An Agilent 5100 ICP-capable of measuring elemental abundances at ppm levels and below in a wide variety of materials including rocks, water, and sediment.
- A Phillips x-ray diffractometer for mineral analysis.
- A completely equipped sample prep lab with facilities for cutting, crushing, and pulverizing rocks, making thin sections, and preparing mineral separates.
- Separate, fully equipped labs for preparation and analysis of samples for paleomagnetism, sedimentology, and geochemistry.
- A wide array of field equipment including two boats, water, soil and sediment sampling gear, and GPS units.
- A broad range of geophysical instruments including a gravimeter, magnetometer, electrical resistivity meter, and hammer seismograph.
- Extensive collections of rocks, minerals, fossils, maps and other teaching materials.

Students who major in geology learn to observe and interpret the natural world. To that end, and to supplement our coursework and research opportunities, we take a departmental trip lasting 10-14 days to an exciting location in alternate years. Our Summer 2015 tour was to Iceland; past trips have been to New Zealand, Tanzania, Ecuador, and Hawaii.

Our majors develop the skills to formulate hypotheses, collect and interpret data, synthesize results, and present findings at professional conferences. All Geology majors have the option to complete a senior thesis. Upon graduation our students are ready to apply their knowledge and skills not only to academic topics, but also to important societal issues such as natural disaster planning, waste disposal, climate change, resource utilization, and water policy.

Our graduates have gone on to a wide range of careers, the most popular in recent years being graduate school, environmental consulting, and teaching. However, we have graduates in 32 states and four foreign countries and their occupations include not only geologic fields (e.g., mineral exploration, hydrology, academia) but also other sciences and related professions (e.g., medicine, environmental law).

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major

Geology is the application of biology, chemistry, mathematics, and physics to the study of the earth. Students majoring in Geology must understand the principles and techniques of these disciplines as well as the basic skills and concepts of geology. A Geology major consists of the following sequence of related courses:

1. Ten Geology units to include:
   a. One unit from GEOL 101, 104, or 110;
   b. GEOL 200, 302, a departmentally-approved summer Geology field camp, normally taken between the junior and senior years, and one of the following: GEOL 305, 306, 330, or 340 taken in the junior or senior year;
   c. Five units from the following: GEOL 206, 301, 303, 304, 305, 306, 307, 310, 315, 320, 324, 330, 340; 492
   2. CHEM 110 and 120 or 115 and 230, MATH 180 and 181 (or 160 or CSCI 161), PHYS 111/112 or 121/122;
3. A grade of C or better must be received in all Geology Department courses.

The Geology Department does not accept courses more than 10 years old towards the major.

Requirements for the Minor

The minor consists of at least 6 required courses and must include one unit from GEOL 101, or 104, or 110 (only one unit counts toward the minor) plus GEOL 200 and any four additional Geology courses.

The Geology Department does not accept courses more than 10 years old towards the minor.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once academic year. Please see “Frequency of Course Offerings” on page 10.

Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI 125 Geomorphology of Ancient Catastrophes
SSI 151 The Natural History of Dinosaurs

Other courses offered by Geology Department faculty See Connections in the Core Curriculum section of this Bulletin for Connections course descriptions (page 24).

ENVR 101 Introduction to Environmental Policy
ENVR 202/203 Tools and Topics in Environmental Science
ENVR 322 Water Policy
ENVR 325 Geological and Environmental Catastrophes
Satisfies the Connections core requirement.
ENVR 400 Senior Seminar in Environmental Policy

101 Physical Geology Physical geology is a survey of the physical processes operating on and in the Earth and the results of these processes through time. Topics covered range in scale from the atomic to the galactic. The formation of the minerals and lavas, types of volcanoes, and the creation of sedimentary and metamorphic rocks make up the first third of the course; this introduces the materials of the Earth. The course next covers large-scale topics such as the age of the earth, earthquakes and their resultant damage, how continents and seafloors are created, a brief history of the world, and an outline of the great unifying theory of geology, plate tectonics. The last third of the course discusses how surface processes such as streams, wind, waves, and changes in the environment affect the deserts, glaciers, shorelines, and groundwater, and how these changes affect our way of life. Includes a laboratory. Credit will not be given for both GEOL 101 and 104. Satisfies the Natural Scientific Approaches core requirement. Offered each semester.

104 Physical Geology of North America This course examines the range of natural environments of North America and the geologic, climatic, and biogeographic basis for this diversity. Focusing on the major physiographic divisions of the United States and Canada, the course looks at the relationship between these fundamental factors, the unequal distribution of natural resources, and the geography and history of human response to them. Includes laboratory. Credit will not be given for both GEOL 101 and 104. Satisfies the Natural Scientific Approaches core requirement. Offered occasionally.

105 Oceanography Earth is largely a “water planet”—the only planet we know of that has liquid water on its surface. Oceanography has developed from early mythological explanations of the seas to the present use of high technology to study their features and workings. The oceans played an integral role in the exploration of Earth and the spread of humankind across the planet, as well as being a continuing source of food and other resources. In the Puget Sound region, we feel the effects of the nearby ocean daily, from the weather we have to the food we eat. This course investigates the origins and nature of Earth’s oceans. It looks at processes acting within the oceans (tides, currents, waves), interaction of the oceans, atmosphere, and continents, and the effects of these processes on life on Earth, including humans in the northwestern U.S. These facets are studied in the “big picture” context of the Earth as an integrated system in which each process affects the others. A portion of the lab time is devoted to measurement of the properties of oceanic and crustal material, some of which are collected locally from Puget Sound. Other labs are used to familiarize students with maps, charts, and other information sources. Emphasis is placed on making inferences about Earth systems from data gleaned from students’ own measurements and other sources. One weekend field trip is required. Satisfies the Natural Scientific Approaches core requirement. Usually offered every year.

110 Regional Field Geology This course focuses on one of several geologic provinces in North America in the most direct manner possible—in the field. After an initial lecture orientation, the class explores the rocks, land forms, structures, and fossils firsthand. Students learn to make their own observations and interpretations along the way. Each student becomes an expert in the geology of a selected area and makes in-field presentations to the rest of the class, as well as compiling a field notebook of the features that the class examines. Trips include the Colorado Plateau, the Death Valley region, and the Pacific Northwest. Prerequisite: Permission of instructor. Satisfies the Natural Scientific Approaches core requirement. Course fee may be required. Offered occasionally.

200 Introduction to Mineralogy and Petrology This course introduces the methods used to identify minerals and rocks and provides an overview of the processes by which these building blocks of the Earth are formed. Topics covered include chemical and physical properties of minerals, mineral associations, and the classification, genesis, and interpretation of igneous, sedimentary, and metamorphic rocks. Labs emphasize the identification of samples in hand specimen and by X-ray diffraction. One required weekend field trip. Prerequisite or co-require: GEOL 101, or 104, or 110. Offered every year.

206 Introduction to Geophysics This course investigates the shape, composition, and formation of the major internal and external features of the Earth: ocean basins, continents, mountain ranges, the core, the mantle, and the lithosphere. A large portion of time is spent obtaining and interpreting quantitative geophysical measurements of Earth properties. This includes collecting and analyzing seismic, gravity, and magnetic and paleomagnetic data, measuring the gravitational constant, and determining Earth’s size and mass, the thickness of the crust, and the distance to earthquake epicenters. Emphasis is placed on geophysical methods used by scientists in the measurement of basic Earth properties. Prerequisite: GEOL 101, 104, or 110 or permission of instructor. Offered every other year.

301 Sedimentary Geology The origin, texture, composition, classification, and interpretation of sediments and sedimentary rocks. The various methods for studying these materials in the field and laboratory are emphasized. A portion of the course is devoted to the main groups of microscopic fossils that occur as components of many sedimentary rocks. Prerequisite: GEOL 200. Offered every other year.
302 Structural Geology and Tectonics Study of earth’s architecture, major tectonic features and processes, and folding and fracturing in rocks; lab and field projects included. One weekend field trip is required. Prerequisite: GEOL 200. Offered every other year.

303 Geomorphology Detailed study of agents, processes, and products involved in landscape development and water movement at the Earth’s surface. Special emphasis is on the effect of the Pleistocene (Ice Age) climate on landforms. Prerequisite: GEOL 200. Offered occasionally.

304 Igneous Petrology and Volcanology This course covers igneous rocks and the processes by which they form. Specific topics include magma formation and evolution, characteristics of igneous rocks in different tectonic settings, and the causes, styles and impacts of volcanic eruptions. Students learn and utilize a variety of field and lab techniques including ICP analysis and thin section microscopy. Two weekend field trips required. Prerequisite: GEOL 200. Offered every other year.

305 Earth History The principles, methods, and materials of stratigraphy and geochronology used to interpret the physical history of the Earth. Emphasizes the interpretation and correlation of suites of rocks and the tectonic settings that controlled their formation. Prerequisite: GEOL 101, or 104, or 110, and GEOL 200. Offered every other year.

306 The Fossil Record This course investigates how life on earth has changed through time as recorded in the fossil record. It includes a survey of major invertebrate and vertebrate fossil groups, with emphasis on paleoecological patterns and processes, and the reconstruction of paleoenvironments. Prerequisite: Any one of the following: GEOL 101, 104, 110, BIOL 112. Offered every other year.

307 Introduction to Geologic Field Methods and GIS In this course students learn a variety of techniques that are used to locate, describe, and document geologic features in the field. Specific techniques include navigating with topographic maps and GPS, sketching geologic features, using a Brunton compass, recognizing and interpreting geomorphic features on topographic maps, aerial photos and lidar images, and working with ArcGIS to produce a variety of different types of maps. Three all-day field trips on Saturdays and/or Sundays are required. Prerequisite: GEOL 200. Offered every other year.

310 Water Resources This course examines the physical, chemical, and geologic processes that determine the distribution, movement, and nature of freshwater resources (rivers, lakes, wetlands, and groundwater). The course pays particular attention to issues of water supply and quality in North America. Lab and field exercises introduce the fundamentals of measuring and modeling river and groundwater flow; field trips to several dams and reservoirs in Washington illustrate some of the ways that surface water resources are utilized. Prerequisite: GEOL 101, or 104, or 110, and 200, or permission of instructor and one course in Mathematical Approaches core. Lab required. Offered every other year.

315 Energy Resources This course surveys the wide range of modern energy sources, and considers the prospects for their future supply and availability. Each energy source is explored from a wide range of perspectives, including: its origin, geographic distribution, energy density, energy “type” (gravity, chemical, radioactive, solar), processing, refining, or transformation from one form of mass or energy to another, transport (both pre- and post-processing/transformation), environmental costs (upstream and downstream-lifecycle considerations), and economic costs (cost/unit of energy produced). As ongoing events dictate, energy topics in the news are also considered, including economic, political, and environmental issues of the day. Prerequisites: GEOL 101, 104, or 110, and 200, or one course in the Mathematical Approaches core and permission of instructor. Offered occasionally.

320 Environmental Geochemistry This course provides an introduction to the ways in which chemical principles are used to study geological and environmental processes. The emphasis is on low-temperature processes that influence the chemistry of water, sediment, and soil. Specific topics include aqueous solutions, thermodynamics, mineral-water equilibria, oxidation-reduction reactions, adsorption-desorption processes, and applications of radiogenic and stable isotopes. The laboratory component of the course is field-based and involves sampling and analysis of water and sediment from around Tacoma. Prerequisite: GEOL 101, or 104, or 110, and CHEM 110, or permission of the instructor. Offered every other year.

324 Biogeochemical Approaches to Environmental Science This course provides an introduction to biogeochemical methods used in the study of environmental science. The course focuses on isotopic and elemental analyses of geological and biological materials with applications to a range of questions. Examples of topics include: energy flow, nutrient cycling, animal migration, and paleoclimatic conditions. The course readings draw heavily upon case studies from the primary scientific literature. Cross-listed as ENV2 324. Prerequisites: any one of BIOL 111, 112, CHEM 110, 115, 120, 230, GEOL 101 or 104, and any 300 level or above course in Biology, Chemistry, or Geology. Offered every other year.

330 Regional Field Geology See description for GEOL 110. Prerequisite: Permission of instructor and GEOL 101 or 104 and GEOL 200. Course fee may be required. Offered occasionally.

340 Climate Change This course examines the wide variety of geologic, physical, chemical, and biologic evidence for the nature, duration, timing, and causes of climate change throughout the long history of our planet. In general, the course proceeds chronologically through geologic time. As the course approaches the modern world, students examine the paleoclimate record in progressively greater detail, and consider increasingly complex explanations for the patterns seen. Because of the great breadth (interdisciplinary range) and great depth (wide range of time periods) of the topics considered, students use a wide range of sources, including semi-popular articles, textbooks, and primary literature. The lab focuses on examining a variety of primary sources of paleoclimatic information and techniques of data analysis, such as tree rings, pollen, and stable isotopes. Prerequisite: GEOL 101, 104, or 110, and 200, or permission of instructor and one course in Mathematical Approaches core. Offered frequently.

390 Directed Research This course provides a laboratory or field research experience for juniors or seniors under the direction of a faculty mentor. Students may initiate a project or join a research project in the mentor’s lab. Students must complete an agreement listing the research activity to be completed, references, and a progress plan. The research will result in a written report and a presentation. Prerequisite: permission of instructor. Offered occasionally.

490 Seminar 0.25 unit In this course students explore current topics in the geosciences. Topics vary from year to year but are primarily based on current or proposed research topics of faculty and students in the department. Design of research projects and presentation of findings are also discussed. Prerequisite: GEOL 101 or 104, 200, and one upper division Geology course. Offered each Spring semester. May be repeated.

492 Senior Thesis Research and preparation of a senior thesis under the supervision of a faculty member. Research proposal and public
presentation of research results is required. Participation in GEOL 490 required concurrently or prior to enrollment.

**495/496 Independent Study Project** By arrangement with Geology faculty. Credit variable up to one unit.

---

**GERMAN STUDIES**

Professor: Kent Hooper, Chair
Visiting Assistant Professor: Kristopher Imbrigotta

**About the Department**

In the age of globalization, the cultural experience of the migrant is defining more and more what it means to be human. This is why the German Studies faculty believes that sustained immersion in a different culture is essential to a modern education, regardless of major.

Adjusting to different customs, perspectives, and values as an individual within a group of native speakers allows our students to experience the dynamics of social integration from a marginal position, thus enabling them to see their own cultures in a different light.

Language has meaning only in its cultural context. That’s why we teach as much about mentalities in our German courses as we do vocabulary and grammar. After four semesters of German, most students qualify for study in Germany and Austria, which, along with Switzerland, are multicultural societies with distinct histories, unique cultures, and different perspectives on immigration and the political process.

Although many Germans speak excellent English, and graduate curricula are now taught in English, the American graduate students we interviewed in Germany were unanimous in the opinion that proficiency in German was essential to their success.

Germany is actively recruiting students for graduate programs across the curriculum, especially in STEM disciplines. Germany offers more financial support to foreign students than any other country. German-speaking countries also offer unique job opportunities. In an increasingly international and competitive job market, studies and internships in Germany open the doors to markets in the EU, where Germany is the dominant economic power, and in Russia and China, where Germany has developed a strong presence. Knowing German also gives you unmediated access to the greatest literature humankind has produced. Alumni and alumnae report that their German finds regular application in disciplines such as philosophy, history, art history, international studies, religious studies, and musicology.

In choosing to major or minor in German Studies, you will be joining an elite. Of over one hundred international fellowships and scholarships awarded to Puget Sound students since 2003 (Fulbright, DAAD, Congress-Bundestag Exchanges etc.), German students have won over thirty!

**Study Abroad**

Regardless of their majors, students of German are strongly encouraged to participate in approved study abroad programs. Details of these programs may be obtained from department advisors and the Office of International Programs.

**Transfer Units and Placement**

Students with previous high school language study may enroll in higher-level language courses by estimating that three years of high school concentration are approximately equivalent to one year of college work in foreign languages. Other factors such as study abroad, living with exchange students or foreign parents, and other intensive studies may warrant special consideration on a case-by-case basis.

All transfer students, especially those who have had prolonged periods of time elapse since their last academic coursework, will be evaluated on an individual basis. Their placement will be based on observation in courses at the Tacoma campus.

German coursework completed at other accredited institutions may be accepted toward major or minor requirements subject to the following conditions:

1. Campus Course Requirement: All German Studies majors must take a minimum of four courses taught in German at the Tacoma campus.
2. All minors must take a minimum of three units at the Tacoma campus.

**General Requirements for the Major or Minor**

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

**Requirements for the Bachelor of Arts in German Studies**

1. A minimum of eight units to include
   a. Proficiency in elementary and intermediate German demonstrated by completing GERM 101-102 and GERM 201-202 or by successful completion of higher level German courses.
   b. At least seven units in German Studies above GERM 102.
   c. One unit, taught in German at or above GERM 350, to be taken during the senior year.
   d. No more than two units taught in English (GERM 300-349, CONN 330) may count toward the major.
2. At least one semester in an immersion study abroad program in Germany, Austria, or Switzerland with one year strongly recommended (see Note 4 below).
3. A senior paper (see Note 2 below).
4. A senior portfolio (see Note 3 below).

**Requirements for the Minor in German**

At least five units to include

1. Proficiency in elementary and intermediate German demonstrated by completing GERM 101-102 and GERM 201-202 or by successful completion of higher level German courses.
2. At least four units in German Studies above GERM 102 to include at least one unit, taught in German, at or above GERM 350.
3. No more than one unit taught in English (GERM 300-349, CONN 330) may count toward the minor.

**Notes**

1. Students must earn a grade of C (2.0) or above in all courses taken for a major or minor in the German Studies Department.
2. The senior paper is completed during a seminar taken during the senior year.
3. Majors are required to compile a portfolio of their work, submitted to the department by April 1 of their senior year. When students declare their major, they should seek a faculty advisor in the department who will advise them on the creation of their portfolio. The portfolio serves to assess the student’s progress in the curriculum and to synthesize the student’s total experience as a major.
4. Financial or personal circumstances may preclude a student from...
German Studies

studying abroad. A student may petition to waive this requirement or replace it by participation in a nationally recognized total immersion program, such as Middlebury or the Deutsche Sommerschule am Pazifik, or successful completion of CONN 330.

5. The German Studies Department does not accept or award credit for distance learning courses.

6. The German Studies Department reserves the right to exclude a course from a major or minor based on the time elapsed since the course was completed.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

The proper course sequence of foreign language instruction is Elementary Level 101, 102, Intermediate Level 201, 202. A student who has received a C (2.00) grade or better in any course of this sequence or its equivalent cannot subsequently receive credit for a course which appears before it in the sequence.

Other courses offered by German Studies faculty. See Connections in the Core Curriculum section of this Bulletin for course description.

CONN 330 Finding Germany: Memory, History, and Identity in Berlin

Satisfies the Connections core requirement.

101/102 Elementary German Classroom and laboratory practice to develop basic listening, speaking, reading, and writing skills. This course is taught in German. The course sequence of foreign language instruction is Elementary Level 101, 102, Intermediate Level 201, 202. A student who has received a C (2.00) grade or better in any course in this sequence or its equivalent cannot subsequently receive credit for a course which appears before it in the sequence. Proficiency range after German 102: Novice Mid to Novice High (ACTFL); A1 (CEFR); 0/0+ (ILR). Prerequisite: 101 and 102 are sequential courses; 101 or permission of the instructor required for 102. 101 offered Fall term only; 102 offered Spring term only.

201/202 Intermediate German Students continue to develop German language skills at the intermediate level, with emphasis on reading authentic texts, building a more sophisticated vocabulary, expanding grammar, honing their speaking and listening skills, and writing strategies that focus on long-term and short-term assignments. Greater emphasis on cultural competency and acquisition. GERM 201 and 202 prepare students for advanced coursework in German Studies and study abroad in a German-speaking country. These courses are taught in German. The course sequence of foreign language instruction is Elementary Level 101, 102, Intermediate Level 201, 202. A student who has received a C (2.00) grade or better in any course in this sequence or its equivalent cannot subsequently receive credit for a course which appears before it in the sequence. Proficiency range after German 202: Intermediate Mid to Intermediate High (ACTFL); A2-B1 (CEFR); 1/1+ (ILR). Prerequisite: 201 and 202 are sequential courses. 201 or permission of instructor required for 202. 201 offered Fall only, 202 offered Spring only. GERM 202 satisfies the Humanistic Approaches core requirement.

Courses taught in English (GERM 300-349)

300 German Cinema of the Weimar Republic and under National Socialism, 1919-1945 The focus is to document, in what is sometimes referred to as self-conscious art cinema of the eras of the Weimar Republic (1919-1933) and National Socialism (1933-1945), the prevalence of aestheticized violence that seems inevitably to stem from extreme imbalances of power between individuals or groups in a society in crisis. Course taught in English. Satisfies the Artistic Approaches core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every other year.

305 Culture in the Third Reich Was National Socialism the incarnation of evil in the modern world? How could twelve years of Nazi control in Germany alter world history? Did its culture consist only of propaganda and party rallies? Why did the Nazi leadership consider art and culture so central to its political goals? In the past 25 years scholars have taken a serious look at Nazi culture and revealed a much more complex set of factors at work in all areas of cultural life. This interdisciplinary course introduces students to the often contradictory but fascinating historical, social, and economic conditions that led to cultural shifts when the Nazis came to power in 1933 and then examines how Nazi policies simultaneously and systematically influenced all aspects of life in Nazi Germany (Gleichschaltung). Students consider both the lowbrow culture and everyday life as well as the more traditional and sophisticated do-mains of ‘high’ culture. Topics include: religion, youth education, the camp system, Fascism, environmentalism, racial theories, disability and discrimination, propaganda and entertainment films, music and theatre, art and architecture, gender roles and family, and consumer culture. Course taught in English. Offered every other year. Satisfies the Artistic Approaches core requirement.

310 WWI in Literature and the Other Arts, 1908-1938 This course explores the words, actions, thoughts and feelings of the individual amidst the catastrophe of war. The course treats a wide variety of materials that relate to WWI, including lyric poetry, novels, memoirs, visual art, film, and deliberative and commemorative oratory. Students explore the ways in which various rhetorical and narrative treatments of soldiers and of war offer us understandings of the subjective experiences and ethical choices of ordinary and extraordinary people under extreme stress and facing horrendous challenges. The course also intends to consider notions of the individual, the community, and civilization (with all that word implies), against the backdrop of the chaotic action of war and combat. Course taught in English. Offered every other year. Satisfies the Artistic Approaches core requirement.

315 Talking about the Weather: Subversion, Counter-Culture, and Resistance This course considers a wide variety of materials from film, literature, theoretical texts, and the Internet in order to examine the influence of protest, revolt, and the power of resistance on post-war German society from the 1960s to the present. Major themes and questions from this course include: To what extent is the spirit of the sixties still alive and to what end? What are the legacies, and perhaps myths, that coalesce around such movements in the contemporary imagination? How does this triumvirate continue to shape Germany today? Course taught in English. Offered every other year.

Mid-level courses taught in German (GERM 350-399)

350 From Rubble to New Reality: German Cinema after World War Two This course surveys the history and development of German cinema after 1945, including canonical works by Staudte, Schlöndorff, Wenders, Kluge, and Fassbinder. We begin in the immediate post-WWII era and continue through contemporary films, examining major trends of German cinematography during four major periods: the Trümmerfilm, the New German Cinema of the Federal Republic, DEFA films in the GDR, and the cinematic trends after German reunification. In order to
come to a better understanding of how one can define German cinema, our focus will be on both thematic and formal aspects. Class discussions will focus on questions such as: What is the relationship between a specific film and its historical-cultural context? Is this relationship overt or hidden? What does (or did) a German audience see in the film? How can we analyze and interpret these films from today’s standpoint? German films might reflect on German issues, but is there a distinct German film language/style and what position do these films occupy within world cinema? What are the theoretical and formal concerns of German filmmakers? The course will also question and challenge the notion that something like a German national cinema exists at all. Prerequisite: GERM 202 or instructor permission. Offered every other year.

360 German Cultural History and Politics No one can hope to comprehend the challenges Germany faces today without confronting the triumphs and tragedies of the German past. Questions of sovereignty and individual freedom, as argued by bloggers and in the press, acquire supreme significance when viewed in light of Germany under Bismarck, the failure of the Weimar Republic, the nightmare of National Socialism, forty years of division, the Pandora’s box of unification, and Germany’s crucial role in the European Union. Students study the evolution of the German political system even as they develop the basic vocabulary of history and politics. Prerequisite: GERM 202 or instructor permission. Offered every three years.

370 Fables, Fairy Tales, and Parables The focus of this course is on didactic literature: fables, fairy tales—many of which serve both to teach and to entertain (docet et delectat, the Latin dictum)—and the modern-day parables of authors such as Franz Kafka. Prerequisite: GERM 202 or instructor permission.

380 Green Germany: Nature and Environment in German Culture Being green is not a new trend for Germans. In fact, Germany has consistently led the way, not only within Europe but also throughout the world, in how to be environmentally friendly and natural resource conscious. Germany is (and has been) a world leader in solar and wind technologies and boasts one of the smallest carbon footprints of any industrialized major economy in the world. Why are Germans so green? What is Germany’s position on today’s major debates surrounding global warming, climate change, conservation, urban planning, public transportation, sustainable agriculture, and environmental protection? How do Germans see themselves vis-à-vis nature as represented in the arts? In this course students explore these and other questions related to nature and the environment from a German perspective, from the mid-eighteenth century through today. The course introduces students to a wide variety of subject matter and topics in literature, film, news items/current events, science, art, politics, language, and contemporary consumerism. The course also highlights the university city of Freiburg in Baden-Wuerttemberg, often called Germany’s greenest city, as a special case study. Prerequisite: GERM 202 or instructor permission. Offered every three years.

Advanced seminars taught in German Proficiency range: Intermediate High to Advanced Medium (ACTFL); B1-B2 (CEFR); 1+ to 2+ (ILR)

405 Novellas of the 19th and early 20th Centuries The history, theory, and development of the literary genre Novelle, featuring some of the more bizarre and fascinating works of the greatest German authors. Emphasis upon the function and limits of genre in literary analysis. Prerequisite: One mid-level German course (GERM 350-399) or instructor permission. Offered every other year.

415 Theory and Practice of German Drama This course exposes students to representative German-language dramatic works, with the intention of staging a public performance at the end of the semester. Additional shorter texts on dramatic theory and visual and/or videos will supplement course materials. As a practical component to the course, we will also conduct technical acting exercises and in-class readings of the dramatic texts. Emphasis will be on closely reading texts, on discussing them in German, and providing opportunities to systematically advance and improve articulation of spoken German. Students participate in all facets of theatrical production, from character development, acting and performing, directing, requisitions and props, and promoting our play. Prerequisite: One mid-level German course (GERM 350-399) or instructor permission. Offered every three years.

420 Nobel-Prize-Winning Authors Students read a selection of works by German, Austrian, Swiss, and Romanian Nobel-prize-winning authors, including Gerhart Hauptmann, Thomas Mann, Hermann Hesse, Nelly Sachs, Heinrich Böll, Günter Grass, Elfriede Jelinek, and Herta Müller. Prerequisite: One mid-level German course (GERM 350-399) or instructor permission. Offered every three years.

450 Contemporary Voices in German Literature and Film since 1989 This seminar seeks to interrogate assumptions about contemporary German and American culture and examine how one can better define what German and ‘Germaness’ means today (if at all possible) from the perspective of the outsider, the foreigner, and the other. What do the words ‘Heimat’ and ‘Nation’ mean to Germans today and why have these notions remained so fluid—even un-definable—in the German context? In this course, students engage with various literary texts, film, news items, and other media from Germany after reunification (1989/90). The course begins by touching on current events and debates surrounding the nation-state, immigrants, and multiculturalism in Germany’s increasingly evolving social and political landscape in the twenty-first century. Then it explores these questions and topics in several units, focusing on the following themes: Germany’s ever-changing capital Berlin and its role within the European and German cultural landscape; perspectives on contemporary Germany and the problems of identity, assimilation, and integration into the Leitkultur/dominant culture from German-Jewish, German-Turkish, and Afro-German writers, artists, and their communities; the on-going reassessment of life in the former German Democratic Republic and the phenomenon of so-called ‘Ostalgie’; and finally, Germany’s legacy of and continued struggle with fascism. Prerequisite: One mid-level German course (GERM 350-399) or instructor permission. Offered every three years.

470 Writing with Light: Literature and Photography From the very beginning of its history, photography has served as a device to reflect on and about representation. In this seminar students explore the many interrelations between literature and photography specifically in the German context as they are represented in genres of fiction, illustrated texts, autobiography, photo books, and others. Students will read and discuss selected texts, photo narratives, and combinations of photos and texts, as well as the supposed affinities and analogies between story-telling and photographic images. The course highlights theoretical texts about photography and its inclusion (or intrusion) into the literary discourse, including a short history of the medium. Prerequisite: One mid-level German course (GERM 350-399) or instructor permission. Offered every three years.

480 Seminar in German Literature Synthesis of various aspects of literary studies. Since content changes, this course may be repeated for credit. This course is taught in German. Prerequisite: One mid-level
About the Program

The Global Development Studies (GDS) Program offers an interdisciplinary minor that focuses on the transformations associated with development. Since development entails transformations at the individual, local, national, and global levels, the program consists of courses that address multiple thematic and regional dimensions of development processes.

Courses in the program allow students to explore the empirical, philosophical, and policy dimensions of development. Faculty members at Puget Sound with development expertise teach in several departments and thus can provide students with a comprehensive set of skills and experiences for future development studies or work.

Program Objectives

By working with diverse disciplinary lenses, textual forms, and theoretical models, students who complete a minor in Global Development Studies should demonstrate the ability to:

1. Explain how, and by whom, the concept of development has historically been defined and practiced.
2. Identify the assumptions that have shaped development policy goals and the diverse kinds of evidence used to evaluate their effectiveness.
3. Understand and critically evaluate a range of development theoretical frameworks.
4. Articulate connections among the political, economic, and sociocultural dimensions of global development.
5. Demonstrate analytical, research, and writing skills through the completion of a senior capstone course.
6. Apply skills or engage in experiences that will enable future studies or work in the field of global development.

To qualify for the minor in Global Development Studies, a student must meet the requirements specified below. While students self-select their participation in the program by completing and submitting a form to the Academic Advising Office, they are strongly encouraged to meet with one of the advisory committee members to coordinate their planned curricular trajectory.

Though courses that reflect a focus on development are represented in some First-Year Seminars, they do not count towards the minor in Global Development Studies. Students interested in development processes are nevertheless encouraged to consider these courses.

Most courses offered in the program require no related prior study; however, students who take any of the few upper division courses with prerequisites must satisfy the associated requirements.
The Department of Hispanic Studies offers a sound educational experience centered on the study of the language as well as the literary and cultural production of Iberian, Latin American, and U.S. Hispanic cultures, from their origins to the present time. We offer language instruction to serve all proficiency levels, from beginners to students with native or near-native language skills. In our upper-division courses, students hone their research, writing, and public speaking skills and explore key questions posed by literary and cultural studies about the Spanish-speaking world: the United States, the Caribbean, Central and South America, and Spain.

We address the needs of traditional students of Spanish as a foreign language; of heritage speakers for whom Spanish is a part of their family history; and of bilingual and bicultural students whose first language is English but who enter the university as near-native speakers of Spanish.

In addition to our traditional mission preparing students to function in Spanish in a foreign setting, the Department of Hispanic Studies encourages students to become proficient in Spanish language and cultures within and outside the borders of the United States. Our curriculum embraces the rich variety of Spanish in the U.S., the centuries-old histories of Latino communities all over the nation, and their current demographic, cultural, and political relevance. Fostering the development of engaged citizens who are able to thrive in our increasingly bilingual nation is of central importance to our mission. In that way we assist students to prepare themselves to use Spanish as citizens and professionals on a daily basis and to understand the complexities and nuances of Hispanic cultures in the U.S. as well as abroad.

Majors in Hispanic Studies are well prepared for graduate studies in Spanish. They are also well qualified to pursue post-graduate degrees and entry-level work in fields such as law, business, education, journalism, and medicine. Frequently, our graduating majors have integrated their studies of Spanish language and cultures with coursework in other disciplines and pursue careers in fields such as international business, the non-profit sector, government, human and immigrant rights work, travel, and communications, all of which value their expertise in Hispanic Studies highly.

Students who graduate from the Hispanic Studies Department will be able to:

- Communicate in Spanish personally and professionally on a daily basis.
- Demonstrate a high level of critical sophistication as readers of complex literary texts.
- Engage critically and deliberately with challenging theoretical questions on a wide variety of topics in the field.
- Prepare and execute effective oral presentations in Spanish and write solid research papers on Hispanic literary and cultural studies.
- Understand the complexities and nuances of Hispanic cultures in the U.S. and abroad.
- Demonstrate an awareness of the linguistic, cultural, racial, and ethnic diversity of Spain, Latin America, and the U.S.
- Act thoughtfully as engaged citizens in our increasingly bilingual communities.

### Course Offerings: Regional Electives

- BUS 472 Business in Latin America
- BUS 474 Business in India and South Asia
- CONN 334 Truth and Reconciliation in South Africa and Beyond
- CONN 395 China and Latin America: A New Era of Transpacific Relations
- ENGL 361 South Asian Fiction
- HIST 280 Colonial Latin America
- HIST 281 Modern Latin America
- HIST 291 Modern Africa
- HIST 380 Modern Mexico: From Revolution to NAFTA
- HIST 382 Comparative Revolutions in Twentieth-Century Latin America
- HIST 384 Transnational Latin America
- HIST 391 Nelson Mandela and 20th Century South Africa
- HIST 392 Men and Women in Colonial Africa
- IPE 333 Political Economy of Southeast Asia
- LAS 100 Introduction to Latin American Studies
- LAS 380 Around Macondo in Eighty Days
- LAS/PG 399 Latin American Travel Seminar
- PG 325 African Politics
- SOAN 312 Indonesia and Southeast Asia in Cultural Context
- SOAN 315 Identity Politics in Latin America
- SOAN 416 Modern India and Diaspora
- SPAN 402 Seminar in Nineteenth-Century Latin America

### Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

**400 Research Seminar in Global Development Studies**

This capstone course allows Global Development Studies minors to consolidate their knowledge and engage in meaningful conversations about knowledge with other students in the program. Students in this seminar undertake an in-depth examination of a specialized topic of interest within the field of global development. Working both as a class and in small groups throughout the semester, students are expected to research, write, and present a senior thesis. **Prerequisite: instructor permission required.**

### GREEK

Students interested in Greek language courses should consult the Classics section in this Bulletin.

### HISPANIC STUDIES

**Professor:** Mark Harpring, Josefa Lago Graña; Harry Vélez-Quiñones

**Associate Professor:** Brendan Lanctot, *Chair*

**Assistant Professor:** Jairo Hoyos Galvis

**Visiting Instructor:** José Lara Aguilar; David Hanson; Alicia Ramírez-Dueker; Aurora Salvador Sanchez

### About the Department

The Department of Hispanic Studies offers a sound educational experience centered on the study of the language as well as the literary and cultural production of Iberian, Latin American, and U.S. Hispanic cultures, from their origins to the present time. We offer language instruction to serve all proficiency levels, from beginners to students with native or near-native language skills. In our upper-division courses, students hone their research, writing, and public speaking skills and explore key questions posed by literary and cultural studies about the Spanish-speaking world: the United States, the Caribbean, Central and South America, and Spain.

We address the needs of traditional students of Spanish as a foreign language; of heritage speakers for whom Spanish is a part of their family history; and of bilingual and bicultural students whose first language is English but who enter the university as near-native speakers of Spanish.

In addition to our traditional mission preparing students to function in Spanish in a foreign setting, the Department of Hispanic Studies encourages students to become proficient in Spanish language and cultures within and outside the borders of the United States. Our curriculum embraces the rich variety of Spanish in the U.S., the centuries-old histories of Latino communities all over the nation, and their current demographic, cultural, and political relevance. Fostering the development of engaged citizens who are able to thrive in an increasingly bilingual nation is of central importance to our mission. In that way we assist students to prepare themselves to use Spanish as citizens and professionals on a daily basis and to understand the complexities and nuances of Hispanic cultures in the U.S. as well as abroad.

Majors in Hispanic Studies are well prepared for graduate studies in Spanish. They are also well qualified to pursue post-graduate degrees and entry-level work in fields such as law, business, education, journalism, and medicine. Frequently, our graduating majors have integrated their studies of Spanish language and cultures with coursework in other disciplines and pursue careers in fields such as international business, the non-profit sector, government, human and immigrant rights work, travel, and communications, all of which value their expertise in Hispanic Studies highly.

Students who graduate from the Hispanic Studies Department will be able to:

- Communicate in Spanish personally and professionally on a daily basis.
- Demonstrate a high level of critical sophistication as readers of complex literary texts.
- Engage critically and deliberately with challenging theoretical questions on a wide variety of topics in the field.
- Prepare and execute effective oral presentations in Spanish and write solid research papers on Hispanic literary and cultural studies.
- Understand the complexities and nuances of Hispanic cultures in the U.S. and abroad.
- Demonstrate an awareness of the linguistic, cultural, racial, and ethnic diversity of Spain, Latin America, and the U.S.
- Act thoughtfully as engaged citizens in our increasingly bilingual communities.

### Study Abroad Coursework

Majors and minors in Hispanic Studies receive credit for coursework earned while studying in departmentally approved study abroad programs only. A list of approved programs is available below. To ensure that credit earned abroad will transfer, students are encouraged to consult with a department advisor to discuss their plans for foreign study. The following are the approved programs in the Department of Hispanic Studies. No University credit in Spanish will be awarded for coursework carried out in programs other than the following:

- [Course Offerings] on page 10.
Hispanic Studies

Placement

Normally, first year students in their first semester who have completed a minimum of three solid years of Spanish courses in high-school are qualified to enroll in Spanish 201 (Intermediate Spanish I). First year students in their first semester who have completed less than three years of solid high-school Spanish courses should consider enrolling in Spanish 101 (Elementary Spanish I) in the fall or in Spanish 110 (Intensive Elementary Spanish) in the spring term. Students who failed to take Spanish during the year prior to entering Puget Sound should consider enrolling in Spanish 110 as well. Experiential learning abroad, living in a Spanish-speaking household in the U.S. or abroad, graduating from a Spanish immersion school program, and other such experiences generally allow first year students to enroll in post-intermediate or advanced courses. Please consult with a department advisor at the fall Academic Fair, via email, or in person during their office hours for personal assistance with placement. All transfer students, especially those who have not taken Spanish for one or more years prior to transferring to Puget Sound, can also be evaluated on an individual basis. Consult department advisors to determine adequate course placement. All transfer students, especially those who have had prolonged periods of time elapse since their last academic coursework, will be evaluated on an individual basis. Their placement will be based on observation in courses at the Tacoma campus.

Transfer of units

Coursework completed at other accredited institutions may be accepted toward major or minor requirements subject to the following conditions:

1. All Hispanic Studies majors must take a minimum of four courses taught in the Hispanic Studies department at the Tacoma campus.
2. In addition to meeting the first requirement, Hispanic International Studies majors must take a minimum of four of the required units in Business, Economics, and Politics & Government at the Tacoma campus.
3. All minors must take a minimum of three units at the Tacoma campus, including the required 300/400-level course.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Bachelor of Arts in Hispanic International Studies

Fourteen units and a senior portfolio (see Notes below).

I. Eight units in Spanish at the 201 level or above to include:
   A. SPAN 205
   B. Three units at the 300/400 level
   C. Two of the 300/400-level courses must be taken at the Tacoma campus, one during senior year. See section on Transfer of Units (above) for more details.

II. Three units in International Politics
   A. PG 102 or 103

III. Three units in International Business and/or Economics
   A. Three units from ECON 101, 268, 271; BUS 370, 435, 472, 475; IPE 205. Note: A student majoring in Hispanic International Studies who also earn a Economics major or minor may also count ECON 301 and 302 towards this requirement.

Requirements for the Minor in Spanish

Completion of a minimum of five units in Spanish at the 201 level or above. One unit must be at the 300 or 400 level taken at the Tacoma campus.

Notes

1. Students must earn a grade of C (2.0) or above in all courses taken for a major or minor in the Department of Hispanic Studies.
2. The senior writing project is a graduation requirement for Language, Culture and Literature majors. It will emerge from an upper division course (301 or above), an equivalent course while taken abroad or an approved summer research project. More information about the senior writing requirement are available from the department or the academic advisor.
3. Majors are required to compile a portfolio of their work, submitted to the department by April 1 of their senior year. When students declare their major, they should seek a faculty advisor in the department who will advise them on the creation of their portfolio. The portfolio serves to assess the student’s progress in the curriculum and to synthesize the student’s total experience as a major.
4. Refer to home departments for prerequisites for all courses without the SPAN designation. For example, PG 321 has a prerequisite of PG 102.
5. Hispanic International Studies students majoring or minoring in Economics may count ECON 301 and 302 toward the International Business or Economics requirement.
6. The Department of Hispanic Studies does not accept or award credit for distance learning courses.
7. The Department of Hispanic Studies reserves the right to exclude a course from a major or minor based on the time elapsed since the course was completed.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10. The proper course sequence of instruction in Spanish language is Elementary Level 101 and 102, or 110; Intermediate Level 201 and 202. A student who has received a C (2.00) grade or better in any course of this sequence or its equivalent cannot subsequently receive credit for a course which appears before it in the sequence.

IFSA/Butler Buenos Aires (Argentina)
CIEE Valparaiso (Chile)
UPS/PLU Oaxaca (Mexico)
ILACA Granada (Spain)
Madrid Summers (Spain)

 requirements: Spanish 110 as well. Experiential learning abroad, living in a Spanish-speaking household in the U.S. or abroad, graduating from a Spanish immersion school program, and other such experiences generally allow first year students to enroll in post-intermediate or advanced courses. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Bachelor of Arts in Language, Culture, and Literature in Hispanic Studies

Ten units, a senior paper, and a senior portfolio (see Notes below).

I. Ten units in Spanish at the 201 level or above to include:
   A. SPAN 300
   B. Two units at the 301 level or above
   C. One 400-level course

II. Two of the 300/400-level courses must be taken at the Tacoma campus, one during the senior year. See section on Transfer of Units (above) for more details.

Requirements for the Minor in Spanish

Completion of a minimum of five units in Spanish at the 201 level or above. One unit must be at the 300 or 400 level taken at the Tacoma campus.

Notes

1. Students must earn a grade of C (2.0) or above in all courses taken for a major or minor in the Department of Hispanic Studies.
2. The senior writing project is a graduation requirement for Language, Culture and Literature majors. It will emerge from an upper division course (301 or above), an equivalent course while taken abroad or an approved summer research project. ILACA Granada (Spain)
Madrid Summers (Spain)
201 101/102 Elementary Spanish These courses are an introduction to the fundamentals of Spanish and focus on the development of four skills: comprehension, speaking, reading, and writing. Emphasis is placed on active communication and the development of oral and comprehension skills. This course is taught in Spanish. The course sequence of foreign language instruction is Elementary Level 101, 102, Intermediate Level 201, 202 SPAN 101 and 102 satisfy the foreign language graduation requirement when both are completed successfully. 202. A student who has received a C (2.00) grade or better in any course in this sequence or its equivalent cannot subsequently receive credit for a course which appears before it in the sequence. Prerequisite: 101 and 102 are sequential courses: 101 or permission of the instructor required for 102. 101 offered Fall only; 102 offered Spring only.

202 201/202 Intermediate Spanish These are mid-level courses for students seeking to perfect their command of Spanish. The courses consist of oral and written assignments on a variety of topics chosen to increase the student’s control of the structures and vocabulary of the language. The courses also include a thorough review of grammar. This course is taught in Spanish. The course sequence of foreign language instruction is Elementary Level 101, 102, Intermediate Level 201, 202. A student who has received a C (2.00) grade or better in any course in this sequence or its equivalent cannot subsequently receive credit for a course which appears before it in the sequence. Prerequisite: Three years of high school Spanish, SPAN 102, or permission of instructor required for 201; 201 or permission of instructor required for 202. 202 offered Fall only; 202 offered Spring only.

203 Advanced Grammar and Composition This course develops students’ writing and editing skills in Spanish by exploring various types of writing (descripción, narración, reportaje, exposición, and argumentación) and the processes needed to develop these styles of composition. As part of the mastery of the skills necessary for writing in Spanish, the course incorporates a review of key and complex grammatical structures. This course is taught in Spanish. Prerequisite: SPAN 201 and 202 or their equivalents. Offered frequently.

204 Advanced Oral Expression This course combines linguistic functions and structures with culture through an integration of listening, speaking, reading, and writing activities. The course concentrates on improving oral fluency in Spanish by using the topics of Spanish and Latin American films, and their illustration of language in its cultural context for class discussion. This course is taught in Spanish. Prerequisite: SPAN 201 and 202 or their equivalents. Offered frequently.

205 Spanish Contemporary Issues, Translation, and Creativity Applications of Spanish in non-literary contexts. This class emphasizes the perfection of practical oral and written skills, especially translation. It is open to a wide variety of topics including popular culture, technology, science, economics, news media, cinema, the environment, and/or some professional uses of Spanish. Students will complete individual and/or group multimedia projects centered around their interests. A grammar review is included. This course is taught in Spanish. Prerequisite: SPAN 201 and 202 or their equivalents. Offered frequently.

210 Latina/o America: A Critical Introduction to Latina/o Studies The United States is the second largest Spanish-speaking country in the world. Taking an interdisciplinary approach, this course explores the historical, social, political, and cultural configurations of this fact and of what has come to be known as Latina/o U.S.A. The course begins with a discussion on the roots of Spanish in the Americas. What are the historical and colonial relations of power leading to the presence of Spanish-speaking peoples and Latino cultures in the U.S.? In posing this question the course examines the nascent U.S. nation as a political and colonizing force throughout the 19th century; its politics of colonization towards Native Americans, Mestizos, and people of Spanish and African descent through the annexation of Florida (1819), the Mexican American War (1846-1848), and the Spanish-American War (1898). Departing from these moments, the course then interrogates ongoing U.S. border politics and U.S. empire building throughout the continent, further questioning the following: How do U.S. policies relate to the massive Latino migratory patterns during the 19th, 20th, and 21st centuries? How do these shape the complexities of the Latina/o experience? Literature, film, historical accounts, and social science works serve to discuss the central issues of this course: migrations, racisms, language as a marginalizing and/or empowering tool, key political and social moments in the Latino experience, the entrenchment of neoliberal economic policies and immigration, deportations and U.S. immigration policies, Latino community building, gender practices, heterogeneities of Latino populations, and politics of identity. This course is taught in English. Satisfies the Humanistic Approaches core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement. Cross-listed with LTS 200. Offered frequently.

211 Iberian Cultures This course introduces students to the culture and civilization of Spain with emphasis on the history, art, and prevalent cultural myths and practices integral to the development of the nations that make up Spain. This course considers the relevance of these cultural elements within an Hispanic context and a global perspective. This course is taught in Spanish. Prerequisite: SPAN 201 and 202 or their equivalents. Offered frequently.

212 Latin American Culture and Civilization This course introduces the student to the culture and civilization of Latin America, with an emphasis on the history, visual art, music, and prevalent cultural myths integral to the civilizations and cultures of the region. The course considers the relevance of these cultural elements within a Hispanic context and a larger world perspective. This course is taught in Spanish. Prerequisite: SPAN 201 and 202 or their equivalents. Offered frequently.
300 Literature, Theory, and Practice  A study of the major genres of Hispanic literature through close analyses of selected masterpieces. This class prepares the student for more advanced studies in literary and cultural studies. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered frequently.

301 Literature of the Americas and Critical Inquiry  A panoramic survey of the literature of the Americas. The texts studied in the course reflect literary developments up to the present. Works to be discussed illustrate cultural elements that are evidenced in today’s society. Latino Literature written in the United States may also be included. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered every other year.

302 Spanish Literature and Critical Inquiry  A panoramic survey of Spanish literature from the early modern period to the present. Works to be discussed illustrate cultural, political, and social issues critical in the development of Spanish literature. This course has a multimedia component. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or permission of the instructor. Offered every other year.

303 Hispanic Short Story  This course considers the main cultural and literary issues of the Hispanic world as represented in the short story. Writers from both sides of the Atlantic are studied with emphasis on close reading and analysis of the texts. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered every other year.

304 Hispanic Poetry  This course examines poetry as an authentic expression of Hispanic literature. Writers from Spain and Latin America are studied with emphasis on close reading and analysis of their poems, the study of meter, rhyme, and other elements of prosody, as well as writing critically about poetry. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered every other year.

305 Spanish Film  An overview of Spanish cinema since the Civil War to the present. All films are studied in reference to the historical developments in Spain from 1939 to the present. Works by Berlanga, Buñuel, Saura, and Almodóvar are screened. Course includes required screening lab. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered occasionally.

306 Latin American Film  This course surveys Latin American cinema, with a particular emphasis on contemporary films. The acquisition of technical vocabulary will facilitate a careful examination of the selected works. Together with literary, critical, and theoretical texts, this analysis will lead to a broader discussion about the key cultural and social issues of the region. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered occasionally.

307 Modern Spanish Theater  This course covers approximately 200 years of Spanish drama. Students read complete dramas from several of Spain’s most prolific playwrights while covering the major literary movements and tendencies of the nineteenth and twentieth centuries. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered occasionally.

308 Modern Latin American and Latino Theatre  This course explores major theatre pieces of the twentieth century and is organized around important theatrical centers in Latin America and the study of terminology related to the theatre. The two largest units focus on Argentina and Mexico, but the course also covers plays from Chile, Puerto Rico, Cuba, and some Chicano works. The growing importance of performance theory and art is included in the coursework. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered every other year.

309 Latina/o Literatures  Latina/o literary and cultural productions have particularly provided a gateway into understanding the heterogeneity of Latino experiences in the U.S. While this course does not survey Latina/o literatures historically, it does introduce students to some of the most contemporary Latina/o literary productions and cultural expressions by situating these in their broader cultural, social, and political frameworks. Plays, short stories, novels, testimonies, poetry, autobiography, essays, and film serve to explore complex—and often silenced—histories, issues, and realities in present-day Latina/o communities. In this manner, the course looks at literature and cultural productions as a platform for cultural, social, individual, historical, and political explorations; a place where ideologies are contested, debated, and articulated; a site where subjectivities are problematized, enunciated, and made visible. Central to this course are questions pertaining to: the neoliberal market and the commodification of the Latino body; identity construction (and/or destruction); the intersections of sexuality, gender, and class in informing discourse; racisms; discourses of privilege; language and art as a conduit for the erosion of invisibilities; the intersections of systems of power in the literary; border politics, death and violence in the Latino experience; conditions of exile and diaspora; U.S. immigration politics, and among others; defiant Latina/o sexualities. This course is taught in Spanish. Cross-listed with LTS 300. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered frequently.

309 Special Topics in Literary and Cultural Studies  SPAN 310 offers in-depth study of literary and cultural topics in the Spanish-speaking world that are interdisciplinary in nature, multiregional in approach, and genre inclusive. As such, it incorporates short story, poetry, drama, essay, and film, and it covers several regions, including but not limited to the Southern Cone, Central America, the Caribbean, and Spain. Potential topics for this rubric are advanced culture courses, literatures of the periphery, narratives of the migration experience, advanced translation, linguistics, or any course which is interdisciplinary in nature. In addition to learning about the concrete topic of the class, students develop their critical skills, and improve their speaking, reading and writing skills in Spanish. This course is taught entirely in Spanish. Because content will change, this course may be repeated for credit. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered occasionally.

311 Migration Narratives  This course explores the human experience of migration, exile, and/or diaspora affecting the Spanish-speaking world, by studying the social, political, historical, economic and intellectual implications of those processes. The class consists of close readings of literary works in several genres, including poetry, plays, short stories and essays, and the screening of several films, in addition to readings on cultural aspects of and theoretical approaches to this phenomenon. This course is taught in Spanish. Prerequisite: any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent. Offered occasionally.

400 Special Topics in Latina/o Studies  This special topics course is conducted as a seminar and varies in focus each time. The course offers students the opportunity to further examine, problematize, and research particular issues and forms of cultural productions as they relate to Latina/o Studies and Latino communities in the United States. To this purpose, class sessions require students to explore the discursive specificities of assigned works as well as to consider and interrogate the critical and theoretical issues they raise. Students’ thoughtful engagement with the material and ability to participate in productive dialogue.
bear directly on the quality of the knowledge produced throughout the seminar. Cross-listed with LTS 400 Prerequisites: any one of SPAN 300, 303, 306, 307, 311, LTS 300, or equivalent. Offered frequently.

401 Seminar in Medieval and/or Early Modern Spanish This course is a comprehensive study of Spanish literature from its origins to the early modern period. The rise of Castilian cultural hegemony, Jewish and Muslim converso cultural practices, the development of Europe’s most prolific national theater, and the birth of the modern novel, etc., will be considered. This course is taught in Spanish. Prerequisite: any one of SPAN 300-311 or equivalent. Offered occasionally.

402 Seminar in Colonial and/or Nineteenth-Century Latin America This course is a comprehensive study of the literature of Latin America from the European exploration, conquest, and colonization, to the independence of the colonies in the nineteenth century, when the nations of the region were established. It includes the late nineteenth century and the emergence of Modernism, the first literary movement to originate in Latin America. This course is taught in Spanish. Prerequisite: any one of SPAN 300-311 or equivalent. Offered occasionally.

403 Seminar in Eighteenth and/or Nineteenth-Century Spain A survey of Spanish literature between its two golden ages; close reading of selected texts; consideration of the Enlightenment, Romanticism, and Realism in a Spanish context; and examination of interplay among society, politics, art, and literature. This course is taught in Spanish. Prerequisite: any one of SPAN 300-311 or equivalent. Offered occasionally.

404 Seminar in Twentieth and/or Twenty-First Century Spain A study of Spanish literature from the generation of 1898 to the present. Close readings of selected texts from all literary genres. This course is taught in Spanish. Prerequisite: any one of SPAN 300-311 or equivalent. Offered occasionally.

405 Seminar in Twentieth and/or Twenty-First Century Latin America The course introduces students to the principle tendencies, texts, and writers of twentieth-century Spanish-American narrative. The course focuses on novels and short stories as different as the Fantastic literature of Jorge Luis Borges, the nativism or “indigenismo” of Miguel Angel Asturias, the literary chronicling literature of the Mexican Revolution of Juan Rulfo, the Magical Realism of Garcia Marquez, and the “boom” and “post-boom” works of South America’s finest writers. This course is taught in Spanish. Prerequisite: any one of SPAN 300-311 or equivalent. Offered occasionally.

410 Special Topics in Hispanic Studies Synthesis of various aspects of literary studies. Topics to meet special needs. Since content changes, this course may be repeated for credit. This course is taught in Spanish. Prerequisite: any one of SPAN 300-311 or equivalent. Offered occasionally.

HISTORY

Professor: Nancy Bristow; John Lear, Chair; Jennifer Neighbors; Douglas Sackman; Katherine Smith; Benjamin Tromly

Associate Professor: Poppy Fry

Assistant Professor: Andrew Gomez

About the Department

Convinced that the study of history is an essential component of a superior education in the liberal arts and sciences, the Department of History offers a strong academic program in a number of areas within the discipline of history. Students who study history develop and sharpen their minds as they learn to think, to evaluate, to communicate, and ultimately to judge. They gain a fundamental understanding of the world in which they live and of the diverse forces that have shaped both past and present. Their work in history helps them to know themselves and to appreciate societies that are different from their own, and they discover how to place contemporary issues and problems within a broad historical perspective.

All students, no matter what their major, benefit from the study of history. Students of the humanities learn to appreciate the development of literature, art, music, and philosophy. Social science majors better understand social change by examining the history of past societies. Students who major in the sciences gain insight into the complex interaction between the social and cultural environment and the evolution of scientific thought. All students acquire perspective on the social, political, and economic relationships that shape the world in which they live and work.

History majors who fulfill the department’s academic requirements and experience the variety of departmental instructional methods acquire 1) substantial and substantive knowledge of the past, 2) conceptual understanding of history as a scholarly discipline, 3) professional skills necessary for independent historical research, and 4) a sense of historical perspective. They have an opportunity to study with excellent faculty, who provide them with rigorous instruction in both broad subject areas and specialized fields. The sound training that students receive as undergraduate history majors prepares them well for graduate study in history and other professional programs, or for rewarding careers in business, education, socially oriented vocations, and government service. Indeed, the methods of learning and the ways of thinking that they develop as history students will prove applicable to the demands of any career that they pursue in later life.

While courses in the Department of History, as a rule, have no prerequisites, they are numbered at three levels that indicate increasing degrees of sophistication, difficulty of material, and workload. Most students with no college work in history first take a 100 or a 200 level course; students with particular interests, however, including juniors and seniors from other departments, are encouraged to take courses at the 300 level at any time, after consulting with members of the Department of History or the instructor. Students considering graduate study in history should seek guidance from a member of the department with expertise in their area of interest; such consultation could occur as early as the freshman or sophomore year.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major

A major in History consists of 10 units:

1. Completion of a minimum of 10 units to include
   a. two survey courses from the following: HIST 101, 102, 103, 152, 153, 224, 230, 231, 245, 248, 254, 280, 281, 291, 293; CLSC 211, 212;
   b. HIST 200;
   c. six additional units, at least four of the six at the 300 and 400 levels;
d. HIST 400.

2. Seminars in Scholarly Inquiry offered by the History Department do not count toward either the History major or minor.

3. The following courses from Classics and Science, Technology, and Society may count toward the major in History: CLSC 209, 211, 212, 308, 309, 390, STS 325, 338, 366.

4. The following Connections courses may count toward the major in History: AFAM 355, 360; ASIA 341; CONN 304, 332, 333; 334; 358, 359, LAS 387; STS 330, 370. For students whose first major is History, Connections courses that fulfill a requirement for the major in History will not count as satisfying the graduation requirement of three upper-division courses outside the major.

5. Excluding HIST 200 and HIST 400, the major must include:
   a. at least one unit each in the following five areas: African history, Asian history, European history, Latin American history, and United States history;
   b. at least one unit in the history of a preindustrial period chosen from the following: HIST 101, 230, 245, 280, 293, 302, 304, 305, 307, 311, 314, 351, 352; CONN 332; CLSC 209, 211, 212, 308, 309, 390.

6. At least five units of the ten required for the major must be completed in residence at the Tacoma campus.

7. Any deviation from these requirements must be approved in writing by the Department of History faculty.

8. The Department of History reserves the right to exclude a course more than 10 years old from completing a major requirement.

Notes
1. Classics courses in ancient history will be considered part of the European area of emphasis.

2. The department advises students who plan to do graduate work in the discipline, especially in African, Asian, European, or Latin American history, to take at least two years of an appropriate foreign language. Students inclined toward research or graduate work in ancient history should consult with members of the Classics Department about incorporating Greek and/or Latin in their undergraduate studies.

Requirements for the Minor
1. Completion of a minimum of six units to include:
   a. One unit from HIST 101, 152, 230, 245, 280, or 293;
   b. Five additional units in the Department of History, or listed below, three of which must be taken at the 300 level.

2. Students minoring in History must select courses from at least two of the following five areas of emphasis: African history, Asian history, European history, Latin American history, or United States history.

3. The following courses can count toward a minor in History: AFAM 355, 360; ASIA 341; CONN 304, 332, 333; 358, 359, LAS 387.

4. At least three units of the six units must be completed in residence at the Tacoma campus.

5. Any deviation from these requirements must be approved in writing by the Department of History faculty.

6. The History Department reserves the right to exclude a course more than 10 years old from completing a minor requirement.

Notes
1. No Classics or STS courses can be counted toward the History minor. Students interested in ancient history are advised to minor in Classics.
2. The Department advises students interested in pursuing a career in teaching to take History 200 as one of their six units.

Course Offerings
Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

Other courses offered by History Department faculty. See Connections in the Core Curriculum section of this Bulletin for Connections course descriptions (page 24):

- AFAM 355 African American Women in American History
  Satisfies the Connections core requirement.
- AFAM 360 The Art and Politics of the Civil Rights Era
  Satisfies the Connections core requirement.
- ASIA 341 Asia Pop! An Exploration of Popular Culture in 20th and 21st Century East Asia
  Satisfies the Connections core requirement.
- CONN 332 Witchcraft in Colonial New England
  Satisfies the Connections core requirement.
- CONN 333 Nations and Nationalism in Modern Europe
  Satisfies the Connections core requirement.
- CONN 334 Truth and Reconciliation in South Africa and Beyond
  Satisfies the Connections core requirement.
- CONN 358 The Mississippi River
  Satisfies the Connections core requirement.
- CONN 359 The United States in the 1960s
  Satisfies the Connections core requirement.
- LAS 100 Introduction to Latin American Studies
  Satisfies the Humanistic Approaches core requirement.
- LAS 387 Art and Revolution in Latin America
  Satisfies the Connections core requirement.

101 The Rise of European Civilization
This course serves as an introduction to European history from the fourth to seventeenth centuries. Rather than offering a year-by-year account of historical events, the course aims to introduce students to the political structures, socioeconomic developments, and belief systems that shaped people’s lives, and to convey a sense of the texture of lived experience during the late
antique, medieval, and early modern periods. 

102 Europe from Absolutism to Revolution, 1648 - 1815 This course examines a period of upheaval and transformation in European history. Its major themes are the rise of the modern state, the emergence of secular thought, and the development of a modern economy. In order to examine these themes, students evaluate different kinds of historical sources such as fiction, memoirs and images. Topics include the absolutist state, colonialism and slavery, the Enlightenment, diplomacy and warfare, and the French Revolution. Satisfies the Humanistic Approaches core requirement. Offered frequently.

103 History of Modern Europe, 1815 to the Present This course is a survey of European history from the end of the Napoleonic Wars to the present day. It examines the emergence of distinctively modern phenomena and trends such as mass politics, industrialization and urbanization, imperialism, and the role of ideology and beliefs about the historical role of the nation state. Satisfies the Humanistic Approaches core requirement. Offered frequently.

152 American Experiences I: Origins to 1877 This course explores the experiences and values of America's diverse peoples. Students in it not only expand their knowledge of events of American history but also deepen their understanding of the meaning of those events in people's lives. Students learn how the social categories of race, gender, and class affected individual Americans' identities and opportunities; how America's natural environment shaped and was shaped by Americans' human culture; and how Americans' ideas and ideals both influenced and reflected their economic, political, and social institutions. To investigate these themes, students read writings by modern historians and analyze a wide variety of historical sources from the past. American Experiences I focuses on the period from European colonization through the end of Reconstruction. Satisfies the Humanistic Approaches core requirement.

153 American Experiences II: 1877-Present This course explores the experiences and values of America's diverse peoples. Students in it not only expand their knowledge of events of American history but also deepen their understanding of the meaning of those events in people's lives. Students learn how the social categories of race, gender, and class affected individual Americans' identities and opportunities; how Americans' ideas and ideals both influenced and reflected their economic, political, and social institutions; and how Americans defined and re-defined national identity in the context of the nation's changing role in the world. To investigate these themes, students read writings by modern historians and analyze a wide variety of historical sources from the past. American Experiences II focuses on the period from the end of Reconstruction to the Present. Satisfies the Humanistic Approaches core requirement.

200 Doing History: An Introduction This course is designed to introduce prospective majors to the discipline and Department of History. In it, students learn what history is and how historians think and work. The course teaches students to do the two things that historians do: develop interpretations from primary sources and critically evaluate the interpretations advanced by other historians. Emphasis is placed on the methods and skills of reading, analyzing, discussing, and writing history. Reading assignments expose students to a variety of current approaches to history. Writing assignments give students practice in the types of historical writing that are expected of them in upper-division history courses. History 200 is intended to be taken in the sophomore year or as soon as a History major is declared. At least one prior course in History is desirable but not required. Students minoring in History or majoring in other disciplines are also welcome.

224 Russia Since 1861 The course covers Russian Imperial state and society; revolutionary movements; causes of 1905 and 1917 revolutions; Russian and Soviet political cultures; Soviet Union and totalitarianism; Russian and Soviet foreign policy; the collapse of communism and the Soviet empire; post-communist Russian society and politics. Satisfies the Humanistic Approaches core requirement. Offered frequently.

230 England from the Romans to the Tudors This course surveys the history of England from the Roman conquest to the end of the Tudor dynasty, following England's rise from remote imperial backwater to incipient world power. We begin by reconstructing the successive invasions of the island by Romans, Anglo-Saxons, and Normans, and assessing the impact of these conquerors on the people, culture, and institutions of England. The course then explores the later medieval and early modern English world in depth, reconstructing the experiences of many different groups - women and men, peasants and aristocrats, Christians, Jews, and heretics - and tracking major historical developments like urbanization, the rise of representative institutions, and attempts to extend English rule into Wales, Ireland, Scotland, France, and beyond. We reconstruct the experience of life in premodern England through a wide range of textual and non-textual sources, including archaeological finds, architecture, law-codes, letters, and poetry, while assignments allow students to hone their research, writing, and analytical skills. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

245 Chinese Civilization This course examines major themes in Chinese history from early times to the Song, Yuan and Ming dynasties of the late imperial period. Topics to be covered include major political philosophies, the development of the imperial state, and encounters with foreign cultures. Satisfies the Humanistic Approaches core requirement. Offered frequently.

248 History of Japan: 1600 to Present Students examine Japanese history from the founding of the Tokugawa shogunate to the present. Topics include the development of the modern Japanese state, imperialism and war, and economic development. Satisfies the Humanistic Approaches core requirement. Offered every other year.

254 African American Voices - A Survey of African American History This course explores the historical experiences of African Americans in the United States from the colonial period to the present. The class studies the diversity of experiences that have constituted African American life, exploring the lives of individual African Americans, while also looking at the development and evolution of African American communities, and the interactions of African Americans with other Americans. Because racism has played such a significant role in shaping African American lives, students also explore the construction of the concept of “race,” the interrelationship of the political, cultural, social, and intellectual forces that have given meaning to that concept, and the ways African Americans have responded to it across time. The course texts include not only the writings of contemporary historians, but also the historical writings, speeches, and artistic productions of African Americans, with particular emphasis on autobiographies. Satisfies the Humanistic Approaches core requirement. Offered occasionally.
280 Colonial Latin America  This course is a survey of the early period of Latin American history, from 1492 to 1826. It begins with an overview of the European background and the major indigenous civilizations in what Europeans came to call the New World. The central focus is on the encounter of indigenous and Iberian cultures and the process of conquest, resistance and mutual transformation that ensued over the next three centuries. Attention is also given to the social and economic structures and institutions of the colonies themselves, the development in some regions of plantation economies using slave labor from Africa, and the evolving relationship of Spanish America and Brazil to Europe, culminating in the wars of Independence. Satisfies the Humanistic Approaches core requirement. Offered every other year.

281 Modern Latin America  Beginning with the transition from colonies to independent nations and ending with the political transitions and implementation of neo-liberal policies in the 1990s, this course considers the Latin American region from the perspective of its subordinate incorporation into the world economy, its struggles for democratic institutions and equitable development, and the formation of identities of class, gender, race, and ethnicity. Satisfies the Humanistic Approaches core requirement. Offered frequently.

291 Modern Africa  This course introduces students to the major events and trends of the past two centuries of African history and explores how those trends and events shaped the experiences of people across the continent. Major topics include the ending of the Atlantic Slave Trade, colonial incursion, cultural change, economic transformations, the rise of nationalism and the challenges of decolonization. Students consider how ethnic, gender, religious and other identities shaped individual Africans' experiences and make comparisons both regionally and in terms of Africa's relationship to the world. To do so, they read a variety of historical sources as well as the work of contemporary historians. Satisfies the Humanistic Approaches core requirement. Offered frequently.

293 Early Africa to 1807  This course offers students a broad outline of political, economic and social developments in Africa—topics covered will include ancient trade between Africa and the Mediterranean region, the rise of the great medieval empires of Ghana and Mali, the creation of a distinctive Swahili Coast culture and the impact of slavery and slave trade upon African societies. Second, the course will introduce students to the specific tools used by historians in the study of early Africa. In evaluating how best to write the history of non-literate peoples, students will consider, among other possibilities, the use of historical linguistics, archaeology and oral traditions. They will assess the usefulness of Islamic and European sources for African history. Satisfies the Humanistic Approaches core requirements. Offered frequently.

300 Birth of Europe  This course introduces students to a period of history that was, until recently, commonly referred to as the “Dark Ages.” It uses historical, literary, and archaeological evidence from a variety of early medieval cultures to shed light on what was actually a time of exciting changes, a period which saw the transformation of the Mediterranean-centered Roman world and the rise of vibrant new cultures throughout Europe and the East. Topics include the “barbarization” of the Roman world, the Carolingian Renaissance, the role of women in various early medieval societies, the rise of Islamic civilizations in the East and Iberia, and the political, economic, and spiritual reordering of the medieval world during the tenth and early eleventh centuries. In the course of its explorations the class encounters martyrs and missionaries, pagan chieftains and Muslim pirates, Carolingian princesses and Viking raiders, and follows the development of early medieval culture up to the eve of the High Middle Ages. Offered every other year.

304 Renaissance Europe  This course examines the great cultural revolution known as the Renaissance from a number of perspectives, considering new developments in the arts, political theory, historical awareness, concepts of the self, science, and technology as interrelated phenomena. The primary focus is on the towns of Northern Italy that served as the cradle of the Renaissance, but consideration is also given to the spread of Renaissance ideals and innovations into Northern Europe and the Americas in the course of the fifteenth and sixteenth centuries. Offered every other year.

305 Women and Gender in Pre-Modern Europe  This course examines the construction of gender in European contexts from Late Antiquity through the medieval and early modern period, addressing historical continuity and change in definitions of femininities and masculinities, as well as the development of related ideas about marriage, family, and sexuality. Students gain an understanding of how gender intersected with social, economic, political, educational, and religious structures in premodern Europe, and consider the merits of various historical approaches to gender over the past several decades. Special topics to be considered include the relationship between gender, sanctity, and sexuality in premodern Christianity, the development of western marriage models, courtly love and its paradoxes, gender non-conformity, and challenges to traditional gender roles in Renaissance humanists and Protestant reformers. Counts as a Gender and Queer Studies elective. Offered every other year.

307 The Crusades  The military campaigns that comprised the Crusades lasted only two centuries, but their impact was far more lasting, and the post-medieval legacy of the Crusades continues to be a matter of debate. This course focuses on the European military expeditions to the Levant between the eleventh and thirteenth centuries, attempting to understand these events and their consequences from a number of perspectives. Because a main goal of the class is to reconstruct the worlds of the crusaders (the world they came from, as well as the world they made in the Levant), students also gain some familiarity with premodern European society, the history of the Holy Land, medieval Christianity and Islam, theories of holy war in each faith tradition, and the history of interfaith relations. Includes a substantial final research paper. Offered every other year.

311 Age of Reformation  Modern people tend to think of the Reformation in strictly religious terms, as the movement that divided the medieval church into Catholic and Protestant camps. The scope of what are more properly termed Europe’s Reformations was, in fact, much broader: Luther’s initial attack on the Catholic Church in 1517 touched off a series of revolutions that divided states, rulers, and neighbors against one another and ultimately altered the balance of power across Europe. The teachings of both Protestant and Catholic reformers transformed civic life, introduced new models of citizenship and government, and forever changed the family lives of early modern Europeans. This course focuses on Northern Europe during the sixteenth and seventeenth centuries, paying special attention to the course of the Reformation in the German states, Swiss cantons, the Netherlands, France, and England. Offered every other year.

314 War and Society in Premodern Europe  This course addresses war as a major force in European history from the early Middle Ages to c.1500, with a special focus on Northwestern Europe. Taking a ‘war and society’ approach, the course focuses less on strategies, tactics, and generalship than on the ways in which war has shaped, and been shaped
by, variables such as social and political hierarchies, gender roles, and religious belief. Students explore the relationship between war and social, cultural, political, and technological change, and attempt to reconstruct the experience of war for combatants and non-combatants. Specific topics to be considered include the role of warfare in shaping early medieval polities, the rise of a knightly class and related social developments, the culture of chivalry and martial display, and the advent of new, increasingly destructive methods of waging war in the later Middle Ages. Students complete a substantial research project in the second half of the semester. Offered occasionally.

316 The British Empire This course examines the British Empire both as a political and economic institution and as a lived reality for millions of individuals of widely diverse backgrounds. It acquaints students with those broad economic, political, social, ecological and technological factors that permitted the Empire’s rise (and those that led to its more recent decline). It also examines the interactions and experiences through which new identities and cultures were created, both in Britain and abroad. The course includes material on the Caribbean, India, Africa, Southeast Asia, Australia, and to a lesser extent, North America. For majors, this course counts as a unit in European history. Offered frequently.

317 Liberation and Alienation: Intellectuals in Modern Europe This course examines the works and times of prominent intellectual critics of modern European society. It centers on the texts of nineteenth-century writers, theorists, scientists and revolutionaries who formulated far-reaching analyses of and challenges to modern cultures, practices, values and economics. Special emphasis is placed on the generation of ideas and ideologies of the period, such as materialism, psychoanalysis and Marxism, and their application in culture and the arts. Cross-listed with HUM 317. Offered every third year.

322 The Cold War in Europe This course examines the experience of the Cold War in Europe when Europe was divided between opposing Soviet and American spheres of influence. Students examine the origins of a polarized Europe and the crises on both sides of the Iron Curtain that threatened to unravel it. While the course has a transnational approach, the main focus is on the experiences of Germany, France, and East-Central Europe (Czechoslovakia, Poland, and Hungary). Seminar discussions of primary and secondary texts allow students to evaluate recent interpretations of the Cold War in Europe. The course culminates with the researching and writing of a substantial research paper on a topic of the student’s choosing. Offered every other year.

325 Totalitarian Dictatorships in Twentieth Century Europe This course examines dictatorial regimes that had an enormous destructive impact on Europe and the world in the twentieth century: Stalin’s USSR, Hitler’s Germany, and Mussolini’s Italy. Using the comparative method, it addresses central issues in the histories of the three states that scholars have often grouped together under the concept of totalitarianism: the rise to power of political movements; the harnessing of the vast powers of the modern state for ideological projects such as racial empire and communist utopianism; explaining collaboration, conformity and resistance with secret police agencies; and the impact of dictatorships on culture, gender, and everyday life. Readings include scholarly works and primary source materials such as diaries, letters of denunciation, and fictional works. Offered occasionally.

335 Intelligence and Espionage in Europe and the US This course examines the history of the activities of intelligence services, with a focus on Europe and North America from the end of WWI to the present day. In today’s world, few figures fascinate us (or disgust us) as much as the spy, a figure whose profession poses difficult questions about truth and deception, morality and deviance, personal and national betrayal, and the power of the modern state. Beyond the popular cult of spies, however, espionage has played a crucial role in the shaping of the twentieth-century world in a number of ways: spurring the fighting (or avoidance) of wars, shaping diplomatic and military policies, propelling and exploiting technological advancements, and creating political and mass cultures. Offered frequently.

343 Law, Society, and Justice in China An international spotlight has fallen on the Chinese justice system in recent years due to a series of high-profile trials, detentions, and imprisonments. The names and images of Nobel Laureate Liu Xiaobo, “Barefoot Lawyer” Chen Guangcheng, and Chongqing Party Secretary Bo Xilai have graced the cover pages of newspapers and magazines around the world, and their journeys have been fodder for extended discussions and debates over the current state of the Chinese legal system. This course examines the history of law, society, and justice in China from the early imperial era to the present. During the first part of the semester students explore the philosophical underpinnings of traditional Chinese law and the late imperial civil and criminal justice systems. The second part of the course examines the evolution of law during the Republican period as well as the legal system established during the Mao era. The course concludes by using a series of high-profile cases to unpack post-Mao legal reforms, matters of human rights, and the contemporary state of Chinese justice. Offered frequently.

344 Resistance, Rebellion, and Revolution in China, 1800 to the Present Twentieth-century China bore witness to a political revolution, a social revolution and a “cultural” revolution. This course explores the causes and characteristics of those revolutions, as well as the varying patterns of protest, revolt, and rebellion that have taken place in China since 1800. Topics covered include peasant revolts, the role of religion in rebellion and resistance to state authority, and forms of resistance and protest in contemporary China during the age of the internet. Offered frequently.

349 Women of East Asia This course examines women’s history and gender relations in both traditional and modern East Asia. Themes explored include the constantly evolving roles of women in the family and as workers, artists, writers, and revolutionaries. Offered frequently.

350 American Transcendentalism The subject of the course is the New England Transcendentalists and their critics. Assigned readings include Emerson’s Essays, Thoreau’s Walden, Fuller’s Woman in the Nineteenth Century, Hawthorne’s Blithedale Romance, as well as other primary source documents on Transcendentalism and the Brook Farm community. The approach is interdisciplinary, and students with an interest in literature, philosophy, or religion are especially welcome. Previous work in history is not required. Offered every other year.

352 The American Revolution, 1763-1789 This course emphasizes the following themes: the things that divided Americans from one another and the things that united them in rebellion; the incidents and ideology that convinced colonists that the British king, parliament, and people were conspiring to deprive them of their liberty; the reasons that some Americans remained loyalists while others became rebels; the relationship between imperial constitutional crisis and domestic social crisis; the consequences of the Revolution for women, African Americans, and Native Americans; the implications of the daring experiment in establishing republican government; and the legacy of the Revolution for subsequent American history. The aim of the course is to answer this question: How revolutionary was the American Revolution? Offered every other year.
353 Abraham Lincoln and the Civil War Era  This course focuses on the life of Abraham Lincoln as a way to study the Civil War era in the United States. Readings are drawn from the speeches and writings of Lincoln and from the best recent biographies and scholarly studies of Lincoln. Offered every other year.

357 (Re)Constructing the Nation: U.S. 1865–1914 This course explores the United States in the transformative period from the end of the Civil War to the beginning of World War One. Investigations will be focused on three important domestic issues of the period—the reconstruction of the nation and of the concept of race in the aftermath of the Civil War; the development of an industrialized economy and the attendant changes in Americans’ lives; and the politics of reform that emerged repeatedly during these years as Americans fought over the nature of citizenship, freedom, and justice in a rapidly changing nation. Implicit in all of these topics is the growth of the United States into a world power. All of these topics have been dramatically reconceptualized by historians in recent years, and this course emphasizes the exploration of these recent trends in the historiography of the era, including for instance new work in the history of race, gender, class, culture, the environment, and transnational relationships, as well as efforts to employ multiple historiographical lenses in intersecting ways that reflect more accurately the complexity of the past. Students also have the chance to work with a wide range of primary sources, and to conduct their own research. The course facilitates students’ understanding of their own world as they discover the roots of contemporary American life in the structures and lived experiences of this earlier period. Offered frequently.

360 Frontiers of Native America This course explores the political and cultural frontiers between Indian peoples and Euro-Americans from contact to the present. Students use documents, autobiography, ethnohistory, ethnography, film, and literature to examine Indian-white relations from a variety of viewpoints. The approach moves beyond a simple narrative of what happened to Indians to a more complex consideration of how Indians have made their own history and how that history has been presented and contested. Offered every other year.

361 The United States and the War in Vietnam This course investigates American involvement in Southeast Asia, particularly Vietnam. The course focuses on the years of the Second Indochina War (1954–1975), with particular attention to the meaning and experience of American involvement for Americans. At the same time, the course places these core subjects in the context of a larger history, including the history of Southeast Asia before and after U.S. involvement, and the legacies of the war for the United States and its citizens. Some of the issues the course explores include: Why did the United States first get involved in Vietnam? What led to the expansion of American involvement? Who were the nation’s allies? Enemies? What motivated them in their struggles? What motivated Americans who supported the war? What motivated those who opposed it? What were the experiences of the men and women who served in Vietnam? What is PTSD and why has it been such a serious problem for some veterans of this war? Why did the United States withdraw from the war? What were the broader geo-political consequences of American involvement? Withdrawal? How does the war affect the United States today? The course also explores closely the role of values in shaping this war, as well as the clashes between values that were both causes and consequences of the war. Includes a substantial research paper. Offered frequently.

363 Americans, Catastrophe, and Culture in the Twentieth and Twenty-first Centuries This course explores catastrophes in the United States in the twentieth and twenty-first centuries, using these uncommon occurrences as a window into American culture and its practices. Following a roughly chronological path, the course is organized around different kinds of catastrophes Americans have faced—ranging from floods and forest fires to epidemics, from state-sanctioned violence to domestic terrorism, from warfare to violent crime—and the historical themes and issues these moments of crisis revealed, and shaped. The course does not claim coverage of every disaster but seeks instead to expose students to the range of historiographical approaches employed in the study of catastrophe, and the multiplicity of issues they allow historians to explore. Offered frequently.

364 American Environmental History This course examines the relationship between human society and the natural world in what is now the United States. That relationship is complex: non-human nature sustains human society, yet people can have a profound and often destructive effect on the natural world. Nature, nonetheless, cannot be completely altered to suit human needs: resources are finite and people are bound by the limits of biology. The environment thus simultaneously creates and limits human possibilities and reflects human influences. Through reading and discussion, participants in this course examine this reciprocal relationship between ecology and society. Offered every third year.

367 Immigration in the U.S. This course provides a broad overview of the history of immigration in the United States from the colonial era to the present day. The course begins by analyzing the contours and historiography of immigration. The opening sections of the class consider the role of African slaves, Native Americans, the frontier, and the early republic in an effort to understand the parameters of immigration and citizenship. After establishing these debates and per-spectives, the course moves into a series of case studies that overlap with major political and legislative shifts in the history of citizenship and immigration. The course looks at how factors such as ethnicity, class, religion, race, and foreign policy have shaped the immigrant experiences of various groups. The material in the course also seeks to highlight the uneven nature of immigration in the United States. In particular, students analyze how and why certain immigrant groups have been privileged over others to understand how these shifts have colored the immigrant narrative of the United States.

368 The Course of American Empire: The United States in the West and the Pacific, 1776-1919 This course explores the politics and culture of United States imperialism from the nation’s founding until the first decades of the 20th century. Focusing on westward expansion and the projection of U.S. power into Asia and the Pacific, the course considers how the ideas and policies supporting expansion and military conquest were developed, expressed, manifested, and contested. It examines how various peoples have confronted U.S. colonialism, including Indians, Mexicans, Chinese, Hawaiians and Filipinos. It also examines the economic underpinnings of expansion, its environmental impact, and the racial ideas that paradoxically were used both to justify and to criticize imperialism. Offered every other year.

369 History of the West and the Pacific Northwest This course examines major themes in the history of the American West during the last two centuries, with particular emphasis on the Pacific Northwest. Themes include Indian-white encounters, the formation of frontier communities, land policy and resource use, the impact of federalism, urbanization, and the West in the American imagination. Offered every other year.

371 American Intellectual History to 1865 This course examines the works of some of the most important American intellectuals who lived and wrote in the years before the Civil War. The approach is bi-
American Cultural History Since 1865 This course focuses on the rise of consumer culture and the way the media have influenced the formation of the American identity since 1865. The class explores the cultural significance of mass circulation magazines, advertising, photography, radio, film, television, and the Internet. Particular attention is paid to the cultural construction of race and gender. Several films are screened outside of regular class time. Offered occasionally.

Cuba and the Cuban Diaspora This course is centered on the common historical heritage between the island of Cuba and its diasporic populations. Dating back to the birth of the Cuban independence movement, exile, migration, and displacement have been nearly permanent conditions of Cuban history. This course argues that there is not only a history of Cuba but a history Cubans that have played out in Florida, New York, Spain, Mexico, and a variety of other locations as diasporic communities have worked to shape both the Cuban republic and their adopted communities. This course looks at the interplay between events on the island and events in diasporic communities as a way of showing the profound and constant linkages between them. Along the way, the course explores how race, sexuality, citizenship, gender, culture, and a variety of other factors have shaped this shared history. Offered frequently.

History of Latinos in the United States This course provides an overview of the history of peoples of Latin American descent in the United States. It begins with the imperfect term “Latino.” The earlier portion of the course attempts to unearth the complex history behind this concept and its evolution as an idea and identity. As such, the earlier sections of the course and later sections on Afro-Latinidad provide an overview that also considers various strains of Indigenous, European, and African history to help explore the broad and varied trajectories of peoples we now call Latinos. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered frequently.

Modern Mexico: From Revolution to NAFTA This course traces the emergence of modern Mexico since its 1910 revolution. It begins with attempts at economic modernization and political centralization in the late nineteenth century, considers the social upheaval of the Revolution and the consolidation of the post-revolutionary regime by 1940. A second section follows the rise and demise of the “Mexican Miracle” of growth and stability from 1940 to 1982 in the context of the Cold War. A final section considers Mexico’s neo-liberal trade and investment reforms culminating in NAFTA, along with the contradictory structures of migration, drug flows, in-bond industry in northern Mexico and militarization of the US southern border. Offered every third year.

Film and History: Latin America In 1915 filmmaker D.W. Griffith predicted that “moving pictures” would soon replace book writing as the principal way to communicate knowledge about the past. Both historical writing and movies have at various times made parallel promises to objectively convey past realities. But just as historians have questioned the objectivity of the written word, one might also ask “how real is reel?” This course explores the relationship between film and historical interpretation and understanding. It considers how films produced in the U.S. and Latin America interpret Latin American history, and how they can be used to understand Latin America’s past. Besides viewing and discussing around ten films throughout the semester, the class also reads a series of related historical texts, both as a point of interpretive comparison for the films, and as a point of reflection on the possibilities and limits of the academia-bound historian’s primary medium. Offered occasionally.

Comparative Revolutions in Twentieth-Century Latin America Revolutions, according to H.L. Mencken, are the “sex of politics.” They offer an opportunity to glimpse social and political life in their most revealing forms. The goal of most twentieth-century Latin American revolutions has been national development, defined economically, politically, and culturally. This course explores the revolutions of Mexico, Cuba, and Nicaragua in terms of their causes, the process of revolution, and the consequences of revolution for politics, society, and culture. It also considers the foreign policy of the United States toward revolutionary and revolutionary governments. Sources include historical narrative, testimony, novels, and film. Offered occasionally.

Borderlands: La Frontera: The U.S. – Mexico Border The region referred to as the U.S.-Mexico borderlands has been the subject of wide-ranging popular and scholarly treatment, especially focusing on politics, cultural contact, economic exchange, and violence. Readings cover examples of how the geo-political boundary and socio-cultural space encompassed by the region have produced persistent debate about identity formation, the fluidity of the border, and the inability of governments to restrict the movement of peoples and goods. Through close reading of primary and secondary sources, students explore several questions throughout the semester: How are “borderlands” defined? What role do the historical shifts in political boundaries that have occurred along the U.S.-Mexico border play in defining the geographical limits of “borderlands”? What are the origins of cross-border violence, and how have official approaches to dealing with this violence changed over time? How does the historiography on borderlands contribute to an understanding of the causes of, and popular and official reactions to, the Drug Wars currently underway? This seminar provides students with a general understanding of the scholarship and theoretical foundation of U.S.-Mexican borderlands history. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered occasionally.

Transnational Latin America Scholars have recently embraced a turn towards “transnationalism”—an approach to the study of the movement of goods, people, and information beyond state boundaries—as a framework or set of theoretical and methodological approaches for understanding Latin America as a distinct world region. This course considers a variety of topics including environmental issues, the Cold War, the drug trade, border politics, religion, economic development, the persistence of social inequality in the region, the persistence of regional identities and loyalties, forms of political activism and the “failures” of radical politics in the context of neoliberalism. Offered every three years.

20th-Century South Africa Nelson Mandela has become an international symbol of South Africa’s twentieth-century tragedies and triumphs, and for good reason; his experience touches on many of the major themes in that country’s recent history. This course uses Mandela’s autobiography, Long Walk to Freedom, as a starting point for exploring the history and historiography of South Africa. Major topics include rural life and the peasant experience, “tribalism” and the significance of tradition, urbanization and industrialization, the development of apartheid and anti-apartheid ideologies, and the implementation of democratic governance. Students consider the benefits and challenges of using autobiographies as historical sources, analyzing Mandela’s ac-
count in the context of other South Africans’ experiences. Offered every other year.

392 Men and Women in Colonial Africa  How did colonization and decolonization impact the way Africans defined themselves as men and women? How did empire and the experience of cultural difference impact on gender roles in Europe? How did concerns about gender shape colonial policies and Africans’ responses to those policies? Students in this course will address these questions by examining gender through a variety of analytical lenses—religion, labor, etc.—and working collaboratively to make sense of what it meant to be a man or woman within the contexts of colonial and postcolonial Africa. Offered every other year.

393 Missions and Christianity in Africa  Half of all Africans identify themselves as Christian, but their interpretations of Christianity vary dramatically. Some follow the ancient traditions of Ethiopia and Egypt, while others embrace new and radical forms of Pentecostalism. This course will offer a narrative of Christianity in Africa from the 4th century AD to the present, with a particular emphasis on the ways both Africans and Europeans spread Christianity. The course seeks to use Christian belief and practice as a window into issues of power, gender, colonialism, nationalism and identity. A major focus will be the motivations behind African conversions and the ways in which Africans adapted Christianity to their own changing circumstances. Offered frequently.

394 Slavery and the Slave Trade in Africa  This course introduces students to the debates surrounding the history of slavery in Africa. Did slavery in Africa predate the Atlantic Slave Trade? What impact did the Atlantic Slave Trade have on African communities? How did the Atlantic Slave Trade compare to other slave trades within and out of Africa? How were slavery and slave trading related to European colonial claims in Africa in the 19th century? These questions are addressed using both primary source material and scholarly arguments from historians, anthropologists and sociologists. While the course considers only in passing the contours of slavery in the Western Hemisphere, it aims to situate Africa and Africans within larger global narratives of violence, trade, and modernity. Offered every other year.

399 Special Topics In History  This course is designed as an advanced seminar in which students explore the historiography on a particular issue, topic or field in the discipline. Though the course may be grounded in a particular nation, region, or time period, it may also involve the study of works in multiple areas. A different topic is selected by faculty each time it is offered. May be repeated for credit. Prerequisite: History 200 or consent of the instructor. Offered occasionally.

400 Research Seminar in Historical Method  This course is a practicum in the methods and techniques of historical research and writing. Students undertake independent research in primary source materials and complete an advanced research paper. Research topics may relate to any area of history covered by department faculty, and are defined through consultation with the instructor in a process which ideally begins before the start of the course. Prerequisite: History 200.

495/496 Independent Study  An independent study course provides for study under the supervision of a faculty member of a specific topic not covered by existing courses in order to develop a particular interest on the part of the student. The topic must be agreed upon with a faculty member and described in a proposal at the time of registration. No more than one independent study may count toward the major or minor in history.

HONORS

Professor: Alison Tracy Hale, Co-Director, English; Aislinn Melchior, Co-Director, Classics

Advisory Committee: Mike Benveniste, English; James Bernhard, Mathematics and Computer Science; Denise Despres, English/Honors/Humanities; George Erving, English/Honors/Humanities; Alison Tracy Hale, English; Suzanne Holland, Honors/Religious Studies; Alisa Kessel, Politics and Government; Kriszta Kotsis, Art and Art History; David Latimer, Physics; Aislinn Melchior, Classics; John Wesley, English

About the Program

The Honors Program is an alternative pathway through the university’s required core curriculum that uniquely engages the intellectual traditions of the liberal arts as a powerful means of understanding our contemporary world. The program is not itself a major, but is taken in conjunction with any major. Honors students benefit from the rich conversations that build over their four years of shared academic, residential, and co-curricular experiences. Prospective students apply separately to the program (see the prompt for Honors on the Common Application), and admission is based upon prior academic achievement and demonstrated understanding of the program’s curricular and residential features. First-year Honors students live in Regester Hall (along with many students who are not in the program) and have the option to continue living in Honors-themed residences thereafter. The program also provides an array of cultural events, including a film series, student-organized dinners, guest lectures, and trips to Seattle/Tacoma museums, theater, symphony, and opera.

Honors courses examine influential authors and works in the Western intellectual tradition that for better and for worse have framed its values, attitudes, and beliefs. These courses address fundamental and enduring questions, such as “What makes something true?” “What makes something good or evil?” “What is the purpose of art?” “What is the proper function of government?” “What is the Self?” The course sequence culminates with an interdisciplinary study of “America” as an idea and an ideal. Honors seniors also research, write, and publicly present a thesis (normally in the student’s major). After successfully completing the prescribed coursework and senior thesis requirements, Honors seniors graduate as Coolidge Otis Chapman Honors Scholars.

Requirements

Honors students must meet the following requirements.
1. First year: SS11 195, SS12 196, HON 211
2. Senior year: HON 401
3. Three of the following four courses, usually taken during the sophomore and junior years: HON 206, 212, 213, and 214
4. Write and publicly present a senior thesis, normally in the student’s major.

Once admitted to the Honors program, a student continues so long as s/he maintains a minimum GPA as established by the Honors Committee in all university work or until s/he resigns from the program. The Honors faculty annually reviews the performance of Honors students to determine their continuance in the program. Dismissed students may apply for readmission upon evidence of satisfactory academic improvement.

Course Offerings

Each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.
SSSI 195 Honors: The Scientific and Romantic Revolutions
SSSI 196 Honors: Postmodernism and the Challenge of Belief

Connections course. See Connections in the Core Curriculum section of this Bulletin for course descriptions.

206 The Arts of the Classical World and the Middle Ages This course introduces selected monuments of the ancient Egyptian, Greek, and Roman artistic traditions as well as works of art of the Early Christian, Byzantine, and Islamic cultures. The course examines a wide range of material—architecture and monumental decoration, painting, sculpture, as well as works of minor art—to understand the role art played in various societies of the ancient and medieval world. Works of art are examined with particular attention to their original function, context, and intended audience in order to explore how they expressed political, social, and religious meanings. The course introduces key terms and principal methods of art historical inquiry. Prerequisite: admission to the Honors Program. Satisfies the Artistic Approaches core requirement. Students may not receive credit for both ARTH 275 and HON 206. Offered spring term only.

211 Metamorphosis and Identity This course explores identity across the centuries through stories about metamorphosis. The nature of change reflects cultural, intellectual, and social differences that undergird these stories about self and form from fifth-century Athens to twentieth-century Germany. The course examines how early cultures both anticipate modern ideas of individualism as well as radically diverge in their assumptions about human nature, personal and communal obligations, and change as a threat to or regeneration of order. All of the stories, verbal and visual, reflect tensions and paradoxes through a highly conscious working out of the boundaries between the personal and communal, interior and exterior, private and public, animal and human, despite the fact that they do not share a view of the individual or self that corresponds to a contemporary (and thus diverse) sense of personal identity and autonomy. Prerequisite: admission to the Honors Program. Satisfies the Humanistic Approaches core requirement. To be taken in the first year. Offered spring term only.

212 Origins of the Modern World View This course studies the development of attempts by scientific thinkers to understand and explain the universe. The central theme is the development of astronomy and physics, but some mention is made of corollary studies in mathematics and other sciences. A major portion of the course is devoted to the Scientific Revolution of the seventeenth century and the work of Kepler, Galileo, and Newton. Another major portion concerns the development of twentieth-century physics, concentrating on relativity and the quantum theory as developed by Einstein, Bohr, Heisenberg, and others. Prerequisite: admission to the Honors Program. Satisfies the Natural Scientific Approaches core requirement. Offered fall term only.

213 Mathematical Reasoning: Foundations of Geometry This course uses the idea of symmetry as an invitation to explore contemporary mathematics. The roots of the mathematics of symmetry extend back to ancient times, and the current mathematical expression of symmetry was first developed in the early 19th century. The course explores both the history and mathematics of this development and traces where the key ideas have led from there, both mathematically and culturally. Emphasis is placed on how mathematics is discovered and how it fits into broader cultural contexts (including the work of M.C. Escher, fractals, and symmetry in fields other than mathematics). Prerequisite: admission to the Honors Program. Satisfies the Mathematical Approaches core requirement. Offered spring term only.

214 Interrogating Society This course has as its subject matter the individual’s relation to society and the relationships that arise among individuals, organizations, and institutions over questions of value. It thus enables students to understand their relation to the social world considered as a web of complex and dynamic interrelationships among cultural, economic, psychological, political, ethical and social factors. To this end, the course examines various theories and methods used to analyze this social world, their embedded assumptions, and their application to a variety of contemporary social issues. Prerequisite: admission to the Honors Program. Satisfies the Social Scientific Approaches core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered fall term only.

401 What is America? This course provides a comparative, interdisciplinary, and critical examination of “America” (the U.S.) and its endurance as both idea and ideal. Students consider what “America” means—as a place and as a concept, historically and in contemporary times, and to different constituents. Readings and discussion topics address broad issues that have shaped U.S. history and contemporary life, especially those areas around which national identity coheres and those about which the nation has been most conflicted: politics and governance; slavery and freedom; the natural world; capitalism and consumption; industry and technology; immigration and exclusion; civil rights and social justice; culture and the arts. Prerequisite: admission to the Honors Program and completion of all other Honors core courses, or permission from Honors Program Director. Satisfies the Connections core requirement.

INTERDISCIPLINARY HUMANITIES
Co-directors: Kriszta Kotsis, Art and Art History; Katherine Smith, History
Advisory Committee: Greta Austin, Religious Studies/Gender and Queer Studies, Gwynne Brown, School of Music, Derek Buescher, Communication Studies, Andrew Gomez, History/Latina/o Studies, Alison Tracy Hale, English, Grace Livingston, African American Studies, Geoffrey Proehl, Theatre Arts, Justin Tietjen, Philosophy
Affiliated Faculty: Denise Despres, English/Honors/Humanities; George Erving, English/Honors/Humanities (on leave Spring 2019)

About the Program
The Interdisciplinary Humanities Emphasis (IHE) offers designated pathways that encourage students to consider topics of enduring importance from a variety of humanistic perspectives. The emphasis can complement a student’s major in any field of study. Each of the pathways described below includes multiple courses through which students can complete a number of their university core and graduation requirements (Artistic Approaches, Humanistic Approaches, Connections, the Knowledge, Identity, and Power Graduation Requirement, and upper division electives). A student who satisfies the requirements within a single pathway is eligible to receive the Interdisciplinary Humanities Emphasis designation on their transcript. This notation signals that the student has, through significant thematic, interdisciplinary study, mastered the skills of critical and creative thinking and of clear and effective writing fostered by the humanities disciplines. These skills form the basis for engaged citizenship and professional success in virtually any career.
The program also offers interdisciplinary courses that are not incorporated into the pathways, but draw on several disciplines to explore a focused topic.

First-year students may join the Humanities Residential Program. These students form a living-learning community by taking their fall first-year seminars together, and by enjoying a variety of co-curricular activities such as film screenings, open-mic nights, guest lectures, dinner events, and trips to Seattle and Tacoma theatres, concert halls, and museums. Acceptance into the program is not limited to those intending to major in the humanistic disciplines; many will go on to major in the sciences and social sciences, but all share a special interest in the arts and humanities.

**Requirements for the Interdisciplinary Humanities Emphasis**

Completion of five units to include:

1. Five units chosen from a single pathway, two of which must be at the 300-level or above.
2. Students wishing to declare the IHE meet with the program director or a member of the faculty advisory committee to discuss their educational goals and create a plan for completion of one of the pathways. This plan will be finalized in a signed contract to be filed with the Office of the Registrar. Once filed, the contract will be reviewed periodically, and may be modified as needed.
3. In the first semester of their senior year, students pursuing the IHE submit to the program director a short essay that reflects on their progress in their chosen pathway and its relevance to their major(s), minor(s), or other programs of study.

**Notes**

1. Because these pathways are not intended as substitutes for a minor or major, students may not count more than two units from any department or program towards a single pathway.
2. A student may double-count a maximum of two units from any given pathway with each major, minor, or program that the student plans to complete.
3. With permission of the program director, students may substitute one of the five required units with a relevant second semester, second year (or higher) foreign language course, e.g., German 202, French 202, etc.
4. Courses in the IHE may not be taken as Pass/Fail.
5. A student must have a grade of C- or higher in all courses of the IHE.
6. Four out of the five required units must be taken on campus.

**IHE Pathways**

**The Artist as Humanist**

This pathway encourages students to engage with the interplay between creativity, creative processes, and humanistic concerns such as the representation of cultural values, exploration of identity, and inquiry into questions of meaning within the fields of visual and literary arts, theatre, and music. It fosters questions about the complex relationships between artists, aesthetic objects, and audiences. Courses in this pathway explore the following questions:

- How do aesthetic objects or performances alter perceptions and communicate ideas, and how do they participate in larger social and political discourses?
- What is the role of sensations, emotions, and poetics in invoking form, conveying meaning, and fostering critical thinking?
- How does the creative process itself contribute to the production of knowledge?

**Challenging Inequality, Leading Social Change: Issues of Gender**

This pathway encourages students to evaluate the ways in which under-
standings of sex and gender have informed and intersected with institutions and hierarchies across time and space, through an exploration of a variety of disciplinary lenses and genres. Courses within this pathway explore the following general questions from different cultural, historic, or geographical perspectives:

- How do cultures understand and/or conceptualize gender?
- How do those understandings intersect with political, cultural, and social institutions? How do they shape the lived experiences of individuals and groups? How have dominant ideas and practices around gender been challenged, and what implications might those challenges have today?
- How do different disciplines explore, conceptualize, and/or evaluate concepts of sex/gender?

AFAM 210: Black Fictions and Feminism (Humanistic Approaches Core)
AFAM 355: African American Women in American History (Connections Core; Knowledge, Identity, Power Graduation Requirement)
ENGL 206: Literature by Women (Humanistic Approaches Core)
ENGL 346: Jane Eyre and its Afterlives
ENGL 365: Gender and Sexualities
FREN 340: Francophone Women Writers
GQS 215: Religion and Queer Politics
GQS/HUM 327: Queer Cultures (Knowledge, Identity, Power Graduation Requirement)
GQS 340: Feminist and Queer Methodologies
GQS 365: Indigenous Feminisms
HIST 305: Women and Gender in Premodern Europe
HIST 349: Women of East Asia
HIST 392: Men and Women in Colonial Africa
MUS 221: Jazz History (Artistic Approaches Core) [when taught by Prof. G. Brown]
MUS 223: Women in Music (Knowledge, Identity, Power Graduation Requirement)
PHIL 390: Gender and Philosophy (Knowledge, Identity, Power Graduation Requirement)
REL 303: Sexuality and Religion
REL 307: Prisons, Gender, and Education (Knowledge, Identity, Power Graduation Requirement)
SOAN 102: Introduction to Anthropology (Humanistic Approaches Core)
SPAN 309/LTS 300: Latina/o Literatures

Challenging Inequality, Leading Social Change:
Issues of Race and Ethnicity
This pathway allows students to explore how race and ethnicity have influenced the construction of individual and collective identities, and to better understand both the marginalization of individuals and groups, as well as the strategies of resistance to oppression. Courses within this pathway explore the following general questions from different cultural, historic, or geographical perspectives:

- How have race and ethnicity shaped individual and collective identities?
- What forms of resistance have been undertaken by racial and ethnic minorities?
- What is the relationship between race and ethnicity, and how do the two vary across different regional and historical contexts?

AFAM 101: Introduction to African American Studies (Humanistic Approaches Core)
AFAM 210: Black Fictions and Feminism
AFAM 346: African Americans and American Law (Connections Core)
AFAM 360: The Art and Politics of the Civil Rights Era (Connections Core)
AFAM 401: Narratives of Race (Connections Core)
ALC 330: Writing the Margins in Contemporary Japanese Literature
COMM/AFAM 370: Communication and Diversity (Knowledge, Identity, Power Graduation Requirement)
COMM 373: Critical Cultural Theory
CONN 318: Crime and Punishment (Connections Core)
CONN 334: Truth and Reconciliation in South Africa and Beyond (Connections Core)
ENGL 235: American Literature and Culture: Long Nineteenth Century
ENGL 236: American Literature and Culture: Modern and Contemporary
ENGL 237: American Literature and Culture: Beyond Borders
ENGL 242: Introduction to Native American Literature
ENG 356: Bollywood Film

MUS 221: Jazz History (Artistic Approaches Core)
PG 339: The Politics of Empire
PG 384: Ethnic Politics
PHIL 389: Race and Philosophy (Knowledge, Identity, Power Graduation Requirement)
PHIL 312: Latin American Philosophy
REL 270: Religion, Social Movements and (In)justice in the United States (Knowledge, Identity, Power Graduation Requirement)
REL 302: Ethics and the Other
REL 307: Prisons, Gender and Education
SPAN 210: A Critical Introduction to Latina/o Studies (Humanistic Approaches Core; Knowledge, Identity, Power Graduation Requirement)
SPAN 212: Introduction to Latin American Cultures
SPAN 301: Literature of the Americas
SPAN 306: Latin American Film
SPAN 308: Survey of Twentieth Century Latin-American/Latino Theatre
SPAN 309/LTS 300: Latina/o Literatures
SPAN 311: Migration Narratives
Interdisciplinary Humanities

The Global Middle Ages
This pathway encourages students to take a comparative approach to studying different regions and cultures in the period from roughly 500 to 1500 C.E., an era in which virtually every part of the globe experienced significant political, intellectual, religious, social, and technological developments which continue to shape our world. Though encompassing a variety of regions and disciplinary approaches, courses in this pathway share a concern with larger questions about human experience and self-expression in these centuries, such as:

• How did various medieval cosmologies impact political institutions?
• To what extent were medieval societies inclusive and/or exclusionary?
• How can we give voice to a range of medieval perspectives?

This pathway encourages students to evaluate and understand the sciences through a humanistic lens, and to consider questions such as:

• How have claims about what is ‘natural’ been used to defend or undermine value statements?
• How were scientific methods and approaches developed and why?
• How do the sciences share a concern with larger questions about human experience and self-expression in these centuries, such as:

• How can the sciences be understood in their broader historical, social, and ethical contexts?

Science and Values
This pathway encourages students to evaluate and understand the sciences through a humanistic lens, and to consider questions such as:

• How can the sciences be understood in their broader historical, social, and ethical contexts?
• What is the relationship between science and values (in the past and the present)?
• How were scientific methods and approaches developed and why?
• How have claims about what is ‘natural’ been used to defend or undermine value statements?
STS 344: Ecological Knowledges in Historical Perspective  
(Humanistic Approaches Core)
STS 366: History of Medicine
STS 370: Science and Religion: Historical Perspectives  
(Connections Core)
STS 375: Science and Politics (Connections Core)

*Students may count either STS 201 or STS 202, but not both, towards this pathway.

**Visual Culture**
This pathway allows students to engage critically with numerous manifestations of visual culture, including artifacts, images (from paintings to film), and built environments from various historical periods and diverse cultures. The pathway urges students to examine the role of visual practices in history, culture, and the forming of human subjectivity. Courses in this pathway explore questions such as:

- How do objects, images, and built environments reflect or shape social, religious, and political values?
- How may objects, images, and built environments foster the development of personal or group identities?

ALC 225: Visualized Fiction: Cinematic Adaptations of Traditional Chinese Literature (Humanistic Approaches Core)
ALC 325: Chinese Cinema: Ideology and the Box Office (Humanistic Approaches Core)
ARTH 275: Studies in Western Art I: Ancient Art to Renaissance (Artistic Approaches Core)
ARTH 276: Studies in Western Art I: Renaissance to Modern (Artistic Approaches Core)
ARTH 278: Survey of Asian Art (Artistic Approaches Core)
ARTH 302: The Art of Mexico and Mesoamerica (Artistic Approaches Core)
ARTH 380: Museums and Curating in the 21st Century: History, Theory, and Practice
CHIN 307: Through the Cinematic Lens: Old and New China in Film
CLSC 201: Ancient Tragedy (Artistic Approaches Core)
COMM 291: Film Culture (Humanistic Approaches Core)
COMM 372: Contemporary Media Culture: Deconstructing Disney (Knowledge, Identity, Power Graduation Requirement)

SPAN 306 Latin American Film
SPAN 307: Modern Spanish Theater (in Spanish)
SPAN 308: Survey of Twentieth Century Latin-American/Latino Theatre
SPAN 310: Special Topics in Literary and Cultural Studies (when topic is Visual Culture and Modernity in Latin American
THTR 200: Theatrical Experience (Artistic Approaches Core)
THTR 371: Theatre History I: From the Origins of Theatre to the 17th Century Theatre
THTR 373: Theatre History II: 18th Century to the Present

**Course Offerings**
Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 18. Not all HUM courses listed below are incorporated into the pathways above. For descriptions of other courses listed in the pathways, see the appropriate department’s listing in the Bulletin.

**Seminars in Scholarly Inquiry.** See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions.

- SSI1/SSI2 101 Dionysus and the Art of the Theatre
- SSI1 115 Imaging Blackness
- SSI1 124 Utopia/Dystopia
- SSI1 131 Athens, Freedom, and the Liberal Arts
- SSI1 149 Transgressive Bodies
- SSI1 152 Gender and Performance
- SSI1 172 The Scientific and Romantic Revolutions

**Connections courses.** See Connections in the Core Curriculum section of this Bulletin for course descriptions.

- HUM 301 The Idea of the Self
- HUM 302 Mystics, Knights, and Pilgrims: The Medieval Quest
- HUM 303 The Monstrous Middle Ages
- HUM 315 Drama, Film, and the Musical Stage
- HUM 316 The Lord of the Ring: Wagner’s Ring of the Nibelung
- HUM 330 Tao and Landscape Art
- HUM 368 A Precious Barbarism: Enlightenment, Ideology, and Colonialism

**200 Homer to Hitchcock: The History of Ideas in the Arts** This course serves as the gateway to the Humanities minor; as such it introduces students to the history of Western cultures and ideas as expressed through literary, historical, philosophical, religious, musical, architectural, and artistic works. Professor teams may vary the organizational logic and thematic emphases from semester to semester, but in all cases readings and assignments will foreground the minor’s historical scope and two-track formula (Antiquity through the Renaissance, and Renaissance to the present). By learning to engage the history of Western ideas from the various perspectives afforded by the humanistic disciplines, and by learning to read, analyze, and write about the various kinds of texts (verbal, visual, and aural) that have been the
conduits for these ideas, students develop the interpretive frameworks and critical vocabularies for more specialized study. Satisfies the Artistic Approaches core requirement.

201 The Arts, Ideas and Society Survey of intellectual developments in western civilization from the Renaissance through the eighteenth century. Emphasis is placed on the relationship between the individual and the state examined through literature and the arts. Satisfies the Humanistic Approaches core requirement. Offered every other year.

260 It’s Only Rock and Roll: Rock from Cradle to Adolescence This course is a survey of rock history, from its roots in the mid-1950s, to the end of the “Summer of Love - Flower Power” era, to The Rolling Stones’ disastrous Altamont concert in 1969, to the break-up of The Beatles in 1970. Students examine cultural influences, historical events, and stylistic developments of rock music, primarily in the United States and Great Britain, to gain a wider knowledge and understanding of rock music’s place as a crucial part of the arts and culture of this time period in many parts of the world. Satisfies the Humanistic Approaches core requirement. Offered every other year.

288 The Ideas of the Bible Even though the Biblical materials stand at the foundation of the Western tradition, common knowledge of the Bible is at a low point. The popular debate often gets polarized into two extreme positions: the Bible holds all truth, or the Bible is irrelevant. Yet many modern discoveries on archeological sites or in the archives now provide a much clearer idea of the way the Biblical materials are put together over the centuries, and the way the Biblical authors respond to each other, developing, critiquing, and reinterpreting ideas in the political and cultural crises of their times. Students study a selection of materials from both the Hebrew Bible and the New Testament, not only to appreciate the depth and complexity of what the Bible “says” in its own original contexts, but also to reassess what it “says” to the modern world—with its very different cosmology, anthropology, and political and social structures—about human responsibility to the planet and to fellow human beings about the recognition of human destructiveness and the hope for survival. Satisfies the Humanistic Approaches core requirement.

290 Introduction to Cinema Studies In this course, students develop the expertise necessary to communicate intelligently about the artistic medium of film. Drawing on the expertise of two professors, students consider key terminology related to mise-en-scene, editing, and sound; apply those concepts to a wide variety of examples from the advent of film to the present; and begin considering critical approaches to the medium. In addition to regular class sessions, film screenings are required. Satisfies the Artistic Approaches core requirement; counts toward the “Artist as a Humanist” and “Visual Culture” pathways. Offered frequently.

317 Liberation and Alienation: Intellectuals in Modern Europe This course examines the works and times of prominent intellectual critics of modern European society. It centers on the texts of nineteenth-century writers, theorists, scientists and revolutionaries who formulated far-reaching analyses of and challenges to modern cultures, practices, values and economies. Special emphasis is placed on the generation of ideas and ideologies of the period, such as materialism, psychoanalysis and Marxism, and their application in culture and the arts. Cross-listed with HIST 317. Offered frequently.

327 Queer Cultures Gay, lesbian, bisexual, transgender, queer, questioning (GLBTQ) are categories used to identify sub-groups within the queer community. Yet within these groups, or cultures, exist vastly complex and different experiences. In the struggle for social justice and equity, queers navigate the tension of remaining hidden—to fit into the dominant culture—versus being seen— to change the dominant culture. Main units include: “Science, Sexuality, and Ethics”, “Queering School Curricula”, “Marriage is a Queer Institution” and “The Disappearing Queer: Fear and Desire in Theory”. This course addresses questions such as: How are cultures constituted, experienced, and transformed? How can we interrogate category systems to understand framing assumptions and the ways categories position “majority” and “minoritized” in social contexts? What is the relationship between taking a subversive stance and social transformation? Cross-listed with GQS 327. Satisfies the Knowledge, Identity, and Power graduation requirement.

337 Art and Culture in Sixteenth- and Seventeenth-Century Italy This course examines how the plastic and literary arts of the Italian High Renaissance and Baroque responded to four events that changed the most fundamental beliefs Europeans held about the world and their place in it: the discovery of the New World, the emergence of Renaissance Humanism, the Protestant Reformation, and the new cosmos advanced by Copernicus and Galileo. Their combined effect undermined long-en- trenched institutions of religious and political authority to open space for new socio-political orders and cultural models. Art produced in the Italian city-states during this tumultuous period (roughly from 1490 to 1690), whether expressed in the form of architecture, rhetorical literature, plays, or painting, became a key means of reflecting and propagating public opinion—and a powerful weapon, both for wielding authority and for challenging it. Offered occasionally.

340 Film Genres This course explores some of the major theoretical and cinematic approaches to film genre, and provides the opportunity for students to produce a short film project based upon this exploration. The specific genre (e.g., documentary, horror, melodrama, film noir, etc.) under study for any given semester is at the discretion of the professor. Through the analysis and subsequent production of the selected film genre, students interrogate the ways that industrial, social, technological, and aesthetic factors shape the development, circulation, and reception of a film genre over time. In addition to regular class time, evening film screenings are required. Counts toward the “Visual Culture” pathway; cross-listed as ENGL/HUM 340.

360 Theory and Revolution in Advanced Capitalist Culture This col- lumbium explores the development of theory in the Marxist critique of Capital and capitalist cultures, especially in its relation to revolutionary praxis in Late Capitalism. The course examines foundational themes of Critical Theory as elaborated by Frankfurt School authors (Adorno, Horkheimer, Benjamin, and Marcuse) and study revolutionary move- ments and practices (Situationists, 1968, Autonomists, Tarnac 9, and Occupy) in relation to Marxist theory. Discussion and study also include more contemporary contributions to the question of the relation be- tween theory and revolutionary praxis in a world dominated and saturat- ed by capitalist culture by important Marxist writers, including Deborg, Baudrillard, Badiou, Zizek, Holloway, and The Invisible Committee. Some familiarity with Marx and Marxian theory is recommended, but not required. Offered frequently.

367 Word and Image “Print Culture” habits of reading work against the dramatic and visual nature of medieval composition, in which words were to be heard aloud and images visualized. Medieval manuscript il- lumination of literary texts reflects this active, visual process of reading. Humanities 367 immerses readers in medieval manuscript culture to experience a performative mode of reading essential to the appreciation of medieval literary genres like dream vision, chivalric romance, and al- legory. Satisfies the Artistic Approaches requirement; counts toward the “Global Middle Ages” and “Visual Culture” pathways; offered frequently.
**399 Library as Collaboratory** 0.25 unit activity credit. Expressly designed as an experiential learning opportunity, this course invites students to dive into the workings of a 21st century library by undertaking, completing, and documenting a small library project. Specific project roles include: Metadata Creator, Exhibit Curator, Instructional Designer, Digital Publisher, and Transcriptionist/Historical Investigator. Along the way, students are asked to actively reflect on their educational experiences at the University of Puget Sound and to begin to articulate a growing repertoire of skills in critical thinking, communication, research, creative problem solving, and ethical decision making. **Pass/fail grading only.**

**400 Digital Methods in Humanities Scholarship** This course surveys a wide range of software tools and technologies that are becoming associated with the domain of scholarly activity known as the digital humanities: micro- and macro-directed text analytics, annotated timelines, multimedia presentation platforms, data and network visualizations, NGrams, thick maps/GIS, topic modeling, immersive simulations, etc. During the first third of the course, students read conceptual material about digital methods and look at representative completed projects that have made use of such tools and methods. Each student then proposes a project that aligns with her or his research interests and selects a suite of tools appropriate for the project type. During the last two thirds of the course, students meet individually with the instructor at least once a week to review project status and plan ensuing phases of the work. In the final weeks, students reconvene as a group to discuss their completed projects. The course is appropriate for students who want hands-on experience using tools and methods that are changing the way scholarship in the humanistic disciplines is being conducted. **Offered frequently.**

### INTERNATIONAL POLITICAL ECONOMY

**Professor:** Bradford Dillman; Nick Kontogeorgopoulos

**Associate Professor:** Emelie Kaye Peine, Pierre Ly, **Director**

**Visiting Assistant Professor:** Jamila Glover, Lisa Nunn

#### About the Program

The International Political Economy (IPE) Program offers a multidisciplinary approach to the study of international and global issues. International Political Economy uses tools and methods of political science, economics, and sociology as informed by an understanding of history and tempered by appreciation of cultural differences.

Students in the IPE program 1) gain an appreciation for competing theoretical perspectives; 2) study the overlapping economic, political, and social linkages between global actors and events; 3) master the application of this powerful framework to the analysis of a wide range of issues; 4) consider issues broadly and see how they are interconnected; 5) engage in critical and creative thinking; and 6) develop expertise through senior thesis research on a particular IPE problem or issue.

The program sponsors regular lectures and discussions on campus, which encourage students and faculty to consider the integrated character of global economic, political, and social issues.

#### About the International Political Economy Major

The International Political Economy major consists of a thoughtfully integrated set of courses in the social sciences leading to the degree of Bachelor of Arts in International Political Economy. The goal of this major is to prepare students for an increasingly interdependent world through the study of international and global issues. The IPE major culminates in a senior thesis in which students demonstrate their ability to analyze a complex question, bringing to bear both the depth of their knowledge and the breadth of their liberal arts education.

Students who major in IPE take required courses in International Political Economy, Politics and Government, Economics, Sociology and Anthropology, and Mathematics. They tailor their plan of study to their individual educational goals by choosing additional elective courses. IPE majors are encouraged to pursue foreign travel-study opportunities as part of their undergraduate education. Two-thirds of IPE majors typically study abroad. Many students combine foreign study with background research for the senior thesis.

Students who major in IPE thus combine broad, multidisciplinary studies of IPE, which examine global problems from a variety of perspectives, with the opportunity to study intensely a specific issue in their senior thesis. The IPE major clearly embodies the spirit of liberal education as we understand it at the University of Puget Sound.

#### Structure of the IPE Major

The core of the IPE major consists of three required IPE classes (101, 301, and 401) and the three elective courses. The other IPE requirements—in comparative politics, economics, sociology and anthropology, and statistics—provide necessary tools and skills and encourage the breadth of knowledge and sensitivity to differing viewpoints that are hallmarks of IPE at Puget Sound.

**IPE 101:** Introduction to International Political Economy surveys the international and global problems that are at the heart of IPE. This course is designed to be a valuable element of the liberal education for majors and non-majors alike.

**IPE 301:** Theories of IPE is for IPE majors only. It features a rigorous analysis of the main theories of IPE. Students write a final paper that is intended to establish a theoretical foundation for their senior thesis. Students take IPE 301 in the junior year or in the fall of the senior year.

**IPE 401:** Senior Thesis Seminar is the capstone course in which IPE majors share ideas, engage in critical discussions, and write and defend their senior theses. Ideally, the more that a thesis is able to build upon past work the more it can be expected to achieve.

**IPE Major Electives.** IPE majors take three elective classes chosen in consultation with their IPE advisor. Students who study abroad are usually able to count up to two classes as IPE electives. Elective courses must be pre-approved by the student’s IPE advisor in consultation with the student. Elective classes should be chosen to: broaden or deepen the student’s understanding of IPE theory; provide economic, political, social or historical context for analysis of important IPE issues; provide specific expertise necessary for a student’s senior thesis research; develop IPE research tools; or deepen knowledge of a particular country or region. Please note that at least one of the three IPE Major Electives must be an upper-division IPE course taken on the Puget Sound campus.

#### Other Important Issues

Since most IPE majors study abroad at some point in their undergraduate careers, they are advised to consider foreign study options as soon as possible and to give special consideration to foreign language preparation. Although some study abroad programs have no formal foreign language requirement, other programs require as many as two years of prior language study. IPE students and their advisors should give serious consideration to foreign language preparation both for foreign study and with respect to senior thesis research needs and career preparation.

All Puget Sound students must take three upper-division elective classes as part of the university’s graduation requirements. IPE students are...
International Political Economy

encouraged to use courses taken for this requirement to broaden their understanding of IPE and contemporary global problems. Many IPE students plan eventually to pursue advanced degrees. It is wise, therefore, to consider what undergraduate courses might be most useful as preparation for law or graduate schools in addition to the coursework required for the IPE major.

Students who expect to pursue Master’s or Ph.D. degrees, for example, should consult with their IPE advisors regarding additional coursework that may be necessary or advisable in foreign language, quantitative methods, or research methodology. Students who want to prepare themselves for the MBA degree should supplement the IPE requirements with core business classes such as accounting and finance. Students who plan to enter graduate programs in area studies, such as Asian Studies or Latin American Studies, should consider additional coursework in foreign language and literature, comparative politics, and cultural studies.

General Requirements for the Major

General university degree requirements stipulate that 1) at least four units of the major be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major; and 3) all courses taken for a major must be taken for graded credit. Any exceptions to these stipulations are indicated in the major degree requirements listed below.

Requirements for the Major

I. IPE 101, PG 102, ECON 101, and SOAN 101 or 102.
II. IPE 205 or ECON 271
III. IPE 301
IV. MATH 160 or 260 or equivalent.
V. Elective courses: Three courses (usually upper-division courses) in IPE or related disciplines. Elective courses must be pre-approved by the student’s IPE advisor in consultation with the student. A course used to satisfy this requirement may not also be used to satisfy a university core requirement. At least one of the three IPE Major Electives must be an upper-division IPE course taken on the Puget Sound campus. Elective classes should be chosen to:
   - Broaden or deepen the student’s understanding of IPE theory;
   - Provide economic, political, social or historical context for analysis of important IPE issues;
   - Provide specific expertise necessary for a student’s senior thesis research;
   - Develop analytical tools useful in IPE research;
   - Deepen knowledge of a particular country or region.
VI. Senior Thesis: IPE 401

Notes
1. To count towards the major a course grade must be C- or above.
2. Every student must coordinate his or her program with an IPE advisor.
3. Where a course both supports a major in IPE and fulfills a major or minor requirement in another field, a student may count no more than two 200- or higher-level departmental units from that major or minor towards the IPE major.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI 173 Alexander Hamilton’s America: The Political Economy behind the Musical

Connections courses. See Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24).

IPE 389 Global Struggles over Intellectual Property
Satisfies the Connections core requirement.

CONN 307 Hooch: The Natural and Social Science of Liquor
Satisfies the Connections core requirement.

CONN 395 China and Latin America: A New Era of Transpacific Relations
Satisfies the Connections core requirement.

IPE 405 The Idea of Wine
Satisfies the Connections core requirement.

IPE 427 Competing Perspectives on the Material World
Satisfies the Connections core requirement.

101 Introduction to International Political Economy This course provides a multidisciplinary introduction to the study of international social, political, and economic problems. Concepts, theories, and methods of analysis drawn from economics, history, political science, and sociology are developed and applied to enable students to understand broadly a number of relationships between states, markets, and societies at a global level. Satisfies the Social Scientific Approaches core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every semester.

205 The Political Economy of International Trade and Finance This course trains students in the modern International Political Economy analysis of the battle between the winners and losers of economic globalization. The first part of the course focuses on political economy approaches to international trade issues, including discussions of trade policy in rich and poor countries, the role of government in assisting displaced workers, the regulation of labor standards and the politics of multinational corporations. The second part of the course provides students with a well-rounded understanding of the political, economic and social aspects of the international financial system and financial crises. This includes political economy analyses of important recent events such as the US credit rating downgrade and the European debt crisis. It is advised that students take IPE 205 (or ECON 271) as soon as possible after taking ECON 101, beginning in the Fall semester of the sophomore year. Prerequisite: IPE 101 or Econ 101. Offered every year.

301 Theories of International Political Economy This course examines theoretical explanations of international political economy relationships and events. Students become acquainted with important theoretical debates in the IPE literature, study research methods used to answer questions in IPE, and assess empirical research on the global political economy. This course is a prerequisite for IPE 401. Prerequisites: IPE 101 and junior or senior standing. Offered every semester.

311 Political Economy of International Development This course serves as an introduction to the political economy of international development and explores two themes. First, what are the tradeoffs inherent to the process of industrialization, globalization, and economic growth? Second, what are the political, social, and economic challenges faced by low-income countries? In focusing on these themes, this course addresses several questions: What is the meaning of development? How has colonialism shaped the contours of the contemporary world? What are the tradeoffs associated with mechanization and other features associated with the modernization of agriculture? What is the debt crisis and what are some possible solutions to the crisis? What are the great-
321 The Business of Alleviating Poverty: NGOs, Corporations and Social Entrepreneurs This course studies the interaction between states, markets and civil society in the fight against global poverty. More precisely it analyzes the roles of Non-Governmental Organizations (NGOs), corporations and social entrepreneurs. The course addresses a number of issues: What do NGOs do and how do they finance their operations? Can multinational corporations play a role in the fight against global poverty and, if so, how? How can we make sense of so-called "social enterprise"? What is the role of the state in regulating and encouraging private solutions to poverty? Are these private solutions further proof of economic liberal dominance or a move toward a new form of capitalism tailored to serve social needs? Offered frequently.

323 The Political, Economic, and Social Context of International Tourism In the contemporary world, tourism is often the foremost process that brings together people from different parts of the world, allowing those from vastly different societies to interact on a face-to-face basis under peaceful, if not always equal, circumstances. As such, tourism as a phenomenon and as a process raises questions about global interconnections and global movements of finance, cultural and material artifacts, ideas, and people across national and cultural boundaries. The two questions this course addresses throughout the semester are 1) what are the economic, political, social, cultural, and environmental impacts of tourism in low and middle income countries? and 2) what are the tradeoffs associated with tourism? In tackling these two questions the course examines a wide range of issues, including the political, economic, social, and cultural implications of tourism, the impact of global tourism on environmental and global conservation efforts, and tourism as a vehicle of social change and as a facilitator of cultural and material globalization. Crosslisted with SOAN 323. Offered frequently.

331 International Political Economy of Food and Agriculture Everyone eats, and therefore everyone has a relationship to global agriculture. But because less than one percent of the US population earns a living from farming, most Americans rarely think about where our food comes from. This course explores the origins of our current global food system, the political-economic relations that structure it, and emerging alternatives to industrial food. The course begins with an overview of the global food system, including the actors and ideas that have shaped its historical development. Second, students examine the dominant paradigm of industrial agriculture and the politics of its organization primarily in the US context. Finally, students discuss some of the most prescient debates over the future of our food system with a focus on the local context. Note: this course includes a required weekly three-hour experiential session in addition to regular class sessions. This experiential session provides students the opportunity for hands-on learning through field trips, volunteering, and community-based projects. Students use class materials to bring an analytical lens to these experiences, and the course culminates in a major research project and presentation that engages local community gardeners. Prerequisite: IPE 101, 201, or PG 103. Usually offered every year.

333 Political Economy of Southeast Asia This course serves as an overview of the political, economic, social, and cultural processes shaping the region known as Southeast Asia. This course utilizes a range of disciplinary approaches in order to illustrate patterns of change in the Southeast Asian context. Throughout, the course integrates discussion of theoretical issues with examples from around Southeast Asia. By applying theoretical material to specific countries and real-world examples, the class explores the ways in which broad perspectives intersect with economic, political, and social issues to shape the nature and direction of change in Southeast Asia. Usually offered every year.

360 Food Systems Northwest: Circuits of Soil, Labor, and Money Eating food is critical to everyday life, and yet many have the luxury to treat daily sustenance as an afterthought. For some, the connections between food and the larger environmental and social systems that sustain human life are largely invisible. This experiential course explores these intersections through an extensive and intensive investigation of the Northwest food system from farm to fork. For three weeks, the course travels among the campuses of Whitman College, the University of Puget Sound, and Willamette University, tracing the themes of soil, labor, and money across the Northwest foodscape. Beginning at Whitman, students focus on the political economy of the food system, training a global lens on the industrial wheat farms, chicken processing plants, and large-scale dairy operations of the Walla Walla Valley. At the University of Puget Sound, the focus shifts to urban agriculture and food justice, tracing the three themes through questions of poverty access to food, urban planning, and the challenges of growing food in the city of Tacoma. Finally, the course concludes at Willamette where students will live and work at Zena Forest and Farm, putting the methods of sustainable agriculture into practice and exploring the opportunities and obstacles associated with smaller-scale organic agriculture in the Willamette Valley. Offered occasionally.

361 Business and the Base of the Pyramid The base of the pyramid (BOP) refers to the four billion people living on less than $2 per day. Currently, various approaches exist on how best to align business activity with the needs and potential of this segment of the global population. Those at the BOP can be seen as a large untapped market, creative entrepreneurs, business partners, and innovators. This course examines the various BOP perspectives to need satisfaction, poverty alleviation, and economic growth through business activity. The focus is on emerging business models that address individual and social needs in an innovative, profitable, sustainable, and socially-responsible manner. This course integrates concepts of development economics, international business, leadership, and strategy. Cross-listed with BUS 361. Prerequisite: Junior standing. Offered occasionally.

380 Gods, Guns, and Oil in the Middle East This course examines the efforts of states in the Middle East and North Africa (MENA) to adapt to the international political economy. It examines how states have tried to reshape their political and economic institutions in the face of religious radicalism, armed conflict, and changes in global markets. Attention is paid to relationships that exist between governments, businesses, civil society, and opposition groups. Topics include the relationship of economic reform to democratization, regional integration, and corruption and illicit transactions. Prerequisite: IPE 101 or PG 102. Offered every other year.

382 The Illicit Global Economy This course examines patterns of illicit activity in the global economy. A political economy approach is used to understand reasons why illicit behavior occurs, how it occurs, and who the relevant actors are. Attention is focused on production and distribution of commodities, especially those that originate in developing countries. Commodities are broadly defined to include drugs, money, guns, people, diamonds, oil, timber, and intellectual property. The course concludes with a discussion of efforts by states and multilateral institutions to combat illicit transnational activity. Prerequisite: IPE 101 or permission of the instructor. Offered every year.
407 Political Ecology Political ecology is an active interdisciplinary framework with foundations in anthropology, geography, environmental studies and the biological sciences. Its central contention is that our understanding of environmental issues and environmental change must include an analysis of the social, political, economic, and cultural context in which they are produced. Through a set of advanced readings in the social sciences, students become familiar with the genealogy of this interdisciplinary approach, the keystone texts that inform contemporary political/ecological work, and the new directions that comprise the cutting edge of political ecology. Recurring themes in the reading list will examine indigenous peoples struggle over resources, the construction of nature through the capitalist lens, and an examination of sustainability in both discourse and practice. Students conduct original ethnographic research that builds upon these areas of interest. Advanced coursework in anthropology, sociology, and/or international political economy is strongly recommended. Crosslisted with SOAN 407. Offered every year.

INTERNERNSHIP

General
The University of Puget Sound offers students the opportunity to undertake an internship in order to:
1. Apply cognitive learning in an off-campus work-related organizational setting.
2. Extend knowledge acquired elsewhere in the curriculum.
3. Reflect upon work experience within an academic context.

Eligibility
The eligibility of a student to undertake an internship is determined by the Career and Employment Services using the following criteria:
1. Sophomore, junior or senior class standing.
2. Cumulative university grade point average of at least 2.50.
3. A declared major or minor in a department, school, or program; or other academic preparation appropriate for the internship placement.
4. Recommendation of the academic advisor.
5. Approval from the chair or director of the department, school, or program for which the student will receive credit (if a faculty-sponsored internship).

Requirements
The requirements of the internship will be specified in the Internship Learning Agreement composed of an Academic Syllabus and an Internship Description. The Learning Agreement must be completed; signed by the intern, the supervising instructor, the department chair or program director (for a faculty-sponsored internship), and the internship supervisor; and submitted to Career and Employment Services before the end of the add period during the term of enrollment. The student may then be registered for credit.

The Academic Syllabus (see Note below) should be comparable to the syllabus of any upper-division course in the curriculum and should include:
1. A list of the academic topics or questions to be addressed.
2. The learning objectives to be achieved.
3. The reading and/or research requirements relevant to the topics and learning objectives.
4. The assignments or progress reports (plus the dates they are due to the instructor) to be completed during the internship.
5. The final project, paper, report, or thesis to be completed at the conclusion of the internship.
6. A regular schedule of days and meeting times of at least 35 hours for the internship seminar. Or, a comparable schedule of at least 35 hours for consultation with the instructor and independent research in a faculty-sponsored internship. In either case, students should regularly review their progress toward their learning objectives and should discuss how they are applying their previous courses and experiences to the internship.
7. The date during the final examination period (or the date by the last day of the summer session) for the student to submit the self-assessment to the instructor unless arrangements have been made to extend the internship with an in-progress grade beyond the normal end of the term.
8. The instructor’s grading criteria.

Note
A student in an internship seminar will also have a seminar syllabus from the seminar instructor. The student should not duplicate the seminar syllabus in the Learning Agreement Academic Syllabus but must address those items specific to the student’s particular internship.

The Internship Description will include:
1. A list of the specific responsibilities and tasks relevant to the academic learning objectives.
2. A list of the specific responsibilities and tasks relevant to the internship site expectations although not directly related to the academic learning objectives.
3. A schedule of at least 120 hours of directly related internship experience.
4. The criteria used by the internship supervisor to evaluate the intern’s performance.
5. The date by which the supervisor is to send the student’s performance appraisal to Career and Employment Services.

Grading
An internship is intended to be a graded course (although a student may select pass/fail grading). However, the instructor of a faculty-sponsored internship may determine that, due to the nature of the experience and the internship assignments, pass/fail grading is appropriate.

A student’s performance in an internship will be assessed by the student’s achievement on the academic requirements, as assigned and graded by the university faculty member, and on the completion of on-site internship responsibilities, as evaluated by the supervisor at the organization hosting the internship. Additionally, the student may be required to complete a self-assessment reviewing the learning objectives, how they were achieved, and how that achievement was demonstrated.

Designation
1. The internship seminar will be designated as INTN 497.
2. The department-offered internship will be designated with the department abbreviation and the course number 497. (For example, the internship offered by the Sociology and Anthropology department is designated as SOAN 497.)
3. The internship sponsored by an individual member of the faculty will be designated with the department abbreviation of the faculty member and the course number 498.
Credit
Credit for an internship is not applicable to the Upper-Division Graduation Requirement. Only 1.0 unit may be assigned to an individual internship and no more than 2.0 units of internship credit, or internship credit in combination with cooperative education credit, may be applied to an undergraduate degree.

Course Offerings
Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

INTN 497 Internship Seminar This scheduled weekly seminar provides the context to reflect on concrete experiences at an off-campus internship site and to link these experiences to academic study relating to the political, psychological, social, economic and intellectual forces that shape our views on work and its meaning. The aim is to integrate study in the liberal arts with issues and themes surrounding the pursuit of a creative, productive, and satisfying professional life. Students receive 1.0 unit of academic credit for the academic work that augments their concurrent internship fieldwork. This course is not applicable to the Upper-Division Graduation Requirement. Only 1.0 unit may be assigned to an individual internship and no more than 2.0 units of internship credit, or internship credit in combination with cooperative education credit, may be applied to an undergraduate degree. Prerequisite: sophomore, junior or senior standing; 2.5 GPA; ability to complete 120 hours at internship site; approval of the Career and Employment Services internship coordinator; and completion of a learning agreement.

498 Internship Tutorial Students who enroll in this course develop an individualized learning plan with a faculty sponsor to connect off-campus internship site experience with study in the student’s academic area of interest. The learning plan includes required reading and writing assignments, as well as a culminating project or paper. Students receive 1.0 unit of academic credit for the academic work that augments their concurrent internship fieldwork. The internship sponsored by an individual member of the faculty will be designated with the department abbreviation of the faculty member. This course is not applicable to the Upper-Division Graduation Requirement. Only 1.0 unit may be assigned to an individual internship and no more than 2.0 units of internship credit, or internship credit in combination with cooperative education credit, may be applied to an undergraduate degree. Prerequisite: junior or senior standing; 2.5 GPA; ability to complete 120 hours at internship site; approval of the CES internship coordinator; and completion of a learning agreement.

Co-operative Education Guidelines

General
The University of Puget Sound offers students the opportunity to undertake a co-operative (co-op) education experience so that students, through full- or part-time employment, may:
1. Gain pre-professional experience at an academically-related off-campus site.
2. Gain relevant experience to provide context for later academic studies.
3. Extend theoretical knowledge to practical application.
4. Achieve professional and academic goals in preparation for employment.

Eligibility
The eligibility of a student to undertake a co-op will be determined by Career and Employment Services using the following criteria:
1. Sophomore, junior, or senior class standing.
2. Cumulative university grade point average of at least 2.50.
3. A declared major, minor, or interdisciplinary emphasis in a department, school, or program appropriate for the co-op placement.
4. Recommendation of the academic advisor.
5. Approval from the chair or director of the department, school, or program from which the student will receive credit.
6. Total enrollment in co-ops is limited to 20 students per term.

Requirements
The requirements of the co-op will be specified in the Co-operative Education Learning Agreement composed of a Co-op Description and Learning Objectives. The Learning Agreement must be completed; signed by the student, the supervising instructor, the department chair or program director, and the co-op supervisor; and submitted to Career and Employment Services before the end of the add period during the term of enrollment. The student may then be registered for credit.

The Co-op Description will include:
1. A list of the specific responsibilities and tasks assigned to the student.
2. The criteria used by the co-op supervisor to evaluate the student’s performance.
3. The student’s schedule with start and end dates plus a summary of expected hours the student will contribute to the Co-operative Education experience.
4. The day and time during the week that the student will meet with the supervisor to review performance and progress toward learning objectives.
5. The date by which the supervisor is to send the student’s performance appraisal to Career and Employment Services.

The Learning Objectives should reflect the student’s academic and professional interests and must specify how the student intends to achieve a pertinent experience by including:
1. Specific intended objectives for undertaking the co-op.
2. A description of how each responsibility or task assigned by the co-op supervisor can be made relevant to the intended objectives.
3. A schedule of days and times for meeting with the instructor to review the student’s self-assessment of performance and progress toward the learning objectives.
4. The date during the final examination period (or the date by the last day of the summer session) for the student to submit the self-assessment to the instructor unless arrangements have been made to extend the co-op with an in-progress grade beyond the normal end of the term.
5. Any specific objective(s) that may be assigned by the instructor.

Grading
A student’s performance in a co-op will be graded pass/fail by the instructor using the co-op supervisor’s appraisal of the student’s completion of responsibilities (forwarded by Career and Employment Services); the student’s self-assessment regarding the completion of learning objectives, how they were achieved, and how that achievement was demonstrated; and by any additional criteria the instructor assigns in the Learning Agreement.
Internship/Japanese/Latin/Latin American Studies

Designation

1. The co-operative education experience will be designated COOP 499 CO-OP EXPERIENCE.

Credit

Activity credit will be granted for a co-op based on hours of engagement with the site:
1. 0.25 unit and less-than-half-time enrollment status for at least 120 hours.
2. 0.50 unit and half-time enrollment status for at least 240 hours.
3. 1.00 unit and full-time enrollment status for at least 480 hours.

This credit is not applicable to the Upper-Division Graduation Requirement.

As activity credit, a co-op is included in the limit of 2.00 units of activity credit that may be applied to an undergraduate degree. Apart from the activity unit limit, no more than a total of 2.00 units of co-op credit, combined with internship credit, may be applied to an undergraduate degree.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

COOP 499 Co-Op Experience  0.25-1.0 activity unit  Students from any major may alternate semesters of on-campus study with academically-related, off-campus experience or may undertake such experience while enrolled in classes (a “parallel placement”). This program is tailored for sophomores, juniors, and seniors who seek experience and a head start on their career objectives while still in school. Activity credit in the range of 0.25 to 1.0 unit may be awarded for each concurrent placement based on the number of hours engaged at the co-op site. COOP 499 must be taken pass/fail. This course is not applicable to the Upper-Division Graduation Requirement. As activity credit, a co-op is included in the limit of 2.00 units of activity credit that may be applied to a bachelor’s degree. Apart from the activity unit limit, no more than a total of 2.0 units of co-ops combined with internships may be applied to a bachelor’s degree. Prerequisite: sophomore, junior, or senior standing; 2.5 GPA; ability to complete required minimum hours at co-op site; approval of the Career and Employment Services internship coordinator; completion of learning agreement.

JAPANESE

Students interested in a major or minor in Japanese language and culture should consult the Asian Languages and Cultures section in this Bulletin.

LATIN

Students interested in Latin language courses should consult the Classics section in this Bulletin.

LATIN AMERICAN STUDIES

Director: Linda Williams, Art and Art History

Advisory Committee: Monica DeHart, Sociology and Anthropology; Pepa Lago Graña, Hispanic Studies; Andrew Gomez, History; Brendan Lanctot, Hispanic Studies; John Lear, History; Ariela Tubert, Philosophy; Nila Wiese, Business and Leadership

About the Program

The Latin American Studies Program offers an interdisciplinary approach to the study of Latin America. The United States and the countries of Latin America have historically exerted great influence on each other and today, in the age of hyper-globalization, are more intertwined than ever before. The required gateway course to the program is Latin American Studies 100, which fulfills the Humanistic Approaches core and explores the interaction of politics and culture at national and international levels by considering the historical legacies affecting present-day Latin American societies. Drawing on courses from Hispanic Studies, Politics and Government, Business, Art History, Anthropology, International Political Economy, and History, students minoring in Latin American Studies gain an in-depth understanding of the region, past and present, through the application of and different analytical tools and disciplinary perspectives. Students are encouraged to gain some experience abroad, particularly through the university’s semester abroad programs in Latin America (primarily Mexico, Argentina, and Chile). In addition, the Latin American Studies Program features an interdisciplinary approach to the study of Latin America that is not applicable to the Upper-Division Graduation Requirement. As activity credit, a co-op is included in the limit of 2.00 units of activity credit that may be applied to an undergraduate degree. Apart from the activity unit limit, no more than a total of 2.00 units of co-op credit, combined with internship credit, may be applied to an undergraduate degree.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

COOP 499 Co-Op Experience  0.25-1.0 activity unit  Students from any major may alternate semesters of on-campus study with academically-related, off-campus experience or may undertake such experience while enrolled in classes (a “parallel placement”). This program is tailored for sophomores, juniors, and seniors who seek experience and a head start on their career objectives while still in school. Activity credit in the range of 0.25 to 1.0 unit may be awarded for each concurrent placement based on the number of hours engaged at the co-op site. COOP 499 must be taken pass/fail. This course is not applicable to the Upper-Division Graduation Requirement. As activity credit, a co-op is included in the limit of 2.00 units of activity credit that may be applied to a bachelor’s degree. Apart from the activity unit limit, no more than a total of 2.0 units of co-ops combined with internships may be applied to a bachelor’s degree. Prerequisite: sophomore, junior, or senior standing; 2.5 GPA; ability to complete required minimum hours at co-op site; approval of the Career and Employment Services internship coordinator; completion of learning agreement.

Credit

Activity credit will be granted for a co-op based on hours of engagement with the site:
1. 0.25 unit and less-than-half-time enrollment status for at least 120 hours.
2. 0.50 unit and half-time enrollment status for at least 240 hours.
3. 1.00 unit and full-time enrollment status for at least 480 hours.

This credit is not applicable to the Upper-Division Graduation Requirement.

As activity credit, a co-op is included in the limit of 2.00 units of activity credit that may be applied to an undergraduate degree. Apart from the activity unit limit, no more than a total of 2.00 units of co-op credit, combined with internship credit, may be applied to an undergraduate degree.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

COOP 499 Co-Op Experience  0.25-1.0 activity unit  Students from any major may alternate semesters of on-campus study with academically-related, off-campus experience or may undertake such experience while enrolled in classes (a “parallel placement”). This program is tailored for sophomores, juniors, and seniors who seek experience and a head start on their career objectives while still in school. Activity credit in the range of 0.25 to 1.0 unit may be awarded for each concurrent placement based on the number of hours engaged at the co-op site. COOP 499 must be taken pass/fail. This course is not applicable to the Upper-Division Graduation Requirement. As activity credit, a co-op is included in the limit of 2.00 units of activity credit that may be applied to an undergraduate degree. Apart from the activity unit limit, no more than a total of 2.00 units of co-op credit, combined with internship credit, may be applied to an bachelor’s degree. Prerequisite: sophomore, junior, or senior standing; 2.5 GPA; ability to complete required minimum hours at co-op site; approval of the Career and Employment Services internship coordinator; completion of learning agreement.

General Requirements for the Minor

General university degree requirements stipulate that 1) three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the minor; and 3) all courses taken for a minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the minor degree requirements listed below.

Requirements for the Minor

1. Completion of a minimum of five units, to include:
   a. LAS 100 Latin American Studies (1 unit);
   b. One course from each of the following three categories (see lists below): Fine Arts/Literature, Social Sciences, and History (3 units);
   c. One elective course from any of the categories below (1 unit).
2. At least two of the five courses taken for the minor must be at the 300 or 400 level.
3. An internship in or related to Latin America or Latin Americans in the United States can count as the elective if it meets university...
requirements and is approved by the director of Latin American Studies.

4. Students minoring in Latin American Studies must complete two semesters of Spanish at the 101-102 level, or one semester at the 200 level, or the equivalent, with a passing grade.

5. Upon approval by the Latin American Studies Program, students may complete up to two of the required units of study for the minor when enrolled in a study abroad program in Latin America or in a Spanish- or Portuguese-speaking country.

Students may count only two courses taken to fulfill requirements in their major or another minor towards the LAS minor.

399 Latin American Travel Seminar

100 Introduction to Latin American Studies This course introduces students to the history, literature, and culture of the different Latin American regions. It examines the products of individual and collective experience and creativity in a variety of ways. Using historical and anthropological texts, the course provides a brief overview of historical periods and legacies, and considers how anthropologists have understood the cultures of urban and rural, racial and ethnic existence. In addition, using a series of literary works, students reflect on the cultural and national identity, moral and religious values, and individual experience of Latin Americans as well as the cultural, intellectual, and linguistic influence of these people in the United States. Classes are organized around discussion and occasional presentations by guest speakers. In addition to exams, students write several short evaluations of readings and are involved in several group presentation projects. The course serves as a required introduction to the Latin American Studies minor. Satisfies the Humanistic Approaches core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement.

LATINA/O STUDIES

Director: Pepa Lago-Graña, Hispanic Studies
Advisory Committee: Michael Benitez, Dean of Diversity and Inclusion; Robin Jacobson, Politics and Government; Pepa Lago Graña, Hispanic Studies; Renee Simms, African American Studies

About the Program
The student of Latina/Latino Studies explores the historical, cultural, political, and socio-economic experiences of Latinos, the largest minoritized ethnic group in the United States. A key objective of Latina/o Studies is to integrate the body of knowledge pertaining to these populations into the United States’ understanding of itself. Taking an interdisciplinary methodology, the minor provides a comprehensive and in-depth approach to key issues, research, and cultural facets of the Latina/o experience. Students minoring in Latina/o Studies prepare themselves for graduate studies and careers in social and welfare policy, law, counseling, public policy, health care, education, advertising, journalism, and education.

General Requirements for the Minor
General university degree requirements stipulate that 1) three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the minor; and 3) all courses taken for a minor
must be taken for graded credit. Any exceptions to these stipulations are indicated in the minor degree requirements listed below.

**Requirements for the Minor**

1. Completion of a minimum of five units, to include:
   a. LTS 200 Latina/o America: A Critical Introduction to Latino Studies (1 unit);
   b. Three courses from the following list (3 units);
      - AFAM 401 Narratives of Race
      - HIST 367 Immigration in the U. S.
      - HIST 376 Cuba and the Cuban Diaspora
      - HIST 378 History of Latinos in the United States
      - LTS 300 Latina/o Literatures
      - LTS 375 Queer-Latinx: Art, Sex, and Belonging in America
      - LTS 400 Special Topics in Latina/o Studies
      - PHIL 312- Latin American Philosophy
      - PG 304 Race and American Politics
      - PG 306 Immigration Policies and Policy in the U.S.
      - PG 311 Politics of Detention: Criminal Justice, Immigration, and the War on Terror
      - PG 346 Race in the American Political Imagination
      - SOAN 215 Race and Ethnic Relations
      - SOAN 303 Contemporary Immigration, Race, and Immigration Regimes in the U.S.
      - SOAN 350 Border Crossings: Transnational Migration and Diaspora Studies
      - SPAN 303 Hispanic Short Story (whenever the course includes significant Latina/o Studies content)
      - SPAN 306 Latin American Film (whenever the course includes significant Latina/o Studies content)
      - SPAN 307 Latin American and Latino Theatre
      - SPAN 310 Special Topics in Literary and Cultural Studies (whenever the course includes significant Latina/o Studies content)
      - SPAN 311 Migration Narratives
   c. A capstone experience (1 unit): LTS 400 Special Topics Seminar in Latina/o Studies or LTS 497 Internship Seminar

2. Proficiency in Spanish at a level equivalent to passing SPAN 202.

**Course Offerings**

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 18.

**200 Latina/o America: A Critical Introduction to Latina/o Studies**

The United States is the second largest Spanish-speaking country in the world. Taking an interdisciplinary approach, this course explores the historical, social, political, and cultural configurations of this fact and of what has come to be known as Latina/o U.S.A. The course begins with a discussion on the roots of Spanish in the Americas, and among others; defiant Latina/o sexualities. Cross-listed with SPAN 375. Prerequisites: Any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent.

**300 Latina/o Literatures**

Latino literary and cultural productions have particularly provided a gateway into understanding the heterogeneity of Latino experiences in the U.S. While this course does not survey Latino literatures historically, it does introduce students to some of the most contemporary Latina/o literary productions and cultural expressions by situating these in their broader cultural, social, and political frameworks. Plays, short stories, novels, testimonies, poetry, autobiography, essays, and film serve to explore complex—and often silenced—histories, issues and realities in present-day Latino/a communities. In this manner, the course looks at literature and cultural productions as a platform for cultural, social, individual, historical, and political exhibitions; a place where ideologies are contested, debated and articulated; a site where subjectivities are problematized, enunciated, and made visible. Central to this course are questions pertaining to: the neoliberal market and the commodification of the Latino body; identity construction (and/or destruction); the intersections of sexuality, gender, and class in informing discourse; racisms; discourses of privilege; language and art as a conduit for the erasure of invisibilities; the intersections of systems of power in the literary; border politics, death and violence in the Latino experience; conditions of exile and diaspora; U.S. immigration policies, and among others; defiant Latina/o sexualities. Cross-listed with SPAN 309 This course is taught in Spanish, with some readings in English and Spanglish. Prerequisites: Any one of SPAN 203, 204, 205, 210, 211, 212, or equivalent.

**375 Queer-Latinx: Art, Sex, and Belonging in America**

In this course, students develop an understanding of the main topics for Queer Latinx Studies, including current aesthetic, political, and theoretical frameworks to analyze Latinx art, cinema, literature, and performance. This course gives students the opportunity to study how queer Latinx artists are contesting civil and governmental oppression against non-heterosexual communities. Students understand the significance of dwelling and sexual embodiment for dissident art-ists and their political intervention in the public sphere. In this class, students will engage with questions of disability, immigration, legality, race, and sexuality in America. Cross-listed with SPAN 375.

**400 Special Topics in Latina/o Studies**

This special topics course is conducted as a seminar and varies in focus each time. The course offers students the opportunity to further examine, problematize, and research particular issues and forms of cultural productions as they relate to Latina/o Studies and Latino communities in the United States. To this purpose, class sessions require students to explore the discursive specifics of assigned works as well as to consider and interrogate the critical and theoretical issues they raise. Students’ thoughtful engagement with the material and ability to participate in productive dialogue bear directly on the quality of the knowledge produced throughout the seminar. Cross-listed with SPAN 410. Prerequisites: any one of SPAN 300, 303, 306, 307, 311, LTS 300, or equivalent.
The study of mathematics and computer science prepares students to enter a world in which computational and mathematical literacy are crucial. Many of our students move on to graduate study, and ultimately pursue careers in business, research, industry, education, government, and actuarial work, among others. Whether considering a major in mathematics or computer science, building the foundation for another discipline, or simply developing the quantitative literacy required to interact in an increasingly quantitative world, the Department of Mathematics and Computer Science provides the strategies and conceptual understanding to help students reach these goals.

Students who graduate from the Department of Mathematics and Computer Science will be able to communicate precisely in the formal language of mathematics or computer science, both verbally and in written form, work effectively individually and as part of a team, and leverage the power of abstraction to transform complex problems into simpler but conceptually relevant ones.

Additionally, students completing a degree in mathematics will be able to:

- Demonstrate an understanding of the core ideas in calculus and linear algebra, as well as a breadth or depth of understanding in other mathematical subject areas;
- Write clear and correct mathematical proofs;
- Successfully transition to advanced study in any of a range of pure or applied mathematical subject areas.

Computer science graduates will additionally be able to:

- Choose and apply appropriate algorithms and data structures to solve a problem;
- Analyze the correctness, efficiency, and viability of algorithms;
- Implement and evaluate complex software systems using a variety of tools.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

The Department of Mathematics and Computer Science offers courses cross-listed as both Mathematics and Computer Science as indicated in their course descriptions. A student majoring or minoring in both...
Mathematics and Computer Science may apply only one such course to both majors, to both the major and the minor, or to both minors.

The Bachelor of Science in Mathematics

The department offers two options for a Bachelor of Science in Mathematics: a contract major and a standard major. The contract major emphasizes the value of planning a coherent set of courses based on goals and interests articulated by the student. The contract major also allows the flexibility of including a course from another department if the course has sufficient mathematical content and relates to the student’s interests. The standard major is available for those students who declare a mathematics major later in their undergraduate career.

Contract option for the Bachelor of Science in Mathematics

This degree is awarded on the basis of a course of study agreed upon by the student and a committee of faculty members. A student who intends to complete a contract major in Mathematics should select a faculty member in the Department of Mathematics and Computer Science as an advisor. The student and advisor form a committee that consists of one additional faculty member from the Department of Mathematics and Computer Science and, if a course from another department is to be part of the contract, a faculty member from that department. The student works with the committee to select a coherent set of courses (satisfying the requirements given below) that advances the student’s educational goals. The contract is signed by the student, committee members, and chair of the department, and is filed in the Office of the Registrar. The student can later modify the contract with the approval of all committee members and the department chair.

Each contract course of study will meet the following requirements.

1. Completion of a minimum of eight units and a maximum of 16 units with no more than nine units in mathematics.
2. Completion of CSCI 161 or equivalent.
3. Completion of a minimum of five upper-division units in mathematics.
4. The upper-division units are to include the following:
   a. Two units of related upper-division courses chosen to provide depth.
   b. One upper-division unit in a proof-based course.
   c. Be approved by the end of the semester in which the first upper-division course on the contract is completed. Upper-division courses completed before the contract is approved cannot be included in the contract.

Standard option for the Bachelor of Science in Mathematics

This degree is awarded on the basis of a course of study that meets the following requirements.

1. Completion of the calculus sequence (through MATH 280) and MATH 290.
2. Completion of CSCI 161 or equivalent.
3. Completion of five upper-division units in mathematics to include the following:
   a. Two units of related upper-division courses chosen to provide depth.
   b. One upper-division unit in a proof-based course.
   c. At least one upper-division unit from each of the following two lists to provide breadth of experience in both continuous and discrete mathematics:
      List A: MATH 301, 302, 321, 322, 352, 360, 375, 376, 381, 420 (some topics as noted in topic course descriptions)
      List B: MATH 300, 310, 335, 338, 420 (some topics as noted in topic course descriptions), 433, 434, 471

Individual classes can count for more than one requirement in 3.

Notes for contract and standard majors

1. For the purposes of major requirements, upper-division courses in mathematics are those at the 300–400 level.
2. A student majoring in mathematics must earn a grade point average of at least 2.00 in all upper-division major courses.
3. A student majoring in mathematics must complete at least four units of the required upper-division courses in the major at Puget Sound. One of these four units may be a course taken as part of a study-abroad program. For contract majors, this is subject to approval in advance by the student’s contract committee.
4. Contracts normally include the calculus sequence and linear algebra.
5. Currently-offered sets of related upper-division courses to provide depth in contract and standard majors include MATH 301/302, 321/322, 375/376, 433/434, and 335/471.
6. Students majoring in mathematics should take CSCI 161 in their first two years.

Requirements for the Minor in Mathematics

1. Completion of five units in mathematics, two of which must be numbered 170 or higher.
   a. One unit of credit taken from Computer Science, either 141 or a course numbered 161 or higher, may count toward the minor and, if it is numbered 200 or higher, may count as one of the mathematics courses numbered 170 or higher.
   b. HON 213 may count toward the 170-level requirement.
   c. PHIL 240 may count toward the minor. It will not count as one of the required mathematics courses numbered 170 or higher.
   d. First-year Seminars do not meet the requirements of the minor.
2. Maintain a cumulative grade-point average of 2.0 in the five units.

The Bachelor of Science in Computer Science

The department offers two options for a Bachelor of Science in Computer Science: a contract major and a standard major. The contract major emphasizes the value of planning a coherent set of courses based on goals and interests articulated by the student. The contract major also allows the flexibility of including a course from another department if the course has sufficient computer science content and relates to the student’s interests. The standard major is available for those students who declare a computer science major later in their undergraduate career.

Contract option for the Bachelor of Science in Computer Science

This degree is awarded on the basis of a course of study agreed upon by the student and a committee of faculty members. A student who intends to complete a contract major in Computer Science should select a faculty member in the Department of Mathematics and Computer Science as an advisor. The student and advisor form a committee that consists of one additional faculty member from the Department of Mathematics and Computer Science and, if a course from another department is to be part of the contract, a faculty member from that department. The student works with the committee to select a coherent set of courses (satisfying the requirements given below) that advances the student’s educational goals. The contract is signed by the student, committee members, and chair of the department, and is filed in the Office of the Registrar. The student can later modify the contract with the approval of all committee members and the department chair.
Each contract course of study will meet the following requirements.

1. Completion of a minimum of eight units and a maximum of 16 units with no more than 10 units in computer science.
2. Completion of the sequence CSCI 161, 261, 281.
4. Completion of a minimum of five upper-division units in computer science. One of these may be from a field other than computer science provided the course has sufficient computer science content. The upper-division courses are to include at least two proof-based or writing courses in computer science.
5. Approval by the end of the semester in which the first upper-division course on the contract is completed. Upper-division courses completed before the contract is approved cannot be included in the contract.

Standard option for the Bachelor of Science in Computer Science

This degree is awarded on the basis of a course of study that meets the following requirements.

1. Completion of the sequence CSCI 161, 261, 281.
2. Completion of MATH 210; CSCI 281, 291, 361.
3. Completion of two upper-division electives.
4. Completion of the Capstone CSCI 440.

Notes for contract and standard majors

1. For the purposes of major requirements, upper-division courses in computer science are those at the 300-400 level.
2. A student majoring in computer science must earn a grade point average of at least 2.00 in all upper-division major courses.
3. A student majoring in computer science must complete at least three units of the required upper-division courses for the major at Puget Sound. One of these three units may be a course taken as part of a study abroad program. For contract majors, this is subject to approval in advance by the student’s contract committee.
4. Students majoring in computer science are encouraged to take MATH 210 in the first two years, preferably concurrently with CSCI 281.
5. In lieu of the MATH 210 requirement for the computer science major, the department will allow the following two-course substitution:
   a. Completion of MATH 290 with a grade of C or better, and
   b. Completion of a 300-level or 400-level mathematics course from List B with a grade of C or better.

Requirements for the Bachelor of Science in Computer Science/Business

1. BUS 205, 305, 310, 315; 1 unit from 402, 416, 432, 434, or 435;
2. CSCI 161, 250, 261, 281, and 455;
3. ECON 101;
4. MATH 160, 170 or 180, 210;
5. Maintain a cumulative grade-point average of 2.0 in the required courses in Business and Computer Science.

Requirements for the Minor in Computer Science

1. Three units to include CSCI 161, 261, and 281;
2. Two units from CSCI 240, 250, 291, 315, 325, 335, 361, 370, 425, 431, 455, 475, 481.

Note: Although there is no time restriction on when a course taken in the past can apply to a major or minor, students who plan to use a course taken several years ago as a prerequisite for a current course should consult the instructor to determine if they are adequately prepared.

Course Offerings in Mathematics and Computer Science

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Note: Students must earn a grade of C- or better in all prerequisite courses.

Other courses offered by Mathematics and Computer Science Department faculty.

HON 213 Mathematical Reasoning: Foundations of Geometry
Satisfies the Mathematical Approaches core requirement.

Course Offerings in Mathematics

103 Introduction to Contemporary Mathematics  This course provides an introduction to contemporary mathematics and its applications. It may include topics from management science, statistics, social choice, the geometry of size and shape, and mathematics for computer science. These topics are chosen for their basic mathematical importance and for the critical role their application plays in a person’s economic, political, and personal life. This course is designed to be accessible even to students with a minimal background in mathematics. This course is not designed to prepare students for further work in mathematics. No credit will be given for MATH 103 if the student has prior credit for another mathematics course that is equivalent to any of our courses numbered Math 110 or higher. Unlike most other introductory mathematics classes, this course is not a requirement for any currently offered major. Therefore, students are advised not to take this class before deciding on a major. Prerequisite: One year of high school mathematics. Satisfies the Mathematical Approaches core requirement. Offered Spring term only.

110 Pre-Calculus  This course presents the basic concepts of algebra and trigonometry needed for future courses in mathematics, science, business, or the behavioral and social sciences. It includes a review of elementary algebra, introduction to algebraic functions, exponential and logarithmic functions, and trigonometric functions. Prerequisite: Three years of high school mathematics. Does not satisfy the Mathematical Approaches core requirement. Offered Fall term only.

150 Finite Mathematics  This course provides an introduction to the theory of linear systems and discrete probability with applications from business and the physical and social sciences. The study of linear systems includes a discussion of matrix theory and linear programming. The concepts from linear systems and probability are integrated in the study of Markov Chains and Game Theory. This course contains topics of particular interest to students studying business or business-related topics. It is an excellent choice for such students who are also seeking a minor in mathematics. Prerequisite: three years of high school mathematics. Satisfies the Mathematical Approaches core requirement. Offered Spring term only.

160 Introduction to Applied Statistics  This course provides an introduction to statistics, concentrating on statistical concepts and the “why and when” of statistical methodology. The course focuses on learning to ask appropriate questions, collect data effectively, summarize and interpret information, and understand the limitations of statistical inference. Students with Advanced Placement credit for MATH 160 should
170 Calculus for Business, Behavioral, and Social Sciences  This course takes a problem-solving approach to the concepts and techniques of single variable differential calculus, with an introduction to multivariate topics. Applications are selected primarily from business and behavioral and social sciences. Students will not receive credit for MATH 170 if they have already taken MATH 180, MATH 181 and/or MATH 280, without prior permission of the department. This course is not intended for mathematics majors, but is a recommended course for students going on to graduate school in business, some social sciences, or desiring more quantitative courses in their studies. Prerequisite: Three years of high school mathematics. Satisfies the Mathematical Approaches core requirement. Offered Spring term only.

180 Calculus and Analytic Geometry I  There are two main topics in the calculus for functions of one variable: differentiation and integration. This course focuses on differentiation starting with limits and continuity, then introduces the derivative, and applications of the derivative, in a variety of contexts. The course concludes with an introduction to integration. The central ideas are explored from the symbolic, graphic, numeric, and physical model points of view. Prerequisite: MATH 110, or its equivalent. Satisfies the Mathematical Approaches core requirement.

181 Calculus and Analytic Geometry II  This course is a continuation of MATH 180. It focuses on integration and its relation to differentiation. Topics include definite integrals, antiderivatives, the Fundamental Theorems of Calculus, applications of integration, sequences, and series. The central ideas are explored from the symbolic, graphic, numeric, and physical model points of view. Prerequisite: MATH 180 or its equivalent. Satisfies the Mathematical Approaches core requirement.

201 Introduction to Mathematics of Computer Science  An introduction to the mathematics underlying computer science. Topics include a review of basic set theory, logic (propositional and predicate), theorem proving techniques, logic as a method for representing information, equivalence relations, induction, combinatorics, graph theory, formal languages, and automata. Prerequisite: CSCI 161.

260 Intermediate Applied Statistics  This course covers the fundamentals of conducting statistical analyses, with particular emphasis on regression analysis and linear models. Students learn to use sophisticated computer software as a tool to analyze and interpret data. Prerequisite: MATH 160, MATH 181, PSYC 201, Advanced Placement Statistics, or the equivalent of one of these. Satisfies the Mathematical Approaches core requirement.

280 Multivariate Calculus  This course, a continuation of the calculus sequence that starts with MATH 180 and 181, is an introduction to the study of functions that have several variable inputs and/or outputs. The central ideas involving these functions are explored from the symbolic, the graphic, and the numeric points of view. Visualization and approximation, as well as local linearity continue as key themes in the course. Topics include vectors and the basic analytic geometry of three-space; the differential calculus of scalar-input, vector-output functions; the geometry of curves and surfaces; and the differential and integral calculus of vector-input, scalar-output functions. Prerequisite: MATH 181 or its equivalent. Satisfies the Mathematical Approaches core requirement.

290 Linear Algebra  This course is a study of the basic concepts of linear algebra, and includes an emphasis on developing techniques for proving theorems. Students explore systems of linear equations, matrices, vector spaces, bases, dimension, linear transformations, determinants, eigenvalues, change of basis, and matrix representations of linear transformations. Prerequisite: MATH 181. Satisfies the Mathematical Approaches core requirement. Also satisfies the Writing in the Discipline requirement.

295 Problem Seminar  No credit  In this class students and faculty discuss problems that cut across the boundaries of the standard courses and investigate general strategies of problem solving. Students are encouraged to participate in a national mathematics competition. This class meets one hour a week, is graded only on a pass/fail basis, is a 0 credit course, and can be repeated. Prerequisite: permission of instructor.

296 Problem Seminar in Mathematical Modeling  No credit  Students are given examples of problems from an annual international mathematical modeling contest. The students, in groups and with faculty mentoring, develop approaches to the problems. The students and faculty also discuss winning solutions to the problems. The students are expected to participate in the contest and give a presentation of their solution. The course meets once per week, is graded on a pass/fail basis, is a 0 credit course, and can be repeated. Prerequisite: MATH 280 and 290 or permission of the instructor.

300 Geometry  The course presents a rigorous treatment of the foundations of Euclidean geometry and an introduction to non-Euclidean geometry. The course emphasizes the axiomatic method and students are expected to do proofs. Students are introduced to the history of the discovery of non-Euclidean geometry. This course is especially recommended for prospective mathematics teachers. Satisfies the proof-based requirement in major contracts and the standard major. Credit for MATH 300 will not be granted to students who have completed HON 213. Prerequisites: MATH 181 and MATH 290 with a grade of C- or higher. Offered occasionally.

301 Differential Equations  Ordinary differential equations (ODEs) are first introduced in the calculus sequence. This course provides a deeper look at the theory of ODEs and the use of ODEs in modeling real-world phenomena. The course includes studies of first order ODEs (both linear and nonlinear), second and higher order linear ODEs, and first order systems of ODEs (both linear and nonlinear). Existence and uniqueness of solutions is discussed in each setting. Most topics are viewed from a variety of perspectives including graphical, numerical, and symbolic. Tools and concepts from linear algebra are used throughout the course. Other topics that may be covered include series solutions, difference equations, and dynamical systems. Prerequisite: MATH 280 and 290 or permission of the instructor. Offered every semester.

302 Partial Differential Equations  This course introduces partial differential equations, how they arise in certain physical situations, and methods of solving them. Topics of study include the heat equation, the wave equation, Laplace’s Equation, and Fourier Series with its applications to partial differential equations and boundary value problems. Additional topics may include Green’s Functions, the Fourier Transform, the method of characteristics, dispersive waves, and perturbation methods. Prerequisite: MATH 301 or equivalent. Offered Fall term only.

321/322 Advanced Calculus I, II  This course provides a rigorous study of calculus. The course begins with a study of the real numbers and then moves on to the core topics of limits, continuity, differentiation, integration, and series. In the first semester, the focus is on functions of one variable; in the second semester, the focus is on scalar- and vector-valued functions of several variables. Additional topics may include differential geometry of curves and surfaces or vector calculus. Satisfies the proof-based requirement in major contracts and standard major.
Prerequisite: MATH 280 and 290 or equivalents, MATH 321 for 322. MATH 321 offered Fall term only; MATH 322 offered Spring term only.

**335 Optimization** This course is about how to find the best, or at least good, solutions to large problems frequently arising in business, industrial, or scientific settings. Students learn how to model these problems mathematically, algorithms for finding solutions to them, and the theory behind why the algorithms work. Topics include the simplex method, duality theory, sensitivity analysis, and network models. The focus is on linear models and models with combinatorial structure, but some nonlinear models are considered as well. Optimization software is used frequently. Crosslisted as CSCI 335. Prerequisite: MATH 280, 290, CSCI 161. Offered every other year.

**352 Complex Analysis** The calculus of functions with complex numbers as inputs and outputs has surprising depth and richness. The basic theory of these functions is developed in this course. The standard topics of calculus (function, limit, continuity, derivative, integral, series) are explored in this new context of complex numbers leading to some powerful and beautiful results. Applications include using conformal mappings to solve boundary-value problems for Laplace’s equation. Satisfies the proof-based requirement in major contracts and the standard major. Prerequisite: MATH 280 and 290 or permission of the instructor. Offered every other year.

**360 Advanced Applied Statistics** This course covers advanced methods in applied statistics, beyond those of Mathematics 260. The emphasis is on applied aspects of generalized linear models, which provide a framework for analyzing some types of data for which ordinary linear models are not suitable. The analyses will be conducted using R, so students entering the course should already have a working knowledge of R. Topics other than generalized linear models are included as time allows, such as: time series analysis, categorical data analysis, and statistical graphics. Prerequisite: Math 260, the equivalent, or permission of the instructor. Offered every other year.

**375 Probability Theory and its Applications** This course provides an introduction to the standard topics of probability theory, including probability spaces, random variables and expectations, discrete and continuous distributions, generating functions, independence and dependence, special probability models, sampling distributions, laws of large numbers, and the central limit theorem. The course emphasizes modeling real-world phenomena throughout. Satisfies the proof-based requirement in the mathematics major. Prerequisite: MATH 280 and 290. Offered Fall term.

**376 Mathematical Statistics** This course introduces the theory of linear regression and uses it as a vehicle to investigate the mathematics behind applied statistics. The theory combines probability theory and linear algebra to arrive at commonly used results in statistics. The theory helps students understand the assumptions on which these results are based and decide what to do when these assumptions are not met, as it usually the case in applied statistics. Satisfies the proof-based requirement in the mathematics major. Prerequisite: Math 375 or equivalent. Offered Spring term.

**381 Differential Geometry** This course is an introduction to the application of calculus and linear algebra to the geometry of curves and surfaces. Topics include the geometry of curves, Frenet formulas, tangent planes, normal vectors and orientation, curvature, geodesics, metrics, and isometries. Additional topics may include the Gauss-Bonnet Theorem, minimal surfaces, calculus of variations, and hyperbolic geometry. After completion, students will have the background to begin studying further mathematical and theoretical physics topics such as Riemannian geometry, differential topology, general relativity, and gauge theory. Students will additionally develop their mathematical intuition and ability to use calculations and proofs to verify theorems and solve problems. Satisfies the proof-based requirement in the major contracts and the standard major. Prerequisites: MATH 280 and 290 and grade of C- or higher. Offered every other year.

**420 Advanced Topics in Mathematics** This course allows students to explore mathematical topics beyond those covered in the standard mathematics curriculum. Some semester-long topics include combinatorics, number theory, numerical analysis, and topology. See the department website for further information on topics to be offered during the next two years, including the prerequisites for each topic. The course may be repeated on a different topic for credit. Prerequisites vary with topic. Offered at least once a year.

**433/434 Abstract Algebra I, II** These courses present a rigorous treatment of modern algebra. The writing of proofs is emphasized. Modern applications of abstract algebra to problems in chemistry, art, and computer science show that this is a contemporary field in which important contributions are currently being made. Topics include groups, rings, integral domains, field theory, and the study of homomorphisms. Applications such as coding theory, public-key cryptography, crystallographic groups, and frieze groups may be covered. These are proof-based courses. Satisfies the proof-based requirement in major contracts and the standard major. Prerequisite: MATH 290 or permission of the instructor. MATH 433 offered Fall term only. MATH 434 offered Spring term only.

**471 Mathematical Modeling** A study of the process of mathematical modeling as well as specific deterministic (both discrete and continuous) and stochastic models. Certain mathematical topics such as graph theory are developed as needed. Prerequisite: MATH 280 and 290; MATH 375 recommended. Offered every other year.

**491/492 Senior Thesis** Credit, variable up to one unit. A senior thesis allows students to explore areas of mathematics that are new to them, to develop the skill of working independently on a project, and to synthesize and present a substantive work to the academic community. Thesis proposals are normally developed in consultation with the student’s research committee. This committee consists of the student’s faculty supervisor and two other faculty members. It is involved in the final evaluation of the project. The results are presented in a public seminar or written in a publishable form. Prerequisite: Completion of at least 4 upper-division (300-400 level) courses by the end of the junior year, or completion of the major by the end of the fall term of the senior year. The student should have a grade point average of at least 3.5 in all major courses numbered 300 or above.

**495/496 Independent Study** Credit variable up to 1 unit. Students wishing to study an academic area not covered by existing courses in the curriculum may take an independent study. Students should obtain a copy of the Independent Study Policy from the Office of the Registrar. Prerequisite: Junior or senior class standing and cumulative grade-point average of 3.0.

**Course Offerings in Computer Science**

**Note:** Students must obtain a grade of C- or better in all prerequisite courses.

**141 Programming for Natural Sciences** This course is an introduction to computer science and programming intended for students in the
natural sciences. The emphasis is on problems that might come up in a modern research laboratory. Assignments and exercises are done in Python programming language, which is favored by many natural scientists. The course teaches how to maintain an electronic notebook of calculations, to complement the traditional lab notebook. There is also a focus on standard data structures and good programming techniques, giving the student a solid grounding in modern programming techniques. Students who receive credit for CSCI 161 or 261 will not receive credit for 141. Prerequisite: MATH 110 or three years of high school math.

161 Introduction to Computer Science This course is an introduction to computer science and programming. The programming language Java is used to illustrate concepts in computer science. The course emphasizes the use of the computer as a problem-solving tool and the development of good programming style. CSCI 161 is the introductory course for students planning to major in computer science. A weekly laboratory is required. Prerequisite: three years of high school mathematics, MATH 110, or equivalent. Satisfies the Mathematical Approaches core requirement.

240 Software Engineering Students study the design and implementation of large software systems. Topics include design methodologies, programming team organization, and management, program verification and maintenance, design patterns and software engineering tools. Prerequisite: CSCI 261 with a grade of C- or better. Satisfies a writing requirement in major contracts.

250 Electronic Commerce An introduction to the technological issues in electronic commerce. Topics include networks, the Internet and World Wide Web, Web page design, Web page programming, transaction processing, HTTP, network and e-commerce security, electronic payment systems. Students build an online commerce site using client-side and server-side programming. Prerequisite: CSCI 261 or permission of instructor. Offered occasionally.

261 Computer Science II This course is a continuation of CSCI 161. It provides an introduction to the study of fundamental data structures and their associated algorithms. Students learn how to choose appropriate data structures and algorithms for particular problems. They learn about lists, stacks, queues, trees, sorting, searching, abstract data types, and object-oriented programming using an object-oriented programming language. A weekly laboratory is required. Prerequisite: CSCI 161 or permission of instructor. Satisfies the Mathematical Approaches core requirement.

281 Assembly Language and Computer Architecture Introduction to machine organization, machine structure, data representation, digital logic, and assembly language programming on a RISC based architecture. Prerequisite: CSCI 261. Offered frequently.

291 Programming Language Paradigms Declarative programming languages are an important alternative to languages (such as C, C++, and Java) that use the more familiar imperative programming paradigm. This course introduces the functional, dataflow, and logic programming paradigms in depth through assignments in the programming languages Haskell and Prolog. These languages are based on models of computation that are fundamentally different from the von Neumann model underlying imperative programming languages, and exposure to these new paradigms provides valuable perspective on programming and problem solving in general. Prerequisite: CSCI 261. Offered frequently.

295 Problem Seminar No credit Consideration of a diverse range of problems in computer science from problems in the design of correct and efficient algorithms and the implementation of data structures through problems in the theory of computation. Prerequisite: CSCI 261 recommended. Offered frequently.

315 Computer Graphics This course is an introduction to the process of generating images with a computer. The emphasis is on the design and use of graphical facilities for two- and three-dimensional graphics. Students study the mathematical theory underlying computer generated graphics, and will implement programs utilizing these techniques. The mathematical topics covered include rotations, translations, and perspective. The core pieces of the graphics pipeline used in current graphics hardware are studied. Prerequisite: CSCI 261. Offered Fall only.

325 Network Programming Computer networks have become a fundamental part of our everyday lives—used for everything from social networking to research and commerce. This course introduces the concepts behind modern computer networks and their implementation. It covers the software and hardware architecture of the internet, networking protocols like TCP and IP, how services like Email and the Web work, approaches for reliable and secure communication, and the details of both wired and wireless transmission. Programming exercises in Java and C++ will reinforce key concepts form the course. Prerequisite: CSCI 240. Offered frequently.

335 Optimization This course is about how to find the best—or at least good—solutions to large problems frequently arising in business, industrial, or scientific settings. Students learn how to model these problems mathematically, algorithms for finding solutions to them, and the theory behind why the algorithms work. Topics include the simplex method, duality theory, sensitivity analysis, and network models. The focus is on linear models and models with combinatorial structure, but some nonlinear models are considered as well. Optimization software is used frequently. Crosslisted as MATH 335. Prerequisite: MATH 280, 290, CSCI 161. Offered every other year.

361 Algorithms and Data Structures This is a course in advanced data structures, the algorithms needed to manipulate these data structures, proofs that the algorithms are correct, and a runtime analysis of the algorithms. Students study advanced data structures such as Red-Black Trees, 2-3 Trees, Heaps, and Graphs. Students also study algorithm design techniques including Greedy Algorithms, Divide and Conquer, Dynamic Programming, and Backtracking. They also learn about NP-Complete problems. Satisfies a writing requirement in major contracts. Prerequisite: CSCI 261, 281, and MATH 210. Offered frequently.

370 Theory of Computation An introduction to formal models of computers and computation. Topics include formal languages and automata theory, computability, decidability, and Church’s Thesis. Satisfies the proof-based requirement in major contracts and the standard major. Prerequisite: CSCI 361 and MATH 210. Offered occasionally.

425 Advanced Topics in Computer Science The topics are chosen each time the course is offered to meet the interests of students and instructors. Possible topics include computer architecture, computer modeling and simulation, networks, advanced graphics, and advanced artificial intelligence. Prerequisite: CSCI 361 and permission of the instructor. Offered occasionally.

431 Introduction to Artificial Intelligence This course introduces the student to the techniques of artificial intelligence. Students learn strategies for uninformed and informed (heuristic) search, knowledge representation, problem-solving, and machine learning. Additional topics may include motion planning, probabilistic reasoning, natural language understanding, and philosophical implications. Prerequisite: CSCI 361
(may be taken concurrently) and MATH 180, or permission of the instructor. Offered every other Fall.

440 Capstone in Computer Science  The senior capstone course provides computer science majors the opportunity to integrate the knowledge that they have gained from across the curriculum. Students are encouraged to work in teams, and can pursue either an applied or theoretical project. Students choosing applied projects participate in the identification of a problem, develop a project proposal outlining an approach to the problem’s solution, implement the proposed solution, and test or evaluate the result. Students choosing a theory project conduct original research (e.g., develop a new algorithm) and evaluate its strengths and limitations. Regardless of the choice of project, students document their work in the form of written reports and oral presentations. Prerequisite: Senior class standing, CSCI 240, CSCI 361, or permission of instructor. Offered Spring term only.

455 Principles of Database Systems  The management of data is one of the classical problems throughout the history of computing. This course centers around the fundamental concepts and theory that underpin the relational data model, which addresses numerous problems that plague data management, including data independence, consistency, information loss, and access performance. Course topics include the relational data model, database languages (e.g., SQL), relational database theory, database design (by decomposition), query execution, and considerations that affect system performance. Students design database schemas that effectively model an organization’s information requirements and write programs that require database integration. Students also gain insight through the analysis and implementation of influential data structures and algorithms that are commonly used in modern relational database systems. Prerequisite: CSCI 261; MATH 210 or instructor permission. Offered frequently.

460/461/462 Senior Project  0.5 or 1 unit  A practical computer software development experience to incorporate topics learned in advanced computer science courses with the tools and techniques for software development studied in the software engineering class. Students may enroll in either the one-semester, one-unit or the two-semester, 0.5 unit per semester sequence, but not both. Satisfies a writing requirement in major contracts and the standard major. Prerequisite: CSCI 240, with at least one upper-division computer science course in an area related to the project.

475 Operating Systems  One of the most complex software systems ever assembled, the modern operating system serves as the interface between the human and the machine. This course traces how the simple idea of “resource sharing” unravels into some of the most confounding problems and original breakthroughs in computer science. Course topics include process and thread management, input/output, CPU scheduling, synchronization primitives, memory management, and file systems. Students taking this course learn how to deal with the intricacies of low-level programming, parallel computing and synchronization problems, and also receive kernel-development experience through the design and implementation of various subsystems in a real operating system. The C programming language is used for homework assignments and projects. Offered frequently.

481 Compilers and Compiler Writing  Compilers take input programs written in a high-level language and generate equivalent programs in a low-level language. This course introduces the mathematical tools (formal languages and automata) necessary for recognizing and validating input programs and the computational techniques used to construct equivalent output programs. Students develop first-hand experience with the process by implementing a sample compiler as a course project. The tools and techniques introduced in this course can be applied across a wide range of applications. In particular, this course is valuable preparation for writing any program that needs to read and act on structured input files. Prerequisite: CSCI 281, 240, 281, and 361; CSCI 370 is recommended. Offered every other Spring term.

491/492 Senior Thesis  Credit, variable up to one unit  A senior thesis allows students to explore areas of computer science that are new to them, to develop the skill of working independently on a project, and to synthesize and present a substantial work to the academic community. Thesis proposals are normally developed in consultation with the student’s research committee. This committee consists of the student’s faculty supervisor and two other faculty members. It is involved in the final evaluation of the project. The results are presented in a public seminar or written in a publishable form. Prerequisite: completion of at least 4 upper-division courses by the end of the junior year, or completion of the major by the end of the fall term of the senior year. The student should have a grade point average of at least 3.5 in all major courses numbered 300 or above.

495/496 Independent Study  Credit, variable up to 1 unit  Students wishing to study an academic area not covered by existing courses in the curriculum may take an independent study. Students should obtain a copy of the Independent Study Policy from the Office of the Registrar. Prerequisite: junior or senior class standing and cumulative grade-point average of 3.0.

MOLECULAR BIOLOGY

Students interested in a degree in Biochemistry should consult the Chemistry section in this Bulletin.

Students interested in a degree in Molecular and Cellular Biology should consult the Biology section in this Bulletin.

MUSIC

Professor: Robert Hutchinson; Maria Sampen; Tanya Stambuk; Steven Zopfi
Associate Professor: Gwynne Brown; Gerard Morris, Interim Director; Dawn Padula
Artist in Residence: Alistair MacRae
Assistant Professor: Anna Wittstruck
Visiting Assistant Professor: Paul Harris
Affiliate Artist Faculty: Rodger Burnett; Noelle Burns; Catherine Case; Timothy Christie; Kimberly Davenport; Francine Floyd-Peterson; Karla Flygare; Edmund Hughes; Tracy Knoop; Christina Kowalski; David Krosschell; Abe Landa; Kathryn Lehmann; Jeffery Lund; Jennifer Nelson; Joyce Ramée; Sarah Samuelson; Stephen Schermer; Ryan Schultz; Judson Scott; Paul Thornock; Dan Williams; Fred Winkler

About the School

The School of Music serves a diverse population, offering course and performance opportunities for more than 400 students each term while providing a rich curriculum for approximately 84 majors and 35 minors. In addition, the School of Music offers cultural and intellectual enrichment to all Puget Sound students through music classes, ensembles,
Music

and performance study. It contributes to the cultural climate of the campus and surrounding community through frequent concerts, master classes, festivals, clinics, and recitals.

The University of Puget Sound is an accredited institutional member of the National Association of Schools of Music (NASM).

The Bachelor of Music is offered in Performance (keyboard, voice, and all standard orchestral instruments), in Music Education, and Elective Studies in Business.

The Bachelor of Arts with a major in Music is the traditional liberal arts degree providing broad, flexible coverage of cultural, historical, analytical, and creative issues in the field. Although we do not offer specific degree tracks in the following areas, students may construct programs of study that support preparation for graduate study in music theory, music history and musicology, composition, jazz, music librarianship, or other music-related fields. Students who wish to emphasize one of these areas in their studies should consult their advisor early in the sophomore year.

An audition on a major instrument or voice is required of all incoming students who wish to major in music or to be considered for music scholarships. A student need not be a music major to be awarded a music scholarship. Audition dates and times should be arranged through the Music Admission office.

Students may participate in a wide variety of performing groups, some of which require an audition for membership. The performing groups are listed under Course Offerings.

Applied Music

A four-year course of study in applied music through individual lessons is offered to students in keyboard, orchestral and band instruments, voice, and classical guitar. The choice of materials is left to the discretion of the instructors. Students accepted to the Performance Major take courses 161 through 462 (one-hour lessons); all others take courses 111 through 412 (thirty-minute lessons). Applied Music is not available for audit and may not be taken pass/fail. Students register for lessons through the School of Music office.

Applied Music Fees, per semester

Thirty-minute lesson, $175
Sixty-minute lesson, $350

Class lessons are available in piano and guitar for students who wish to elect this form of applied music instruction or who, in the judgment of the appropriate applied music chair, find the experience necessary to qualify for private instruction.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major

1. Entrance audition to demonstrate appropriate background and potential for formal acceptance into the School of Music.
2. Completion of 32 units for the Bachelor of Arts or Bachelor of Music degree.
3. Music majors must attain, maintain membership in, attend, and be registered for credit in the appropriate large university ensemble (band, orchestra, choir or Accompanying Ensemble; Jazz Orchestra for pianists and guitarists) during all semesters in which they are enrolled. Music majors selecting a wind or percussion instrument as their principal performing medium are required to participate in the Wind Ensemble, Concert Band, or Symphony Orchestra, as assigned; string instruments in the Symphony Orchestra; voice students in the Adelphian Concert Choir, Chorale, or the Dorian Singers, as assigned; keyboard majors in a minimum of the first four semesters in Accompanying Ensemble; and guitar students in any of the above ensembles. Students may elect to perform in additional ensembles if they desire and are qualified.
4. Each major must pass the Keyboard Musicianship Examination, preferably during the sophomore year. Typically, this requirement is completed in the two-year music theory sequence.
5. Music majors are required to be registered for applied music every semester with the exception of students in the Bachelor of Music with Elective Studies in Business track, who are required to be registered for applied music through the junior year.
6. Recital requirements for Bachelor of Music candidates majoring in Performance are a minimum of one-half of a formal recital or three noon recital appearances in the principal performing medium in the junior year and a full recital demonstrating a high level of musicianship in performance in the principal performing medium in the senior year. Other majors must perform in one noon recital at a minimum during both their junior and senior years.
7. Continuation in all music major degrees is based on ongoing assessment by the faculty of a student’s progress in music theory, music history, ensembles, music education methods, and applied music. To advance to the junior year as well as to graduate in the major, students must have a 2.3 overall grade point average and a 2.5 music grade point average. Students also must demonstrate excellence in the jury of their major performance instrument in the spring of the sophomore year. Students who are music education majors and/or transfer students will also have a review of their academic performance progress in the junior year.
8. Upon transcript review, transfer students may be required to take placement examinations in music theory and music history prior to registration; Music Education transfer students are required to complete MUS 393 or an equivalent one-semester, in-school teaching experience.
9. Each semester in residence all music majors register for Recital Attendance (109/309), a non-credit course. All music majors are expected to fulfill the recital attendance requirement by attending a prescribed number of concerts and recitals.

Note

Music majors and minors must receive a grade of C- or better in all courses required by the School of Music. A course in which the student receives less than a C- will not satisfy the graduation requirements of the School of Music. Music Education majors must receive a grade of C or better in all required courses to fulfill Washington State teacher certification requirements. For transfer students, courses more than 10 years old on their transcripts cannot be included toward a major or minor offered by the School of Music.

Bachelor of Music in Performance

Keyboard Emphasis (Piano, Organ)

1. Four units Theory: MUS 101/103, 102/104, 201/203, 202/204;
2. Four units Music History to include MUS 230, 231, 333, and 493;
3. One-half unit Conducting: MUS 291 or 293;
4. Seven units Applied Music: 6 units of MUS 161 through 462 (major instrument), MUS 353 (Pedagogy and Literature), MUS 168 or 368...
Music Education is a prerequisite in the Master of Arts in Teaching degree. Students earn both a Bachelor of Music in Music Education and a Master of Arts in Teaching. The Bachelor of Music in Music Education is a prerequisite in the Master of Arts in Teaching degree with certification in music. Application to the MAT takes place in the senior year. Details are available from the School of Education.

An endorsement in music requires completion of the major. Licensed, practicing teachers who wish to apply for completion of music certification, which includes completion of all music education major courses, should send a letter of application outlining previous certification, experience, and goals, and a copy of their Washington teaching license. All unlicensed teacher applicants will be expected to complete the music education major and the fifth-year MAT program for teacher certification in music.

**Instrumental and General Emphasis**
1. Four units Music Theory to include 101/103, 102/104, 201/203, and 202/204;
2. Four units Music History to include 230, 231, 333, and 493;
3. Six and three-quarter units Music Education to include MUS 240, 241, 242, 243, 244, 245, 246, 247, 291, 390, 392, 393, and 394;
4. Two units Applied Music 111 through 412 on major instrument (Strings, Winds, Keyboard, or Percussion);
5. Participation for credit in a performing group each semester as specified under Requirements for the Major; for music education students whose primary instrument is keyboard, this requirement includes Accompanying Ensemble (MUS 282) in the first four semesters;
6. Completing the performance requirements as specified under Requirements for the Major;
7. Recital attendance each semester;
8. EDU 419 and 420 (prerequisites for the MAT) recommended as electives.

**Choral and General Emphasis**
1. Four units Music Theory to include 101/103, 102/104, 201/203, and 202/204;
2. Four units Music History to include 230, 231, 333, and 493;
3. Six and one-half units Music Education to include MUS 240, 241, 242, 245, 247, 291, 390, 392, 393, and 394;
4. MUS 235 (Diction);
5. Two units Applied Music 111 through 412 (Voice or Piano);
6. Participation for credit in a performing group each semester as specified under Requirements for the Major; for music education students whose primary instrument is keyboard, this requirement includes Accompanying Ensemble (MUS 282) in the first four semesters;
7. Completing the performance requirements as specified under Requirements for the Major;
8. Recital attendance each semester;
9. EDU 419 and 420 (prerequisites for the MAT) recommended as electives.

Keyboard or other instrumental majors enrolled in the music education choral/general degree program require four semesters of applied voice. A student who desires a comprehensive program (demonstrated experience in both vocal and instrumental music) must complete an application process during the first semester of the sophomore year. If the student is accepted, a program will be designed to fulfill the instrumental, choral, and general degree requirements. The comprehensive music education major requires four semesters of applied voice.

**Bachelor of Music with Elective Studies in Business**
1. Four units Theory: MUS 101/103, 102/104, 201/203, and 202/204;
2. Four units Music History to include: MUS 230, 231, 333, and 493;
3. One-half unit Conducting: MUS 291 or 293;
4. Two units Music Business: MUS 341 and INTN 497 or MUS 498;
5. Four units Business: BUS 205, 305, 310, and 380. ECON 101 is a prerequisite for BUS 310 and should be taken to satisfy the Social Scientific Approaches core requirement; MATH 160 is recommended but not required (satisfies the Mathematical Approaches core requirement);
6. One and a half units Applied Music: MUS 111 through 312 (major instrument);
7. Participation for credit in a performing group each semester as specified under Requirements for the Major, which may be waived during the semesters a student enrolls in the required internship. For students whose primary instrument is keyboard, this requirement includes Accompanying Ensemble (MUS 282) in the first four semesters.
8. Completing the performance requirements as specified under Requirements for the Major through the junior year;
9. Recital attendance each semester.

Bachelor of Arts with a Major in Music
1. Four units Music Theory to include MUS 101/103, 102/104, 201/203, 202/204;
2. Four units Music History to include MUS 230, 231, 333, 493;
3. Enrollment in applied music (primary instrument) during every semester that a student is in residence, with at least one semester at the 400 level, totaling a minimum of 2 units;
4. Participation for credit in a performing group each semester as specified under Requirements for the Major; for students whose primary instrument is keyboard, this requirement includes Accompanying Ensemble (MUS 282) in the first four semesters;
5. Completing the performance requirements as specified under Requirements for the Major;
6. Recital attendance each semester.
7. Students must fulfill the Artistic Approaches core requirement with a course outside of music.

Students who are planning to study musicology or composition at the graduate level are advised to include the following courses in their programs:

**Music History:** MUS 494, (Music History Thesis) and at least one additional course in Music History and Literature.

**Composition:** At least three units chosen from the following courses: MUS 301, Form and Analysis; MUS 401, Counterpoint; MUS 402, Orchestration; MUS 337, Composition; and MUS 437, Advanced Composition.

Minor in Music
1. Two units Theory: MUS 101/103, 102/104;
2. Two units History from MUS 100 (first or second year only), 105, 126, 220, 221, 222, 223, 224, 225, 226, 230, 231, 333, 493;
3. One unit Applied Music: MUS 111 through 212;
4. One unit Music elective (MUS 100 may be taken only in the first or second year) or HUM 315 or 316;
5. Each Music minor shall register for credit and maintain membership for at least four semesters in the large university music ensemble (band, orchestra, choir or Accompanying Ensemble; Jazz Orchestra for pianists and guitarists) appropriate to the student’s major instrument and ability.

Major Courses by Area

**Music Theory**
101  Aural Skills 1
102  Aural Skills 2
103  Music Theory 1
104  Music Theory 2
201  Aural Skills 3
202  Aural Skills 4
203  Music Theory 3
204  Music Theory 4
301  Form and Analysis
335  Jazz Theory and Improvisation
337/437  Composition/Advanced Composition
401  Counterpoint
402  Orchestration

**Music History and Literature**
100  Survey of Western Music
105  Music in the United States
126  History of Rock Music
220  The Broadway Musical
221  Jazz History
222  Music of the World’s Peoples
223  Women in Music
224  The Age of Haydn, Mozart, and Beethoven
225  Romanticism in Music
226  Twentieth Century Music Through Film
230  Western Music from Antiquity to the End of the Baroque Era (c. 500 B.C.E. to 1750)
231  Western Music of the Classic Era to the Birth of Modernism (1750-1914)
333  Western and World Music Since 1914
493  Special Topics in Music History
494  Music History Thesis

**Music Education**
240  Instrumental Techniques: Brass
241  Instrumental Techniques: Percussion
242  Instrumental Techniques: Single Reeds, Flute
243  Instrumental Techniques: Double Reeds
244  Instrumental Techniques: Lower Strings
245  Instrumental Techniques: Upper Strings
246  Vocal Techniques
247  Techniques of Accompanying
327  Practicum in Music Education/Music Business
393  Introduction to Secondary Music Education
394  Introduction to Elementary Music Education

**Pedagogy and Literature**
235/236  Diction for Singers I, II
353  Piano Pedagogy and Literature
354  Collaborative Piano
355  String Pedagogy
356  Vocal Pedagogy

**Conducting**
291  Beginning Instrumental Conducting and Rehearsal Techniques
293  Beginning Choral Conducting and Rehearsal Techniques
390  Advanced Choral Conducting and Rehearsal Techniques
392  Advanced Instrumental Conducting and Rehearsal Techniques
Music Business
327 Practicum in Music Education/Music Business
341 Seminar in Music Business
498 Music Business Internship

Applied Music
111 – 412 Applied Music (thirty-minute lesson)
161 – 462 Applied Music (sixty-minute lesson)
113 Class Guitar, Beginning Level
114 Class Guitar, Intermediate Level
115 Acoustic Roots Guitar I
116 Acoustic Roots Guitar II
168/368 Instrumental Chamber Music
205 Class Piano

Performing Groups (activity units)
119/319 Opera Theater
170/270/370 Wind Ensemble
172/272/372 Adelphian Concert Choir
174/274/374 Symphony Orchestra
176/276/376 Chorale
178/278/378 Voci d’Amici
180/280/380 Dorian Singers
182/282/382 Accompanying Ensemble
184/284/384 Puget Sound Jazz Orchestra
188/288/388 Concert Band

Courses Especially Suitable for Non-Majors
All Performing Groups (no audition required for Chorale and Concert Band)
Applied Music, including classes (subject to audition by instructor and availability)
MUS 100, 105, 126, 220, 221, 222, 223, 224, 225, 226, 230 and 341.

Course Offerings
Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI1 127 “Why Beethoven?”
SSI1/SSI2 139 The Third Wave: Rock After the Beatles
SSI1/SSI2 149 Transgressive Bodies
SSI2 178 George Gershwin
SSI1/SSI2 192 Elvis and MJ: The Image of the Kings

Other courses offered by School of Music faculty. See Connections in the Core Curriculum section of this Bulletin for course description.

HUM 305 Modernization and Modernism
Satisfies the Connections core requirement.
HUM 315 Drama, Film, and the Musical Stage
Satisfies the Connections core requirement.
HUM 316 The Lord of The Ring: Wagner’s Ring of the Nibelung
Satisfies the Connections core requirement.

100 Survey of Western Music
A survey of Western music from the Middle Ages to the present. Through study of music literature from historical periods and the cultivation of critical listening skills, students develop an understanding of musical styles and structures and the ability to listen perceptively to music. Includes attendance of concert performances either on or off campus. Satisfies the Artistic Approaches core requirement.

101 Aural Skills 1
Development of skills in sight singing, melodic and harmonic dictation, transcription, and keyboard harmony to improve overall musicianship and comprehension of music theory and literature. Must be taken concurrently with MUS 103. Offered fall term.

102 Aural Skills 2
Continuation of MUS 101, including further diatonic intervals and more complicated rhythms in sight singing and melodic dictation, and all diatonic harmonies in harmonic dictation. Must be taken concurrently with MUS 104. Prerequisite: MUS101/103 or advanced placement by examination. Offered spring term.

103 Music Theory 1
Introduction to the fundamentals of music theory: scales, key signatures, intervals, triads, seventh chords, harmonic function and progression, four-part voice leading, and period forms. Creation of an original composition. Must be taken concurrently with MUS 101. Offered fall term only.

104 Music Theory 2
Study of non-chord tones, secondary chords, and modulation through analysis and four-part writing. Creation of original composition. Must be taken concurrently with MUS 102. Prerequisite: MUS101/103 or advanced placement by examination. Offered spring term only.

105 Music in the United States
This course surveys the rich musical heritage of the United States from the Colonial Period to the present. It explores many of the musical traditions whose collective heterogeneity defines a country of diverse musical narratives. Musical styles and genres explored include art music, concert music, popular music, musical theater, sacred music, country, folk, jazz, and rock. Satisfies the Artistic Approaches requirement. Offered fall term.

109/309 Recital Attendance
No credit Music majors attend 10 concerts, on or off campus, and submit printed programs from these concerts at the end of the semester. Pass/fail grading only.

111/112, 211/212, 311/312, 411/412 Applied Music
0.25 unit each For Applied Music students other than Performance majors. One half-hour lesson per week is required. The choice of materials is left to the discretion of the instructors in each applied music area. In the jury examination given at the end of the term, students are required to perform excerpts from the material studied. Registration for lessons is administered through the Music office. May be repeated for credit. Cannot be audited or taken pass/fail. Prerequisite: previous music experience; audition required.

113 Class Guitar 1
0.25 unit Designed for students with minimal guitar background. The course deals with music notation, scales, chords, and fundamental techniques of playing the guitar. May be repeated for credit; open to non-majors. 114 Class Guitar 2
0.25 unit Continuation of MUS 113. Basic repertoire is developed as well as more advanced techniques. May be repeated for credit; open to non-majors. Prerequisite: MUS 113 or permission of instructor.

115 Acoustic Roots Guitar 1: Celtic to Bluegrass
0.25 activity credit
This course provides a practical approach to learning how to play a variety of American “acoustic roots” guitar styles, all using a flatpick and based on Celtic-inspired fiddle tunes. The course progresses from Celtic through Appalachian/old-timey, old country, and bluegrass styles with a focus on rhythm and backup skills as much as lead playing techniques. Tunes are taught in the traditional manner: listening and repeating tune segments over and over (and over) until the song can be played by
memory. The course also covers basic guitar maintenance techniques such as proper tuning, restringing, and setup, and covers some of the wide variety of steel-string guitar body styles and construction methods. Offered fall term.

116 Acoustic Roots Guitar 2: Blues to Swing to Rockabilly 0.25 activity credit This course provides a practical, hands-on approach to learning how to play a variety of American guitar styles (using the acoustic steel-string guitar), including Delta and Piedmont 12-bar blues, “crawling” behind standard swing-era songs, and finishing up with a bit of rockabilly. The techniques include 2- and 3-finger fingerpicking, Freddie Green-style 4-to-the-bar-backup, simple chord soloing, and Carl Perkins/Scotty Moore/James Burton styles. The course covers how to read and play along with a basic chord chart, as well as basic chord theory. Tunes are taught in the traditional manner: listening and repeating tune segments over and over (and over) the song can be played by memory. The course also focuses on ear training-hearing the changes in the song without using written charts or scores, in addition to covering basic guitar maintenance techniques such as proper tuning, restringing, and setup. Finally, some of the wide variety of steel-string guitar body styles and construction methods are demonstrated. Offered spring term.

119/319 Opera Theater 0/0.25 activity unit The preparation and performance of works for the musical stage. Audition required. May be repeated for credit. Pass-fail grading. Offered spring term.

123 Discovering Music Discovering Music is for those who love music, are interested in both music theory and in practice, and might pursue further studies in music at the college level, but whose background might not have prepared them to jump right into the music theory and aural skills sequence (MUS 101/103). Students discover music through active engagement including performance, improvisation, composition, conducting and other movement, close listening, leadership exercises, concertgoing, reading and discussion. Discovering Music invites students to consider and try on the actions of the conductor, who leads others with a clearly communicated vision, as well as those of the individual musician, whose skill and self-discipline bring music to life. Satisfies the Artistic Approaches core requirement.

126 History of Rock Music An historical survey of the history of rock music from its origins in the 1950s through to the present, focusing on its musical elements of style, its principal innovators, the role of technology, and its sociology. Through extensive use of recorded works, this course develops critical listening skills, understanding, and appreciation of rock. Satisfies the Artistic Approaches core requirement. Offered spring term.

161/162, 261/262, 361/362, 461/462 Applied Music, Performance Majors 0.5 - 1 unit each Designed for Applied Music students admitted to the Performance degree or other Applied Music students with written permission from the Director of the School of Music. One hour-long or two half-hour lessons per week required. May be repeated for credit. Registration for lessons is through the Music office prior to university registration. Cannot be audited or taken pass/fail.

168/368 Instrumental Chamber Music 0.5 unit Music for small instrumental ensembles. May be repeated for credit. Prerequisite: permission of instructor.

170/270/370 Wind Ensemble 0/0.5/0.5 activity unit Prepares and performs music of many styles. Makes public appearances throughout the year and tours in the Pacific Northwest. Audition required. May be repeated for credit. Pass-fail grading only.

172/272/372 Adelphian Concert Choir 0/0.5/0.5 activity unit Prepares and performs varied repertoire for mixed voices. Makes public appearances throughout the year and tours in the Pacific Northwest. Audition required. May be repeated for credit. Pass-fail grading only.

174/274/374 Symphony Orchestra 0/0.5/0.5 activity unit Preparation and performance of works for symphony orchestra. Makes public appearances throughout the year. Tours in the Pacific Northwest. Audition required. May be repeated for credit. Pass-fail grading only.

176/276/376 Chorale 0/0.5/0.5 activity unit An all-university group for mixed voices. Local performances are scheduled each semester. Audition not required. May be repeated for credit. Pass-fail grading only.

178/278/378 Voci d’Amici 0/0.25/0.25 activity unit Selected by audition from the Adelphian Concert Choir, Voci d’Amici is a vocal chamber ensemble dedicated to the performance of repertoire from all musical epochs. The ensemble is self-conducted. May be repeated for credit. Pass-fail grading only. Offered Fall term only.

180/280/380 Dorian Singers 0/0.5/0.5 activity unit An auditioned ensemble of women singing both accompanied and a capella literature and appearing in concert several times each semester. Audition required. May be repeated for credit. Pass-fail grading only.

182/282/382 Accompanying Ensemble 0/0.5/0.5 activity unit This course familiarizes pianists with the skills required of a collaborative/ensemble pianist. Depending on the semester, music is selected from song literature, opera, choral, instrumental, and concerto accompaniments. Discussion of specific skills and techniques required for effective collaboration and accompaniment are emphasized. The course focus is primarily on skill-building and practical experience in rehearsal and performance. Students focus on sight-reading, transposition, navigating orchestral reductions, reading choral scores, and coaching of student performances. Pass/fail grading only.

184/284/384 Puget Sound Jazz Orchestra 0/0.25/0.25 activity unit Prepares and performs music of many jazz styles for both large bands and small combos. The jazz band plays concerts throughout the year. Audition required. May be repeated for credit. Pass-fail grading only.

188/288/388 Concert Band 0/0.25/0.25 activity unit An all-university ensemble for brass, woodwind, and percussion. Performs on campus each semester. Audition not required. May be repeated for credit. Pass-fail grading only.

201 Aural Skills 3 0.5 unit Chromatic exercises in sight singing, melodic and harmonic dictation, and keyboard harmony to improve overall musicianship and comprehension of music theory and literature. Must be taken concurrently with MUS 203. Prerequisites: MUS 102 / 104 or advanced placement by examination. Offered fall term.

202 Aural Skills 4 0.5 unit Singing and keyboard exercises in counterpoint, jazz theory, and twentieth-century techniques. Dictation of contrapuntal examples, jazz scales and chords, and twentieth-century sonorities and pitch-sets. Harmonic dictation of all chromatic harmonies and modulations. Must be taken concurrently with MUS 204. Prerequisites: MUS 201 / 203 or advanced placement by examination. Offered spring term.

203 Music Theory 3 0.5 unit Chromatic exercises in sight singing, melodic and harmonic dictation, and keyboard harmony to improve overall musicianship and comprehension of music theory and literature. Must be taken concurrently with MUS 201. Prerequisites: MUS 102/104 or advanced placement by examination. Offered fall term.
204 Music Theory 4 0.5 unit  Study of sixteenth- and eighteenth-century counterpoint through composition and analysis; introductory jazz theory; and twentieth-century compositional techniques through analysis of selected literature. Must be taken concurrently with MUS 202. Prerequisite: MUS 201 / 203 or advanced placement by examination. Offered spring term.

205 Class Piano 0.25 unit  Designed for students who have had some prior instruction on the piano. The course focuses on improving music reading ability, harmonizing melodies, improvisation, basic musicianship, and performance of repertoire from the advanced beginner/early intermediate level literature. Offered fall term.

220 The Broadway Musical A historical survey that focuses on the principal developments and creators of the modern Broadway musical from the 1920s to the present. Through a study of representative musicals the course emphasizes the relationship between music and drama, critical, analytical, authenticity, and social issues, the creative and collaborative process, and adaptation. Satisfies the Artistic Approaches core requirement. Offered every other year. Offered spring 2019.

221 Jazz History A historical survey that focuses on the principal elements and styles of jazz, its trends and innovators, and its sociology. The course is designed to develop a critical awareness, understanding, and appreciation of jazz. Satisfies the Artistic Approaches core requirement. Offered every other year. Offered spring 2019.

222 Music of the World’s Peoples An introductory survey of the music from world cultures as varied as African, Indonesian, South American, Caribbean, European, Asian, Celtic, and the United States. Students are introduced to the methods of ethnomusicology and to the viewpoint that music is a human activity—a product of its historical, social, and cultural context. Satisfies the Artistic Approaches core requirement. Offered spring term.

223 Women in Music This course critically explores women’s contributions to music in a variety of roles and cultural contexts. The first unit surveys the life and works of a diverse range of female composers in the Western art music tradition. The second considers the often overlooked but crucial roles that women play in the musical world as teachers, administrators, patrons, and scholars. The final unit considers how particular well-known women perform music and gender, including musicians who have been politically and/or nationally significant figures in Egypt, South Africa, and Russia. An important theme throughout the course is how (and whether) women’s contributions to music are addressed in music scholarship and popular media. Satisfies the Artistic Approaches core requirement. Satisfies the Knowledge, Identity, and Power requirement. Offered spring term.

224 The Age of Haydn, Mozart, and Beethoven An introductory survey of music of the Classical era (1750-1825). Students explore the historical and stylistic developments of this period through the life and works of the period’s three masters, Haydn, Mozart, and Beethoven. Satisfies the Artistic Approaches core requirement. Offered occasionally.

225 Romanticism in Music An introductory survey of music in the Romantic era (1815-1900) beginning with the late works of Beethoven and Schubert and ending with the works of Mahler and Debussy at the turn of the twentieth century. Students explore historical and stylistic developments through the critical study of representative works from the period. Major genres, the lives of the composers, and the creative process are examined, and the importance of the artist for society is considered. Satisfies the Artistic Approaches core requirement. Offered occasionally.

226 Twentieth-Century Music Through Film This introductory survey introduces students to twentieth-century European and North American classical music by exploring the use of major twentieth-century musical styles and individual works in movies. Students develop analytical tools to understand and communicate effectively about a wide range of compositional languages, while also considering how particular styles and compositions are put into dialogue with a film’s visual, narrative, and affective content. Composers who wrote specifically for movies, such as Aaron Copland, Bernard Herrmann, and Philip Glass, are considered alongside those such as Béla Bartók and György Ligeti, whose works were appropriated by directors. Satisfies the Artistic Approaches core requirement. Prerequisite: Students who have MUS 226 transfer credit may not take this course. Students who have taken or will take MUS 333 should speak to the instructor before registering for MUS 226. Offered occasionally.

230 Western Music from Antiquity to the End of the Baroque Era (c. 500 B.C.E. to 1750) Following an introduction to the meanings and purposes of music history and how it is conceived and studied, the course surveys the history of Western music and musical style from its foundations in ancient Greece through the death of Bach and Handel at the end of the Baroque era. Students explore such topics as the origins and development of sacred and secular monophonic and polyphonic music in the Middle Ages and the continuing development of vocal and instrumental styles, genres, and forms in the Renaissance and Baroque eras. The focus of each class is on detailed historical, analytical, and critical study of representative works and the issues they raise through lectures, class discussions, readings, listening, and writing assignments. Satisfies the Artistic Approaches core requirement. Offered fall term.

231 Western Music from the Classic Era to the Birth of Modernism (1750-1914) A survey of music history that traces the development of Western musical styles, genres, and ideas from the late-eighteenth classical style of Haydn and Mozart, nineteenth-century Romanticism from Beethoven to Mahler, and the birth of Modernism in the late nineteenth and early twentieth centuries. Topics include the development of major instrumental and vocal genres, including the symphony, string quartet, concerto, the solo sonata and character piece for piano, the “Lied” and song cycle, and opera. The focus of each class is on detailed historical, analytical, and critical study of representative works by major figures and the issues they raise through lectures, class discussions, readings, listening, and writing assignments. Offered spring term.

235 Diction for Singers I 0.5 unit  An introduction to the symbols of the International Phonetic Alphabet and how to use those symbols in the study of languages. The course also studies and applies the basic rules of English and Italian diction for singers through oral drills and transcription of song texts. Offered every other year.

236 Diction for Singers II 0.5 unit  Devoted to the study of German and French diction for singers. After introducing the sounds of each language, the class studies and applies the rules of pronunciation through oral drills and transcription of song texts. Offered every other year.

240, 241, 242, 243, 244, 245 Instrumental Techniques 0.25 unit each  Class instruction in playing and teaching instrumental music at a beginning level in preparation for teaching in schools. Study of beginning level methods, materials, and literature for solo and ensemble instruments are included. Prerequisite: MUS 102/104.
240  Brass  Must be taken concurrently with:
241  Percussion  Spring term
242  Single Reeds, Flute  Fall term
243  Double Reeds  Spring term
244  Lower Strings  MUS 394  Fall term
245  Upper Strings  MUS 393  Spring term

Please see degree plans for course sequences.

246  Vocal Techniques  0.25 unit  This course provides the basics of vocal technique, diction and pedagogy for the music educator. Emphasis is placed on the development of basic vocal skills and pedagogical concepts leading to a better understanding of the voice. Specific problems often encountered by choral directors are also discussed. Co-requisite: To be taken concurrently with MUS 291 or 293. Offered every other year.

247  Techniques of Accompanying  0.50 unit  Class instruction in accompanying skills for the music classroom on piano and guitar. Study focuses on beginning level methods, materials, and literature; ensemble playing in piano duets and as an instrumental and/or vocal accompanist; improvisational skills, score reading, and further development of chord reading skills. Prerequisite: basic piano skills (keyboard skills are assessed prior to enrolling) and permission of instructor. Offered spring term.

250  Music Recording Techniques  This course provides students with knowledge of and hands-on practice with the basics of working in a recording studio, including acquiring knowledge of studio set up and the essentials of recording music digitally. Prerequisite: MUS 101 and 103. Offered fall term.

291  Beginning Instrumental Conducting and Rehearsal Techniques  0.5 unit  An introduction to the basic elements of instrumental conducting, including: basic conducting technique, preparatory beats, patterns, cues, fermatas, and 4-part score reading. Class time is spent in lecture, discussion, demonstration, and skill refinement. Students conduct an ensemble consisting of class members during regular videotaped conducting labs, with formal and informal evaluation given by the instructor. Offered fall term.

293  Beginning Choral Conducting and Rehearsal Techniques  0.5 unit  An introduction to the basic elements of choral conducting, including: basic conducting technique, preparatory beats, patterns, cues, fermatas, and 4-part score reading. Class time is spent in lecture, discussion, demonstration, and skill refinement. Students conduct an ensemble consisting of class members during regular videotaped conducting labs, with formal and informal evaluation given by the instructor. Offered fall term.

301  Form and Analysis  An exploration of musical language and form, with emphasis on the primary forms of the Baroque, Classical, and Romantic eras, and the melodic and harmonic language of music of the twentieth century. Topics include the Baroque dance suite, sonata form, rondo form, continuous and sectional variations, concerto, pitch-class set theory, and twelve-tone operations, with focus on detailed aural and written analysis. Prerequisites: MUS 202/204 or permission of the instructor. Offered every other year.

327  Practicum in Music Education/Music Business  Credit, variable up to 1 unit  An on-site experience in a school music classroom or music business, providing the student with pre-professional opportunities to observe and participate in school music and music business programs. Term project and journal required. Applications are due into the School of Music early in the semester preceding registration. May be repeated for credit if total credit will not exceed one unit. Prerequisite: permission of instructor.

333  Western and World Music Since 1914  A survey of music history of the classical and popular traditions from World War I to the present and an introduction to world music. Topics include the legacy of modernism, neoclassicism, the post World War II avant-garde, postmodernism, jazz and popular music, and representative non-Western traditions. The class includes detailed analytical, historical, and critical study of representative works through lectures, class discussions, writing assignments, and directed listening. Prerequisite: MUS 201/203, 230, and 231, or permission of instructor. Offered fall term.

335  Jazz Theory and Improvisation  An introduction to jazz theory and improvisation though the study of selected compositions with emphasis on musical analysis, transcription, and performance. Laboratory required. Prerequisites: MUS 202/204 or permission of instructor. Offered fall term.

337  Composition  0.5 unit  An introduction to compositional technique through the study of musical form, style, performing forces (including electronic media), text setting, twentieth-century compositional techniques, and analysis of selected compositions. May be repeated for up to 1.5 units. Prerequisites: MUS 102/104 and permission of instructor.

341  Seminar in Music Business  An introduction to the music industry and to the treatment of music as a commodity. Topics include music publishing, licensing, copyright and intellectual property, artist management, concert promotion, music unions, merchandising, arts administration, the non-profit sector, the digital revolution, and the recording industry. Offered every other year.

353  Piano Pedagogy and Literature  0.5 unit  Basic concepts of piano techniques and musicianship, and their demonstration in the teaching studio. Selection of teaching materials from method courses for beginning students to repertoire for advanced pianists. Emphasis on creating teaching situations, student demonstration. Survey of well-known piano literature for interpretive guidelines and pedagogical application. Offered occasionally.

355  String Pedagogy  0.5 unit  An introduction to the pedagogy of string teaching (violin, viola, ‘cello, and double bass) as it applies to individual and small group instruction (i.e., the private studio.) Prerequisite: One year of string instrument instruction at the college level or permission of instructor. Offered every other year.

356  Vocal Pedagogy  0.5 unit  A study of the singing voice. Includes the structures, mechanics, and acoustics involved in the production of a sung tone, as well as practical methods for developing the voice and correcting vocal faults. Offered every other year.

390  Advanced Choral Conducting and Rehearsal Techniques  Advanced study of choral conducting techniques, emphasizing strategies for choral pedagogy, vocal warm-ups, advanced meters, and recitative. Class time is spent in lecture, discussion, demonstration, and skill refinement. Students conduct an ensemble consisting of class members during regular videotaped conducting labs, with formal and informal evaluation given by the instructor. Once a week, students conduct a lab ensemble consisting of music education majors, providing an opportunity for the exploration of choral repertoire and rehearsal techniques. The course also provides opportunities to explore choral repertoire and rehearsal techniques. Offered spring term.
492 Advanced Instrumental Conducting and Rehearsal Techniques
Advanced study of instrumental conducting techniques, emphasizing strategies for instrumental pedagogy, transposition, score reading, score study, analysis, and aural translation of the printed page. Class time is spent in lecture, discussion, demonstration, and skill refinement. Students conduct an ensemble consisting of class members during regular videotaped conducting labs, with formal and informal evaluation given by the instructor. The course also provides opportunities to explore band, orchestra, and jazz repertoire and rehearsal techniques. The culminating exam includes conducting a university ensemble in rehearsal and concert. Offered spring term.

493 Introduction to Secondary Music Education
An introduction to foundations of music education with emphasis on junior high and high school band, choir, orchestra, and jazz programs. This course explores theories of learning as applied to music and of teaching as a career. Topics include development of skills in curriculum building, lesson planning, comprehensive musicianship, reflective teaching and inquiry in music education. Practicum teaching and observing within school music programs is included throughout the semester. Satisfies the Knowledge, Identity, and Power graduation requirement. Prerequisite: MUS 390 or 392.

494 Music History Thesis
Guided thesis in music history. Topic and scope to be arranged between the student and faculty thesis advisor. Prerequisites: MUS 230, 231, and 493.

495/496 Independent Study
Credit arranged. Independent study in specific areas; written proposals required. May be repeated for credit. Prerequisite: permission of the instructor and the Director of the School of Music.

498 Music Business Internship
Designed to provide music business students with on-the-job experience with participating businesses. The student works with a faculty advisor to develop an individualized learning plan that connects the internship site experience to study in the major. The learning plan includes required reading, writing assignments, and a culminating project or paper. Registration is through Career and Employment Services. Prerequisite: MUS 341, permission of Director of the School of Music, and approval of the Internship Coordinator.

NATURAL SCIENCE

Coordinators: Andreas Madlung, Biology; James Evans, Physics; Dan Burgard, Chemistry; Mike Valentine, Geology

This major is designed to serve the needs of students who desire a broad background in the natural sciences. It may serve students who plan to teach (see the School of Education section of this Bulletin). It is a useful major for students considering post graduate studies in health professions. Other students who wish a broad, interdisciplinary approach will want to look closely at the benefits offered by this major. In addition to meeting requirements for a Bachelor of Science degree, it provides for moderately in-depth study in one field of science as well as a background in other areas of mathematics and the natural sciences. Natural Science majors are not eligible for a double major in Biochemistry, Biology, Chemistry, Geology, Molecular and Cellular Biology, or Physics, nor for a double major in Natural Science.

Students interested in pursuing a major in Natural Science should consult with one of the coordinators listed above.

The coordinators of the program reserve the right to require a student earning a Natural Science major to comply with the time limit rules required by the department of the Natural Science emphasis.

General Requirements for the Major
General university degree requirements stipulate that 1) at least four units of the major be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major; and 3) all courses taken for a major must be taken for graded credit. Any exceptions to these stipulations are indicated in the major degree requirements listed below.

Natural Science Majors
One of the following areas of emphasis is required. See departmental listings for course descriptions.

Biology
Completion of a minimum of 14 units, two units of which must be at the 300/400 level, to include
1. Seven units of Biology 111, 112, 211, 212, 213, and two units upper-division Biology electives numbered from 312-496 excluding BIOL 398; at least one of the electives must include a lab and at least one of the electives must be completed on the Puget Sound campus;
2. Two units of Chemistry: 110 and 120; or 115 and 230;
3. One unit in Mathematics (150 or higher) or Computer Science (141 or higher);
4. Four additional units from the following (at least two units must be taken from a department/program other than biology): BIOL 312-496 (excluding BIOL 398); CHEM 250 or higher; CSCI 141 or higher; ENVR 105; EXSC 221, 222; GEOL 101 or higher; MATH 150 or higher; NRSC 201, 350; or PHYS 111 or higher.

Chemistry
Completion of a minimum of 14 units, to include
1. CHEM 115, 230; or 110, 120, 231;
2. Four additional units of Chemistry (all courses must be those normally counted toward a major);
3. Two units of Mathematics (180 or higher);
4. Two units of Physics (111/112 or 121/122) or Biology (111/112);
5. Four additional units of Biology, Chemistry, Geology, Physics, or Mathematics/Computer Science. (All courses must be those normally counted toward a major. No more than two of these may be Chemistry courses.)

Geology
Completion of a minimum of 14 units, to include
1. Six units of Geology to include either GEOL 101 or 104 or 110 (only one of these will count toward the major) and GEOL 200. GEOL 105 and ENVR 301 may also count toward the major;
2. No more than two 100-level courses will count toward the major, excluding the required Chemistry and Math courses;
3. Two units Mathematics, MATH 110 or higher; may include CSCI 161;
4. Two units Chemistry, to include either CHEM 110 and 120 or CHEM 115 and 230;
5. Four additional units of Physics, Biology, Chemistry, Mathematics/Computer Science, Geology (206 or higher), or ENVR 105.

Physics
Completion of a minimum of 14 units, to include
1. Six units of Physics (all courses must be those normally counted toward a major);
2. Four units of Mathematics, MATH 180, 181, 280 and one additional upper division (300-400 level) unit;
3. Four additional units of Biology, Geology, Chemistry, Physics, or Mathematics/Computer Science. (No more than two of these may be Physics courses.)

Notes
1. The coordinators of the program reserve the right to require a student earning a Natural Science major to comply with the time limit rules required by the department of the Natural Science emphasis.
2. For the Biology, Geology, and Physics emphases, the grade criterion within the Natural Science major will follow the requirement of the department corresponding to the emphasis. For the Chemistry emphasis, the grade criterion is the university requirement rather than the requirement for the Chemistry Department.

About the Program
The Neuroscience Program provides a forum for faculty and students interested in the sub-disciplines within the field of neuroscience. The program offers a general introductory course in neuroscience as an elective for all students, and also offers an interdisciplinary minor that may serve as an enhancement of, or complement to, any major of a student’s choice. This interdisciplinary minor provides additional opportunities for students to develop skills necessary to become successful scientists and is recognized with a designation on the transcript upon graduation. Participation in the minor by both faculty and students facilitates involvement in broader neuroscience topics and contributes to a sense of community across departments. A key feature of this program is a research or internship experience in the field. Invoking students in research with faculty not only broadens their knowledge and training in brain sciences, but also kindles an interest in and an appreciation for the methodological, philosophical, and ethical issues with which neuroscientists are concerned. This additional experience significantly improves the training of our students as they prepare for entry into careers in basic research, health care, secondary teaching, and public policy. Additionally, the Neuroscience Program is a part of a consortium of Northwest Liberal Arts Colleges offering Neuroscience experiences. pugetsound.edu/neuroscience

Requirements for the Minor in Neuroscience
1. Completion of five units to include:
   A. NRSC 201, Introduction to Neuroscience (prerequisite: BIOL 111 OR BIOL 101 with permission of instructor OR permission of instructor). Note: Completion of NRSC 201 with a grade of C or better is required to earn an emphasis in neuroscience.
   B. Completion of three units of elective courses, at least two from outside the student’s major. Selection of elective courses should be made in consultation with a neuroscience advisor.

   Biological Foundations of Neuroscience
   BIOL 212 Cell Biology
   BIOL 340 Animal Communication
   BIOL 361 Biochemical Pathways and Processes OR CHEM 461, Metabolic Biochemistry
   BIOL 404 Molecular Biology
   BIOL 434 Neurobiology
   EXSC 221 Human Physiology
   EXSC 222 Human Anatomy
   EXSC 328 Neuromuscular Adaptation
   EXSC 424 Recent Advances in Cellular and Molecular Mechanisms of Neuroplasticity
   EXSC 428 Advanced Neuromuscular Adaptation
   PHYS 231 Circuits and Electronics
   PSYC 313 Physiological Psychology
   NRSC 350 Methods in Neuroscience

   Cognitive and Behavioral Neuroscience
   BIOL 472 Animal Behavior
   CONN 357 Exploring Animal Minds
   CONN 393 Cognitive Foundations of Morality and Religion
   CSCI 431 Introduction to Artificial Intelligence
   PHIL 105 Neuroethics and Human Enhancement
PHIL 230 Philosophy of Mind
PHIL 250 Moral Philosophy
PSYC 230 Behavioral Neuroscience
PSYC 366 Clinical Neuropsychology
PSYC 310 Sensation, Perception, and Action
PSYC 335 Cognitive Psychology
PSYC 361 Language Development
PSYC 373 Perceiving Self and Other
PSYC 313 Physiological Psychology
STS 318 Science and Gender (Connections)
STS 350 Introduction to Cognitive Science (Connections)

C. NRSC 450 Senior Seminar: Special Topics in Neuroscience

2. Completion of either an internship or research experience in the discipline and approved in advance by the steering committee. (Note: students must meet with a neuroscience advisor and submit an application for internship/research prior to the end of the second semester of their junior year.) Course credit earned from an internship or research experience does not count toward the required five units of course work outlined above.

Notes
1. Courses taken to fulfill requirements of a student’s first major will not count towards the Neuroscience minor requirements.
2. Courses may be taken to fulfill the Neuroscience minor requirements and Core, other minor, second major, and university graduation requirements.
3. Internship/research may be taken for credit through the Internship Program or the student’s major department.

Course Offerings
Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Other courses taught by Neuroscience faculty. See Connections in the Core Curriculum section of this Bulletin for course descriptions.

CONN 303 Art-Science: Inquiry into the Intersection of Art, Science, and Technology
Satisfies the Connection core requirement.

201 Foundations of Neuroscience This course provides a survey of the structure and function of the nervous system, neurophysiology, and sensorimotor systems, including examples of neuropathologies (e.g., spinal cord injury, neuropathic pain, and Parkinson’s disease). Students also explore selected topics in depth, such as motivation (e.g., eating and sexual behavior), memory processes, and clinical disorders (e.g., post traumatic stress, schizophrenia, and dementia). This course is required of students pursuing an Interdisciplinary Emphasis in Neuroscience, but is open to all students. Prerequisite: BIOL 111 OR BIOL 101 with permission of instructor or permission of instructor.

350 Methods in Neuroscience This course offers students an introduction to various methods in the field of Neuroscience. Neuroscience is an interdisciplinary field that spans a range of topics from basic biology to psychology to therapeutics in the clinical setting. This course provides a flavor of a few of the techniques used currently in the field of neurosciences and explore methods from historical, futuristic and ethical perspectives. Hands-on training on a range of methodologies with scope for independent projects is provided. Prerequisite: NRSC 201. Offered occasionally.

450 Senior Seminar: Special Topics in Neuroscience This course provides a capstone experience for students earning a Neuroscience Emphasis and is designed for senior undergraduates who have completed all other course requirements in the emphasis. This course offers students in the program the opportunity to explore and discuss more sophisticated theories and complex methods in neuroscience than was possible at the introductory level. This seminar features student-led discussions of advanced topics in the discipline, including nervous system organization, neurochemistry, brain plasticity, neural bases of learning and memory, diseases and injury of the nervous system, and neuropharmacology. Also includes evening presentations by guest experts. Prerequisite: senior neuroscience emphasis student or permission of instructor.

490 Advanced Topics in Neuroscience Neuroscience is a rapidly evolving field with new technologies and practices advancing yearly. In this course, experts in the field who are at the forefront of research in neuroscience teach in-depth current research and advanced technologies used for cutting-edge investigations and the future of neuroscience. Postdoctoral researchers from the University of Washington and the Fred Hutchinson Cancer Research Center team teach the course, offering insight into neuroscience within a highly advanced research context. Prerequisite: NRSC 201.

OCCUPATIONAL THERAPY

Professor: Anne James, Associate Director; Tatiana Kaminsky; Yvonne Swinth, Director; George Tomlin
Associate Professor: Jennifer Pitonyak
Clinical Associate Professor: Kirsten Wilbur
Clinical Assistant Professor: Wendell Nakamura; Sheryl Zylstra
Visiting Assistant Professor: Renee Watling
Visiting Instructor: Dawn Yoshimura-Smith, Academic Fieldwork Coordinator

General Information

History
The School of Occupational Therapy at Puget Sound was established in 1944 with the aid of funds from the Washington Tuberculosis Association and various local leagues in response to an acute shortage of occupational therapists. The School of Occupational Therapy was the first of its kind in the Pacific Northwest and has retained continuous accreditation since 1945. In 2002, the program began offering only a post-baccalaureate degree (Master of Science in Occupational Therapy) as the entry-level degree, following the guidelines of the American Occupational Therapy Association (AOTA). In addition, the School of Occupational Therapy offers a post-professional degree. This clinical doctorate (DroT) allows therapists to spend a year in concentrated study in order to refine their skills in an area of expertise.

Student Body
Each year the School admits approximately 40 master’s degree students to the School of Occupational Therapy. These students come from a variety of backgrounds and educational experiences, from throughout the U.S. and internationally. The Student Occupational Therapy Association (SOTA) is active on campus. Up to 16 post professional students will be admitted in the clinical doctorate program, which started in Summer 2015. There are opportunities for interaction across both groups of oc-
occupational therapy students as well as with undergraduate and graduate students in other programs across the Puget Sound campus.

Accreditation and Graduates’ Eligibility to Sit for the National Certification Exam

The School of Occupational Therapy is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE’s telephone number, c/o AOTA is: 301.652.AOTA and its web address is www.acoteonline.org. Graduates of the program are eligible to sit for the OTR® Exam administered by the National Board for Certification in Occupational Therapy (NBCOT), 12 South Summit Avenue, Suite 100, Gaithersburg, MD 20877-4150, telephone: 301.990.7979, e-mail: info@nbcot.org. After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). All states regulate occupational therapy practice, with 49 states requiring licensure and 1 (HI) requiring registration in order to practice. Currently, all state regulation requires occupational therapists to pass the NBCOT OTR® Exam. (Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or obtain a state license.)

Philosophy

The University of Puget Sound holds the belief that the academic community should be a meeting place for the exchange and generation of ideas and for the personal and professional growth of individuals. The School of Occupational Therapy, therefore, is more than just a professional training program. The approach of the School of Occupational Therapy is to prepare the student both for professional roles and responsibilities and for life. The School offers curricula that will not only provide thorough background in a professional field of healthcare practice, but will also significantly broaden the student’s horizons. This curriculum provides the practitioner with a strong foundation for understanding and using the methods of discovering knowledge, for evaluating new knowledge, and for translating it into useful technology and practice.

Mission

The mission of the School of Occupational Therapy is to prepare its graduates for the scientific, ethical, client-centered, and evidence-based practice of occupational therapy. This is achieved in a liberal arts context that promotes a community of learning, teaching excellence, scholarly engagement of faculty and students, and close faculty-student interaction. The School of Occupational Therapy is committed to equipping its graduates to promote the occupational participation of clients across practice settings through

- Recognizing the diversity of human situations, values, occupations, and behaviors;
- Exhibiting the expected qualities of a professional health care practitioner; and
- Demonstrating beginning skills in building relationships between practitioners, clients, and the health care system.

The entry-level professional master’s degree program utilizes enhanced classroom, community and clinical experiences in leadership, advocacy, and research to provide its students with the knowledge, critical thinking, and clinical skills necessary to practice general occupational therapy at the entry-level. Graduates have an excellent foundation for professional lifelong learning, service to the profession, and later specialization.

The post-professional clinical doctoral degree program (DrOT) allows occupational therapists educated at the baccalaureate or master’s entry-level, including internationally educated occupational therapists, to upgrade their academic credentials through rigorous interaction with concepts of advanced theory, advocacy, teaching, and clinical research and prepares its graduates to provide clinical excellence and leadership in a self-selected area of practice.

The Master of Science in Occupational Therapy Degree

The School of Occupational Therapy offers a graduate, professional entry-level program leading to a Master of Science in Occupational Therapy degree (MSOT).

Any undergraduate major may lead to the successful study of occupational therapy. In fact, the program seeks a diversity of educational backgrounds among its students. A liberal education is a vital component in the preparation of today’s health care practitioner. Specific prerequisite courses also must be completed before enrollment in the Occupational Therapy program: EXSC 221/222 (Anatomy and Physiology); PSYCH 220/221 (Human Development through the Lifespan); MATH 160 (Elements of Applied Statistics); and one upper-division course concerning human behavior. (Please note that, at Puget Sound, EXSC 222 carries a prerequisite of BIOL 111 or equivalent, EXSC 221 carries a prerequisite of BIOL 111, CHEM 110/120 or 115/230, and EXSC 222 or equivalent.)

Please note that in most years more applications are received for the incoming class than there are spaces available. Applicants who have been or will be granted an undergraduate degree from Puget Sound, however, and who are competitive within the applicant pool, are offered priority consideration for admission.

For information concerning application procedures and acceptance to degree candidacy, see the Occupational Therapy program brochure (available in the Office of Admission, the School of Occupational Therapy or online: pugetsound.edu/ot). Please see the Graduate Bulletin for information on course sequencing, course descriptions, and completion of degree requirements for the graduate program in Occupational Therapy.

The Doctor of Occupational Therapy Degree

The School of Occupational Therapy offers a Post-professional Doctor of Occupational Therapy (DrOT) Program designed to fit all levels of experience, whether you are a new entry-level occupational therapist or a seasoned one. The twelve month curriculum is designed to be student-centered and to support students’ development of advanced practice skills that support their career goals. To that end, students in the Program are required to articulate an area of concentration and related learning outcomes that will guide them in developing a doctoral thesis project, shaping course assignments, and selecting authentic learning experiences. Students will enter the DrOT Program with a range of professional experience and interests, which will enhance the learning of all.

DrOT students will also have opportunities to interact with entry-level MSOT students, developing mentoring, teaching, and collaborative skills in classroom activities, clinic settings, and through thesis projects.

For information concerning application procedures and acceptance to degree candidacy, see the Occupational Therapy program brochure (available in the Office of Admission, the School of Occupational Therapy or online: pugetsound.edu/ot). Please see the Graduate Bulletin for information on course sequencing, course descriptions, and completion of degree requirements for the post-professional program in Occupational Therapy.

Undergraduate Course Offerings

101 Introduction to Allied Health Professions 0.25 unit This course is an advising section for students interested in exploring allied health
professions, such as nursing, occupation therapy, and physical therapy, in addition to the liberal arts and sciences. The three objectives of the course are 1) to define the roles and functions of occupational therapists, physical therapists, and other allied health professionals in a variety of settings; 2) to explore current issues in U.S. health care delivery; and 3) to explore students' alternative academic interests to ensure that their courses of study will be chosen in a well-informed and considered way. Note: This course is not required for the Occupational Therapy program nor will it meet any requirements for a degree in Occupational Therapy.

PHILOSOPHY

Professor: William Beardsley (on leave fall 2018); Ariela Tubert
Associate Professor: Shen-yi Liao (on leave spring 2019); Justin Tiehen, Chair
Assistant Professor: Sara Protasi
Visiting Assistant Professor: James Garrison

About the Department

Philosophy is the systematic consideration of timeless and timely questions of human concern. What is it to be human? What is real? How should we live? What can we know? Such timeless philosophical questions have not only generated the academic disciplines that comprise a liberal arts education, but continue to interrogate and inform their intellectual foundations. How does race structure social reality? How does gender influence the transmission of knowledge? What is our moral responsibility toward future generations impacted by climate change? Could a machine think? Such timely philosophical questions apply the same systematicity to conditions that confront us today so that we can better understand what the world is, who we are, and what we should do.

The timeless and timely questions of philosophy can be very roughly divided into two categories. Questions regarding knowledge and reality systematically consider the relationship between ourselves and the world. Questions within value theory systematically consider what matters to us and how values inform our judgments, feelings, actions, and relationships. Finally, the study of history and traditions of philosophy reveals responses to these questions across cultures and eras. The pursuit of philosophy allows us to consider timeless and timely questions of human concern so that we can better provide answers to them for our place and our time.

The Philosophy Department strives to introduce students to influential historical and vibrant contemporary philosophical work. In so doing the Department stresses certain intellectual values traditionally associated with the discipline: breadth of outlook, rigorous argument, imagination, consistency, systematicity, and the dialectical interplay of different minds. It thereby contributes to the liberal arts education of all students taking its courses, helping students better understand how the world is, who they are, and what they should do. At the same time, it provides majors with the basis for graduate study in philosophy as well as related fields, such as linguistics, psychology, politics, and religion. The Department also provides its majors with a springboard for training in a variety of professional fields, such as law, bioethics, environmental policy, education, social work, technology, international affairs, and business.

Students completing the major in Philosophy will have gained:
1. The ability to carefully engage in close reading of demanding texts;
2. The ability to produce precise and carefully structured writing;
3. The ability to participate extensively in reasoned discussion;
4. The ability to make cogent and carefully constructed oral presentations;
5. Familiarity with and an appreciation of a range of contemporary philosophical texts, theories and methods;
6. Familiarity with and an appreciation of a range of texts and theories drawn from the history of philosophy;
7. The ability to construct sustained arguments and analyze and criticize the arguments of others;
8. The ability to develop and defend their own philosophical position and to engage in sustained and critical reflection on their own values and beliefs;
9. The ability to reflect meaningfully on themselves, others and the world.

Students who major in the department's program undertake, and succeed in, a variety of endeavors upon graduating. Those who wish to do graduate work are well prepared for it. Others pursue professional programs in such fields as law, education, media studies, business, public administration, divinity, and even medicine and public health. Without further education, many Philosophy graduates add their own energy and good sense to the abilities developed in them by the study of philosophy, and find rewarding positions in business, in the arts, in journalism, technology, and in government. Virtually any career that requires clear thinking, intellectual creativity, good command of language, and a perspective on competing values and systems of belief provides opportunities for a graduate in Philosophy. But equally important is the value of an education that develops a reflective understanding of ourselves, and of our experience of the world and of others.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major

A major in Philosophy consists of the following:

1. At least ten units in Philosophy, excluding courses numbered 480 or above. At most two of these ten units can be satisfied with courses numbered 199 or below.
2. Level Requirements:
   A. Intermediate Level. Three of the following courses: 210 Ancient Greek Philosophy; 220 17th and 18th Century Philosophy; 230 Philosophy of Mind; 240 Formal Logic; 250 Moral Philosophy.
   B. Advanced Level. At least four courses numbered 300–399. At least two of these four courses must be completed on campus.
   C. Specialist Level. At least one of the following courses: 410 Topics in History and Traditions; 430 Topics in Knowledge and Reality; 450 Topics in Value Theory.
   Note: Students can take one additional course at the Specialist Level (numbered 410-450) in lieu of one course at the Advanced Level (numbered 300-399).

3. Area Requirements:
   A. History and Traditions. At least two of the following courses: 210 Ancient Philosophy; 220 17th and 18th Century Philosophy; 310 Aristotle; 311 Classical Chinese Philosophy; 312 Latin American Philosophy; 320 British Empiricism; 323 Kant; 325 19th Century Philosophy.
B. Knowledge and Reality. At least two of the following courses:
230 Philosophy of Mind; 240 Logic; 330 Epistemology; 331
Metaphysics; 332 Philosophy of Science; 333 Philosophy of
Emotions; 336 Philosophy of Language.
C. Value Theory. At least two of the following courses: 250
Moral Philosophy; 285 Environmental Ethics; 292 Bioethics;
350 Metaphysics; 353 Philosophy of Film and Performing
Arts; 360 Aesthetics; 370 Social and Political Philosophy; 378
Philosophy of Law; 389 Race and Philosophy; 390 Gender and
Philosophy.

Requirements for the Minor
A Minor in Philosophy consists of the following:
1. At least five units in Philosophy, excluding courses numbered 480
or above. At most one of these units can be satisfied with a course
numbered 199 or below.
2. At least two of the following courses at the Intermediate
level: 210 Ancient Greek Philosophy; 220 17th and 18th Century
Philosophy; 230 Philosophy of Mind; 240 Logic; 250 Moral
Philosophy.
3. At least two courses at the Advanced and Specialist levels, num-
bered 300–479. At least one of these two courses must be com-
pleted on campus.

Notes
1. Only two courses may be used simultaneously to satisfy core cur-
rriculum and Philosophy major or minor requirements.
2. Intermediate Level requirements should be completed by the end
of the junior year.
3. Courses taken more than six years ago will be accepted or rejected
for the minor by the Philosophy Department on a case-by-case
basis.

Course Offerings
Unless otherwise specified, each course carries 1 unit of credit and is
offered at least once each academic year. Please see “Frequency of
Course Offerings” in this Bulletin.

Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the
Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI1/SSI2 111 Life, Death, and Meaning
SSI1/SSI2 128 The Philosophy and Science of Human Nature

Other courses offered by Philosophy Department faculty

CONN 393 The Cognitive Foundations of Morality and Religion
Satisfies the Connections core requirement.
LAS 399 Latin American Travel Seminar
Satisfies the Connections core requirement.
STS 333 Evolution and Ethics
Satisfies the Connections core requirement.

101 Introduction to Philosophy Representative philosophical top-
ics, such as mind and body, the grounds of knowledge, the existence
of God, moral obligation, political equality, and human freedom,
are discussed in connection with contemporary philosophers and figures
in the history of philosophy. Satisfies the Humanistic Approaches core
requirement.

102 Freedom and the Self This course covers a range of philosoph-
ic problems centering on issues of personhood and rational agency.
Readings are drawn from both classic and contemporary sources and
address such topics as freedom of the will, personal identity, knowledge
of the self, weakness of will and self-deception. Offered frequently.

103 Philosophy of Religion The course assesses the reasonableness
of various forms of religious belief and of irreligion. Noted historical and
contemporary authors are read. Students attempt to develop personal
views on the truth of religion and its place in life. Offered occasionally.

104 Existentialism Existentialism describes an influential set of views
that gained prominence in Europe following World War II, stressing rad-
cal human freedom and possibility, as well as concomitant responsibility
and anxiety, in a world bereft of transcendent significance. This course
examines the nineteenth-century philosophical roots of such views,
their leading twentieth-century philosophical and theological expression,
and a few of their most compelling incarnations in literature. Offered
frequently.

105 Neuroethics and Human Enhancement This course examines the
ethical, political, and philosophical questions raised by some of the
new forms of human enhancement made available by breakthroughs in
science and technology, from fields like neuroscience and genetic engi-
neering. For example: Should parents be allowed to use genetic screen-
ing or modification to create “designer children,” either for the purpose
of avoiding diseases and other ailments or to select desired traits such
as their child’s intelligence, athletic ability, or good looks? Should we
pursue immortality or, failing that, radically extended lifespans? Is there
any important ethical difference between artificial and natural intelli-
genence, and will the former soon surpass the latter? What justification
is there, if any, for regarding the use of steroids in athletics as a form
of cheating while regarding the use of weight training regimens as fair
game? Is the goal of human enhancement compatible with the pursuit
of social equality? What constitutes the self, as opposed to the tools or
pieces of technology that a self uses?

210 Ancient Greek Philosophy A survey of the origins of Western phi-
losophy in Ancient Greece, beginning with the Presocratics and covering
Socrates, Plato, Aristotle, and Hellenistic philosophy. In this course stu-
dents are introduced to the answers some of the most influential ancient
philosophers have given to the question: “How can we be happy?” In
addition to learning what these philosophers thought, students are stimu-
lated to think about these questions from their own modern perspective,
and reflect on the extent to which their modern viewpoint differs. Finally,
but not least importantly, students learn to read and interpret texts that
were written millennia ago. In the process, they encounter argumenta-
techniques that are still as current as the theses defended through
them. Satisfies the Humanistic Approaches core requirement.

220 17th- and 18th-Century Philosophy European philosophers of
the seventeenth and eighteenth centuries struggled to make sense of
ordinary perceptual experience in light of the emerging mathematical
physics that culminated in Newton. This new physics presented a pic-
ture of the world according to which things in space and time are not as
they appear to the senses, and thus overturned the Aristotelian worldview endorsed by the Church since the Middle Ages. The philosophical issues of this period concern the nature of knowledge of the world and how it is acquired. Also included are various accounts of the mind and of its intellectual and sensory capacities.

230 Philosophy of Mind This course introduces central issues in the philosophy of mind, especially the relation between mind and body—the brain, in particular—and the nature of consciousness. Other topics may include the possibility of artificial intelligence, the nature of psychological explanation, self-knowledge, psychopathology and psychopharmacology, psychoanalysis, and the concept of a person. Course materials reflect scientific developments in such fields as psychology, neurobiology, medicine, linguistics, and computer engineering.

240 Formal Logic A study of the principles and techniques of deductive logic, taking the formal approach that prevails in contemporary practice. Arguments are paraphrased in a formal language and elements of that language are interpreted by being assigned certain simple mathematical structures. Topics include the concepts of consistency, logical consequence, and proof; the logic of truth-functions, quantifiers, and identity; and an introductory consideration of theorems about the formal language and their interpretations themselves (what is called metalogic). The nature of logic, its role in reasoning, and its epistemological standing are considered philosophically. Satisfies the Mathematical Approaches core requirement.

250 Moral Philosophy This course examines a number of ethical theories—philosophy of mind, especially the relation between mind and body—the brain, in particular—and the nature of consciousness. Other topics may include the possibility of artificial intelligence, the nature of psychological explanation, self-knowledge, psychopathology and psychopharmacology, psychoanalysis, and the concept of a person. Course materials reflect scientific developments in such fields as psychology, neurobiology, medicine, linguistics, and computer engineering.

285 Environmental Ethics This course focuses on ethical issues that arise in the context of human relationships to nature and to non-human living things. The course explores questions such as the following: What is nature? Is nature intrinsically valuable? Should wilderness be preserved? What is biodiversity and should it be promoted? What are our moral obligations to non-human animals and to future generations? What ethical considerations arise in facing global poverty and overpopulation? Offered frequently.

292 Basics of Bioethics This course is an examination of Western philosophical understandings of moral issues brought on by advances in health care, science and technology. In this course, students will learn the “Principles approach” to bioethics, as well as other ethical approaches to the difficult moral issues raised by contemporary medical science and its clinical applications. Cross-listed as BIOE 292. Students may not receive credit for both BIOE/PHIL 292 and BIOE/REL 292. Offered frequently.

300 Aristotle This is a moderately comprehensive and systematic treatment of Aristotle, including method, metaphysics, psychology, ethics, and politics. It considers Aristotle’s criticism of Plato’s theory of forms and his own views about what is real, the relation of form and matter, the nature of the soul, the highest human good, and the relation of the individual and the community. Offered frequently.

311 Classical Chinese Philosophy This course introduces students to influential philosophical questions in early Chinese thought, such as ones concerning human nature and living the good life. And it exposes students to the philosophical ideas of thinkers such as Kongzi (Confucius), Laozi (the fictitious author of Daodejing), Mozi, Zhuangzi, Mengzi (Mencius), Xunzi, and Han Feizi. It is both a course in history of philosophy and a course in comparative philosophy. Hence, students are expected to both develop skills for making historically-informed interpretations of these thinkers’ responses to the influential philosophical questions, and to consider their ideas’ relevance to practical and philosophical discourses today. (This course does not assume any background in philosophy or in Sinitic languages.) Offered frequently.

312 Latin American Philosophy This course introduces students to philosophy in Latin America—broadly construed to include Indigenous philosophy and Latinx philosophy in the United States. The course is especially focused on issues of identity in Latin American Philosophy, to include: 1) Latin American philosophers’ self-conscious discussion about whether there is such a thing as a Latin American Philosophy; 2) alternative conceptions of self, other, and community in selected indigenous conceptions of the world; 3) issues of gender, race, and identity in Latin American anti-colonial and independence philosophy, liberation philosophy, and Latinx philosophy in the United States.

320 British Empiricism This seminar examines the metaphysical and epistemological theories of the British Empiricists of the seventeenth and eighteenth centuries through close readings of Locke’s Essay Concerning Human Understanding, Berkeley’s The Principles of Human Knowledge, and Hume’s A Treatise of Human Nature. It considers such issues as realism, idealism and skepticism, the nature and scope of scientific knowledge, the nature of the self and self-knowledge, and personal identity. Special consideration is paid to the development of empiricism in the context of scientific and religious controversies in seventeenth- and eighteenth-century Britain. Readings in recent secondary literature are also required. Offered occasionally.

323 Kant This course consists of a careful reading of Kant’s Critique of Pure Reason, designed to provide a thorough introduction to the epistemological aspect of Kant’s critical philosophy. Philosophical issues discussed include the nature of the human mind, the possibility and extent of human knowledge, the reality of space and time, the basis of mathematics and logic, self and personal identity, the foundations of natural science, matter and substance, force and causation, the origin and composition of the universe, freedom of the will, the existence and properties of God, teleology, and the basis of morality. Offered occasionally.

325 19th-Century Philosophy This course is an introduction to philosophical systems of Hegel, Feuerbach, Marx, J.S. Mill, Kierkegaard, and Nietzsche. Topics include the nature of history and historical change, the extent of human freedom, the relation between individuals and their cultures, the historical and psychological importance of religious, moral, and philosophical consciousness, and the nature of truth. Offered frequently.

330 Epistemology Epistemology, otherwise known as the theory of knowledge, addresses issues about the nature of knowledge, justification, and truth, issues that arise from questions such as “How do you know?” and “Can you be sure?” It has been an especially lively area of philosophy in English in recent decades; many currents in the humanities appeal to epistemological notions—such currents as post-modernism, relativism, social constructionism, feminism, and situated knowing. This course answers both developments. It introduces such disciplinary concerns as foundationalism, virtue epistemology, internalism and externalism, naturalism, relativism, reliabilism, and the Gettier problem. It also engages such wider concerns as relativism about truth and reason and the role of social institutions and social structures, power and privilege, in constituting knowledge.
331 Metaphysics  This course is a survey of some of the central issues in contemporary metaphysics, the area of philosophy devoted to understanding the fundamental level of reality. Topics of the course may include existence and nonexistence, identity, personal identity, possibility and necessity, time and persistence, realism and antirealism, and free will. Featured philosophers may include W.V.O. Quine, Saul Kripke, David Lewis, Judith Jarvis Thomson, and Derek Parfit. Offered frequently.

332 Philosophy of Science  This course consists of a philosophical examination of science. The course examines attempts to describe what is distinctive about science, including views concerning scientific methodology. The course also examines the character of scientific change, asking how one should understand the history of science. This examination leads to a discussion of the nature of scientific knowledge, including whether scientific entities should be considered real and what role values play in the development of science. Issues that arise from particular sciences also may be discussed. Prerequisite: one previous course in Philosophy or junior standing with a major in Biology, Chemistry, Geology, Natural Science, Physics, or Science, Technology, and Society. Offered frequently.

333 Philosophy of Emotions  Anger, fear, joy, sadness, disgust, surprise, envy, pride, jealousy, love, grief… without emotions our experience of the world would be flat and grey, void of the upheavals, accelerations, and turns that make the journey of life so exciting. But what are emotions? What kind of mental state are they? Are there universal emotions, or are all emotions culturally-relative? What does it mean to feel fear—as opposed to think—that something is scary? How can we know that someone is envious? Is disgust always bad? Can joy be inappropriate? In this course students explore these and many other questions concerning the metaphysics, epistemology, phenomenology, value, and rationality of emotions. Readings are drawn from a variety of sources: classical philosophical texts, contemporary articles in philosophy and psychology, popular culture, and literature. Offered frequently.

336 Philosophy of Language  Philosophers have long regarded language as the essential intermediary between thought and the world. Accordingly, this course studies philosophically important theories about language and more general philosophical conclusions drawn from considerations about language. Central topics concern meaning, reference, inference, existence, and truth. In addition to discursive language, some attention is devoted to systems of notation and of pictorial representation. Offered occasionally.

350 Metaethics  This course is concerned with the study of epistemological, metaphysical, and psychological issues related to ethics. The course focuses on questions like the following: Are moral judgments objective or subjective? Are they relative to the speaker or to the community of the speaker? Are there moral facts? If so, what kind of facts are they (e.g., natural, non-natural, psychological)? What motivates moral action (is it reason, desire, a combination)? What is the relationship between freedom and moral responsibility? Readings are drawn primarily from contemporary authors. Offered frequently.

353 Philosophy of Film and Performing Arts  This course surveys some of the fundamental philosophical questions that arise from the performing arts in general, and cinema in particular. What is a film? What does it have in common and how does it differ from other performing arts? How do these in turn differ from the other arts? What challenges do they pose to the traditional understanding of art? How do cinema and television differ? Other topics covered may include: the problem of identifying authorship in a collective enterprise such as a film or a theater production; the reasons and nature of our emotional engagement with movies or plays; the relation between film and society. Offered frequently.

360 Aesthetics  This course is a critical examination of the problems that arise in trying to understand the creation, nature, interpretation, evaluation, and appreciation of works of art. Art is viewed in its relation to other aspects of culture such as morality, economics, and ecology. A variety of classical and contemporary perspectives are examined. Offered occasionally.

370 Social and Political Philosophy  This course explores some of the central questions in Social and Political Philosophy as well as some well-developed attempts to answer these questions: What makes a government legitimate? What should the goal of government be? Is it to maximize justice, to maximize liberty, to provide common defense, or something else? What is justice? What is liberty? Readings are drawn from prominent historical and contemporary thinkers like Plato, Aristotle, Hobbes, Locke, Rousseau, Marx, Mill, Rawls, Nozick, Cohen, Okin. Offered occasionally.

378 Philosophy of Law  This course is concerned with the nature of law and the relationship between law and morality. The course is centered on questions like the following: What is the connection between law and morality? Is it morally wrong to break the law? Is breaking the law sometimes morally permissible or even morally required? Should morality be legally enforced? To what extent, if at all, should legal decisions be influenced by moral beliefs? What are the relationships between legal, constitutional, moral, and political rights? How can legal punishment be morally justified? While pursuing answers to these questions through the work of leading legal philosophers, students read a number of actual court cases and discuss specific issues like hate speech, homosexuality, and capital punishment, among others. Cross-listed as PG 348. Prerequisite: one previous course in Philosophy or one course in Political Theory (PG 104, PG 340-348). Offered frequently.

389 Race and Philosophy  The construct of race is omnipresent in the way people think, the way society is structured, and even in the materials that people use. Despite its omnipresence, race remains difficult to discuss, if it is discussed at all, because of its theoretical complexity, contested social history, and emotional triggers. This course challenges students to engage in courageous conversations about the nature of race and its relations to mind, language, and aesthetics. Students will confront difficulty questions such as: What is race? How does race influence human cognition? How does race structure human communication? How does race shape human aesthetic preferences and artistic endeavors? Students use tools developed in different areas of philosophy and its cognate disciplines to construct answers to these difficult questions about race. At the same time, students learn that these difficult questions about race can challenge and extend common conceptions of analytic philosophy. Satisfies the Knowledge, Identity and Power graduation requirement. Offered frequently.

390 Gender and Philosophy  This course is a study of a number of philosophical and political questions related to gender and with the relation between these two types of questions. The course will be concerned first, with metaphysical issues concerning gender: What is gender? How many genders are there? Is there an essence of womanhood or manhood that goes beyond certain physical characteristics? Are ‘woman’ and ‘man’ purely natural categories or are they to some extent socially constructed? Is gender a social/political concept? Second, with epistemological issues that relate to gender difference: Do women, for example, see the world differently from men? What kind of implications
does this have for scientific and philosophical knowledge? Are there, for example, specifically female ways of thinking or reasoning? If so, to what extent are they marginalized? Do gender related values or political aims affect scientific knowledge? Finally, with ethical issues related to gender: What is gender oppression? What is sexism and heterosexism? Granted that everyone has an equal right to flourishing regardless of gender, is a woman’s flourishing, for example, different from a man’s? Are there specifically gendered roles for men and women? To what extent are we culturally biased when we think that women or those who don’t conform to gender norms living in other cultures are oppressed? Crosslisted as PG 390. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered occasionally.

410 Topics in History and Traditions  Conducted as an advanced seminar, the course addresses topics from the history of philosophy, typically concentrating on a major philosopher or philosophical movement. Each student writes and presents a substantial seminar paper related to the course. Representative course topics include Plato, the Stoics, Ancient and Modern Skepticism, Aqinas, Rationalism, Hume, Idealism, Nietzsche, the Pragmatists, and Russell and Wittgenstein. Prerequisite: Two courses from PHIL 210, 220, 310, 311, 312, 320, 323, and 325. May be repeated for credit with permission of instructor. Offered occasionally.

430 Topics in Knowledge and Reality  Conducted as an advanced seminar, the course addresses topics from metaphysics and epistemology, understood to include the philosophy of mind. Each student writes and presents a substantial seminar paper related to the course. Representative course topics include human freedom and the causal order, conceivability and possibility, number and other abstractions, the infinite, a priori knowledge, relativism and truth, knowledge of the self, intentionality, mental causation, and the nature of consciousness. Prerequisite: Two courses from PHIL 230, 240, 330, 331, 332, 333, and 336. May be repeated for credit with permission of instructor. Offered frequently.

450 Topics in Value Theory  Conducted as an advanced seminar, the course addresses topics from value theory, understood to include ethics, political philosophy, aesthetics, and philosophy of religion. Each student writes and presents a substantial seminar paper related to the course. Representative course topics include sources of normativity, virtues of character and moral rules, personal identity and moral responsibility, objectivity and moral relativism, the role of reason in ethics, critical theory, ethics and psychoanalysis, and religious commitment and civil liberties. Prerequisite: Two courses from PHIL 250, 285, 292, 350, 353, 360, 370, 378, 389, and 390. May be repeated for credit with permission of instructor. Offered frequently.

499 Ethics Bowl  0.25 activity unit  This course provides students with a unique opportunity to practice applying ethical theories to controversial ethical problems. An Ethics Bowl is a collaborative yet competitive event in which teams analyze a series of wide-ranging ethical dilemmas. Throughout the semester, students research and discuss case studies dealing with complex ethical issues in a number of practical contexts and possibly compete in an Ethics Bowl. Cases concern ethical problems on wide ranging topics, such as personal relationships (e.g. dating, friendship), professional ethics (e.g. cases in engineering, law, medicine), social and political ethics (e.g. free speech, gun control, health care, discrimination), technology (e.g. autonomous cars, carebots), and global issues (e.g. the impact of globalization, global warming, biodiversity). Pass/fail grading only.

**PHYSICAL EDUCATION**

Director of Physical Education, Intercollegiate Athletics and Recreation: Amy Hackett

Activities Instructors and Varsity Sport Coaches: Michael Adams, Aaron Benson, Jomarie Carlson, Robert Clements, Jeffrey Daniel, Andy Davis, Todd Erwin, Tiffany Fields, Reggie Frederick, James Grant, Jeff Halstead, Atrell House, Sue Hubbell, Di Jannsen, Craig Kennedy, Casey Kushiyama, Justin Lunt, Lyle Maines, Mark Massey, Elyn Moss, Chris Myhre, Reece Olney, Mike Orecia, Nathan Page, Kayla Reeves, Michael Rice, Carrie Sabochik, Renata Stec, Kellyn Tate, Jeff Thomas, Joe Vari.

About the Programs

The Physical Education program offers Puget Sound students 45 different activity courses including fitness, recreational activities, sports skills, dance, and varsity sports. It is the goal of the program to promote the development and maintenance of physical fitness as a lifestyle through sport, recreational, and dance activities; to cultivate in students an understanding of the physiological importance of physical activity; to provide opportunities to develop students’ level of concentration, discipline, and emotional control through skill development and competition; and to promote social interaction now and in the future through sport and recreational participation.

Course Offerings

**Intercollegiate Varsity Sports**

A. Offered only in one semester at one-half activity unit each. Pass-fail grading only.
- 101 Cross Country (men and women)
- 102 Football (men)
- 103A Soccer (men)
- 103B Soccer (women)
- 104 Volleyball (women)
- 108 Baseball (men)
- 109 Softball (women)
- 110 Crew (men and women)
- 111 Golf (men and women)
- 112 Tennis (men and women)
- 113 Track (men and women)
- 115 Lacrosse (women)

B. Offered in both semesters at one-quarter activity unit each. Pass-fail grading only.
- 105A Basketball (men)
- 105B Basketball (women)
- 107 Swimming (men and women)
- 114 Cheerleading (men and women)

**Activity Courses**

(One-quarter activity unit each)

Activity classes are generally offered four days a week for half a semester or two days a week for the entire semester. There are a few exceptions for specialty classes. Consult the schedule of classes for exact starting dates. Pass-fail grading only unless otherwise indicated.

122 Strength Training and Conditioning  0.25 activity unit  This course introduces the principles of increasing levels of strength and endurance for the student. Instruction of correct lifting techniques using free weight equipment, safety, circuit training, setting up individual weight training workouts, and combining flexibility and endurance within
workouts are covered. The student in this course is involved in active participation.

123 Advanced Conditioning 0.25 activity unit This course involves advanced lifting techniques, safety, percentage lifting schedule, progressive flexibility skills, and speed/agility development. Each student is given an individualized training program. Prerequisite: reported good health on a physical not more than one year old.

124 Jogging 0.25 activity unit Instruction on physiological benefits and hazards of jogging as well as group participation in off-campus and on-campus runs. Intended for the beginning-intermediate runner. Prerequisite: reported good health on a physical not more than one year old.

125 Circuit Training 0.25 activity unit This course introduces the principles of circuit training, flexibility, and endurance within workouts. Instruction of correct lifting techniques, proper fitting of equipment, and safety are covered. The student in this course is involved in active participation.

126 Individualized Fitness 0.25 activity unit Instruction, periodic testing, and personalized, progressively structured cardiovascular fitness program tailored to each individual’s capabilities.

127 Walking for Fitness 0.25 activity unit Instruction on the physiological benefits and techniques of various fitness walking styles. The class includes group and individual walks on and off campus. It is intended for the beginning or intermediate walker. Offered Spring term only.

130 Scuba 0.25 activity unit Basic scuba instruction leading to ability to receive certification by the Professional Association of Diving Instructors. Unique consideration: course fee to cover cost of renting certified scuba equipment. Some course requirements to be held off campus. Must provide own snorkeling equipment. Prerequisite: PE 157 or an intermediate level of swimming skills.

131 Introduction to Backpacking 0.25 activity unit This course, which is for the novice or near-novice hiker or backpacker, runs for the first half of the fall semester. It consists of evening lectures, one day hike, and two overnight hikes. The course covers such topics as proper equipment, the basics of camping, cooking in the outdoors, safety, and wilderness ethics. A primary emphasis of the course is to promote lifetime enjoyment of the natural environment through hiking and backpacking. Unique consideration: course fee to cover cost of some food, equipment, and transportation on hikes. Offered Fall semester only.

132 Advanced Backpacking and Basic Mountaineering 0.25 activity unit This course, which is for the intermediate or advanced hiker, runs for a full semester. The course, in addition to lectures, includes three overnight hikes. The primary emphasis of the course is on cold weather, off-trail travel in the alpine environment. As a result of this, the lecture material leans heavily on one’s ability to read the terrain, navigate with and without map and compass, meet mountain emergencies, and plan for the extended backcountry trip. Skills taught include use of avalanche beacons, ice axe use, and snow analysis. Unique consideration: course fee to cover cost of food, equipment, and transportation on hikes. Prerequisite: PE 131 or permission of instructor. Offered Spring term only.

134 Beginning Rock Climbing 0.25 activity unit An introduction to the skills, terminology, and fundamentals of movement utilized in the sport of rock climbing. The class emphasizes safety and movement as well as the basics of climbing-specific training. Upon completion of the course, the individual will possess the necessary skills to utilize the university climbing facility and will have the working knowledge of the basic elements necessary to enjoy rock climbing. Unique consideration: course fee to cover cost of facility fee and harness rental.

135 Basic Sailing 0.25 activity unit This is a basic sailing class that combines twelve hours of classroom lecture with twelve hours of on-the-water experience to develop manual skills and reinforce theoretical lecture material. Graduates of the course will have attained the knowledge and experience base to handle a boat under 25 feet for day sailing in normal weather and will qualify for ASA Basic Sailing Certification. On-the-water sails will occur on selected weekdays and weekends. Unique consideration: course fee to cover cost of equipment rental. Offered Spring semester only.

137 Beginning Riding 0.25 activity unit This course introduces the novice rider to the fundamentals of horsemanship as well as the proper administration of care for the horse and equipment. The two hours a week include one hour of actual riding time in which the student learns to walk, trot, and canter the horse, and one hour of preparing and caring for the horse and equipment. Students are expected to provide their own transportation to stables and appropriate foot gear. Unique consideration: course fee to cover cost of horses and equipment.

138 Intermediate Riding 0.25 activity unit This course refines the rider’s fundamentals of horsemanship as well as the proper administration of care for the horse and equipment. The student has a more responsible role in caring for the horse. The two hours a week include one hour of actual riding time devoted to refinement of the rider’s position and a more sophisticated use of the aids, and one hour of preparing and caring for the horse and equipment. The student needs to be proficient at the walk, trot (posting and sitting), and canter. Unique consideration: course fee to cover cost of horses and equipment. Students provide their own transportation to stables. Prerequisite: PE 137 and instructor’s permission.

141 Bowling 0.25 activity unit Instruction in scoring, terminology, history, and fundamental technique for beginning bowlers, an introduction to competitive bowling, league play, and advanced techniques. Unique consideration: course fee to cover rental of the bowling lanes.

145 Pickleball/Badminton/Racquetball 0.25 activity unit This course is designed as a comprehensive overview of the fundamentals of badminton, pickleball and racquetball in an effort to develop an appreciation within the student for the benefits of participating in these lifetime activities. Emphasis is placed on the acquisition of good skill technique and an understanding of the kinesiological principles of correct form which allows the student to successfully progress to a higher skill level. An understanding of the rules, terminology, basic histories, safety precautions, strategies, and court descriptions as well as the physiological and sociological benefits of the sports is provided. Students must provide their own racquets (racquetball only). Offered Spring term only.

146 Martial Arts 0.25 activity unit This class introduces students to the general theory of martial arts and offers instructions for basic techniques. The course helps students to determine their specific area of interest for future study and improvement. Students are required to purchase a martial arts uniform. Offered Fall term only.

147 Tai Chi for Health 0.25 activity unit This class introduces students to one of five major styles of Tai Chi exercise, Yang style. Students learn general theory of Tai Chi, basic Yang style techniques (including pushing hands), and a barehanded Yang style form. Students also learn basics of relaxation and Qi exercise (Qi Gong). Offered Spring term only.
150 Beginning Yoga 0.25 activity unit This course introduces basic yoga techniques (postures), breathing practices, and relaxation techniques to the beginning yoga practitioner. During the semester, students work on refining alignment in the asanas, increasing strength and flexibility, and changing stress patterns. In this non-competitive class environment, students are encouraged to challenge themselves while accepting any personal limitations. Alternate postures are taught depending upon individual abilities or needs.

152 Beginning Golf 0.25 activity unit Instruction in scoring, terminology, and fundamental technique. Unique consideration: course fee to cover usage of equipment and facility. Students must provide their own transportation to golf center.

153 Intermediate Golf 0.25 activity unit Instruction in history, terminology, safety, etiquette rules, strategy, and intermediate skills of golf. Unique consideration: course fee to cover equipment and facility usage. Students must provide their own transportation to golf center. Prerequisite: PE 152 or its equivalent. Offered Spring term only.

156 Swimming for Non-Swimmers 0.25 activity unit This class is designed for students who are non-swimmers—those who cannot stay afloat in deep water. Class activities include adjustment to the water, swimming, correct breathing, basic water safety, and elementary swimming strokes. Prerequisite: should be a non-swimmer—one who cannot stay afloat in deep water. Offered Spring term only every other year.

158 Swim for Fitness 0.25 activity unit This course is intended to develop technical stroke skill and proper methods of swim stroke mechanics, toward application of a successful exercise routine. Student skill level should include the ability to swim at least four lengths of the pool without stopping. Knowledge and skill in both freestyle and backstroke desired, but not required. Students must be comfortable swimming in deep water.

159 Lifeguard Training 0.25 activity unit Lifesaving techniques leading to certification by the American Red Cross in Lifeguard Training. Requires above average swimming ability, particularly in sidestroke, breaststroke, underwater swimming, and swimming endurance. Prerequisite: ability to pass the equivalent of the Red Cross Swimmer test. Offered Spring term every other year.

161 Beginning Tennis 0.25 activity unit Introduction to the fundamental skills, rules and terminology of tennis. Emphasis is placed on the development of good technique in the serve, forehand, and backhand. Unique consideration: students must provide their own racquets.

170 Zumba Fitness 0.25 activity unit Zumba® is a Latin inspired, dance-fitness class that incorporates Latin and international music and dance movements, which create a dynamic, exciting, and effective fitness system. Zumba integrates some of the basic principles of aerobic, interval and effective fitness resistance training to maximize caloric output, cardiovascular benefits, and total body toning. Zumba provides a vibrant non-intimidating opportunity for dancers and non-dancers to participate in a group aerobic class. No dancing experience necessary.

180 Beginning Ballet 0.25 activity unit A study of the basic theories and techniques of classical ballet wherein the historic vocabulary of ballet is taught. Beginning ballet is designed for the beginning ballet student with no previous dance training. Offered Fall term only.

181 Intermediate Ballet 0.25 activity unit A continuation of beginning ballet, introducing intermediate level ballet technique, including the first level of the study of pas de deux. Designed for the student with a background in ballet. Prerequisite: PE 180 or its equivalent. Offered Spring term only.

185 Aerobic Conditioning 0.25 activity unit Students will develop aerobic capacity through a blend of workouts involving the rowing ergometer, running, and the stationary bicycle. Students are instructed how to individualize a periodized training regimen based on their own fitness goals. Supplemental work to improve core stability and muscular endurance is included as well. Course offered in second half of fall semester only.

186 Folk Dance 0.25 activity unit This course is designed for the beginning and intermediate dancer. A variety of international dances are taught at the beginning-intermediate level. Offered Spring term only.

188 Step Aerobics/Z Dance Fitness/Toning 0.25 activity unit This course incorporates dance step aerobics and toning exercises to improve total fitness (i.e. cardiovascular endurance, strength, and flexibility) and to provide an understanding of the physiological benefits of safe aerobic exercise.

196 First Aid and CPR 0.25 activity unit This class is conducted following the guidelines of the American Red Cross, Department of Transportation, American Heart Association, and American Academy of Orthopaedic Surgeons. Emphasis is placed upon the body’s reaction to trauma and the causes, immediate recognition and early care of medical conditions and injuries. Certification in Cardio-Pulmonary Resuscitation (CPR), and training on use of AED are also included. Unique consideration: course fee. Offered Spring term only.

---

PHYSICAL THERAPY

Professor: Roger Allen; Jennifer Hastings

Clinical Professor: Robert Boyles, Program Director; Danny McMillian

Associate Professor: Julia Looper

Clinical Associate Professor: Ann Wilson, Director of Clinical Education

Clinical Assistant Professor: Holly Roberts, Karin Steere

The Doctor of Physical Therapy Program

The Physical Therapy program is a post-baccalaureate graduate program leading to a Doctor of Physical Therapy degree (DPT). The program is designed to educate an entry-level physical therapist. That is, the graduate student studies to enter the profession rather than to become a specialist within the profession.

A baccalaureate degree is prerequisite for enrolling in the Doctor of Physical Therapy Program. Diversity of educational background is desirable among potential physical therapists. A broad-based undergraduate education is an integral part of physical therapy education. Any undergraduate degree may lead to the successful study of physical therapy, and undergraduates are encouraged to follow their passion in selecting a major as a strong academic record is required for successful application to the PT program. Student must also demonstrate appropriate mastery of the prerequisite courses by passing each course with a grade of B (3.0) or better.

Complete information on the admission requirements and process can be found on the School of Physical Therapy web page (pugetsound.edu/pt).
The mission of the Department of Physics is to educate undergraduate students in the fundamental ideas and methods of physics. The department strives to provide an environment of scientific inquiry and discovery on the part of both students and faculty. It offers a curriculum of classical and modern physics that prepares students for careers as scientists and citizens. Students who complete a Physics major will gain the following skills and proficiencies:

1. Problem-solving skill in a variety of disciplines, including classical mechanics, waves and optics, electromagnetism, quantum mechanics, and relativity;
2. Ability to apply higher-level mathematical reasoning in the process of problem-solving, using mathematical tools that include calculus of one and more than one variable, linear algebra, ordinary differential equations, and partial differential equations;
3. Proficiency in laboratory work, through a minimum of four seminars of lab-based courses;
4. Ability to express their work clearly in writing, including written reports on their laboratory work that contain discussion of results, quantitative reasoning, and error analysis; and
5. Use computers to solve problems related to the physical world that lack simple analytical solutions.

The Bachelor of Science degree is appropriate for students who are interested in undergraduate studies in physics and who complete their studies at an engineering institution through the DDE program.

Independent research projects and senior thesis presentations are encouraged of all Physics majors. Students who complete distinguished projects will be eligible for graduation with Honors in Physics.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major

Before declaring a physics major, students should schedule an appointment with the department chairperson. This will usually be held no later than a student’s fourth semester.

Bachelor of Science

1. PHYS 121, 122, 221, 222, 305, 351, and 411, and one elective at the 200 level or higher and one elective at the 300 level or higher from: 209, 231, 299, 310, 322, 412, 494
2. MATH 180, 181, 280, 290, and 301.

Bachelor of Arts (Engineering, Dual Degree)

Degree is awarded upon completion of Baccalaureate in Engineering.

1. PHYS 121, 122, 221, 305, 351, and two additional upper-division (209 or higher) courses; 2. MATH 180, 181, 280, 290, and 301, or equivalent;
3. CHEM 110/120 or 115/230; and
4. CSCI 161, or equivalent.

Requirements for the Minor

PHYS 121/122 (or 111/112); three additional units at least one of which must be at the 300 level or higher. (Ordinarily PHYS 105, 107, and 109 will not satisfy these requirements.)

Notes:

For students pursuing the BS in Physics, there are two grade level requirements in the first two years of course work. The department chair may waive these requirements under appropriate circumstances. Students pursuing the BA in Physics for the Dual Degree Engineering program and other students interested in upper level physics courses are not subject to these requirements.

1. A grade of C- is required in Physics 122 to continue on to Physics 221, and a grade of C- in Physics 221 is required to continue on to Physics 222.
2. To pursue the major with 300 level courses and higher, a GPA of 2.0 is required for all 100 and 200 level physics courses required for the major, and a GPA of 2.0 is required for all 100 and 200 level math courses required for the major.

The Physics Department does not restrict the applicability of courses to major or minor requirements based on the age of the course.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.
**Physics**

**Seminars in Scholarly Inquiry.** See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

**SSI1/SSI2 108 Empowering Technologies: Energy in the 21st Century**  
**SSI2 123 The Search for Extraterrestrial Intelligence**

Other courses offered by Physics Department faculty  
See Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24).

**HON 212 Origins of the Modern World View**  
Satisfies the Natural Scientific Approaches core requirement.

**STS 314 Cosmological Thought**  
Satisfies the Connections core requirement.

**STS 345 Physics in the Modern World: Copenhagen to Manhattan**  
Satisfies the Connections core requirement.

**STS 348 Strange Realities: Physics in the Twentieth Century**  
Satisfies the Connections core requirement.

**STS 361 Mars Exploration**  
Satisfies the Connections core requirement.

**109 Astronomy**  
A survey of descriptive and physical astronomy, which are given roughly equal stress. Descriptive astronomy involves time reckoning, calendars, and the motions of the sun, moon, and planets. Physical astronomy deals with the composition and origin of the planets and solar system, as well as the evolution of stars and galaxies. A weekly laboratory is required. Satisfies the Natural Scientific Approaches core requirement.

**111/112 General College Physics**  
This two-semester sequence of courses is designed for any interested student regardless of his or her major. The fundamental branches of physics are covered, including mechanics, heat, sound, optics, electricity, magnetism, and nuclear physics. Although it is assumed that the student brings only a background of high school algebra, trigonometry, and geometry, additional mathematical concepts are developed within the course. A weekly laboratory is required. Credit for PHYS 111 will not be granted to students who have completed PHYS 121; credit for PHYS 112 will not be granted to students who have completed PHYS 122. Prerequisite: PHYS 111 or 121 is a prerequisite for PHYS 112. Each course satisfies the Natural Scientific Approaches core requirement.

**121 General University Physics**  
Fundamental principles of mechanics (including rotational motion and oscillations) and gravity are treated. A weekly laboratory is required. Credit for PHYS 121 will not be granted to students who have completed PHYS 111. Prerequisite: MATH 180 (may be taken concurrently). Satisfies Natural Scientific Approaches core requirements. Offered fall term only.

**122 General University Physics**  
Fundamental principles of heat, electricity, and magnetism are treated. A weekly laboratory is required. Credit for PHYS 122 will not be granted to students who have completed PHYS 112. Prerequisite: PHYS 121 and MATH 181 (may be taken concurrently). Satisfies the Natural Scientific Approaches core requirement. Offered spring term only.

**205 Physics of Music**  
This course is intended primarily for students having some background in music. The scientific aspects of musical sound are treated including the basic physics of vibrating systems, wave phenomena, and acoustics and their applications to musical instruments and musical perception. A weekly laboratory is required. Recommended: one semester of college-level music theory, formal music training, or permission of instructor. Satisfies the Natural Scientific Approaches core requirement.

**209 Introduction to Astrophysics**  
Astrophysics is the application of the laws and principles of physics to answer questions about the cosmos. This course develops the physics necessary to understand the origins, properties, and evolution of planets, stars, and galaxies as well as investigating the application of physics to questions of cosmological significance. The semester is divided between studying the theoretical tools astrophysicists have developed and using those tools with several small hands-on archival data analysis tutorials. Each student will end the semester by completing an individual observational or theoretical research project. Prerequisite: Phys 121/122 and Math 180/181, or permission of instructor. Offered every other year.

**221 Modern Physics I**  
The physics of waves is studied with emphasis on the nature of light, including propagation, interference, diffraction, and polarization. The constant speed of light leads to a careful study of the theory of special relativity. A weekly laboratory is required. Prerequisite: PHYS 122 and MATH 280 (may be taken concurrently). Satisfies the Natural Scientific Approaches core requirement. Offered fall term only.

**222 Modern Physics II**  
A continuation of PHYS 221, this course is an introduction to quantum mechanics with applications to atomic and solid state systems. A weekly laboratory is required. Prerequisite: PHYS 221. Satisfies the Natural Scientific Approaches core requirement. Offered spring term only.

**231 Circuits and Electronics**  
This course is intended to teach the fundamental behavior of electronic components and their applications in various circuits. A balance of lecture and laboratory experience demonstrates the practical method of investigation of electronic devices. Topics include AC and DC circuit analysis, amplifiers, active and passive filters, operational amplifiers, and digital electronics. Prerequisite: PHYS 112 or 122. Offered every other year.

**299 The History and Practice of Ancient Astronomy**  
This course treats the ancient astronomical tradition from its beginnings around 700 BC down to its culmination in the astronomical Renaissance of the sixteenth century. Attention is devoted not only to the emergence of astronomy as a science, but also to the place of astronomy in ancient life, including its use in timetelling, and its affiliations with literature and philosophy. The treatment of ancient technical astronomy is thorough enough to permit the student to apply ancient techniques in practical problems, e.g., in the design of sundials and the prediction of planet positions. Concrete models and scale drawings are used to deepen understanding and to simplify analysis, but some geometry is required. Prerequisite: one course satisfying the Humanistic Approaches core. Satisfies the Natural Scientific Approaches core requirement.

**305 Analytical Mechanics**  
This introduction to mechanics begins with the formulation of Newton, based on the concept of forces, and ends with the formulations of Lagrange and Hamilton, based on energy. The undamped, damped, forced, and coupled oscillators are studied in detail. Prerequisite: PHYS 122 and MATH 301 (may be concurrent), or permission of instructor. Offered fall term only.

**310 Statistical Mechanics and Thermodynamics**  
Newtonian mechanics and methods of probability are combined and used to gain new insights regarding the behavior of systems containing large numbers of particles. The concept of entropy is given new meaning and beauty. Certain properties of metals and gases are derived from first principles. The analysis of spectra leads to the initial development of the quantum
theory and the statistics obeyed by fundamental particles. This course assumes a knowledge of calculus. Prerequisite: PHYS 305 and MATH 280, or permission of the instructor. Offered every other year.

322 Experimental Physics An introduction to experimental physics, involving independent work on several physical systems. Prerequisite: PHYS 221 or permission of instructor. Offered every other year.

351 Electromagnetic Theory Theory of electrostatic and magnetostatic fields is discussed, with emphasis on the theory of potential, harmonic functions, and boundary value problems. Prerequisite: PHYS 122, MATH 280 and 301 (may be taken concurrently). Offered fall term only.

352 Electromagnetic Theory This is a continuation of 351, emphasizing radiation, the propagation of electromagnetic waves, and the theory of special relativity. Prerequisite: PHYS 351. Offered spring term only.

363 Biophysics This course explores the principles of physics applied to living systems. Topics include diffusion, hydrodynamics and the low Reynolds-number world, importance of entropy and free energy, entropic forces, molecular machines, membranes, and nerve impulses. Written and oral scientific communication is emphasized. This course is appropriate for junior or senior undergraduates in the sciences, particularly physics and biology. No specialized knowledge of biology or physics is expected, but a facility with algebraic manipulations and a working knowledge of calculus is needed. Crosslisted with BIOL 363. Prerequisites: Math 180 and either Physics 111 or 121 are required, as is either Biology 212 or a previous 300-level course in biology or physics, or permission of instructor.

390 Directed Research Variable credit: 0.25-.50 or 1.0 This course provides a theoretical or experimental physics research experience for juniors or seniors under the direction of a faculty mentor in the Department of Physics. The research will result in a written summary of the research results. Prerequisite: Completion of Directed Research Contract with permission of research mentor, to be approved by department chair and Registrar before student registers. Offered each semester, including summer.

411 Quantum Mechanics I This course is an introduction to the quantum theory of matter. The emphasis is on exactly soluble systems including the infinite square well, harmonic oscillator, and hydrogen atom. The theory of angular momentum is also discussed. Prerequisite: PHYS 305, PHYS 351, and MATH 301, or permission of instructor. Offered fall term only.

412 Quantum Mechanics II This is a continuation of Physics 411. The emphasis is on achieving perturbative solutions to real physical systems. Topics may include time-independent and dependent perturbation theory, the WKB method, a discussion of the interaction between light and matter, and scattering. Prerequisite: PHYS 411, or permission of instructor. Offered spring term only.

491/492 Senior Thesis Credit, variable Research may be undertaken under the supervision of a faculty member on a topic agreed upon and described in a proposal to the supervising instructor.

493/494 Special Topics in Theoretical Physics Advanced topics in mechanics, optics, quantum mechanics, or other fields are studied. This course is offered in response to student interest in particular advanced topics. Prerequisite: PHYS 305, 351, or permission of instructor. Offered occasionally.
students will also choose to complete an optional thesis in the spring semester of their senior year. Many students also choose to do internships, conduct independent research, and participate in study abroad programs in order to broaden their academic experience. The department can provide guidance as to which study abroad programs may best meet the needs of students as well as helping place students in internships in the local area, in Washington, D.C., or overseas, and assisting them in receiving credit for this work.

The Department of Politics and Government provides its majors with information on a wide range of resources, including fellowship opportunities, summer programs, internships, alumni connections, employment and educational opportunities. These are maintained on the departmental blog and website. After graduation, many majors pursue careers and advanced degrees in political science, public policy, international development, diplomacy, business, and law. The department faculty draws upon their experiences, as well as those of alumni, to guide Politics and Government majors, helping them to find and realize their goals, wherever those goals may take them.

General Requirements for the Major or Minor

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major
1. Completion of a minimum of ten units in the Department of Politics and Government to include
   a. Two 100-level courses (PG 101, 102, 103, or 104);
   b. PG 200;
   c. Five 300-level courses, three of which must be taken in the student’s area of concentration within the discipline:
      U.S. Politics: PG 304, 305, 306, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319,
      344, 346, 353, 354, or 355
      Comparative Politics: PG 315, 321, 323, 325, 326, 328, 336, 337, 347, 360, 361, 372, 376, 382; IPE 380
      International Relations: PG 331, 332, 333, 334, 335, 336, 337, 338, 339, 343, 344, 354, 381, 382; IPE 380
      Political Theory: PG 334, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 380
   d. One 400-level senior capstone course in the student’s area of concentration;
2. At least five units of the total must be completed at Puget Sound.
3. Any deviation from these requirements requires written approval by the chair of the Politics and Government Department.

Requirements for the Minor
1. Completion of a minimum of five units in the Department of Politics and Government to include
   a. Two 100-level courses (PG 101, 102, 103, or 104);
   b. Three units at the 300 level. One course may be at the 400 level;
2. Any deviation from these requirements requires written approval by the Chair of the Politics and Government Department.

Notes for Majors and Minors
1. Students who study abroad may apply two approved courses toward their Politics and Government Major. Of these courses, only one may apply to the student’s area of concentration.
2. With prior approval of the Politics and Government Department, one unit of PG 498 may apply toward the major.
3. Independent study and IPE upper-division courses may count toward the major with prior approval of the department.
4. The Politics and Government Department will determine on a case-by-case basis the acceptability of courses that may be applied to a major or minor based on the age of the course.
5. Students wishing to write a senior thesis can apply for entry into PG 490 (Thesis in Politics and Government) upon completion of the fall senior capstone course and fulfillment of application requirements.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI1 142 The Concept “Orwellian”

Other courses offered by Politics and Government Department faculty. See Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24).

ASIA 344 Asia in Motion
Satisfies the Connections core requirement.

CONN 397 Migration and the Global City
Satisfies the Connections core requirement.

CONN 420 The American Progressive Ideal
Satisfies the Connections core requirement.

101 Introduction to U. S. Politics This course introduces students to the institutions and processes of U. S. politics. It covers all of the fundamental principles and important decision makers, giving to students the necessary breadth and understanding to take more advanced and more specialized courses. In addition, it prepares students to evaluate the guiding values of the polity, both in theory and in practice. Satisfies the Social Scientific Approaches core requirement. Offered each semester.

102 Introduction to Comparative Politics How do we understand the fall of Apartheid in South Africa, the rise of Islamic Fundamentalism in Iran, the troubles of Russia’s post-Communist regime, and China’s attempt to blend communism with capitalism? This course provides students with the tools to understand these and other questions about how politics works around the globe. The study of comparative politics focuses on the basic foundations of political life and how these institutions differ in form and power around the world. This introductory course deals with such central concepts as nation and state, citizenship and ethnicity, political ideology, religious fundamentalism, revolution, terrorism and political violence, the relationship between politics and markets, democracy and authoritarianism, electoral systems and different forms of representation, development and globalization. These concepts are investigated through a number of country case studies, which may include the United Kingdom, Japan, Russia, China, Iran, India and South Africa, among others. Satisfies the Social Scientific Approaches core requirement. Offered each semester.

103 Introduction to International Relations What are the causes of war between states? What conditions help make peace more likely? Is the international distribution of economic assets just? Why is it so difficult
to increase the amount of cooperation between states? What role can non-states actors play in international politics? These are just some of the questions considered in this course. By focusing on the interaction of contemporary and historical international actors—including states, intergovernmental organizations, and non-governmental organizations—this course examines the interplay of political, economic, social, and cultural factors that influence the international distribution of power and wealth and contribute to world conflict and cooperation. Specific areas of study include causes of interstate war, terrorism, economic globalization, and international law and organizations. Satisfies the Social Scientific Approaches core requirement. Offered each semester.

104 Introduction to Political Theory: The Perennial Issues This course is designed to provide an introduction to the enduring figures and texts of ancient, classical, and modern political thought (such as Plato, Locke, Hobbes, Machiavelli, Marx, Rousseau, Wollstonecraft, and Du Bois) that enhance our understanding of the formation of political community. Course readings allow students to investigate crucial themes in the development of political theory, including political authority, sovereignty, citizenship, and political identity and behavior. Satisfies the Social Scientific Approaches core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered each semester.

200 Power and Political Inquiry This course is an introduction to the construction of knowledge in the social sciences, and in political science particularly. In the first half of the course, students study the tools and methods used in political science. Students explore the connections between normative and empirical claims, uses of evidence, and theory building and testing. They ask how theoretical ideas are generated and how they inform the world around them (both explicitly and implicitly). In the second half of the course, they focus on the concept of power, central to any study of politics, to ask: how do actors use claims, theories, and data to reinforce or subvert dominant power structures? This class provides students the tools and perspective to become more thoughtful interlocutors and more critical consumers of information by helping them better understand the processes of knowledge construction. This is a required course for the major. Prerequisite: declared PG majors only; any two 100-level PG courses. This course should be taken before the junior year.

300 Methods, Analysis, and Argument in Political Literature This course examines approaches and methods that will most improve majors’ reading, writing, and discussing books, articles, and other media related to politics and government. The instructor and students will coach each other in efficient but perceptive reading, skeptical but sympathetic consideration of and conversation about perceptions and interpretations, and sensible planning and careful executing of responses to extant researches.

304 Race and American Politics Race is central to understanding U.S. politics. This course asks the questions: what does race mean; how has it changed over time; what is the relationship between race and ethnicity and power; and what is the role of race in U.S. politics. This course examines these questions by looking at a variety of historical and contemporary moments, and a variety of political forces including electoral politics, social movements, government institutions, and everyday politics. By the end of this course, students should be able to talk critically about the evolution of the concept of race in America, identify how race shapes our political language and outcomes, and evaluate contemporary racial politics. Prerequisite: PG 101. Offered every other year.

305 U.S. Environmental Policy This class focuses on environmental policymaking and policy in the United States, emphasizing developments since the emergence of the modern environmental movement in the late 1960s. It offers an overview of environmental policymaking institutions and the key policies of the national and state governments, and explores the challenges that have come with the emergence of new issues and interests in the environmental policy field. The class gives special attention to the strengths of weaknesses of current policies and the prospects for significant reform of the “green state.” Prerequisites: P&G 101. Offered occasionally.

306 Immigration Politics and Policy in the U.S. Immigration politics and policy define the nation, its borders, its community, and its identity. Through an exploration of the political history of immigration, students gain insight into the reconstruction of American identity. The class looks at the rhetoric, the movements, the institutions, and the actors central to the politics of immigration to understand the current system and future political possibilities. Specific policy issues such as refugee and asylum policy, border enforcement, immigration detention, and birthright citizenship are considered. Offered occasionally.

308 Images of Corruption in U.S. Politics This course explores many visions of the corruption of the American republic, exploring concerns grounded in the liberal and civic republican and constitutional traditions, commitments to and deviations from the core commitments of the American “creed,” religious values, pluralism, the partisan and ideological “spirit of faction,” and the abandonment of the hope that, to borrow from Richard Rorty (through James Baldwin), we can “achieve” a country. The reading list includes books that engage broad themes in American politics and American political development, and this course exposes students to those themes while working through the multifaceted meanings of corruption, and the political consequences of these perceptions of corruption. Prerequisite: PG 101, Junior or Senior Standing. Offered occasionally.

309 U.S. Presidency This course focuses on the US presidency. In the first part of the course students read two great books on the presidency and the American political system, Richard Neustadt’s Presidential Power and Stephen Skowronek’s The Politics Presidents Make as tools for understanding the evolution of the presidency as an institution and its relationship to the larger constitutional system. In the second half of the course students trace the growth of presidential power over the course of US history, focusing on executive management of the bureaucratic state and control of foreign affairs, and consider the implications of this development for the republic. Prerequisite: PG 101. Offered every other year.

310 Presidency and Congress The course focuses on the historical development of the legislative and executive branches, focusing on the interactions between Congress and presidents in policy making process. Some offerings of the course focus heavily on the presidency, and others are more focused on Congress; recent offerings have used a single presidency as a long case study of problems in presidential leadership and the workings of the legislative and executive branches. Prospective students may wish to consult the instructor. Prerequisite: PG 101. Offered every other year.

311 Politics of Detention: Criminal Justice, Immigration, and the War on Terror Detention is one of the most extreme forms of state control. This class explores the theoretical justifications for state detention, the effectiveness of this policy tool, the politics that lead to its use and acceptance, and the impacts of detention, both on the individual and various communities. Looking at the variation across three policy areas, criminal justice, the war on terror, and immigration, highlights what forces are at work on all three and what pulls the practices of detention in different di-
reictions, providing leverage on questions of justice, the balance of power, and the role of identity in public policy formation. Offered every other year.

312 Parties, Elections, and Campaigns In a government based on “the consent of the governed,” elections are fundamental. They provide citizens with the opportunity to choose their leaders, and in the process pass judgment on the past performance of officials and broadly indicate the direction they want government to take in the future. This course approaches the study of parties, elections, and campaigns through the lens of presidential and congressional elections, focusing on the purpose, process, and problems of electing our nation’s leaders. It looks at how the system works, how it came to be, what citizens want it to accomplish and what it in fact accomplishes, and what the possibilities and limits of reform may be. At the end of the course, students should be able to give an in-depth, well-reasoned, and historically informed answer to the question, “Is this any way to run a democracy?” Prerequisite: PG 101. Offered every other year.

313 American Constitutional Law Examination of the role of the Supreme Court in the American constitutional systems with particular emphasis on its role in establishing a national government and national economy, and in protecting the rights of individuals. Views Supreme Court from historical, political, and legal perspectives to understand its responses to changing interests and conditions. Prerequisite: PG 101. Offered every year.

314 U.S. Public Policy There is widespread pessimism about the performance of American national government over the last 35 years. This course examines this gloomy conventional wisdom, exploring its analytical and ideological roots and its critique of American political institutions and public policy. The class then interrogates it, first by examining contrary arguments and evidence and then in a series of student-led case studies of government performance in specific policy areas. Students produce major term papers that assess the successes and failures of some public policy. The course aims at helping students to come to grips with the complexities of policymaking, the strengths and weaknesses of national governmental institutions, and the extent to which the pessimism that marks so much of contemporary political discourse is justified. Prerequisite: PG 101. Offered every other year.

315 Law and Society This course introduces students to the nature, functions, and processes of law. The course surveys criminal and civil trials in the U.S., England, and France, appellate deliberations in several countries, constitutional courts and public law, and specific extra-judicial legal institutions. The latter third of the course details lessons of the first two-thirds by case study of litigation in the United States. Prerequisite: PG 101. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every other year.

316 Civil Liberties The course surveys the state of civil liberties in the U.S. and the world. Primary emphasis is given to institutions in the United States, and how they enforce, obstruct, or affect the protection of civil liberties. Specific topics include free expression, free belief, freedom of religion, and emerging rights and claims. Prerequisite: PG 101. Offered every other year.

317 Politics and Policy of the U.S. Welfare State This course focuses on social welfare policy in the United States. The first section of the course explores ideological debates over the welfare state, theories of welfare state development, and the historical development of the U.S. welfare state in comparative perspective. The middle section of the course explores arguments about challenges to political order created by market dynamics, the question of American exceptionalism, and the intersections of race, gender, and welfare in American political development. Then, we focus on core welfare state policies aimed at addressing problems of unemployment, poverty, access to health care, and old age security. The final section addresses questions about the sustainability of the welfare state, in practical, fiscal as well as ideological terms. Prerequisite: PG 101; PG 314 recommended. Offered every three years.

318 Public Opinion This course introduces students to the theory and practice of research about public opinion. Students learn about the creation and manipulation of public opinion, its measurement and study, and the implications of findings for the practice of democratic republicanism in the U.S. and abroad. Instruction includes projects in survey research and content analysis, so that students master the techniques of public opinion research as well as the theories. Prerequisite: PG 101. Offered every other year.

319 Local Politics This course in U.S. politics focuses on key questions about local governance. Students explore institutional structure, civic engagement, local economics, and demographics to understand how decisions are made, power is wielded, and community needs are met. Students engage in sustained field work throughout the term. Placements include municipal, county, and non-profit organizations. Prerequisite: instructor permission. Offered every other year.

321 European Political Systems An overview of the political systems of Europe that covers both the advanced industrial democracies of Western Europe and the emerging regimes of Eastern Europe. The focus of this course is comparative, and students should expect to study a number of substantive themes such as the crisis of the welfare state, the decline of party politics and the rise of “single-issue” movements, the move toward a more comprehensive European union, and the democratization and “marketization” of East European nations. Different instructors may decide to focus on one or more themes and/or one or more regions of Europe. Prerequisite: PG 102. Offered occasionally.

322 Asian Political Systems A comparative analysis of development and democracy in seven Asian political economies: Japan, Taiwan, South Korea, Singapore, Malaysia, China, and Vietnam. The course begins with a survey of China’s, Japan’s, and the United States’ role in Asia and then places each of the political economies in comparative perspective. Prerequisite: PG 102 or permission of instructor. Offered every other year.

325 African Politics Understanding the diverse experiences of the peoples of Africa requires engagement with the cultures, politics, religions, and perspectives of people in more than fifty countries across a vast continent. While such engagement can hardly be accomplished in a semester, we will attempt to scratch at the surface in different ways that reveal ideas, experiences, and thoughts that reflect political life and culture in Africa south of the Sahara in a more reflective manner. Prerequisite: PG 102. Offered every other year.

326 People, Politics, and Parks Conserving wild places through the creation of national parks is not only a reflection of environmental priorities, but a profoundly political undertaking that can bring significant changes to local landscapes. This course examines the intersection of protected areas and political priorities in local, regional, and global context, including discussion of issues such as tourism, human–wildlife conflict, forced displacement, and community–based conservation. Crosslisted as ENVR 326. Prerequisite: ENVR 101 or PG 101, 102, or 103. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every year.

328 Theories of Development, Exploitation, and Political Change This course offers an intellectual history of the evolution of the interdis-
331 U.S. Foreign Policy Explores the roots and extent of U.S. America’s involvement in world affairs; ideological, institutional, and strategic factors shaping U.S. foreign policy since WW2. Students investigate the global responsibilities of the United States’ responsibility and its influence on global conditions. Approaches to analyzing U.S. foreign policy. Prerequisite: PG 103 strongly recommended. Offered every other year.

332 International Organizations A theoretical and practical examination of the role played by a number of international and regional organizations in the international system today. Comprehensive study of a number of international organizations including the United Nations. Prerequisite: PG 103. Offered every other year.

333 International Law in Political Context What is international Law? Who determines its content? Why do sovereign states willingly bind themselves under its rules? Is it a tool of the powerful, or a safeguard against exploitation? In short, does international law matter? This course draws on primary source materials (cases and treaties) and scholarly articles to examine the processes of international law as seen from the perspective of politically motivated actors. Readings examine broad theoretical issues pertaining to international law as well as the functioning of international legal regimes in specific issue areas such as trade, human rights, and the environment. Students apply political science methodologies in an attempt to understand and explain the behavior of states and non-state actors as they engage in a competition to create, enforce, and resist international law. Students should complete PG 103 and have a familiarity with international relations theory and social science methodologies prior to taking the course. Prerequisite: PG 103. Offered every other year.

334 The Challenge of Global Justice This course examines the configuration of world politics and how claims of individual and group rights challenge the current global framework. Students examine the role of the state as a meaningful purveyor of rights and material goods. They also analyze and critique alternative approaches to organizing human populations in an increasingly globalized world. It is easy to say that the world’s poor deserve a better material existence. It is much more difficult to determine where the duty to provide resources lies, and how individuals, states, and organizations might achieve better outcomes. Students examine these issues from the perspective of states, international organizations, and non-governmental entities. Prerequisite: PG 103. Offered occasionally.

335 Global Security This course explores evolving threats to global peace and stability in the post-Cold War era. The class tests the efficacy of traditional theories about international conflict through the examination of a number of contemporary security problems. Attention focuses on issues that are persistent, politically explosive, and global in scope, such as nationalism, migration, and environmental problems. All have potential for generating violent conflict in the world today. Prerequisite: PG 103. Offered every year.

336 Terrorism This course examines the phenomenon of terrorism on many different dimensions. First, it explores what is meant by the term “terrorism,” and the question of “Is one man’s terrorist another man’s freedom fighter?” Next, the class considers why certain groups turn to terror. What do they hope to accomplish and how does terrorism help them achieve their goals? The course then looks at various examples of terrorism and strategies to combat it. Is terrorism best fought like a military conflict or like an international crime? How can states hope to protect themselves? Ethical issues are also addressed, such as how the needs of national security are balanced against the requirements of civil liberties in a free, democratic society. Finally, the course considers the War on Terror itself, analyzing its strategies and tools and assessing its purpose and efficacy. Prerequisite: PG 102 or 103. Offered every other year.

337 U.S. – Canadian Relations This course examines the current relationship between the United States and Canada. After a brief overview of U.S. and Canadian political institutions, and initial efforts to distinguish American and Canadian political culture, this course then focuses on contemporary issues in the complex political, economic and social relationship between the two states. Prerequisite: PG 102 or PG 103. Offered occasionally.

338 Constitutional Law of U.S. National Security The course examines the constitutional law of U.S. national security policy. It explores classic constitutional issues, such as separation of powers, war powers of the President and Congress, intelligence operations, and treaty-making, as well as contemporary policy issues, such as domestic wiretapping, and the internment and trial of suspected terrorists. Prerequisite: PG 101, 103, or permission of instructor. Offered every other year.

339 The Politics of Empire Empires have existed since the pre-modern era, and until the mid-twentieth century imperial states were the dominant form of government. Today, no state refers to itself as an empire—yet the term is still widely used. Some call modern American foreign policy “imperialist.” Other react that American power is a stabilizing force. The purpose of this course is to examine critically the meaning of the term “empire.” What do empires have in common? What are the political causes of empire, and what are its effects on the colonizer and the colonized? What are the common attributes of this form of governance across time and space? Is economic dominance without political conquest “imperial” in any meaningful sense of the word? If the United States has an empire, what exactly does this mean? Do American interactions with other peoples reflect earlier patterns of imperial dominance, or do users of the term “empire” (perhaps willfully) mischaracterize the phenomenon of benign American hegemony? Students attempt to answer these questions through critical examination of historical forms of empire and contemporary accounts of American political and economic policy. Students should complete PG 103 and have a basic familiarity with international relations theory and social science methodologies prior to taking the course. Prerequisite: PG 103 or permission of instructor. Offered occasionally.

340 Democracy and the Ancient Greeks This course examines ancient Athenian political philosophy and applies the questions raised in those texts to contemporary political challenges. In light of the ideas, words, and deeds of thinkers from ancient Greece, students ask themselves: “how shall we live, and what shall we do in our time?” Thinkers studied typically include Homer, Thucydides, Aristotle, and Plato. The course also explores Greek satire and tragedy. Offered every third year.

341 Liberalism and its Critics This course examines the theoretical foundations of liberalism and radical critiques of it from both the left and the right. In addition to exploring the political implications of the various
conceptions of nature, human nature, justice, freedom, and equality found in the works of various thinkers, students use their arguments to reflect on contemporary liberal democratic theory and practice. Thinkers studied typically include Locke, Rousseau, Burke, Marx, Nietzsche, and others. Credit for PG 341 will not be granted to students who have received credit for PG 441. Offered every other year.

342 Contemporary Democratic Theory This course explores an ongoing debate in contemporary political theory about the nature, challenges, and limits of democracy. Students explore liberal, deliberative, and radical theories of democracy and develop a sense of the central challenges of democratic governance in our time. Central themes include freedom, justice, identity, citizenship, collective decision-making, and the state. Prerequisite: PG 104. Offered every third year.

343 The Political Philosophy of International Relations What is justice? How should society be governed? What is the good life? Questions like these, while abstract and philosophical, underpin all international political disputes, and understanding them is a first step towards resolving the conflicts inherent in international relations. This course seeks to draw connections between the problems of international politics and the world of political philosophy. It traces the history of political thought, from ancient Greece and its proto ideas of both realism and idealized governance through the hard-nosed politics of Machiavelli and Hobbes and the modernized idealism of Kant and Grotius up to the present-day thinking of such international relations scholars as Morgenthau, Waltz, and Walzer. In doing so, the class explores the connections linking political thinking and events across time, taking lessons from different times and applying them to the problems of today. The course concludes by examining four case studies of real policy problems, including humanitarian intervention, the role of international law, and the invasion of Iraq, through the lens of political theory. Prerequisite: PG 104. Offered every other year.

344 American Political Thought In the words of former British Prime Minister Margaret Thatcher, “Europe was created by history; America was created by philosophy.” The history and character of the United States cannot be understood without careful examination of the ideas, theories, and philosophies that underpin the American nation. This course examines the various strands of American political thought, beginning with the early political thought of the Puritans. Much attention is paid to the theories that unite the United States, such as the adoption of the Declaration of Independence and the Constitution, as well as those ideas that have divided the nation, such as race and slavery during the Civil War. The course concludes by considering the enduring tensions in American liberalism and the modern civil rights era. Offered every other year.

345 Politics and Community Engagement This course in political theory prepares students for active participation in local politics. Students develop both a theoretical understanding of political participation and a set of practical skills to enable them to work actively within their communities. Through the study of theories of participation, power, and justice, students explore the ethical and political challenges of undertaking community and political organizing. At the same time, students gain practical skills for undertaking community engagement work; they have real opportunities to communicate with diverse community partners on issues of mutual concern, to conduct power analysis, and to identify strategies for political engagement. Offered occasionally.

346 Race in the American Political Imagination Students explore the concepts of citizenship and personhood in the American political imagination as filtered through a racial valence. Perhaps what is most striking about this valence is the way that it—and Americans’ conceptions of whiteness, citizenship, and personhood—has evolved through America’s history. Students will consider what role such images play in constructing a “shared” political community, and to what extent the exclusions they engender strengthen or undermine this community. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every third year.

347 Comparative Political Ideologies Can ideologies, when put into practice, live up to the utopian dreams of their visionaries? Or will they degenerate into dystopian nightmares? In this course in political theory, students study many of the ideologies that have shaped politics in the twentieth and twenty-first centuries. They explore the core theoretical texts of nationalist, anarchist, socialist, liberal, and Islamist movements, including Marx, Mao, Mussolini, Qutb, and others. Finally, they reflect on the (perhaps utopian) ideals that shape these movements and on how those ideals have influenced politics and political arrangements. Offered every other year.

348 Philosophy of Law This course is concerned with the nature of law and the relationship between law and morality. The course is centered on questions like the following: What is the connection between law and morality? Is it morally wrong to break the law? Is breaking the law sometimes morally permissible or even morally required? Should morality be legally enforced? To what extent, if at all, should legal decisions be influenced by moral beliefs? What are the relationships between legal, constitutional, moral, and political rights? How can legal punishment be morally justified? While pursuing answers to these questions through the work of leading legal philosophers, students read a number of actual court cases and discuss specific issues like hate speech, homosexuality, and capital punishment, among others. Crosslisted as PHIL 378. Prerequisite: one previous course in philosophy or one course in Political Theory (PG 104 or 340-347).

349 Contemporary Issues in Political Theory This course explores contemporary issues in political theory related to questions of citizenship, membership, and power. Students reflect on the structures and practices that determine who wields power, who holds citizenship status, who counts as a member of a political community. Students might also explore the relationship between economic and political arrangements. Prerequisite: by instructor permission only. Students who receive credit for PG 349 will not receive credit for PG 440. Offered every other year.

353 Religion and U.S. Politics Looking at the interaction between religion and politics in the United States, students explore various understandings of the relationship between church and state, the treatment of minority religious communities and the influence of religion on the formation of American identity, institutions and policies. Students investigate various theoretical approaches and US political development to provide a foundation for evaluating how religion and politics influence each other in the current moment. Topics include political behavior, public opinion, organizational activity, and public policies, such as gay rights, environmental policy, and immigration. Prerequisite: PG 101. Offered every other year.

354 Washington State Legislative Process Students engage in a series of seminars on the Washington state legislative process learning from experts in the field and engage in simulations of some of the core conflictual processes. Students learn about the difficulties of budgeting, the rules of the state legislative chamber and how they impact outcomes, the role of political parties and legislative leaders and industry lobbyists, as well as how to conduct legislative research, create sample legislative proposals, and write about state politics for the general public. Offered every other year.
355 Comparative State Politics  State governments are often overlooked, however, states wield tremendous power over the daily lives of citizens. A citizen’s life can look very different depending on what state she lives in. The course takes a comparative approach to understand this critical level of U.S. politics. Why is marijuana legal in some states and not others? Why are the systems of public education so different? A comparative look allows students to ask why states respond differently to similar policy questions, considering the potential role of historical, cultural, economic and political contexts as well as variations in institutional arrangements. After delving into factors that alter the political opportunity structures in states, students turn to case studies. Looking at particular states and particular policy issues allows one to see how and why politics and political outcomes vary across states. Offered every other year.

360 Israel, Palestine and the Politics of the Middle East  This course focuses on the conflict between Israel and the Palestinians, and the relationship between this conflict and the politics of the Middle East. The course will begin with an overview of the emergence of the Israeli state, and the competing national identities of the Palestinian and Israeli people. The subsequent wars between Israel and its neighbors will also be considered, as well as the emergence of terrorism as a political tool. This will be followed by an analysis of the peace process between Israel, the Palestinians and neighboring states, as well as the domestic institutions and issues within Israel, the West Bank, and Gaza. The course will conclude with a discussion of the obstacles to peace between Israelis and Palestinians and between Israel and other. Prerequisite: PG 102. Offered every year.

361 Iran and the Politics of the Persian Gulf  This course focuses on Iran and its relationship with its neighbors in the Persian Gulf and beyond. The course will begin with an investigation of the emergence of modern Iran, including the development of the Iranian state and national identity. The course will then focus on the origins of the 1979 Iranian Revolution, looking at the impact of ideological and religious forces in the overthrow of the previous regime. This will be followed by a discussion of how the Iranian Revolution affected regional politics, including the rise of political Islam and the use of terrorism as a political tool. Current political institutions and issues in Iran will also be given attention, as well as the relationship between Iran and other actors, including Saudi Arabia, Israel, and the United States. The course will conclude with an analysis of the prospects for political change in Iran. Prerequisite: PG 102. Offered every year.

372 Japanese Political Economy  This course is designed to familiarize students both with the institutions of the Japanese political economy and with a breadth of issues relevant to a deeper understanding of how political and economic processes actually work in Japan. It is comparative in nature and deals primarily with issues since 1945. Prerequisite: PG 102 or permission of instructor. Offered every other year.

378 Chinese Political Economy  This course provides a fundamental understanding of the political, economic, and social foundations and permutations of the People’s Republic of China (PRC). Students learn why a multidisciplinary political economy approach is most appropriate for comprehending the complex array of situational determinants that have shaped the PRC during both its revolutionary (1949-77) and reformative (1978-present) eras. Students employ the analytical tools of comparative political economy to identify and weigh those factors most relevant to this remarkable story of socio-political and economic development: political and economic, social and cultural, structural and historical, domestic and international. Prerequisite: PG 102, or 103, or permission of the instructor. Offered every year.

382 Global Environmental Politics  The course examines the intersection of environmental issues with politics and policy-making on a global as well as a local scale. It explores international structures and efforts to deal with environmental problems, a wide range of particular environmental challenges such as climate change and conservation, and the different experiences of individual countries in trying to use and manage their natural resources. Throughout, the relationships between political and natural systems are explored, with a particular focus on the ways in which politics and policy can both produce effective strategies and new difficulties for handling environmental challenges. Crosslisted as ENVR 382. Prerequisite: ENVR 110, PG 102 or 103. Offered every other year.

384 Ethnic Politics  This course examines the political implications of ethnic diversity around the globe. How does ethnic identity relate to nationhood? How do ethnic cleavages affect governance, political mobilization, and development? Does ethnic identification affect a state’s propensity for war? How can institutions and policies moderate or exacerbate these tendencies? Students use theory and concrete examples to examine how political scientists measure and compare ethnicity and its effects around the world. While reference to the U.S. and Europe is made, emphasis is on Asia, Africa, and Latin America. The course concludes with a weeks-long, in-depth simulation of politics on the Indian subcontinent. Prerequisite: PG 102 or 103 or instructor permission.

385 Feminist Approaches to International Relations  In her landmark work on feminism and international politics, Cynthia Enloe encourages scholars to ask, “Where are the women?” when trying to understand international relations. This course introduces students to feminist analysis of international relations by engaging both theoretical and practical questions about women’s experiences in the world. From a foundation of ethics, the course builds to address the place of gendered analysis in international relations issue areas such as security, political economy, and migration. Prerequisite: PG 103 or 104 and one additional PG course. Offered every other year.

387 Just War Theory  This course considers the evolution of the idea of morally justifiable warfare, primarily in the Western context. Students trace just war theory from the ancient world to the present day, with attention to both religious and secular theoretical texts. The course encourages students to think about recent and contemporary international relations through the lens of just war theory. Prerequisite: PG 103 or 104. Offered every other year.

390 Gender and Philosophy  This course is a study of a number of philosophical and political questions related to gender and with the relation between these two types of questions. The course will be concerned first, with metaphorical issues concerning gender: What is gender? How many genders are there? Is there an essence of womanhood or manhood that goes beyond certain physical characteristics? Are ‘woman’ and ‘man’ purely natural categories or are they to some extent socially constructed? Is gender a social/political concept? Second, with epistemological issues that relate to gender difference: Do women, for example, see the world differently from men? What kind of implications does this have for scientific and philosophical knowledge? Are there, for example, specifically female ways of thinking or reasoning? If so, to what extent are they marginalized? Do gender related values or political aims affect scientific knowledge? Finally, with ethical issues related to gender: What is gender oppression? What is sexism and heterosexism? Granted that everyone has an equal right to flourishing regardless of gender, is a woman’s flourishing, for example, different from a man’s? Are there specifically gendered roles for men and women? To what extent are we culturally biased when we think that women or those who don’t conform to gender norms living in other cultures are oppressed?
Satisfies the Knowledge, Identity, and Power graduation requirement. Crosslisted as PHIL 390.

410 Capstone Course in U.S. Politics Students in this capstone course focus on some major concerns of U.S. politics or public law and are required to complete assignments in the topic area of the seminar. The theme or topic of the seminar changes from year to year, and prospective students should check with U.S. politics faculty to determine the theoretical and substantive focus of the upcoming offering. Students who wish to complete a senior thesis should consult the requirements to enroll in PG 490. Prerequisite: PG 101, major concentration in U.S. Politics, senior standing, and PG 200 or permission of instructor. Offered every year.

420 Capstone Course in Comparative Politics Students in this capstone course study major theoretical approaches to comparative politics and are required to apply those approaches to one or more writing projects. The theme of this seminar changes each year. Prospective students should check with the comparative politics faculty to determine the theoretical, substantive, and geo-graphical focus. Students are expected to participate regularly in seminar discussions and may be responsible for leading class sessions. Students who wish to complete a senior thesis should consult the requirements to enroll in PG 490. Prerequisite: PG 102, major concentration in Comparative Politics, senior standing, and PG 200 or permission of instructor. Offered every year.

430 Capstone Course in International Relations Students in this seminar critically examine older and emerging theories of international relations as well as the issues and problems those theories attempt to explain. Students may be expected to lead and participate in class discussions and to take an oral examination. Students who wish to complete a senior thesis should consult the requirements to enroll in PG 490. Prerequisite: PG 103, major concentration in International Relations, PG 200, and senior standing, or permission of instructor. Offered every fall.

440 Contemporary Issues in Political Theory This course explores contemporary issues in political theory related to questions of citizenship, membership, and power. Students reflect on the structures and practices that determine who wields power, who holds citizenship status, who counts as a member of a political community. Students might also explore the relationship between economic and political arrangements. This course serves as a senior capstone course in political theory. Students who wish to complete a senior thesis should consult the requirements to enroll in PG 490. Prerequisite: by instructor permission only. Students who receive credit for PG 440 will not receive credit for PG 349. Offered every other year.

441 Liberalism and its Critics This course examines the theoretical foundations of liberalism and radical critiques of it from both the left and the right. In addition to exploring the political implications of the various conceptions of nature, human nature, justice, freedom, and equality found in the works of various thinkers, students use their arguments to reflect on contemporary liberal democratic theory and practice. Students who wish to complete a senior thesis should consult the requirements to enroll in PG 490. This course serves as a senior capstone course in political theory. Credit for PG 441 will not be granted to students who have received credit for PG 341. Offered every other year.

490 Thesis in Politics and Government Some students may wish to continue the research they began in the senior capstone course by enrolling in this optional thesis course. Students who wish to complete a thesis do so in the spring semester of their senior year (having completed the field-specific capstone course in the fall semester of the senior year). In this course, students complete much of the thesis work independently under the supervision of the thesis instructor. Requirements to enroll in PG 490 are: 1) a minimum grade of “B” in fall capstone course (PG 410, 420, 430, 440, or 441); 2) composition of a prospectus which includes explanation of the proposed topic, the research question, and review of relevant research on the topic and is approved by the instructor of the capstone course (PG 410, 420, 430, 440, or 441); and 3) a formal, consultative meeting about the project which includes the student, the thesis instructor, and one faculty field advisor from the student’s major track.

495/496 Independent Study Requires prior departmental approval to count toward major or minor.

498 Internship Tutorial Students complete 120 hours of field experience at a site prearranged in consultation with the department and internship coordinator. In addition, the student works with a faculty mentor within the department to develop an individualized learning plan which must be pre-approved by the department and completed alongside the field experience. The learning plan is tailored to integrate the field experience with relevant scholarship, linking the major to practical job experience. One unit of PG 498 may count toward the major. Prerequisite: approval of tutorial professor and the Internship Coordinator.

PSYCHOLOGY

Professor: David Moore; Sarah Moore; Mark Reinitz; Carolyn Weisz; Lisa Fortlouis Wood

Associate Professor: David Andreassen; Tim Beyer, Chair; Jill Nealey-Moore

Assistant Professor: Erin Colbert-White; Melvin Rouse; Adrian Villicana

About the Department

Psychology is the study of human thought and behavior. A current assessment of the field of psychology recognizes its application within a wide variety of professions including business, education, law, physical and occupational therapy, medicine, and clinical practice. While acknowledging this breadth of application, the academic discipline of psychology remains strongly wedded to scientific investigation as the fundamental underpinning of psychology and its effective application. Thus, a solid foundation in psychology hinges on an empirically-based understanding of human and animal thought, experience, and behavior. Psychology also has roots in the rational self-reflective capacities of the human mind, in the search for meaning within experience, and in a humanistic concern for others. A comprehensive understanding of the field requires research training, critical analysis of psychological theories and research, and the ethical application of scientific knowledge.

The psychology faculty and curriculum represent many of the major subdisciplines in psychology (e.g., development, clinical, cognition, learning, sensation, perception, biopsychology, personality, social, and industrial-organizational). Lower division courses geared toward majors and non-majors introduce students to psychological theories and ways of knowing within broad content areas. Within the major, students progress through a series of methods, statistics, and laboratory courses and take upper division elective courses to explore selected topics in greater depth. Seminars and independent study courses provide opportunities for students to approach contemporary issues in psychology and to develop the skills of scholarship at a more sophisticated level. Cocurricular opportunities including colloquia, internships,
Psychology club activities, and faculty-supervised research enhance the major for interested students.

The curriculum in the Department of Psychology meets many of the broad educational goals of the university. It provides opportunities for students to strengthen both the quantitative and verbal aspects of logical thinking and critical analysis. Students develop their written and oral communication skills, consider connections between psychology and other disciplines, and apply psychological concepts to practical problems. Topics within psychology frequently reach students at a personal level, providing the motivation for both intellectual and personal development. Thus, education in psychology helps students appreciate their role within the broader contexts of community, culture, and the world.

Students with a major in Psychology develop

a. a breadth and depth of understanding of the content of psychology, including familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends within the academic field;

b. an ability to think scientifically, including constructing arguments, analyzing and interpreting data, reading and critiquing different forms of scientific writing, and evaluating ethical issues and scientific standards;

c. an ability to express ideas effectively, both orally and in writing, within the discourse of the discipline;

d. an appreciation for and understanding of multiple perspectives, including socio-cultural, international, and individual differences as well as interdisciplinary and sub-disciplinary connections among different ways of knowing and across basic and applied approaches to the social and natural sciences; and

e. characteristics valuable for personal development and effective civil engagement, including the abilities to think critically, to work independently as well as collaboratively, to solve problems effectively, to act ethically, and to apply academic knowledge to real-world problems.

General Requirements for the Major

General university degree requirements stipulate that 1) at least four units of the major be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major; and 3) all courses taken for a major must be taken for graded credit. Any exceptions to these stipulations are indicated in the major degree requirements listed below.

Requirements for the Major

1. Completion of ten units in Psychology.

2. Satisfactory completion of cognate requirement: BIOL 101, 102, or 111.
   Note: this cognate requirement is in addition to the ten units in psychology.
   BIOL 111 is strongly recommended for students with an interest in biological psychology or neuroscience.

   Students with a strong psychology background may petition the department to take an elective instead of PSYC 101.
   Note: Psychology majors must earn a grade of “C” or better in PSYC 101 (or its equivalent course) in order to enroll in PSYC 201.

4. Satisfactory completion of both PSYC 201 and PSYC 301 (Applied Statistics & Research Methods I, II).
   Note: Psychology majors must earn a grade of “C” or better in PSYC 101 (or its equivalent course) in order to enroll in PSYC 201.
   Note: MATH 160 is a prerequisite course for PSYC 201.
   Note: The prerequisite for PSYC 301 is completion of PSYC 201 with a grade of “C” or better or permission of instructor.

5. Satisfactory completion of two of four laboratory courses: PSYC 310, 311, 312, or 313.
   Note: All laboratory courses have PSYC 201 as a prerequisite. PSYC 312 also requires PSYC 301 or permission of instructor. PSYC 311 students participate in laboratories involving live animals.

6. Satisfactory completion of PSYC 401 (Psychology Senior Capstone Seminar).

7. Satisfactory completion of four psychology elective courses from the foundation, supporting, or advanced & independent categories.
   a. At least two of the four courses must be from the foundations category at any level.
   b. At least two of the four courses must be at the 300/400 level.
   Note: Foundation electives are PSYC courses numbered between 220-239 and 320-339. Psychology course numbers for the supporting elective category are as follows: Supporting elective courses (240-269 and 340-369); supporting elective seminars (370-379); and advanced and independent courses (490-499).
   Note: Seminars in Scholarly Inquiry cannot be used to fulfill major requirements.
   Note: Psychology majors may not use PSYC 225 to fulfill the Social Scientific Approaches core requirement.
   Note: PSYC 370 may only be counted once toward the major.

8. Psychology majors must satisfy university core requirements other than First-Year Seminars outside of the Psychology department.

The Psychology Department does not offer a Minor in Psychology.

Non-majors who are interested in psychology and who would like guidance in selecting courses are encouraged to speak to any member of the department. For students interested in a concentration in psychology, taking PSYC 201 is recommended, since this course is a prerequisite for 300-level psychology classes. Non-majors who are interested in applying to graduate school in psychology or a related field (such as neuroscience or special education) are strongly encouraged to speak with a psychology faculty member early on regarding their course selections.

Course Offerings

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Other courses offered by Psychology Department faculty. See Connections in the Core Curriculum section of this Bulletin for course descriptions.

CONN 320 Health and Medicine
Satisfies the Connections core requirement.

CONN 354 Hormones, Sex, Society, and Self
Satisfies the Connections core requirement.

CONN 357 Exploring Animal Minds
Satisfies the Connections core requirement.

STS 352 Memory in a Social Context
Satisfies the Connections core requirement.

101 Introduction to Psychology
Humans are complex organisms, and psychology provides a rich, interdisciplinary understanding of the study of mental life, experience, and behavior. Through this course, students develop an appreciation for these complexities by focusing on individual and social behavior, as well as the physiological and neurological processes underlying them. Central to this course is an understanding of the diverse methods, experimental designs, foundational theories, and research used to inform the various subdisciplines in psychology. Topics frequently covered in this survey course include: research methods,
sensation and perception, learning and memory, developmental, personality, abnormal, and social psychology. Psychology majors must earn a grade of at least "C" in PSYC 101 in order to continue in the major. Offered each semester.

201 Experimental Methodology and Applied Statistics I  This course covers experimental design and research methodology, elementary and advanced techniques of data analysis, and basic issues in the philosophy of science. Laboratory and individual research is required. To be taken during the sophomore or junior year. Required course for the major. Prerequisite: must be a declared Psychology major before enrolling in PSYC 201 (or permission of instructor); must also complete PSYC 101 or equivalent with a grade of at least "C" and MATH 160 (or permission of instructor). Offered each semester.

220 Developmental Psychology: Prenatal through Childhood  This course focuses on the milestones of human development from conception through late childhood. It considers physical, cognitive, language, social, and emotional changes that occur during the first decade of life with special attention to various contexts of development. It addresses major theories as well as current research and methodology that explain how and why developmental change occurs. Implications for child-rearing, education, and social policymaking are also examined. Prerequisite PSYC 101. Offered each semester.

221 Developmental Psychology: Adolescence through the End of Life  This course focuses on the development of individuals from adolescence through death. The domains of cognitive, physical, and psychosocial development are examined, with a particular emphasis on the multiple factors and contexts that influence development in each of these areas. Current theories and research are explored on a variety of topics relevant to adolescence and adulthood, including adolescent rebellion, identity development, midlife crisis, and caring for elderly parents. Prerequisite: PSYC 101.

222 Lifespan Development  This course considers human development from the beginning to the end of life. Students focus on the major biological, cognitive, and social changes that occur at each stage of development. Students examine the central questions, theoretical perspectives, research methods, and scientific findings that guide current understanding of human development. The course also emphasizes the ways in which individual development cannot be clearly understood without examining the social and cultural context in which individuals are embedded. The course satisfies a foundational category elective in Psychology. Students who receive credit for PSYC 222 may not receive credit for PSYC 220 or 221. Students who receive credit for PSYC 220 or 221 may not receive credit for PSYC 222.

225 Social Psychology  Social Psychology is a field that uses empirical methods, primarily experiments, to study the social nature of our behaviors, attitudes, perceptions, and emotions. This course is a survey of theory and research literature pertaining to the prediction of human behavior in social settings. Topics covered include research methodology, social perception, attitudes and attitude change, prejudice, aggression, attraction, helping, conformity, group behavior, and the application of findings to current social problems. Satisfies the Social Scientific Approaches core requirement. (Note: Psychology majors cannot fulfill the Social Scientific Approaches core requirement with this course.)

230 Behavioral Neuroscience  This course considers the contributions of the nervous system to the understanding of the behavior of humans and other animals. To this end, the course surveys the basic structure and function of the nervous system, the principle methods for its study, and how knowledge of it informs an understanding of such phenomena as sensation and perception, movement, sleep, emotion, learning and memory, language, and abnormal behavior. Prerequisite: PSYC 101; it is suggested, but not required, that students have completed BIOL 101 or 111.

250 Human Sexuality  Beginning with a brief study of the anatomy and physiology of the sexual and reproductive systems, the course progresses to the consideration of cultural heritages, including cross-cultural and sub-cultural variations. Consideration is given to the evolution of attitudes and behaviors across the life span, including the psychological foundations of the dysfunctions. Prerequisite: PSYC 101. Offered frequently.

255 Industrial/Organizational Psychology  This course focuses on the application of psychological theory and methods to work behavior in industry and social service organizations. Research on job satisfaction, work motivation, personnel selection and training, decision making, and group processes within organizations are considered. Prerequisite: PSYC 101. Offered occasionally.

265 Cross-Cultural Psychology  This course considers the ways in which human culture and human psyche interact, with a specific focus on how human behavior varies across cultural contexts. Students review psychological research on culture, examine the theoretical and methodological foundations of cross-cultural research in psychology, and discuss the mounting evidence suggesting that many psychological processes are culture-specific and context-dependent. Satisfies the Knowledge, Identity, and Power graduation requirement. Prerequisite: PSYC 101.

296 Career Preparation and Planning Workshops  0.25 activity unit This activity credit course for psychology majors teaches important skills associated with academic and co-curricular planning. Using a hands-on workshop approach, students will learn about and implement varied planning models in relation to short and long-term aspirations. In addition, each class member will practice specific strategies for exploring their interests and identifying relevant courses, internships, research opportunities, and summer employment. Presentations by faculty and guest speakers will provide varied perspectives on career options as well as the graduate school application process. As part of their coursework, students will complete an initial personal statement, tentative 5-year plan, and a curriculum vita. Furthermore, students will receive feedback from both their peers and various psychology faculty members on this coursework. Prerequisite: PSYC 101, MATH 160 and sophomore or junior standing. Offered each semester.

301 Experimental Methodology and Applied Statistics II  This course covers experimental design and research methodology, elementary and advanced techniques of data analysis, and basic issues in the philosophy of science. Laboratory and individual research is required. Required course for the major. Prerequisite: Completion of PSYC 201 with a grade of C or higher or permission of the instructor. Offered each semester.

310 Sensation, Perception, and Action  This course considers the phenomena and methods of sensation, perception, and action in biological organisms. It focuses primarily on vision and audition, but with an emphasis on the general principles of how various forms of physical energy in the world are transduced and transformed to yield useful representations and purposeful behavior. Students wishing to facilitate a deeper understanding of the material may want to take PSYC 230, MATH 121, or PHYS 111/112 (or 121/122) prior to taking this course. Laboratory work is required. Prerequisite: PSYC 201.
311 Learning and Behavior  This course is concerned with the lawful relationships between the behavior of organisms and the natural world. The course explores the scientific principles that govern these relationships with particular emphasis upon environmental control of voluntary behavior. Note: The laboratory component of this course requires work with live animals; students must be able to commit one hour MTWF at the same time each day to feed and care for their assigned animal. Prerequisite: PSYC 201 or permission of instructor.

312 Applied Psychological Measurement  This course is an introduction to psychological testing and measurement. Students address the topics of test development, validation, and administration; survey commonly-used psychological measures; and discuss ethical, legal, social, and emotional impacts of decisions based on measures. In computer-based laboratories, students analyze test data with frequently-used statistical tests and procedures. Prerequisite: PSYC 201 and PSYC 301 or permission of instructor.

313 Physiological Psychology  This course focuses on the biological causes and effects of psychological phenomena such as memory, emotion, attention, motor control, and perception. Students address these topics with an array of physiological methodologies such as measures of brain activity (e.g., EEG, muscle activity (e.g., EMG), heart rate, stress response (e.g., skin conductance), and eye tracking. Students learn the application of these methods including their strengths and weaknesses, as well as how to link psychological theories to physiological functions. Prior experience with basic neuroscience content such as in NRSC 201 or PSYC 230 is suggested. Prerequisite: PSYC 201 or permission of instructor.

320 Psychological Disorders  The major focus of this course is aberrant human behavior and the scientific basis for understanding its causes. Students learn the major approaches utilized today in diagnosis and treatment of these disorders including biological, psychoanalytic, cognitive, behavioral, humanistic, and community-systems models. Prerequisite: PSYC 201, two previous psychology courses, or permission of instructor. Offered occasionally.

325 History and Systems of Psychology  This course focuses on the development of psychology from its origins in philosophy to its establishment as a distinct experimental science. The class evaluates the contributions of philosophers and psychologists in terms of the political, cultural, social, and intellectual tenor of the times. Students gain historical sophistication and develop the ability to critically examine both historical and current issues in psychology. Prerequisite: PSYC 201, two previous psychology courses, or permission of instructor. Offered occasionally.

330 Theories of Personality  This course is designed to provide students with an understanding of several theoretical models of the determinants of human behavior. Taking an historical perspective, students learn about psychoanalysis, behaviorism, humanism, and other models of personality. A comparative approach is stressed with an emphasis on structural criticism of each theory and its philosophical underpinnings. Prerequisite: two previous psychology courses at the college level, or permission of instructor.

335 Cognitive Psychology  This course is concerned with how humans learn, think, reason, and solve problems. It addresses the ways in which humans input, encode, transform, store, retrieve, and output information. The course presents major concepts, methods, research findings, and controversies concerning human cognition and examines topics such as autobiographical memory, expertise and creativity, problem solving, cognition and aging, and dementia. Prerequisite: PSYC 201, two previous psychology courses or permission of the instructor. Offered frequently.

345 Psychology of Health and Well-Being  What does it mean to be healthy, and how do we promote health and maintain it? What factors disrupt or undermine our health? What is well-being, and how might it be distinct from health? What contexts or environments cultivate health and well-being, versus illness and suffering? Interweaving foundational and current research in health psychology, with findings from positive psychology that promote human thriving, this course aims to: explore factors that underlie our health habits and lifestyles; understand the role of stress, emotions, outlook and behavior in illness development; examine the intrapersonal, social/cultural, relational, institutional and societal contexts which promote health and wellbeing; and interrogate popular and scientific sources in order to tease apart platitudes from methods for meaningful change. Students master concepts from the empirical literature, synthesize information from medicine, public health, social psychology, personality, organizational scholarship, neuropsychology, health psychology and positive psychology, and engage in experiential learning that requires application of empirically-based findings to targets of self-change and change in local communities or organizations. Prerequisite: Psychology 101; Psychology 201 or permission of instructor. Offered frequently.

350 Developmental Psychopathology  Mental health disorders among children and adolescents are pervasive. Youth violence is a serious social problem. This course examines the etiology, diagnosis, and treatment of mental health problems of children and adolescents based on the empirical literature. Prerequisite: PSYC 201 and PSYC 320, or permission of instructor. PSYC 220 strongly recommended. Offered occasionally.

351 Language Development  This course explores how children learn language with seeming ease by examining classic and contemporary theories of language acquisition. The focus is on all areas of language (phonology, semantics, syntax, morphology, and pragmatics) and their typical developmental sequence. Special topics, such as language development disorders, critical/sensitive period hypothesis, bilingualism, bidialectalism, pidgins and creoles, and animal communication systems are covered. When possible, language data from languages other than English are presented. Prerequisite: PSYC 201, two previous psychology courses or permission of instructor. Offered occasionally.

356 Fundamentals of Neuropsychology  Neuropsychology is the study of how the systems of the brain work together to support thought and behavior. Neuropsychologists often infer the function of a particular brain region by assessing the type of dysfunction expressed after damage to that brain area following a stroke or head trauma. In this course, students learn basic neuroanatomy, clinical assessments, and the functional delineations of the brain’s cortex. Topics may include split-brain patients, language disorders, perceptual agnosias, Parkinson’s Disease, attentional neglect, phantom-limb syndrome, and memory loss. Prerequisite: PSYC 201 and 230. Offered frequently.

370 Special Topics  This course covers areas of psychology that are of contemporary interest and are not covered by other courses in the department. The topics covered and the frequency with which the course is offered depend upon the changing expertise and interests of the faculty. May be repeated for credit. Prerequisites may vary depending on topic but all Special Topics courses will require PSYC 201.

372 Illusions  This class addresses the various ways in which people’s perceptions, memories, and reasoning about the world may diverge
Students work with a faculty instructor; Stuart Suzanne Holland, each semester.

**PSYC 301, two previous psychology courses, or permission of instructor. Offered every other year.**

**373 Perceiving Self and Other**  This course explores how people make sense of themselves and others in the dynamic context of social interaction. Students read and discuss classic and current empirical research in the areas of self perception, interpersonal perception, and intergroup perception. Prerequisite: PSYC 201, two previous psychology courses, or permission of instructor. Satisfies the Knowledge, Identity, and Power graduation requirement. Offered every other year.

**374 Psychology of Romantic Relationships**  This seminar focuses on several facets of romantic relationships, from the initial stages of attraction and partner selection, to relationship building, maintenance, and dissolution. Other key topics include marriage and divorce, communication, and the qualities of relationships that predict relationship satisfaction and stability. Several theoretical perspectives on intimate relationships are presented in the course, and we also examine the advantages and limitations of different approaches and research methodologies. Particular emphasis is placed on empirical research on the course topics, although we also discuss the role of clinical observations (e.g., based on individual and/or couple psychotherapy) in understanding intimate relationships. Prerequisites: PSYC 201, two previous psychology courses, or permission of instructor. Usually offered every other year.

**379 Applied Multi-Method Assessment**  Applied Multi-Method Assessment is an experiential learning seminar introducing students to methods of assessment used by psychologists and other professionals to understand the impact of programs and interventions on individuals and communities. The course focuses on qualitative research methods including interviews and focus groups that engage diverse constituencies, use a social justice lens, and are informed by quantitative approaches. Students learn about theory-based assessment, community-based participatory action research (CBPAR), culturally informed research, and qualitative data analysis. In assignments, workshops, and field work, teams of students conduct assessment research that applies course material. Prerequisite: PSYC 201 or permission of instructor. Offered every fourth year.

**401 Psychology Senior Capstone Seminar**  The Psychology Senior Capstone Seminar provides an opportunity for psychology majors to read and critically analyze primary source materials and review articles drawn from varied subfields in psychology. Through weekly presentations, writing exercises, and ongoing discussion, students address key issues in the discipline concerning, for example, the ethical application of findings, the major paradigmatic shifts in the field, and the pros/cons of various methodological approaches. Students also write their Senior Capstone Paper as part of the course requirements, with seminar members sharing their progress regularly through writing workshops and informal presentations of their topic and proposal. The senior paper includes a comprehensive literature review of a specific research question, as well as a proposal for future research and/or application of findings. Prerequisite: PSYC 201; PSYC 301; senior psychology major standing. NOTE: Exceptions to senior standing by petition to the department; required course for the major. PSYC 401 may be taken concurrently with no more than 1 of the following upper division lab elective courses: PSYC 310, 311, 312, or 313. Offered each semester.

**490 Psychotherapy and Behavior Change**  This seminar reviews the major models of personality, psychotherapy, and clinical assessment. A strong emphasis in the course is placed on the comparison of cognitive-behavioral theories to psychoanalytic, humanistic, and systems approaches. Students have opportunities to develop and practice basic counseling skills as part of the humanistic segment of this course. Prerequisite: PSYC 201, at least junior standing, and 320 or 330 or 350. Offered frequently.

**495 Independent Study**  Variable credit up to 1 unit  Independent study credit is available to students who demonstrate legitimate educational needs not met through regular course offerings. Students must have junior or senior class standing and a cumulative grade average of at least 3.00. Depending on the nature and scope of the project, independent research projects may constitute independent study. Petition for admission is required. Requests evaluated on an individual basis. Independent studies approved by a Psychology advisor for one unit may count as an upper-division Psychology elective.

**497 Practicum in Psychology**  Students work with a faculty instructor in the Psychology Department in conjunction with a site experience related to clinical, counseling, and other applied careers in the discipline. The course includes 8 - 10 hours per week of on-site work and 3 hours of class time where practicum experiences and course-relevant readings are discussed. Students also complete written assignments focused on their fieldwork experience. This course is specifically aimed for advanced psychology students and counts as an upper division psychology elective. Prerequisite: Psychology major, junior or senior standing, GPA of 2.5 or above, and permission of instructor. Interested students must complete an application to be submitted early in the Fall term of their senior year. Offered Spring term only.

**498 Psychology Internship Tutorial**  Students work with a faculty member in the Psychology Department to develop an individualized learning plan that connects an internship site experience to study in the discipline. The learning plan will include required reading, writing assignments, and a culminating project or paper. Students should meet with the university internship coordinator the semester prior to enrolling to begin planning an internship. Internships approved by a Psychology advisor may count as an upper-division Psychology elective. Prerequisite: PSYC 201, Psychology major, junior or senior standing, GPA of 2.5 or above, and approval of the Internship Coordinator and Psychology advisor.

**499 Cooperative Education**  0.25 or 0.5 activity  Volunteer or work experience relevant to psychology and written analysis of experience. Pass/fail only. Sophomore, junior, and seniors are eligible. Prerequisite: PSYC 201; Psychology major; sophomore, junior, or senior standing; and approval of the Internship Coordinator.

**RELIGIOUS STUDIES**

Professor: Greta Austin, James Dolliver National Endowment for the Humanities Distinguished Teaching Professor; Suzanne Holland, John B. Magee Professor of Science and Values (on leave Fall 2018); Stuart Smithers, Chair; Jonathan Stockdale (on leave Spring 2019)

Associate Research Professor: Tanya Erzen

Assistant Professor: Ha Jung Lee, Sam Kigar

Visiting Assistant Professor: Heather White
About the Department
For students seeking a socially engaged liberal arts education, the Department of Religious Studies explores questions of power, knowledge, and identity as they relate to religious traditions. While developing a deeper understanding of oneself as a situated knower, students also explore individual religious traditions in depth, or broad themes such as the following: myth, ritual, and symbol; mysticism, magic, and medicine; beginning and end times; ethics, law, and moral philosophy; oppression and liberation; pacifism and violence; animals, bodies, and emotions. Courses are conducted with attention to structures and institutions of class, gender, sexuality, and race in their cultural and historical contexts.

For the major and minor in Religious Studies, the faculty provides an introduction to the academic discipline of Religious Studies followed by careful probing of two or more important traditions and a consideration of the methods useful to their study. A major or minor provides opportunities to develop excellent skills in writing, analysis, and argumentation and serves as an exceptional stepping stone to graduate or professional school. Past majors have gone on to excel in the non-profit sector, law school, medical school, doctoral programs, social work, creative writing, and serves as an exceptional stepping stone to graduate or professional school. Past majors have gone on to excel in the non-profit sector, law school, medical school, doctoral programs, social work, creative writing, marketing and business, among other vocations.

Learning Objectives in the Religious Studies Major
- To develop an understanding of a variety of theories, methods, and issues including Asian and Abrahamic
- To develop an understanding of the roles religions play in political, economic, social, cultural, and moral areas of people’s lives
- To gain familiarity with a variety of theories, methods, and issues involved in the academic study of religions.

Religious Studies courses are grouped into the following areas:

Area A. Abrahamic Religions
201 The History and Literature of the New Testament
203 Jesus and the Jesus Tradition
204 Religions of the Book: Judaism, Christianity, and Islam
210 Comparative Christianities
211 Islam in America
212 The Religion of Islam
303 Sexuality and Religion in Modern America
310 Christianity and Law in the West
312 The Apocalyptic Imagination
321 Sexuality and Christianity: Then and Now
342 Sufism
350 Mysticism: The Spiritual Search in the Christian Tradition
363 Saints, Symbols, and Sacraments: History of Christian Traditions
CONN 322 Jihad and Islamic Fundamentalism

Area B. Asian Religions
233 Japanese Religious Traditions
234 Chinese Religious Traditions
300 Japanimals: Power, Knowledge, and Spirituality at the Intersection of Species
328 Religion, the State, and Nationalism in Japan
332 Buddhism
334 Vedic Religion and Brahmanism
335 Classical Hinduism

Area C. Cultural and Ethical Studies
220 Spirituality and the Self
265 Thinking Ethically

270 Religion, Social Movements, and (in)Justice in the United States
292 Basics of Bioethics
302 Ethics and the Other
315 Modern Jewish Thinkers
320 Reproductive Ethics
368 Gender Matters
CONN 318 Crime and Punishment

Area D. Advanced Seminars in Religious Studies
410 Religion and Violence
420 Law and Religion
440 The Body in Comparative Religions
450 Modernity and its Discontents
456 Ethics and Postmodernity
460 Religious Technologies

Area E. Additional Courses
202 Introduction to the Study of World Religions
208 Yoga, Psychedelics, and the Ascetic Imperative
215 Religion and Queer Politics
305 Marxism and the Messianic
307 Prisons, Gender and Education
330 Religious Freedom in the United States
340 Imagining Religion: Scholars, Theories, and Cases in the Study of Religion
495/496 Independent Study
CONN 344 Magic and Religion

General Requirements for the Major or Minor
General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

Requirements for the Major
The major in Religious Studies is nine courses, one of which is the required REL 340 Imagining Religion.

From Area A: 1 course
From Area B: 1 course
From Area C: 1 course
From Area D: 2 courses
From Area E: REL 340, Imagining Religion (usually taken sophomore or junior year)
From Areas A through E: 3 additional elective courses in Religious Studies, at least one at the 300 level or above

Notes
1. REL 495/496 counts as an elective toward the major, and not as an advanced seminar.
2. One approved ancillary course may be applied toward the major as an elective. Approved ancillary courses include: CLSC 210, CLSC 318, CONN 332, ENGL 353, HIST 350, HIST 393, STS 370.
3. Only grades of C (2.00) or higher count toward the major or minor.

Requirements for the Minor
The minor in Religious Studies is five courses:
One course each from Area A, B, and C, and two additional Religious Studies courses, at least one of which is above the 200 level.

**Note**
Only grades of C (2.00) or higher count towards the major or minor.

**Course Offerings**

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

**Seminars in Scholarly Inquiry.** See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions.

**SS1/SS2 102 Rhetoric and Religion**
SS1/SS2 150 Exploring Bioethics Today
SS1 162, Mary and ‘Aisha: Feminism and Religion
SS1 168 Zen Insights and Oversights

**Other courses offered by Religious Studies Department faculty.** See Connections in the Core Curriculum section of this Bulletin for course descriptions (page 24).

**CONN 318 Crime and Punishment**
Satisfies the Connections core requirement.

**CONN 322 Jihad and Islamic Fundamentalism**
Satisfies the Connections core requirement.

**CONN 344 Magic and Religion**
Satisfies the Connections core requirement.

**HUM 368 A Precious Barbarism: Enlightenment, Ideology, and Colonialism**
Satisfies the Connections core requirement.

**201 The History and Literature of the New Testament**
All the writings of the New Testament are studied, in order to understand both the critical scholarly questions of date, authorship, purpose, and the impact of these writings and their authors on the emerging Christian community. Offered frequently.

**202 Introduction to the Study of World Religions**
This course provides an introduction to the vocabulary, methods, and theoretical assumptions of the academic study of religion. By examining several diverse religious communities and traditions—including Lakota Sioux, Southern Pentecostal, Nation of Islam, and Zen Buddhist—we will examine patterns, themes, and issues that scholars commonly encounter across world religions. We will also examine how specific communities give voice to themes found within the larger world religion from which they emerge. In each case, particular attention will be paid to the role of religion in social justice and salvation movements, and in the formation of individual and group identities. Satisfies the Humanistic Approaches core requirement. Offered frequently.

**203 Jesus and the Jesus Traditions**
The figure of Jesus has sparked theological debates, artistic expressions, government decrees, religious persecutions, pietistic revivals, and social and moral attitudes, affecting the lives of countless generations. This course addresses an overarching question throughout the semester: How does an educated person in today’s society evaluate such conflicting responses? The course draws on current historical and narrative approaches to understand the ‘images’ of Jesus in their respective literary, social, and historical contexts. It addresses some of the following questions. What did Jesus mean to the first interpreters? How did the early Christian communities view Jesus? What do the texts reveal about early Christian attitudes towards outsiders (government, different religious groups, social/moral attitudes)? How has Jesus been perceived in Christian tradition (art, literature, theology, ecclesiology) and in the development of western civilization (e.g., literature, the arts, politics, public schools)? The goal is not to give final and definitive answers. Rather, the course seeks 1) to encourage questions regarding the themes, purpose, and significance of the texts; 2) to provide methodological tools to aid such questions; 3) to place these questions and answers amongst the questions and answers of others; and 4) to understand the Jesus traditions both ancient and contemporary in light of their own social, cultural, and literary contexts. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

**204 Religions of the Book: Judaism, Christianity, and Islam**
This course surveys the major monotheistic traditions of the world—Judaism, Christianity, and Islam—from their origins to the present day. The course fosters an appreciation of the distinctiveness and inner coherence of each of these traditions as well as to discern facets of unity among the three. Religious expression assumes many forms and is considered in traditional theological and philosophical texts as well as in political systems and the arts. The class is conducted as a combination of lecture and discussion. Satisfies the Humanistic Approaches core requirement. Offered every semester.

**208 Yoga, Psychedelics and the Ascetic Imperative**
This course investigates and attempts to distinguish, identify, and understand the different modes and aspects of yoga, meditation, and ascetic disciplines in a variety of cultural contexts. The class examines the broad influence of the ascetic imperative in culture and criticism—in myth, literature, philosophy, religion, and psychology. Primary texts include Patanjali’s Yoga Sutras, Plato’s Symposium, and Athanasius’s Life of Anthony.
Major interpretive authors studied include Nietzsche, Weber, Freud, and Foucault. Satisfies the Humanistic Approaches core requirement. Offered frequently.

**210 Comparative Christianities**
This course provides an introduction to Christianity, or rather, ‘Christianities.’ To understand the diversity within Christianity, the course compares and contrasts various historical and contemporary traditions in Christianity: Gnosticism, the Eastern Orthodox Church, medieval Western Latin Christianity, Protestantism in the sixteenth century, African-American Christianities, Pentecostalism, liberation theology, and Christian fundamentalism in the United States. Students come to realize that there is no one single, monolithic ‘Christianity,’ but instead a variety of Christianities which vary geographically, historically, and culturally. The course also examines the way in which gender, race, and class affect religious perspectives upon the human experience. It concludes by examining two social issues which Christians today debate, homosexuality and the ordination of women. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

**211 Islam in America**
This course surveys Muslim life and religious movements connected to Islam in North America, tracing the history of Islam on the continent from the Atlantic slave trade to the post-9/11 era. It investigates the many ways in which Islam, as both a religion and an idea, has appeared on the American horizon and in the American imagination. Through course exams, assignments, and papers, students are able to appreciate and reflect concretely in their writing on the cultural and socio-economic differences that have shaped American Muslim views on religion and identity. They do so by citing historic cases, autobiographical testimonies, and current observable practices. Through the briefs and presentations they produce, they also take part in a major semester-long group project in which issues of belonging and community are mapped out in real spaces. Satisfies the Humanistic Approaches core requirement. Offered occasionally.
212 The Religion of Islam With approximately 6 billion adherents today, Islam is a world religion that has inspired a vibrant civilization, massive empires, and abiding social institutions throughout the fifteen centuries since its inception. This course is an introduction to the religion of Islam and its development in history. Topics covered include: pre-Islamic Arabia and the rise of Islam, Muhammad and the Qur’an, the development and criticism of hadith, Islamic law (Sharia) and jurisprudence, Islamic theology and philosophy, Sufism, colonialism and modernity, Islamic political thought and jihad, and themes in contemporary Muslim societies (i.e. “lived Islam”). Although the syllabus is designed for students with no prior knowledge of Islam, it is also engaging for students with a Muslim background. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

215 Religion and Queer Politics What has been the role of religion in gay, bisexual, transgender and queer (LGBTQ) politics? This course challenges the dominant picture of entrenched opposition between queer lives and religious traditions, and it investigates the complexity and variety of queer and religious engagement during the twentieth- and twenty-first centuries. This course covers the historical emergence of sexual and gender identity communities in the United States and the attendant formations of established religious teachings as backdrop and critical context for both opposing and supportive religious involvement in LGBTQ politics. The course examines anti-queer religious responses but also spends significant time covering queer-inclusive religious advocacy, including liberal religious involvement in gay liberation, the formation of queer inclusive churches and synagogues and new spiritual communities such as the Radical Faeries, and religious involvement in political causes from AIDS/HIV activism, hate crimes legislation, and same-sex marriage. Offered occasionally.

220 Spirituality and the Self What does Beyoncé’s Lemonade share in common with St. Augustine’s Confessions? What does Harry Potter teach about spiritual self-mastery? This class investigates contemporary narratives and practices of personal transformation in conversation with themes from classical writings about spiritual experience, highlighting how today’s efforts to transform the self borrow from longstanding religious themes. This course helps students develop critical perspectives for analyzing religious and spiritual influences within contemporary culture, including cultural products and practices that seem not to be religious. At the same time, students also reflect personally on how their own routines and aspirations—from media consumption practices to working out—might be seen and analyzed with those same critical tools from the study of religion. Texts include selections from J.K. Rowling; Harry Potter and the Sorcerer’s Stone, Julian of Norwich’s Revelations of Divine Love; Martin Buber, I and Thou; The Autobiography of Malcom X; B.K.S. Iyengar, Light on Life, James Baldwin, The Fire Next Time, and others. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

233 Japanese Religious Traditions This course explores the major expressions of religion in Japanese culture and history, including both popular and elite forms of religious practice and thought. Because Japan is home to a range of religious traditions, the course explores the various forms that have appeared there not only of Buddhism and Shinto, but also of Taoism, Confucianism, and even Christianity. A primary goal of this course is to develop both an empathetic understanding of Japanese religion and a critical appraisal of its expression in particular historical and cultural contexts. Throughout the course ample time is devoted to the role of aesthetics in Japanese religion (in film, literature, art, and ritual) as well as to the various ways that religion and the Japanese state have interacted over time. Satisfies the Humanistic Approaches core requirement. Offered occasionally.

234 Chinese Religious Traditions This course provides an introduction to the wide range of religious beliefs and practices that have emerged over the course of Chinese history. Topics covered include not only the classic traditions Confucianism, Taoism, and Buddhism, but also such broader examples of religious expression as oracle bone inscriptions, medieval ghost stories, and contemporary practices in longevity. Throughout the course students explore how those in China have understood the world religiously, and how scholars have interpreted the diverse world of Chinese religion. Some of the questions include: What has it meant to be a human in China? What other spirits, ghosts, and divinities inhabit the Chinese religious world? What is included and what is excluded when we use the term “religion,” or even “China”? How do cultural, historical, and political changes affect religious experience, or a person’s understanding of “ultimate reality”? A primary goal of the course is to develop a broad understanding both of Chinese religious history and of contemporary issues involving religion in China. Satisfies the Humanistic Approaches core requirement. Offered frequently.

265 Thinking Ethically: What is Justice? This course provides students with tools of ethical analysis so that they can think critically about pressing contemporary moral issues through the lens of justice. The course focuses on ethical methods from world Christianity and western philosophy. The course introduces both ethical theories and modern justice theories, and examines multicultural perspectives of the long-standing religious and philosophical understanding of justice. It analyzes how social justice concepts have been applied in different cultural contexts, including non-western communities. Students examine different models of justice and their implications for contemporary moral issues (e.g. healthcare, social welfare, racism, war, capital punishment, human rights, immigration, refugees, property rights, and the environment). The class includes interactive lectures on justice theories and students actively participate in discussions on selected case studies. Course readings include excerpts from Aristotle, Aquinas, Mill, Pope, Locke, Calvin, Kant, Rawls, Nussbaum, Singer, and Hauerwas. Crosslisted with AFAM 265. Satisfies the Knowledge, Identity, and Power graduation requirement.

270 Religion, Social Movements and (in)Justice in the United States How do collective groups of people resist, challenge and radically change the status quo? What is a social movement, and what role does religious belief, practice and identity play in social and political change? This course focuses on how religion intersects with questions of power, resistance, and identity in American social movements. Polls tell us America is, by far, the most religious of the industrial democracies, and our often contentious politics reflect that: the debates over women’s reproductive rights, the 1980s rise of the Christian Right, and our still-heated clashes over “moral values” are only its more obvious manifestations. Similar claims have suffused American history: the abolition, suffrage, and temperance movements all had deeply religious dimensions; the Progressive Era was powerfully shaped by the Social Gospel movement; many in the civil rights and anti-war efforts of the 1960s drew on deeply-held religious imperatives to challenge existing structures of power and enact social change. This course exam-ines how religion has been central to historical and contemporary social movements like Immigrant rights, Black Lives Matter and Occup.

292 Basics of Bioethics This course is an examination of Western philosophical and religious understandings of moral issues brought on by advances in health care, science and technology. In this course, students will learn the “Principles approach” to bioethics, as well as other ethical approaches to the difficult moral issues raised by contemporary medical
science and its clinical applications. To that end, case analysis will be used extensively in this course. The course is designed to help facilitate connections for students between medical/scientific advances, ethics, religious values, and American public policy about technology and health care. Each class session will alternate between theoretical and medical/scientific considerations, and the concreteness of bioethical case analyses. Students who have credit for SS11/SS12 150 and are considering this course should consult with the instructor. Cross-listed as BIOE 292. Offered frequently.

300 Japanimals: Power, Knowledge, and Spirituality at the Intersection of Species What do the lamb of God and White Buffalo Woman have in common? For one thing, they illustrate the sometimes-blurry intersection of humans, animals, and the divine; for another, they illustrate the powerful role played by animals in the religious imagination. As the French anthropologist Claude Levi-Strauss once remarked, "animals are good to think." As others have pointed out, they’re also good to eat, ride, look at, hunt, train for battle, make things out of, and keep as companions. In religion, animals have additionally served as sacrificial offerings, totems, signifiers of purity and pollution, and foreshadowers of the apocalypse. In this class students begin to trace the vast interplay between human and non-human animals in the history of religion. Drawing from the emerging field of Critical Animal Studies, Japanimals weaves together rigorous critical theoretical inquiry with case studies drawn broadly from the history of religions, with a particular focus on case studies from Japan. Students emerge from this course able to articulate how different religious traditions have viewed animals, how religions have influenced modern conceptions of animals, and how religious traditions may (or may not) provide resources for addressing contemporary challenges facing human and non-human animals. Offered every other year. Crosslisted with ASIA 300. Prerequisite: one course in Religious Studies or permission of instructor.

301 Consciousness and the Bourgeoisie “Know thyself” is a maxim central to the religious quest, but individuals who are intensely and urgently driven to know themselves often occupy the outskirts of ordinary society. Although these “outsiders” are a part of their culture and contribute to their culture, they no longer share the common values of their society. The course seeks to explore the role of outsiders (those who desire inner freedom and transformation) in the context of bourgeois society. The first half of the course draws on ancient materials (Epic of Gilgamesh, The Oresteia, and Plato’s Republic) in discussing ideas of ontology, psychology, consciousness, and transformation. The second half of the course relies on novels and novellas by Ouspensky, Hesse, and Mann for a discussion of bourgeois attitudes toward the outsider and toward the outsider’s struggle to become an individual who confronts the habitual, unconscious, and mechanical patterns of existence. Satisfies the Connections core requirement. Offered occasionally.

302 Ethics and the Other This course provides an opportunity for students to examine the contours of an ethical framework of responsibility by exploring contemporary moral and religious narratives about the “other” from a multicultural and interdisciplinary perspective. Students learn to apply various ethical theories to particular issues and dilemmas, such as incarceration, immigration, sexuality, disability, race, and other issues of “difference.” Offered occasionally.

303 Sexuality and Religion This course explores the intertwined histories of religion and sexuality in the twentieth- and twenty-first century United States, with attention to transnational contexts and global politics. These two categories—religion and sexuality—are often portrayed as oppositional forces, with sexual progress pitted against religious resistance. This course reappraises this relationship of opposition through a series of historical case studies, which highlight the plurality of religious investments in changing constructions and practices of sexuality. Offered occasionally.

305 Marxism and the Messianic The seminar focuses on the thought of Walter Benjamin, including a selection of texts commonly referred to as Benjamin’s “messianic” or “theological” writings. Benjamin’s life, work, and influence represent a remarkable nexus of aesthetic theory, cultural critique, Western Marxism, and Jewish mysticism. The course is especially aimed at laying bare the messianic structure of his thought as most clearly demonstrated in his early essays “Critique of Violence” and “The Task of the Translator,” both published during his lifetime in 1921 and 1923. Themes include: a-theology, messianic time, apocalypse, redemption, political-theology, dialectical image, profane life, “bare life,” nihilism, violence, transcendence, and the destructive character. Offered occasionally.

307 Prisons, Gender and Education What is the relationship between the university and the prison? How does college in prison raise questions of authority, power, and privilege? Students participate in an experiential learning class that combines academic content and weekly participation in a college program at the Washington Center for Women. Students spend 3 hours per week in study halls as part of the Freedom Education Project Puget Sound (FEPPS), a signature initiative of the University of Puget Sound and a non-profit that offers a rigorous college program leading to an Associate of Arts and Science degree for incarcerated women. Weekly class time includes discussion and analysis of topics such as prison pedagogy, the ethical and political dimensions of higher education in prison, the racialized dimensions of mass incarceration, gender, sexuality in the prison, and the history and theory of punishment in the United States. Satisfies Knowledge, Identity, and Power graduation requirement. Offered frequently.

310 Christianity and Law in the West Many of the distinctive features of the modern Western legal tradition can be traced to medieval Europe and its religious beliefs and practices. International law, law on the European continent, and law in nations following the Anglo-American tradition have been deeply colored by the assumptions and arguments of medieval canon law, the law regulating the Latin Catholic Church. This course discusses legal developments in Europe during the medieval period. Topics covered include sin and crime, natural law, and law governing marriage and sexual norms. The course examines how canonical norms and ideas influenced secular law in the Middle Ages and how they have continued to shape Western law and legal theory up to the present. Prerequisite: none; however, REL 204, 210, or 363 or HIST 102, 302, or 303 would be helpful preparation. Offered occasionally.

312 The Apocalyptic Imagination Apocalyptic visions of heaven, hell, judgment, cosmic battles, and a faithful, persecuted remnant have stimulated literary and religious imaginations for over 2000 years. The course explores the apocalyptic imagination within its historical and cultural context, acquaints students with the value systems and presuppositions embedded in an apocalyptic perspective, and discerns the social structure and symbol system of an apocalyptic world-view. Offered occasionally.

315 Modern Jewish Thinkers This course acquaints students with major Jewish thinkers in the modern and contemporary periods. The course begins by asking what makes a thinker Jewish? What makes a Jewish thinker modern? After a brief overview of major themes in Jewish ethics, students begin their exploration with a study of Baruch Spinoza’s rationalist challenge to Judaism that results in the quintessential modern question, who is a Jew? Students then turn to Jewish
responses to the Enlightenment, emancipation, nationalism, and new forms of antisemitism. These responses include a variety of Zionists, socialist Jews, existentialists such as Martin Buber, and mystics and social activists such as Abraham Joshua Heschel. The course then studies post-Holocaust Jewish ethicists, Jewish feminists, and contending views on Jewish liberation. Offered occasionally.

320 Reproductive Ethics This course examines various religious, legal, and moral issues surrounding reproduction and assisted reproductive technologies. It surveys how religious beliefs, doctrines, and practices have influenced patients’ reproductive decisions, clinicians’ medical decisions, and the reproductive healthcare system. The course analyzes tensions related to curtailing or enhancing fertility in the United States. Moral issues surveyed in this course include reproductive rights, contraception, abortion, prenatal diagnosis, assisted reproduction, surrogacy, genetic engineering in assisted reproduction, and the de-livery of reproductive healthcare. It also covers legal aspects of reproductive medicine. Students actively participate in discussion, debate, and role-playing based on assigned readings. Readings include religious texts, bioethics literature, feminist literature, and legal cases. Offered occasionally.

321 Sexuality and Christianity: Then and Now This course approaches the subject of sexuality in the Christian tradition by focusing on three broad periods—early Christianity, the Middle Ages, and today. Within each era, students investigate questions of virginity, chastity, marriage, and non-normative sexualities (such as homosexuality). Students enlist a diverse selection of primary and secondary sources—theoretical and historical. Through this fascinating exploration of Christianity and sexuality, students witness a dizzying variety of ways that sexualities have been lived, accepted, utilized, and interpreted. Furthermore, students develop a richer understanding of what sexuality has meant to Christianity over the ages and why it matters so much. Offered occasionally.

328 Religion, the State, and Nationalism in Japan This course examines relationships between religious traditions, the “state,” and nationalism in Japanese history. Through careful study of primary and secondary sources, the course explores early symbiosis between religious rites and governance; the role of Shinto and Buddhism in legitimating systems of government centered on the emperor or warrior elites; religious components in modern Japanese imperialism; challenges to the separation of religion and the state in postwar Japan; civil religion; and cultural nationalism. Offered occasionally.

330 Religious Freedom in the United States Should American religious history be told as story of increasing diversity and freedom? This course surveys the changing meanings of religious freedom in the United States from the early nation to the present day. Students consider key primary sources—founding documents, court cases, political cartoons, accusations, and apologetics—and weigh these alongside the arguments of scholars in religious studies. These include historian William Hutchison, who argues that pluralism in the United States is an ongoing legacy of the nation’s founders, as well as law professor Winfred Fallsner Sullivan, who contends that the structures intended to protect religious expression have made religious freedom a practical impossibility. Students develop their own arguments in this debate through a research project that analyzes a historical or contemporary controversy over religious freedom. Offered occasionally.

332 Buddhism A study of the origin and development of Buddhism. Special emphasis is given to the history of Buddhist thought, the evolution of the primary schools of Buddhism, and the question of cultural influence on Buddhist expansion. Sources for study are drawn from Indian, Tibetan, Chinese, and Japanese texts in translation. Offered frequently.

334 Vedic Religion and Brahmanism This course examines the origin and development of religion in South Asian antiquity. Study focuses on the mythology and symbology of the Vedic textual corpus, the rise of ritual ideologies, and the meaning and influence of the yogic vision. In addition to Vedic texts, the course may include study of mythic epics (Mahabharata and Ramayana) and non-Vedic myths that appear in the Puranas. Students who have received credit for REL 331 cannot receive credit REL 334. Offered occasionally.

335 Classical Hinduism A study of the various systems of myth, ritual, symbol, and thought that have significantly contributed to the development of Hinduism after the Vedic period. The approach of the course is primarily textual, examining a wide range of scriptural sources from the Hindu traditions. REL 334 recommended prior to REL 335. Students who have received credit for REL 331 cannot receive credit for REL 335. Offered frequently.

340 Imagining Religion: Scholars, Theories, and Cases in the Study of Religion This course examines and engages influential theories and approaches to the study of religion developed by scholars with diverse intellectual views. Through theoretical readings and case studies, students receive a broad grounding in classical and contemporary theories of religion, including comparative psychoanalytic, anthropological, feminist, and postmodern approaches. In addition to locating religious studies within wider intellectual movements, the course is designed to help students articulate the values and assumptions they bring to their own studies of religion. Offered every fall.

342 Sufism For some Muslims, Sufism (Islamic mysticism) is the defining essence of Islam, without which one is left with only a meaningless shell for a religion. For other Muslims, Sufism stands as the satanic antithesis to God’s singular, eternal truth. What then is Sufism? And why does it elicit such fervent reactions from its champions and detractors alike? This course proposes to answer these very questions. After an introductory look at various definitions and manifestations of Sufism today and in the past, students begin with an historical survey of the earliest precedents and intellectual currents in the development of Sufism. Students continue with a study of Sufi poetry, terminology, institutions, and rituals. Additionally, students look at key Sufi personalities, both men and women. The final part of the course examines modern Islamic intellectual trends and their effects on debates and discussions within the study and practice of Sufism in the twentieth century. The course returns in the end to contemporary Sufism and the diverse forms that it assumes across the globe today. Offered occasionally.

350 Mysticism: The Spiritual Search in the Christian Tradition Mysticism describes a variety of ways in which humans endeavor to encounter the divine directly. The Christian tradition has a long history of mystical encounters, which are founded in the Hebrew Scriptures and in Paul’s experience on the road to Damascus. As a text-based religion, Christianity has a complicated relationship with mysticism, since mysticism tends to focus on the directly experiential rather than the textual. And, even as they claimed that such experiences transcended language and expression, mystics often sought to express their experiences. This course examines the ways in which a mystical tradition developed in Christianity, and in which particular metaphors and images came to hold sway. In doing so, it pays attention to the wider social and political context in which the authors wrote and lived, and asks whether these mysteries, particularly women, were able to acquire authority and charis-
ma outside of the Church hierarchy. The course thus examines the ways in which mystics occupied an ambivalent space in Western Christianity. The clerical hierarchy has historically sought to limit charisma and prophecy. Mystics thus both threatened the official hierarchy, which sought to limit charisma, but also, sometimes, reinforced the status quo.

Questions about power, the body, textuality, charisma, social structures, and authority will be central to our investigation of the Christian mystical tradition. Offered occasionally.

363 Saints, Symbols and Sacraments: History of Christian Traditions This course surveys the major developments in Christian history from its origins up to the current day. In the first half of the course, the focus is on patterns of Christian thought including institutional changes and social context up to 1500 CE. Although this is largely a story of the clerical hierarchy in the Latin West, wherever possible the course emphasizes the role of lay persons, women and Eastern Christianity. In the second half of the course, the focus is on the challenges to Christianity posed by modernity including the Protestant movement, the Enlightenment, the New World, and the liberation movement among women, minorities, and third world peoples. Readings are from both primary and secondary sources. Offered occasionally.

368 Gender Matters An in-depth study of feminist theory, theology, and ethics, and the role such theories have played in Western social and religious thought. Among the issues explored are justice, violence, the body, sexuality, knowledge, power. The course draws upon one or more of the following theoretical insights: liberationist, post-structuralist, standpoint, virtue, or Marxist theories. Prior work in religion, women studies, sociology and anthropology, philosophy, or feminist political theory is helpful, as well as a facility with writing. Counts toward the minor in Gender and Queer Studies. Offered frequently.

410 Religion and Violence Do religions originate in myths of violence, and then re-enact them, as in the Eucharist? How do sacred texts enshrine and commemorate violence? How do religions motivate, justify or reinforce violence? What role does ritual play in re-enacting violence? What roles do eschatological expectations play in violence? How has the postcolonial world grappled with the questions of religious violence? This class explores historical case studies in the relationship between religion and violence, such as the Christian doctrine of just war and the Crusades, the history and practice of Islamic ideas of jihad, or Hindu nationalistic violence. We also consider the question of self-inflicted violence and suffering, as performed in religious rituals. Students read theoretical works and examine case studies; students are encouraged to elaborate their own understanding of the nature of religion and violence. Prerequisite: two courses in Religious Studies and permission of the instructor. Offered occasionally.

420 Law and Religion Notwithstanding the many attempts around the world to separate them, the spheres of law and religion repeatedly overlap in their histories and will continue to intersect into the foreseeable future. Both spheres reflect the deepest of humanistic concerns; both serve as arenas for contesting and projecting the authority of individuals, institutions, and texts within all human contexts. Law and religion chart the contours of our personal, social, and civicizational identities along with the relationships between these identities and their relation to the other, both in its sentient and non-sentient forms. This seminar examines the intersection of law and religion within a broad sampling of historical and contemporary contexts. It does so with the goal of identifying the questions and debates that account for these intersections. The first half of the course surveys the most influential legal systems that are grounded in what is known conventionally as religious traditions. The second part of the course turns its attention to what is known conventionally as secular models of law to discern how such models define religion and locate themselves in relation to it. Offered occasionally.

440 The Body in Comparative Religions While the field of religious studies frequently focuses on belief and the intellectual development of religious traditions, this course shifts its focus to the body and its importance for the study of religion. The class examines the role of the body as a vehicle through which individuals experience “the sacred,” and as a site upon which communities inscribe, assert, and contest religious values. Taking a comparative approach toward cases drawn from Buddhism, Christianity, and indigenous traditions, the class explores such themes as the perfectible body, the body in pain, bodily relics, the body in ritual, and transcending the body altogether. Finally, by drawing on classical and contemporary theorists, students work to develop their own frameworks through which to understand and interpret the crucial role of the body in the history of religions. Prerequisite: two courses in Religious Studies or permission of the instructor. Offered occasionally.

450 Modernity and its Discontents This advanced seminar explores the ideas and values that distinguish modernity from traditional and pre-modern cultures. Students examine the meaning and development of modernity from a variety of perspectives, including the shifting role and relevance of religion in the modern world. Important sources for the cultural critique of modernity include Nietzsche, Freud, Benjamin, Gruenon, T.S. Eliot, Heidegger, and Bataille. Prerequisite: at least two courses in Religious Studies and permission of instructor. Offered frequently.

456 Ethics and Postmodernity This advanced seminar for Religious Studies majors takes up the question of what place (if any) religious and social ethics has in postmodern culture. In other words, what characterizes postmodernity and what has been its effects on the discipline of ethics? Are there any prospects for a common morality given the realities of post-structuralist deconstruction? How will one determine the appropriateness of an ethic for postmodern culture? Prerequisite: two courses in Religious Studies or permission of instructor. Priority given to upper-level Religious Studies majors; open to other students with permission of instructor. Offered occasionally.

460 Religious Technologies This advanced seminar theorizes the intersections of religion and technology as a critical site for exploring broad topics in religious studies. The course will take various approaches to relations among religion, technique, and knowledge production: we examine rhetorical constructions of the religious and the technological; explore religious influences on invention and scientific progress; analyze spiritual ideals and contemporary machines; and theorize ways that religious practices and traditions operate as techniques and specialized knowledges. Course topics will include steam-propelled engines and electromagnetism, physical regimes and body modification, cartography and cyberspace, confession and self-help. With attention to interdisciplinary methods, students will also work on a specific project throughout the semester that proceeds through topic selection, question formulation, research, analysis, and argumentation to produce a final research paper. Prerequisite: Two courses in REL and instructor permission. Offered occasionally.

494 Special Topics This seminar is organized around themes and topics that are of special interest to the study of religion. The seminar is offered on an occasional basis and the topic is determined in advance by the instructor. Prerequisite: at least two courses in Religious Studies or permission of instructor. Offered occasionally.

495/496 Independent Study
**SCIENCE, TECHNOLOGY, AND SOCIETY**

Professor: James Evans; Kristin Johnson, *Director*

Assistant Professor: Amy Fisher

Advisory Committee: James Evans, Physics/Science, Technology, and Society; Amy Fisher, Science, Technology, and Society; Barry Goldstein, Geology; Wade Hands, Economics; Suzanne Holland, Religious Studies; Kristin Johnson, Science, Technology, and Society; Justin Tiehen, Philosophy

**About the Program**

Science and technology are not isolated activities: they are inextricably linked to every other aspect of human experience. Science and technology have important connections to literature, philosophy, religion, art, economics, and to social and political history. Scientific evidence and argument are part of continuing lively debates on issues at every level of generality: social policy, the utilization of natural resources, the allocation of health care, the origin and evolution of life, the place of human-kind in the natural order, and the nature of the universe.

Science, Technology, and Society courses explore the connections between the sciences and other parts of the human endeavor. Students in the program develop an understanding of 1) how the broader culture influences the development of science and how science influences different societies and cultures, and 2) the interplay between science and economics, politics, religion, and values in contemporary decision making. Many Science, Technology, and Society courses are cross-disciplinary in nature. Faculty from more than a dozen different disciplines within and without the sciences participate in Science, Technology, and Society.

Majors in the Program in Science, Technology, and Society develop a strong understanding of the practice of science and technology, which provides excellent preparation for careers in medicine, law, public policy, and university research and teaching. Minors, especially those majoring in a science, and students taking individual courses broaden their understanding of this important area of human endeavor.

**General Requirements for the Major or Minor**

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

**Requirements for the Major**

The Bachelor of Arts degree in Science, Technology, and Society is awarded on the basis of a course of study agreed upon by the student and a committee of faculty members. During the sophomore year or by the first semester of the junior year, a student who intends to major in Science, Technology, and Society should meet with the director of the Program to select a faculty member as an advisor. The student and advisor form a committee that includes the advisor and others members from the Advisory Committee for the Program in Science, Technology, and Society. The committee may include faculty outside the program if the student’s interests overlap with that faculty member’s discipline. The student works with the committee to select a coherent set of courses that advance the student’s educational goals. The committee usually seeks a balance between breadth of coverage and focus in the student’s particular area of interest. The committee will also ensure that there is sufficient concentration in STS courses (in distinction from courses in cognate disciplines that are accepted as electives). The contract goes into effect after it is signed by the student, the committee members, and the director of the Program and is filed in the Office of the Registrar. The contract is reviewed periodically and justified modifications are permitted.

**Requirements for the Contract in Science, Technology, and Society**

Every contract should consist of a minimum of 12 units distributed as follows:

1. **Introductory Surveys:** 2 units.
   - STS 201 Introduction to Science, Technology, and Society I: Antiquity to 1800; and

2. **Methods course:** 1 unit.
   - STS 350 The Interdisciplinary Study of Science and Technology. Preferably taken in the fall semester of junior year.

3. **Philosophy and Science:** 1 unit.
   - One course chosen from PHIL 332 Philosophy of Science; or PHIL 220 Seventeenth- and Eighteenth-Century Philosophy. (A different course in philosophy can be approved by the STS director.) Preferably taken in the spring semester of junior year.

4. **Electives:** 5 units.
   - See the list of electives below. Students must take at least one course each from categories one, two, and three. The remaining two courses can be taken from any of the three categories.

5. **Ancillary Courses:** 2 units.
   - Two courses in the natural sciences. Preferably in the same natural science. Preferably taken in the first or second year.

6. **Capstone course:** 1 unit.
   - Taken in spring semester of the senior year.
   - STS 480 Senior Research Seminar in STS.

**Notes**

1. Students must maintain a grade point average of at least 2.00 in all contract courses and a grade point average of at least 2.00 in the upper-division (300-400 level) courses in the contract.
2. Students must complete at least four units of the required upper-division (300-400 level) contract courses at Puget Sound. One of these 4 units may be a course taken as part of a study-abroad program, subject to approval in advance by the student’s contract committee.
3. Students must gain approval for the contract before completing upper-division coursework. Courses completed before the contract is approved are subject to review by the committee prior to inclusion in the contract.

**Each year, the STS program will name one graduating major a Mott Greene Research Scholar for a distinguished senior research project. All graduating majors are eligible to be considered for Honors in the Major.**

**Requirements for the Minor**

A minor consists of 6 units distributed as follows.

1. **Introductory Survey:** 1 unit.
   - One course chosen from STS 201 Introduction to Science, Technology, and Society I: Antiquity to 1800; or
   - STS 202 Introduction to Science, Technology, and Society II: Since 1800

2. **Electives:** 3 units.
   - See the list of electives below. Students must take at least one class
from each of the three categories.

3. **Methods course**: 1 unit.
   STS 350 The Interdisciplinary Study of Science and Technology

**Electives**

1. Studies of Particular Scientific Disciplines
   - ECON 221 History of Economic Thought
   - PHYS 299 History and Practice of Ancient Astronomy
   - PSYC 325 History and Systems of Psychology
   - STS 100 Ape's Angels & Darwin
   - STS 301 Technology and Culture
   - STS 314 Cosmological Thought
   - STS 330 Evolution and Society Since Darwin
   - STS 344 Ecological Knowledge in Historical Perspective
   - STS 345 Science and War in the Modern World
   - STS 347 Better Living Through Chemistry
   - STS 348 Strange Realities: Physics in the Twentieth Century

2. Special Topics in Science, Technology, and Society
   - CONN 357 Exploring Animal Minds
   - CONN 410 Science and Economics of Climate Change
   - ECON 365 Economics and Philosophy
   - ENGL 348 Illness and Narrative
   - HIST 317 European Intellectual History, 19th and 20th Centuries
   - PHIL 220 Seventeenth- and Eighteenth-Century Philosophy
   - PHIL 330 Epistemology: The Theory of Knowledge
   - PHIL 332 Philosophy of Science
   - SOAN 360 Sociology of Health and Medicine
   - STS 3101, Robot - Humans and Machines in the 20th and 21st Centuries
   - STS 318 Science and Gender
   - STS 325 Highway to History: A Study of the Automobile Industry
   - STS 340 Finding Order in Nature
   - STS 352 Memory in a Social Context
   - STS 354 Murder and Mayhem under the Microscope
   - STS 361 Mars Exploration
   - STS 366 History of Medicine

3. Policy and Values in Science and Technology
   - BUS 478 Environmental Law
   - CONN 320 Health and Medicine
   - CONN 393 Cognitive Foundations of Morality and Religion
   - ENVR 325 Geological and Environmental Catastrophes
   - ENVR 335 Thinking about Biodiversity
   - HIST 364 American Environmental History
   - PHIL 105 Neuroethics and Human Enhancement
   - PHIL 285 Environmental Ethics
   - PHIL 292/BIOE 292 Basics of Bioethics
   - REL 292/BIOE 292 Basics of Bioethics
   - SOAN 352 Work, Culture, and Globalization
   - STS 302 Cancer and Society
   - STS 324 Science and Race: A History
   - STS 333 Evolution and Ethics
   - STS 370 Science and Religion: Historical Perspectives
   - STS 375 Science and Politics
   - STS 378 Weapons of Mass Destruction

**Course Offerings**

Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

**Seminars in Scholarly Inquiry**. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

- SSI1 119 Einstein and Everything
- SSI2 149 Creationism vs Evolution in the U.S.
- SSI1/SSI2 153 Scientific Controversies
- SSI2 159 Evolution for All
- SSI1 181 Science and Theater

**Connections courses.** See Connections in the Core Curriculum section of this Bulletin for course descriptions.

- 301 Technology and Culture
- 302 Cancer and Society
- 314 Cosmological Thought
- 318 Science and Gender
- 330 Evolution and Society Since Darwin
- 333 Evolution and Ethics
- 340 Finding Order in Nature
- 345 Science and War in the Modern World
- 347 Better Living Through Chemistry
- 348 Strange Realities: Physics in the Twentieth Century
- 352 Memory in a Social Context
- 354 Murder and Mayhem under the Microscope
- 361 Mars Exploration
- 370 Science and Religion: Historical Perspectives
- 375 Science and Politics

**100 Ape's Angels, and Darwin**  Benjamin Disraeli described the question placed before society by Charles Darwin's work as follows: “Is man an ape or an angel?” This course examines the development of evolutionary thinking during the nineteenth century and the resulting debates over the “Descent of Man.” It explores the relationship between Darwin’s theory of evolution and the social, political and religious history of Britain and the British Empire in the nineteenth century. The course serves as an introduction to analyzing the interactions between science and society, with particular attention to how Darwin's theory intersected with debates over God, Science, Empire, Ethics, Race, Gender, Economics, and Politics. **Satisfies the Humanistic Approaches core requirement. Offered every other year.**

**201 Science, Technology & Society: Antiquity to 1800** This is a history of science, technology, and society from Antiquity to 1800 C.E. It emphasizes both the theoretical understanding of nature and the practical mastery of the technologies of settled existence. It is the first part of a two-semester survey required of majors and minors in Science, Technology, and Society, though it is open to all students. There are no prerequisites, but the course assumes a working knowledge of biology, chemistry, and geometry at the high school level. Topics include: astronomy and mathematics in ancient Mesopotamia and Greece; Islamic medicine; Renaissance anatomy and physiology; the Scientific Revolution of the seventeenth century; electricity, chemistry and natural history in the Enlightenment. Issues addressed include: the role of cultural institutions in the production and diffusion of scientific ideas; the transmission of science across linguistic and cultural boundaries; the interaction of science with religion, philosophy and political life. **Satisfies the Humanistic Approaches core requirement. Offered each Fall.**

**202 Science, Technology, and Society II: Since 1800** Students in this course analyze the development of the physical and biological sciences throughout the nineteenth and twentieth centuries, paying special attention to the reciprocal relationship between scientific developments and
their social influences. Beginning with the social and intellectual upheaval of the French Revolution and working through the first half of the twentieth century, this course surveys natural scientists’ landmark discoveries and interpretations and examines the intellectual, social, natural, and personal influences that helped shape their work. Subjects of the course include Newtonianism, creationism, natural theology, evolution, the origin and demise of electromagnetic worldview, Einstein and the development of the theories of relativity, scientific institutions and methodologies, quantum mechanics, the atomic theory, molecular biology, big science, and modern genetics. STS 202 is meant as a complement to STS 201, but the prior course, while recommended, is not a prerequisite. Satisfies the Humanistic Approaches core requirement. Offered each Spring.

300 STEM, Society, and Justice 0.25 activity credit. This course promotes conversation about science, technology, engineering, mathematics, medicine (STEM2), society, and justice. Students attend a mix of public lectures and small discussion groups on a range of relevant topics. Subjects, for example, may include, but are not limited to: climate change; government and business databases and personal privacy; the ethical, legal, and intellectual issues surrounding the patenting of organisms; STEM funding, both public and private; animal rights; the selection of illnesses to prioritize in medical research; and issues involving the inequality of access to STEM education.

301 Technology and Culture Science and technology revolutionize our lives, but memory, tradition and myth frame our response. Technology has powerfully shaped and altered human experience. In this course, students examine what is technology, how is our relationship with technology changing, how does technology shape our modern culture and, in turn, how does our culture shape our technology. Topics covered may include: the industrial revolution, the airplane, Julia Child’s kitchen, the Chernobyl disaster, and the development of the internet. Satisfies the Connections core requirement. Offered every other year.

310 I, Robot—Humans and Machines in the 20th and 21st Centuries In the mid-20th century, science-fiction writer Isaac Asimov envisioned the world in 2029 filled with complex and autonomous machines, capable of caring for children and engaging in interplanetary travel, mining, and political and military action. In contrast to this fictional world, in this course, students examine what is technology, how is our relationship with technology changing, how does technology shape our modern culture and, in turn, how does our culture shape our technology. Topics covered may include: the industrial revolution, the airplane, Julia Child’s kitchen, the Chernobyl disaster, and the development of the internet. Satisfies the Connections core requirement. Offered every other year.

324 Science and Race: A History This course examines the history of ideas about race in biology since the eighteenth century. Students study how and why knowledge about race has been constructed and used in particular contexts, and, in doing so, examine the complex relationship between science and society. Satisfies the Knowledge, Identity, and Power graduation requirement.

325 Highway to History: A Study of the Automobile Industry Although inventors in different countries and time periods contributed to the invention of the automobile, the car remains a symbol of American engineering and technological prowess, personal independence, adulthood, and social status. This course examines the intellectual and social history of the automobile in the United States and abroad. By analyzing cars as products of a large technological system, including, for example, tire manufacture, oil and gas production, road construction, gas stations, and a variety of other ancillary industries, this class investigates the social, economic, environmental, and cultural impacts of the automobile. Offered every other year.

344 Ecological Knowledge in Historical Perspective This course examines the history of both scientific ecology and recent movements to interrogate, question, and revise the West’s understanding of nature, including Traditional Ecological Knowledge (TEK). In doing so the course places both defenses and critiques of Western science in historical context, with particular emphasis on potential implications for environmental policy. Students examine how the rise of conservation and environ-mentalism, responses to imperialism and colonialism, and debates over the role of activism and advocacy in science have influenced ecologists’ work, identity, and organizations. In doing so students study the interaction between science and society, while considering the important insights a historical understanding of science can bring to understanding modern concerns and controversies. Satisfies the Humanistic Approaches core requirement. Offered every other year.

347 Better Living Through Chemistry “Better things for better living...through chemistry” was a popular slogan used by DuPont in the mid-to-late twentieth century to market laboratory-developed products. Increasingly, concerns have been raised about the merits and consequences of chemicals in our food, goods, and environment. This class analyzes how we know what we know about chemistry, and how studies of the very small shape fundamental questions about the world, e.g. what is natural, what is artificial, does the difference matter, and if so in what contexts? By investigating a series of historical episodes that highlight some of the key intellectual, social, and political challenges of the nineteenth and twentieth centuries, this course examines how we learn about, modify, and relate to our environment chemically. From the development of the periodic table to the study of pollution, this course encourages students to gain an appreciation for the science of chemistry while engaging in cross-disciplinary dialogue about ways in which chemistry affects our daily lives. Satisfies the Connections core requirement.

350 Interdisciplinary Study of Science and Technology This seminar is required of all majors and minors in STS, but is also open to all students interested in the relationships between science, technology and society. Students study various approaches developed by historians, sociologists and philosophers of science and technology. The methods and approaches learned in this course provide a foundation for the STS Senior Seminar, in which stu-dents complete a substantial research project on a topic of their choice. For non-majors, the course offers an overview of how and why scholars have studied science and technology in different ways, and also provides an opportunity to practice thinking, talking and writing about science beyond traditional disciplinary boundaries. Prereq: STS 201 or STS 202 or permission of STS Director. Offered every fall starting Fall 2020.

366 History of Medicine This course surveys the history of medicine from ancient times to the present, guided by the following questions. How have people in different times and contexts made sense of health, disease, and healing? How have changing conceptions of nature and the scientific study of the human body influenced medicine? What have been the social, political, and institutional contexts in which medicine has been done and developed? How has the role of the doctor and patient relationship changed, and how have conceptions of a “good doctor” and “good medicine” changed? How have the problems of access to and distribution of medical care been approached? Examining each of these questions in historical context will, in turn, provide a foundation
for contemplating modern issues in medical research and practice, as well as medicine’s place in modern society. Offered every other year.

### 378 Weapons of Mass Destruction

During World War I, teams of chemists, engineers, and military leaders in Germany, France, the United States and elsewhere worked to prepare chemical weapons that could be deployed on battlefields. The field use of chemical weapons proved to be difficult and unreliable so they were little used as combat weapons in World War II, though related chemicals were key tools of the Nazi holocaust. Chemical weapons have also been deployed often in smaller conflicts, including very recently. If the first world war was the chemists’ war, the second was the physicists’ and led to the development and use of nuclear weapons. Fortunately, there has not yet been a biologists’ war, although germ warfare has been an active area of research by national governments. In the period after World War II, international efforts at controlling weapons of mass destruction, preventing their proliferation to other nations, and protecting stockpiles from falling into unauthorized hands has proved to be difficult and complicated. In this course students become familiar with the history of weapons of mass destruction and analyze humanitarian, political, and geopolitical arguments about their development and possible use. Students also learn to evaluate strategies for their control. Offered every other year.

### 480 Senior Research Seminar in STS

In this course students will carry out original research and compose an extensive, original research paper on an approved topic, building on the approaches examined in STS 350. This will consist of the creation of an extensive annotated bibliography and research paper on an STS topic of each student’s choice. Prerequisite: STS 201, 202 and 350. Offered every Spring starting Spring 2022.

### 490 Senior Seminar

This seminar is required of all majors and minors in STS, and is offered in the Fall of each year. It is a practicum in the research methods of Science, Technology, and Society in which students work closely with the instructor to develop a familiarity with research sources and strategies. Students become familiar with the history and development of the STS disciplines and with a range of research approaches that are open to them for their own work. Students formulate major research proposals, complete a substantial research paper, and make oral presentations of their work. Students who write a thesis in the Spring of the Senior year generally use their STS 490 project as a springboard. Last offering will be Fall 2020.

### 491 Senior Thesis Instructor permission required. Note that achievement of a B+ or higher in STS 490 is required to register for STS 491. Last offering will be Spring 2021.

### 492 Senior Thesis Seminar

Students in this course build on research completed in STS 490 Senior Seminar to complete an extensive research project on an STS topic. Instructor permission required. Note that achievement of a B+ or higher in STS 490 is required to register for STS 492. Last offering will be Spring 2021.

---

**Sociology and Anthropology**

Professor: Gareth Barkin, Chair; Richard Anderson-Connolly; Monica DeHart, James Dollier National Endowment for the Humanities Distinguished Teaching Professor (on leave 2018-2019); Andrew Gardner; Sunil Kukreja, Associate Academic Dean and Dean of Graduate Studies; Benjamin Lewin; Margi Nowak

Associate Professor: Jennifer Utrata (on leave 2018-2019)

Assistant Professor: Jason Struna

Visiting Assistant Professor: Edwin Elias, Denise Glover

Lora Bryning Redford Post-Doctoral Fellow in Archeology: Peter Coutros

**About the Department**

The Department of Sociology and Anthropology is intended for students who wish to rigorously analyze and understand our modern, complex society. The faculty in the department of Sociology and Anthropology train students in the theoretical and conceptual foundations of each discipline. Upper-level courses apply that fundamental training to the study of contemporary social issues including education, the health care system, the media, inequality, the family, deviance, and urban phenomena. A global approach allows students to investigate these phenomena not only in the U.S. but also in Asia, India, Latin America, and the Arab world. Students are encouraged to complement their major or minor in Sociology and Anthropology with foreign language training and study abroad. Programs in Mexico and Southeast Asia are directed by faculty in the department of Sociology and Anthropology.

Faculty members representing both disciplines share a fundamental concern for engaging students in critical comparative study of social and cultural phenomena from a wide variety of ethnographic and historical contexts. The faculty attempt to expand students’ intellectual horizons, challenge them to recognize the oftentimes ethnocentric limitations of personal experience and individual biography, and encourage them to become more conscious of the ways human beings come to take the “reasonableness” of their world for granted.

**Student Learning Objectives**

Upon completion of their studies in Sociology and Anthropology students should be able

- to take a multidisciplinary approach to problems
- to model phenomena with relevant theory and concepts
- to shift between multiple levels of analysis
- to gather data via multiple methodological tools
- to assess the quality of empirical data
- to run statistical tests and draw appropriate inferences
- to conduct independent research
- to write clearly and persuasively
- to make effective oral presentations

A major in Sociology and Anthropology develops knowledge and skills valued in a wide range of career possibilities in the private or public sectors. It also provides excellent preparation for graduate study in anthropology, sociology, social work, public health, law, criminology, counseling, or public policy. Furthermore, the major is a rewarding end in itself, providing students with valuable experiences for their intellectual growth.

**General Requirements for the Major or Minor**

General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

**Requirements for the Major**

The major in Sociology and Anthropology consists of eleven courses:

Required Courses: 101, 102, 295 or 296, 298, 299, 301, 490.

Elective Courses: Four courses in Sociology and Anthropology, two
of which must be at the 300-level or above. (CONN 335 and CONN 480 can each be used as one of the 300-level or above electives.)

Majors may satisfy no more than two university core requirements from Sociology and Anthropology offerings. The Seminars in Scholarly Inquiry are not included in this limit.

Requirements for the Minor
A minor in Sociology and Anthropology consists of six courses: 101, 102, 295 or 296 and three electives, one of which must be at the 300 or higher level. (CONN 335 and CONN 480 can each be used as one of the 300-level or above electives.)

Note: The Sociology and Anthropology Department reserves the right to evaluate courses on a case-by-case basis to determine whether they may be applied to a major or minor based on the age of the course.

Course Offerings
Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

Seminars in Scholarly Inquiry. See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI1 167 Learning from Indigenous Societies
SSI1 174 Lethal Othering: Critiquing Genocidal Prejudice
SSI2 154 The Anthropology of Food and Eating
SSI1 161 Social Order and Human Freedom

Other courses offered by Sociology and Anthropology

Department faculty. See Connections in the Core Curriculum section of this Bulletin for course description (page 24).

CONN 335 Race and Multiculturalism in the American Context
Satisfies the Connections core requirement.

CONN 395 China and Latin America: A New Era of Transpacific Relations
Satisfies the Connections core requirement.

CONN 397 Migration and the Global City
Satisfies the Connections core requirement.

CONN 480 Informed Seeing
Satisfies the Connections core requirement.

IPE 201 Introduction to International Political Economy
Satisfies the Social Scientific Approaches core requirement.

101 Introduction to Sociology This course is designed to introduce students to the field of sociology. Sociology is a broad discipline which, at its core, constitutes the scientific study of society. Students in this course are exposed to basic concepts, theories, and methods used in modern sociology. Upon successful completion of Introduction to Sociology, students have a basic understanding of the sociological perspective and the ways in which the discipline frames human behavior at all levels, from a brief encounter of two strangers to global social systems. The course also provides students with specific sociological tools that they can use to better understand their world; the theories, concepts, and ideas covered in this class will help students to recognize the connection between self and society, biography and history, as well as the individual and social structures. Satisfies the Social Scientific Approaches core requirement. Satisfies the Knowledge, Identity, and Power graduation requirement.

102 Introduction to Anthropology This course introduces students to the discipline of anthropology, with an intent focus on the sub-discipline of cultural anthropology. Students gain an understanding of the methods, theories, and debates that characterize cultural anthropology through a critical exploration of the concept of culture, the central frame through which anthropologists grapple with gender, ethnicity, politics, economics, religion, tradition, technology, identity, globalization, and much more. The fundamentally cross-cultural, cross-temporal, holistic orientation of anthropology makes it unique among the disciplines, and its practitioners try to broaden any discussion of human beliefs and practices to include examples that are as diverse and varied as possible, while insisting on a singular, underlying, and universal "humanity." The course draws on ethnography, a term that applies to both the immersive field research that anthropologists engage in, as well as the written analyses of cultures that anthropologists produce to better understand how culture and representations of culture structure relationships of power and inequality in the contemporary world. Satisfies Humanistic Approaches core requirement. Satisfies Knowledge, Power and Identity graduation requirement. Prerequisite: Students who have SOAN 102 transfer credit may not take this course.

202 The Family in Society: Critical Perspectives This course challenges students to learn to “see” families sociologically and to think critically and comparatively about the family as a complex social institution. Rather than assuming a universal model of the family, course readings examine families in the United States and elsewhere in the world as diverse entities shaped by economic and political factors, gender ideologies, racial and class inequalities, sexual norms, and cultural changes. Family ideals frequently clash with contemporary family realities; social science is a powerful tool for illuminating the implications and meanings of family continuity and change.

206 Theories of Deviance and Social Control This course offers an in-depth exploration of multiple theories of deviance and social control. Each section of the class is organized around a particular theoretical orientation; each theory will elucidate both how deviance happens and the mechanism of social control that align with that particular theory. Every theory covered in this course is situated within a social, historical, and political context. Social and scientific theories are socially constructed, and thus, the context in which they emerge and exist is fundamental to their basic understanding. Students also learn how to use this diverse set of theories to make sense of how knowledge, power, and inequalities are all fundamentally tied to the ways in which a society comes to define and control deviance. As the semester progresses, students synthesize and integrate these theories to allow for a deeper, holistic understanding of deviance and social control. Prerequisite: SOAN 101. Offered occasionally.

212 Sociology of Gender Gender surrounds us, but ideas about gender in popular culture often oversimplify its workings. This course provides an overview of a sociological perspective on gender, with close attention to the relational construction of gender difference through analyzing both femininities and masculinities, as well as how gender intersects with other differences such as race, class, ethnicity, and sexuality. The first half of the course examines gender inequality from several classic and contemporary theoretical perspectives. The second half foregrounds empirical research on gender and how gender works and changes over time in institutions that affect our daily lives such as schools, families, and workplaces. Readings focus on the United States as well as other countries within our increasingly globalized world. Satisfies the Social Scientific Approaches core requirement.
213 City and Society  More than half of all humans on earth now dwell in cities, and urban life is almost certainly an integral aspect of our collective future. This course introduces students to the sociological and anthropological study of the city through an examination of the theories, concepts, and frameworks social scientists have deployed in seeking to understand cities. This examination includes a focus on urbanization, or the underlying processes by which cities emerge, and on urbanism, or the character of life in an urban built environment. The geographical focus of the class ranges from global cities in other parts of the world to the American cities with which students are familiar. This course includes a fieldwork component that requires students to explore the themes they encounter over the semester in the urban context of Tacoma.

215 Race and Ethnic Relations  The goal of this course is to provide an introduction to the forms of difference and inequality reflected, constructed, and reproduced through notions of race and ethnicity. It asks: what are the forms of knowledge, practices, institutions, and values that have informed the nature and meaning of race and ethnic relations in both the US context and globally? Using a historical, theoretical, and comparative approach, the course examines both the origins of contemporary race and ethnic categories and the way those categories have been reconfigured and deployed over time and space as part of diverse political, social, and economic projects. Drawing on specific cases, students explore how notions of race and ethnicity intersect with other forms of difference, such as class, gender, and national identity. Through engagement with sociological/anthropological analyses of race and ethnic difference, the course thus provides students with a conceptual and theoretical toolbox with which to critically examine contemporary race and ethnic relations and engage in informed debate about their implications. Satisfies the Knowledge, Identity, and Power graduation requirement.

217 International Research Proposal Workshop  0.25 activity unit. This course is designed to guide students through the process of preparing and submitting a proposal for independent research in a foreign/international setting. The course functions as a workshop: students identify potential funding sources, develop relevant proposals, refine those proposals in a collaborative workshop setting, and coordinate with Puget Sound Fellowships Office when appropriate. The class meets monthly, and enrollment is limited. Prerequisite: permission from instructor.

225 Asian Medical Systems  A basic introduction to three traditional medical systems of Asia: Ayurveda, Chinese medicine, and Tibetan medicine. The course examines theoretical underpinnings, trainings of practitioners, materials and techniques utilized in treatment, and important historical developments in each system. Additionally, the course explores issues of the interface between biomedicine and these systems, and larger issues of globalization in the practice and consumption of traditional medicines. Taking an anthropological approach, the course aims to understand each system from within itself while also paying close attention to the social and cultural conditions under which each system has thrived and has also faced challenges. The course examines how systems of healing are both biologically and culturally based, and considers how these medical systems relate to issues of national identity and global politics.

230 Indigenous Peoples: Alternative Political Economies  This course examines the situations, problems, and continually developing strategies of indigenous peoples living in various countries and regions scattered throughout the world. While the central concern of this investigation focuses on so-called “tribal” peoples and their increasingly threatened, yet still instructive lifeways, the course also deliberately considers selected points of contrast and comparison involving “modern” societies as well. Toward this end, the course uses the approach of political anthropology, which has traditionally been associated with the study of small-scale societies (wherein the realms of “politics” and “economics” are inseparably interlinked with other sociocultural institutions such as “religion” and “kinship”). The ultimate aim of the course is threefold: first, to acknowledge the tragedy of past and presently-continuing destruction of indigenous peoples’ physical, social, and cultural lives; second, to learn about and from the resilience and resistance such people have shown over millennia; and third, to inspire hope that it is still not too late for “modern” and “tribal” people humbly and profitably to learn from each other. Satisfies the Social Scientific Approaches core requirement. Offered occasionally; offered Fall 2012.

235 Linguistic Anthropology  This course is an introduction to the sub-discipline of linguistics within the broader discipline of anthropology. The course covers methods used and theories formulated in the study of language in anthropology. These include the structure of language; language through history; a comparison between human and non-human modes of communication; the innate human capacity for language; the relationship between language, thought, and culture; and the study of language, power, and identity. A cross-cultural perspective is emphasized in this class. Offered occasionally.

240 Social Movements  This course surveys major theories and research on social movements. Issues of recruitment, organization, tactics, resource mobilization, the role of the mass media, the impact of official agencies, and effects on public policy are examined. Selected movements are analyzed in relation to political institutions, socio-economic structures, and cultural trends. Among the movements studied: the civil rights movement, women’s movement, environmental movement, labor movement, right-wing movements, the pro- and anti-abortion movements, and popular liberation movements in the Third World. Offered occasionally.

280 Archaeological Foundations  As one of the four fields of anthropology, archaeology seeks to uncover artifacts and the material culture of human life in order to understand past civilizations and the long-term development of human societies across space and time. This course offers an introduction to the field of archaeology, providing an overview of its goals, theory, methods, and ethics. Students have the opportunity to learn and practice basic archaeological techniques, as well as to reflect on the significance of these techniques for understanding other peoples. Through study of specific cases, students are also exposed to some of the major debates that have shaped the field including, for example, questions of artifact authenticity, ownership, and repatriation; the reliability of diverse forms of knowledge and methods; the origins, evolution, and diffusion of human cultures; and the impact of new technology on archeological methods. Offered every other year.

295 Social Theory  This course offers an in-depth survey of sociology’s foundational theoretical perspectives. Students analyze, compare, and apply the ideas of a range of classic and contemporary social theorists, and in doing so develop a keen appreciation for how the lens we use to think about and perceive various social phenomena profoundly shapes our questions and conclusions about the world. The course focuses on the kinds of questions that have been asked by influential nineteenth- and twentieth-century thinkers, as well as the theories they have constructed to answer them. The first half of the course focuses on the “classical” theorists, including Marx, Durkheim, and Weber. The second half is devoted to several contemporary perspectives that build on and extend the classical theories, including feminist theory, Goffman,
Bourdieu, and Foucault. The idea of “emancipation” is used as a heuristic tool for thinking through a range of social theories.

296 Anthropological Theory Anthropological theory sees the world through a disciplinary lens that focuses on culture—shared understandings—while looking broadly and holistically at the human condition across a broad range of times and places. This course invites students to “think anthropologically” as they become familiar with the various lines of thought that have characterized anthropology since its earliest days to the present. In addition, students also learn to grapple theoretically with a contemporary problem and articulate their thoughts on the issues in terms of relevant anthropological theorists. Examples of problems that could be considered in the course include the following: the issue of “ownership” of indigenous culture, the unresolved problems of multiculturalism, or the interrelationships linking globalization, terrorism, and genocide. The course involves heavy reading demands and is conducted seminar style with students expected to lead and contribute to class discussions on a daily basis.

298 Social Research This course covers experimental and quasi-experimental design, the design of social surveys, and techniques of data analysis appropriate for each type of design. Individual student research projects are required. Prerequisites: SOAN 101 or 102 or permission of instructor.

299 Ethnographic Methods Ethnography is the study of human cultures. Ethnographic methods are the constellation of research methods that anthropologists (and nowadays, many others) use in exploring, understanding, and writing about human cultures. This course introduces students to the methodological craft of ethnographic inquiry, and includes an examination of the historical development of this methodological toolkit, the theoretical implications of this approach to research, the ethical considerations paramount to ethnographic research, and the practical concerns involved in “doing” ethnography. Students will have the opportunity to practice and deploy these research methods in fieldwork settings in the greater Tacoma area. The course is structured around the design and implementation of an independent research project that utilizes these methods for anthropological inquiry. Prerequisites: SOAN 101 or 102 or permission of instructor.

301 Power and Inequality This course examines social and economic inequality in the United States and globally. The goal of the course is to understand the extent of inequality as well as the power structures that systematically distribute resources in a particular way. The course introduces concepts and theoretical approaches that are fundamental to the social sciences. The policy implications that emerge from these comparisons are also discussed. Satisfies the Social Scientific Approaches core requirement. Prerequisites: SOAN 101 or 102 or permission of instructor.

305 Heritage Languages and Language Policies Using the perspectives of linguistic anthropology and sociolinguistics, this course investigates not only languages and the people who speak them, but also some of the ideologies and policies (in schools, government, and work) that impinge on issues of language rights and practice. Beginning with a comparative consideration of the semantic “load” carried by several specific key words in different languages/cultures, the course proceeds to examine the larger theme of language loss, looking in particular at endangered indigenous languages. Complementing this focus on the threat faced by “small” languages around the world, the course also considers examples of systematic efforts, on the part of native speakers and policy makers, to affirm linguistic diversity in multicultural societies, exploring in this connection such topics as bilingualism and diglossia (including Ebonics and Creoles). The course ends with a critical look at some of the rhetoric, ideologies, and policies geared to promote or challenge monolingualism in the U.S.

308 Visual and Media Anthropology Students focus on visual anthropology in its primary and original form: as a research practice. Specifically, they investigate and practically explore the use of visual media as a tool for anthropological research and presentation. They discuss visual anthropology both as a supplement to textually-focused ethnography, and as an end in itself, in the creation of a visual product that explicates cultural realities. This course focuses on visual forms of communication by analyzing and questioning how facts travel in the world through old and new media such as film, video, photography, including their digital forms. Students are introduced to the history of anthropographic film and contemporary changes that have widened the possibilities of visual anthropology beyond its early confines as a tool for illustration. Critical theory, methods, and ethical concerns are all part of the current refashioning of visual anthropology and are critical components of the class. Students will also be introduced to the emerging sub-discipline of media anthropology, which focuses on the intersections of culture and media consumption, production, and materiality. The class explores the history of media and cultural studies, and how they have informed contemporary media anthropological approaches. The class combines the discussion of theoretical and ethical issues, film and video screenings, and practical assignments in visual ethnography, using a variety of available media. Prerequisite: SOAN 102.

310 Critiquing Education Measuring students, norming test results, ranking students and schools, and “racing to the top” are endeavors that produce, according to a competitive paradigm, not only triumphant winners, but also deficient losers. Are there better, more inclusive and more socially just ways to envision and carry out the mission of education? How else might stigmatized students—that are often perceived only as marginalized, “broken,” and in need of “fixing” —be seen and positively incorporated in school systems? This course explores these and related questions, using an anthropological approach to identify the possible riches as well as perceived liabilities “brought to school” by those students who often struggle disproportionately in most educational systems. They include students whose biopsychological functioning is different enough for them to be labeled as “disabled”; students who are poor or have access to very limited economic resources; aboriginal students still negatively affected by their parents and grandparents having been forced to live far from family and home in residential boarding schools; and students whose home language is either a language other than English or a devalued variety of English. Class readings include both ethnographic accounts of such students’ lived experiences as well as investigations of various proposed policies of school reform.

312 Indonesia and Southeast Asia in Cultural Context This course provides an anthropological overview of Southeast Asia, one of the most diverse and fascinating regions of the world, with a focus and required field component in Indonesia. Because of the Indonesia trip, the course requires an application and students are responsible for some expenses, including airfare. As a survey of Southeast Asian cultural groups and histories from an ethnographic perspective, the course begins on campus, but finishes in Yogyakarta, Central Java—a city often described as the cultural heart of Indonesia, and the country’s center of higher education. In the first section of the class students investigate the prehistory, archaeology, and initial migration to the region. Students then examine the origins of agriculture and the development of complex state societies, and the influence of world religions (Hinduism, Buddhism, and particularly Islam) in the cultural development of SE Asia. Students then look at case
studies of ‘indigenous’ peoples in the region. Students also explore the economic and cultural impact of European colonialism and the response of SE Asian people to the European presence, as well as the post-colonial period of nation building. The final section of the course is more geographically focused, and looks at the cultural component of many important issues in modern day Indonesia, including environmental decline and deforestation, the impact of globalization and industrialization, the problems of ethnic and religious minorities, and human rights concerns. Students develop individual research projects that incorporate both library research and ethnographic fieldwork while in Indonesia. The Indonesia portion of the course lasts approximately 18 days, beginning shortly after the semester ends, and features an immersive stay at a local university including language instruction, guest lectures by Indonesian scholars, trips to cultural and historic sites, ethnographic projects, a multi-night stay in a rural village, and potential trips to Bali or other neighboring islands. Puget Sound students stay in the dorms alongside Indonesian students, some of whom sit in on class sessions and help introduce the visitors to their culture and lifestyle through group activities. Two faculty members accompany the group, and course meetings continue abroad, while taking advantage of the Indonesian setting with ethnographic assignments and individualized research projects developed prior to departure. The course is limited to 10-12 students and requires an application and instructor permission. There are fees related to the trip, including the plane ticket. Contact the course instructor for more information. Prerequisite: SOAN 102, application, and permission of instructor. NOTE: This course will require an 18-day field component in Indonesia, and will require students to pay their own airfare, as well as other potential program fees. Applications will be accepted from all students who have met the prerequisite of SOAN 102 (Cultural Anthropology), and a panel of two faculty members (the instructor and one other member from Sociology and Anthropology or the Asian Studies Program) will evaluate applications on the basis of: (1) academic performance, (2) well-articulated ability/willingness to deal with adverse situations and cultural difference, (3) recommendations by Puget Sound faculty members, (4) interest and enthusiasm for study in and about Southeast Asia, and (5) a clean disciplinary record at the university.

314 Criminology The field of criminology covers two main areas: (1) analysis of law-breaking and (2) investigation of the ways in which laws are made and enforced by the criminal justice system. The first seeks to answer the question, Why do people break (or follow) the law? The second asks, How is (criminal) law made and enforced? These issues are examined historically and cross-nationally but there is particular attention given to contemporary conditions in the United States, a country with a high rate of offending and probably the highest rate of incarceration in the world. In addition to investigating the variation in offending and victimization, the course examines the extent to which the U.S. criminal justice system is biased against certain classes and groups. Offered occasionally.

315 Identity Politics in Latin America This course explores the rise of identity politics within Latin America since the 1990s. It asks how ethnic, racial, feminist, sexual, and transnational identity politics have shaped the nature and goals of a diverse array of social movements in the region. It draws on ethnographic analyses to analyze how specific instances of identity politics emerged from particular historical and national contexts to challenge traditional hierarchies of power in new ways. The course also utilizes fictional, testimonial, and film sources for further investigation of the experiences of participants within these movements and their implications for transformations in Latin American society. Prerequisite: LAS 100 or SOAN 120, or permission of instructor. Offered occasionally.

316 Cultural Politics of Global Development This course examines how culture, identity, and ethics are implicated in economic development efforts around the globe and here at home. Through a critical examination of major development theories and their assumptions about the nature of the global system and the meaning of difference within it, the course explores whose ideas about development matter, how they manifest in terms of particular policies and politics, and what stakes they pose for different social groups. In particular, the course explores how race, ethnicity, gender, sexuality, health, environment, and education, among other things, have structured development differences. In doing so, the course interrogates the role that colonialism, science, capitalism, and activism have played in shaping development norms and challenges to them. The course engages interdisciplinary and cross-cultural approaches to development through a combination of theoretical and ethnographic texts, as well as experiential learning. This course counts as one of the core courses for the Global Development Studies Designation. Not offered 2018-2019.

318 Gender, Work, and Globalization The world is becoming increasingly interconnected, with the movement of people, capital, and cultures across borders transforming lives all over the globe. Yet globalization also shapes, and is shaped by, gender, class, race/ethnicity, age, sexuality, and other axes of difference and inequality. This course examines how gender relations are embedded in practices of globalizing capitalism. Not only does globalization shape the lives of men and women in distinct ways, but the social and economic changes accompanying globalization affect power relations involved in masculine domination. The course will examine key developments at the nexus of globalization and gender: the feminization of poverty, feminization of migration, and feminization of workforces which are consistent features of transnational production processes. Besides analyzing the gendered consequences of globalization, including how globalization shapes the lived experiences of women worldwide, it also foregrounds how gendered subjects constitute processes of globalization. Special attention is given to how gender shapes our ideas of what counts as “work”, both paid and unpaid, globally, as well as how gender permeates institutions, especially workplaces, but also the government and international organizations. Offered occasionally.

323 The Political, Economic, and Social Context of International Tourism In the contemporary world, tourism is often the foremost process that brings together people from different parts of the world, allowing those from vastly different societies to interact on a face-to-face basis under peaceful, if not always equal, circumstances. As such, tourism as a phenomenon and as a process raises questions about global interconnections and global movements of finance, cultural and material artifacts, ideas, and people across national and cultural boundaries. The two questions this course addresses throughout the semester are 1) what are the economic, political, social, cultural, and environmental impacts of tourism in low and middle income countries? and 2) what are the tradeoffs associated with tourism? In tackling these two questions the course examines a wide range of issues, including the political, economic, social, and cultural implications of tourism, the impact of global tourism on environmental and global conservation efforts, and tourism as a vehicle of social change and as a facilitator of cultural and material globalization. Crosslisted with IPE 323.

335 Third World Perspectives This course examines the dilemmas, challenges, and prospects for selected regions of the developing world - south - as seen through the eyes of intellectuals and leaders from these regions. The course critically examines the values reflected in the ideas/writeings of selected “third world” intellectuals and leaders, specifically focusing on how these values shape 1) assessment by intellectuals and
leaders of social, cultural, economic, and political dilemmas in the Third World; and 2) the alternatives leaders and intellectuals articulate for overcoming these dilemmas. In the process the course examines the social forces that significantly helped shape the social realities being addressed from a Third World Perspective. Offered occasionally; not offered 2012-2013.

340 Global Political Economy The course has a two-fold purpose: first, to analyze the political, economic, and cultural forces creating interdependence in the world, and second, to adopt a comparative perspective and to investigate in some depth the social systems in a variety of countries. Offered occasionally.

350 Border Crossings: Transnational Migration and Diaspora Studies This course is designed to explore diverse and changing forms of transnational migration across a global landscape, with a focus on the dynamic relationships that define migrants’ relationships to both home and host communities. The course draws upon anthropological and sociological contributions to migration studies, transnationalism, and diaspora studies in order to examine the articulation of culture and identity amidst the complexities of the contemporary world. The course also utilizes case studies that allow students to analyze diasporic experiences both in the United States and abroad. This course allows for a sustained discussion on the changing relationships between people, place, and culture, and the role of anthropological methods in investigating them. Prerequisite: none; SOAN 101, 102 or 295 strongly recommended. Offered occasionally.

352 Critical Studies of Organizations, Work, and Management Changes in transportation, information, and communication technology, as well as artificial intelligence and automation are rapidly transforming occupational and commercial arrangements. These forces of transnational economic integration undermine conventional organizational and commercial forms, and in so doing alter the ways people execute work and management in many fields. This course examines these phenomena by focusing on work and management in different phases of product and service supply chains locally and globally, in addition to examining differences in experience of these processes on the basis of race, class, gender, nationality, and other intersecting social dimensions. Offered occasionally.

360 Sociology of Health and Medicine This course examines the sociological dimensions of health, illness and the profession of medicine. Specifically, this course will address five primary themes: 1) The social construction of health and disease and medical knowledge; 2) health and illness behavior: the study of behaviors related to staying healthy and to interpreting and responding to symptoms of illness; 3) Social Epidemiology: the study of patterns of distribution of disease and mortality in the United States; 4) the organization of the United States health care system compared to systems found in the other countries; and 5) the socialization and organization of health care professionals.

365 Global Health This course serves as an introduction to issues surrounding global health. Students explore multiple mechanisms that lead to health inequalities around the world, along with policies and interventions that aim to deal with issues of morbidity and mortality at a national and/or global scale. Topics covered in this course include, but are not limited to: the impact of globalization on the health of specific populations, socioeconomic contexts of disease, issues of infectious disease and nutrition, the interplay between culture and health, ethical and human rights concerns, and the role of NGOs and non-profits in global health.

370 Disability, Identity, and Power Disability studies offers perhaps the most trenchant critique of “the hegemony of the normal”—that is, the reification and privileging of certain numerical indices (for example, IQ score; body mass index; weight and height; complete blood count; range of motion; brainwave frequencies; and other such measurements which are then regarded as “better” or “worse” than comparable numbers). While certainly accepting the importance of such measurements in designing treatments and strategies to improve the quality of life for people living in pain, disability studies seeks to balance this “experience-distant” emphasis on “the quantified life” with “experience-near” insights. Thus disability studies seeks out, reflects on, and tries to incorporate and prioritize the meta-biological realities of the lived experiences of people with disabilities (defined here as lifelong or chronic biological and/or psychological impairments), especially in policy-making endeavors inspired by ideals of social justice. Hence this course focuses on issues of power, disparity, and diversity of experience and identities, particularly as these affect and are affected by the minds and bodies of individuals who “have” (or are socially close to people who “have”) conditions that mark them as “not normal”. Unlike studies done from the perspective of the healing professions, where non-normalcy is regarded as a condition to be helped or remedied, this course, following the perspective of disability studies, is less concerned with identifying and “fixing” deviation from some statistically defined ideal range, and more directly focused on socially grounded, ever-dynamic identity construction and its relation to emancipatory social change, especially when these processes involve confrontations between individuals with disabilities and the various social institutions (e.g. education, health care, legal and economic systems) they (or their caregivers) must deal with throughout their lives. Satisfies the Knowledge, Identity, and Power graduation requirement.

380 Muslim Cultures and Communities Islam has significant influence on a broad array of nations, ethnic groups, and local expressions of culture, and plays a role in shaping societies’ politics, economics, and law. Taking a practice-focused, anthropological perspective on the study of religion, this course examines the many ways in which culture and society have been co-influenced by Islam in different parts of the world, including here in the Pacific Northwest. The objective of this course is to move beyond stereotypes and essentialization to better understand the diverse, lived experience of Muslims around the world, and the ways that collaborat-ive, ethnographic social science can help in understanding Islam as a way of life. The course aims to help students develop a critical awareness of the ways Muslims’ understandings of their faith can be mediated by social, economic, and political phenomena. Students further explore representationpolitics and power relations surrounding Islam, and how Western powers have historically represented the Islamic world and Muslims, both at home and abroad.

390 Men and Masculinities This course offers a critical analysis of what it means to be a man using a sociological lens. Feminist scholars have made gender visible, problematizing both femininities and masculinities in order to challenge and transform unequal gender relations. Yet until recent decades, men were rather invisible as men, as gendered beings, in academic research. Building on the insights of gender studies, the course emphasizes the socially constructed, power-laden, and historical-ly and culturally variable character of masculinities in its multiple forms. Readings highlight the individual, interactional, and institutional processes through which men become men and “do masculinity” in relation to both women and other men. Using an intersectional approach, the course also explores how masculinities are shaped by other axes of difference and inequality, including class, race/ethnicity, sexual orientation, and age. Masculinities are analyzed across multiple contexts over the life course, including intimate relationships, schools, families, workplaces, and organizations. Diverse forms of masculinities in the United States as well as masculinities in Mexico, Russia, and Western Europe will be considered.
407 Political Ecology  Political ecology is an active interdisciplinary framework with foundations in anthropology, geography, environmental studies and the biological sciences. Its central contention is that our understanding of environmental issues and environmental change must include an analysis of the social, political, economic, and cultural context in which they are produced. Through a set of advanced readings in the social sciences, students become familiar with the genealogy of this interdisciplinary approach, the keystone texts that inform contemporary political/ecological work, and the new directions that comprise the cutting edge of political ecology. Recurring themes in the reading list will examine indigenous peoples struggle over resources, the construction of nature through the capitalist lens, and an examination of sustainability in both discourse and practice. Students conduct original ethnographic research that builds upon these areas of interest. Advanced coursework in anthropology, sociology, and/or international political economy is strongly recommended. Crosslisted with IPE 407.

416 Modern India and Diaspora  This course is designed with a two-fold focus: 1) to provide an in-depth sociological examination of pertinent developments and trends shaping modern/contemporary India; and 2) to situate India’s trajectory as a modern society in a broader international (both regional and global) context. Specifically, the course centers on the (a) critical social transformations in Indian society since the beginning of the 20th century; and (b) an examination of India’s relationships and links to the broader global community. The 20th century marks a period of “great transformations” in the narrative of India. Its salience is reflected in the fact that the period draws on the intersection of the late colonial as well as the post-colonial period in India. The course emphasizes the complex links and transition between British colonialism and the post-colonial period in India, and India’s relationship with the global system. Offered occasionally.

420 Sociology through Literature  Sociology has long sought scientific status. In the process, it has tended to squeeze out the human and personal from its vocabulary and methods. This course is designed to tackle the crucial questions of sociology by approaching them through an examination of works of literature (for novelists are often excellent microsociologists) and through personal social histories to try and arrive at the abstract and theoretical aspects of sociology from the personal and concrete. The unifying theme of the course is emancipation. This course is conducted in seminar format requiring extensive class participation.

481 Special Topics  This seminar involves an in-depth examination of selected topics in anthropology and/or sociology. A different topic is selected by faculty each time it is offered. Relevant theory and current research are examined. Students are responsible for research papers and presentations under close supervision of the faculty. May be repeated for credit. Offered occasionally.

490 Senior Thesis  In this capstone course students bring together their previous conceptual, theoretical, and empirical knowledge and skills in sociology and anthropology in order to propose and ultimately answer a social-scientific research question. Much of the work is done independently while under the supervision of the thesis instructor. Prerequisite: SOAN 490.

494 Research Assistantship  Conducting original, independent research is central to the experience of the Sociology and Anthropology major. This activity credit course pairs a student with a SOAN professor to collaborate on a sociological or anthropological research project in progress. In the capacity of research assistant, the student contributes to the project through tasks that may include interviewing, interview transcription, survey administration, data indexing, data summary, bibliographic research and literature review, data coding, data input, and research briefs. Specific details for each project will be specified in a written proposal prepared by the student and professor and approved by the department chair. The proposal will (a) articulate the nature and aims of the research project; (b) set forth the terms of the work to be undertaken by the student; and (c) identify the desired research skills and objectives to be pursued. At the end of the semester, the student prepares a written summary of the experience, reflecting on skills obtained, challenges faced, knowledge acquired, and experiences gained through the assistantship. Prerequisites: SOAN 101 and 102 and instructor permission. Pass/fail only.

495/496 Independent Study  

497 Internship  In this seminar students examine theoretical issues surrounding work or volunteerism in areas relevant to sociology and cultural anthropology while drawing from a field experience. Students do not need an internship placement at the time of registration but must have one by the start of the course. Prerequisite: shortly after registration students must meet with the instructor and an internship coordinator from Career and Employment Services for assistance in locating a placement.

498 Internship Tutorial  Students who enroll in this course work with a faculty member in the Sociology and Anthropology Department to develop an individualized learning plan that connects the actual internship site experience to study in the major. The learning plan will include required reading, writing assignments, as well as a culminating project or paper. Prerequisite: approval of tutorial professor and the Internship Coordinator.

SPANISH  

Students interested in a major or minor in Spanish should consult the Hispanic Studies section in this Bulletin.

SPECIAL INTERDISCIPLINARY MAJOR  

The purpose of the Special Interdisciplinary Major (SIM) is to permit exceptional students to complete a degree at Puget Sound through a course of study that draws upon the curricula of two or more departments, schools, or programs. The SIM may be in a recognized interdisciplinary field or in an emergent field. The course of study is designed by the student in concert with a multi-disciplinary faculty committee. The plan of study must present a coherent program in the liberal arts and objectives to be pursued. The plan of study must also include upper-division coursework sufficient for the student to develop knowledge and analytic tools sophisticated enough to permit interdisciplinary synthesis. The student must demonstrate this knowledge and analytical skill by preparing and publicly presenting a senior thesis or project.
The purpose of a SIM is not to dilute an existing major, but to allow students to pursue areas of study that cannot adequately be addressed through existing majors, minors, and programs. For some students the pursuit of a SIM may be preferable to the completion of a double major. The SIM is supervised by a principal advisor from a relevant department with a committee of two or more other faculty members. At least one of the committee members must have their primary appointment in a different department or program from that of the principal advisor. All three committee members supervise implementation of the SIM, approve changes when necessary, and certify completion of the approved course of study.

Steps in the Development of a Special Interdisciplinary Major

Students interested in pursuing the SIM must do the following:

1. Create a SIM advisory committee composed of three faculty members from departments appropriate to the topic, including one as the principal faculty advisor. At least one of the committee members must have their primary appointment in a department or program different from that of the principal advisor.
2. With the SIM advisory committee, develop a SIM application (application forms are available online, in the Registrar’s, Associate Deans’, and Academic Advising offices).
3. Submit the proposal to the Curriculum Committee no later than first term, junior year. Proposals submitted to the Curriculum Committee by October 1 or February 15 will be acted upon before registration for the following term.
4. Complete the program plan approved by the Curriculum Committee. Modifications to the approved SIM program require approval by the SIM Advisory Committee and the Curriculum Committee. The Registrar will be notified of any modifications to the approved SIM program.

Prerequisites

A student must have completed twelve units at Puget Sound before applying for the SIM earning a cumulative GPA of at least 3.2. The student must also have completed at least four units of coursework relevant to the SIM before submitting a proposal.

Requirements for the Special Interdisciplinary Major

1. A minimum of 12 courses, of which 10 must be at the 200 level or above and of which 6 must be at the 300 level or above. The major may not exceed 16 units. Nine of the 12 required courses must be above and of which 6 must be at the 300 level or above. The major program different from that of the principal advisor.
2. No more than 2 Independent Study units may be applied to the SIM. If 2 Independent Studies are proposed, one must focus on the integration of the fields within the SIM.
3. A Senior Project (SIM 490). Public presentation is required in the second semester, senior year.
4. A grade of C or higher in each course applied to the SIM.

Application

1. The student and faculty committee prepare a proposal for a degree plan that includes the title of the degree and a list of courses with departmental sign-off indicating when the course will be offered; educational objectives of the degree and a discussion of how the proposed major will meet the objectives; an explanation of how particular courses in the proposed degree program will address the requirement of a thorough grounding in methodology in the contributing disciplines, of breadth within the major, and of depth within the major; an explanation of how existing majors and programs are not adequate to meet the educational objectives of the proposed SIM; an explanation of how the proposed major will serve the student’s broader academic and career goals; a statement of how the proposed major compares to established majors in the same field at other institutions; and a recommendation of whether the degree awarded should be a BA or a BS that at minimum addresses the type of degree typically granted by the disciplines represented or for a similar degree at other universities and, if a BS is proposed, the extent to which the proposed SIM prepares the candidate to do advanced research.

2. The application must include a letter from each faculty member on the proposed SIM advisory committee evaluating the merits of the proposal and specifically explaining the following: how particular courses in the proposed degree program provide a thorough grounding in methodology in the contributing disciplines along with exposure to the breadth and depth of the major; faculty preparation to support the proposed degree program; and a plan for how frequently the student, advisor, and full committee will meet (with an expectation that the full committee will meet at least once per year, excluding their presence at the student’s public presentation of research).

3. The principal advisor forwards the completed package (proposal, letters, student transcript) to the Curriculum Committee for approval.

Only complete applications are considered.

490 Senior Project

Students completing a Special Interdisciplinary Major must complete a senior project that integrates work in the major. The project can take the form of a thesis, creative project, or artistic performance. A prospectus for the project must be submitted to and approved by the student’s SIM faculty committee in the semester prior to registering for the course. Completion of this course will include a public presentation of the project in the final semester of the senior year. Prerequisite: permission of SIM committee.

STUDENT AFFAIRS COURSES

101 Introduction to Journalism

0.25 activity unit
This course teaches students the basics of journalism writing. Hands-on activities and engaging in-class discussion are used to develop the skills to interview and properly attribute sources, write effective ledes, avoid the pitfalls of bias, structure thoughtful articles of varying genres and more. This course is strongly encouraged for writers and prospective writers for the university’s student newspaper, The Trail, or other student publications in which writing experience is preferred. All students interested in journalism writing are welcome. Pass/fail grading only.

150/151 Posse Workshop

0 activity unit
Students attend weekly workshops focused on college transition, campus leader-ship, career development, and team building, among other topics. Students lead workshops on topics of their interest. Enrollment restricted to students in the first year of the Posse Program. Pass/fail grading.

250/251 Posse Workshop

0 activity unit
Students attend weekly workshops focused on college transition, campus leader-ship, career development, and team building, among other topics. Students lead workshops on topics of their interest. Enrollment restricted to students in the second year of the Posse Program. Pass/fail grading.
**STUDY ABROAD**

**Mission**
The University of Puget Sound recognizes the importance of intercultural understanding in the liberal arts education and offers study programs in many locations worldwide. In accordance with the mission of the university to encourage an appreciation of commonality and difference, the Study Abroad Program aims for students: 1) to acquire knowledge about a particular culture and language, gained through an extended period of living and learning in the host culture, and 2) to develop the ability to use this acquired knowledge to move back and forth between cultures in mutually respectful interchanges, resulting in an informed appreciation and deeper understanding of oneself and others.

**Programs**
Puget Sound supports a wide variety of study abroad programs offered by both the University of Puget Sound and program providers. Visit the International Programs Web page (pugetsound.edu/studyabroad) for more information on Puget Sound’s approved study abroad programs, procedures, and deadlines for studying abroad. To receive academic credit, students must select a program from the approved program list, complete the Puget Sound Study Abroad application by the Puget Sound Application deadline, and be approved to study abroad by the International Education Committee (IEC).

**Application for Study Abroad**
Students must be approved by Puget Sound in order to study abroad. For complete details on the application process, please visit pugetsound.edu/studyabroad.

**THEATRE ARTS**
Professor: Geoffrey Proehl, Kurt Walls, Director of Theatre Production

Associate Professor: Sara Freeman, Chair

Assistant Professor: Jess K. Smith

**About the Department**
Theatre Arts offers courses and creative activities in which students learn to make, understand, and evaluate theatrical events. In doing so, students acquire knowledge and skills that enable them to become collaborative, informed, imaginative, and engaged theatre makers, who – as artists, scholars, and citizens – will pursue paths after graduation in professional theatre, education, business, and other fields of endeavor. The faculty is committed to theatre as a liberal art and an emphasis on the total artist. Majors, minors, and non-majors develop skills and connect insights in acting, directing, design, production, dramaturgy, research, and writing throughout their coursework, culminating in thesis projects presented as part of Senior Theatre Festival. Through participation in student- and faculty-directed productions, students ground their study of theatre in rehearsal and performance. Department productions provide the university and local community with the opportunity to experience high-quality theatre of diverse style, content, and form from a variety of historical periods.

The department annually offers scholarships for incoming and ongoing students. For information, visit the department website or contact the office administrator at 253.879.3330.

**The Norton Clapp Theatre**
This intimate theatre, located in Jones Hall, serves as the performance center for the department. All students are welcome to audition for and participate in Theatre Arts productions.

**Senior Theatre Festival**
Senior majors in the Department of Theatre Arts complete a culminating thesis project that requires the planning, execution, and evaluation of a four-show festival of plays, collaboratively produced. This Senior Theatre Festival is the capstone of experiential learning in the program, and draws on all areas of study in the major, while also mirroring many aspects of professional work in the field post-degree. Through an intense supervised process housed in the THTR 490 class, the senior class reads extensively, selects four full-length plays to produce, and determines which seniors will direct, design, dramaturg, and act in STF shows as their thesis project. This year-long ensemble process results in an April festival that is part of the department’s mainstage season.

Theatre Arts faculty provide guidance, beginning with thesis-oriented readiness assessment during junior interviews. The faculty emphasizes that success in STF, particularly in key roles such as director and dramaturg, correlates with three distinct modes of achievement: maintaining at least a 3.0 GPA across all theatre classes; participating in a faculty directed show in a high responsibility production role; and a strong experience in the 313 Directing class.

**General Requirements for the Major or Minor**
General university degree requirements stipulate that 1) at least four units of the major or three units of the minor be taken in residence at Puget Sound; 2) students earn a GPA of 2.0 in courses taken for the major or the minor; and 3) all courses taken for a major or minor must be taken for graded credit. Any exceptions to these stipulations are indicated in the major and minor degree requirements listed below.

**Requirements for the Bachelor of Arts**
Completion of the following 10 units: THTR 215; 217; one unit of 250, 252, 254, or 256; 300 or 310; 317; 371; 373; 490; and one additional THTR unit. MUS 220 or BUS 380 may be used to fulfill this elective.

**Requirements for the Minor**
Completion of the following 6 units: THTR 215; 217; two of the following: MUS 220, THTR 200, 250, 252, 254, 256, 371, or 373; two additional theatre electives of the student’s choice. Note The Theatre Arts Department reserves the option of determining, on an individual basis, a time limit on the applicability of courses to a major or minor.

**Course Offerings**
Unless otherwise specified, each course carries 1 unit of credit and is offered at least once each academic year. Please see “Frequency of Course Offerings” on page 10.

**Other courses offered by Theatre Arts Department faculty**

**Seminars in Scholarly Inquiry.** See Seminars in Scholarly Inquiry in the Core Curriculum section of this Bulletin for course descriptions (page 10).

SSI1/SSI2 101 Dionysus and the Art of the Theatre
SSI1 152 Gender and Performance
SSI2 190 Sources and Adaptations

200  The Theatrical Experience  In this course, students explore the aesthetics and traditions of the theatrical art form through studies in acting, directing, design, playwriting, dramaturgy, spectatorship, and
theatre history. Students encounter the diversity and complexity of the theatre making process by way of readings, lectures, discussions, playgoing, and workshop performances of scenes. Using critical and analytical tools studied over the course of the semester, students learn ways of exploring the theatrical experience both orally and in writing. *Satisfies the Artistic Approaches core requirement.*

### 215 Fundamentals of Acting

In this introductory course, students collaborate in the rehearsal and performance of scenes from contemporary plays. They engage mind, body, and voice in the fundamentals of acting: behaving truthfully in imaginary circumstances. In doing so, students develop greater confidence and awareness of the body and the voice as flexible instruments of communication. They acquire skills in relaxation, concentration, creativity, script analysis, and action execution, along with an introductory understanding of the Stanislavsky system of acting. Participation includes rigorous physical activity, vocal exercises, theatre games, improvisation, and scene work. All levels of experience welcome. *Students must also register for the 215 lab.*

### 217 Technical Theatre

This course introduces students to materials and methods used in the execution of designs for the stage. Projects provide hands-on experience with shop equipment for construction of two- and three-dimensional scenery, theatrical drafting, color mixing, scenic painting, and in the business of planning, scheduling, and organizing crews and the scenery shop for production. Reading assignments introduce major reference books in technical theatre and students begin the study of the history of scenery and technical practice. *Prerequisite: permission of instructor.*

### 250 World Theatre I: African Diaspora

Through the lens of tradition and innovation, students explore contemporary theatre of the African Diaspora with an emphasis on the plays of Suzan-Lori Parks. Students in this and all contemporary world theatre courses engage with and collaborate in a set of informed, imaginative explorations of plays with a particular emphasis on dramatic action. They work toward the completion of this goal by (1) investigating, in light of performance, a play's dramaturgy both from within (formally) and from without (historically, culturally); (2) by cutting, arranging, and producing scenes from plays they are studying; (3) by discovering formal and thematic threads that run through the plays, readings, and topics of this class; (4) by considering ways to increase the breadth and depth of theatre productions at Puget Sound through course work grounded in the Knowledge, Identity, and Power rubric. Although contemporary world theatre classes have similar learning outcomes and a common methodology, the plays and fields of study (e.g., African Diaspora, Asian Theatres, Voices of the Americas) differ from one class to another. *Taught in rotation with THTR 250, 252, and 256.*

### 252 World Theatre II: Asian Theatres

Through the lens of tradition and innovation, students explore the dramaturgy of Asian theatre from classic forms (e.g., Noh drama) to contemporary plays by Asian American/Canadian authors. Students in this and all contemporary world theatre courses engage with and collaborate in a set of informed, imaginative explorations of plays with a particular emphasis on dramatic action. They work toward the completion of this goal by (1) investigating, in light of performance, a play's dramaturgy both from within (formally) and from without (historically, culturally); (2) by cutting, arranging, and producing scenes from plays they are studying; (3) by discovering formal and thematic threads that run through the plays, readings, and topics of this class; (4) by considering ways to increase the breadth and depth of theatre productions at Puget Sound through course work grounded in the Knowledge, Identity, and Power rubric. Although contemporary world theatre classes have similar learning outcomes and a common methodology, the plays and fields of study (e.g., African Diaspora, Asian Theatres, Voices of the Americas) differ from one class to another. *Taught in rotation with THTR 250, 252, and 256.*

### 254 World Theatre III: Voices of the Americas

Through the lens of tradition and innovation, students explore the dramaturgy of contemporary theatre from the Americas, north and south, including plays that speak to Latina/o experience. Students in this and all contemporary world theatre courses engage with and collaborate in a set of informed, imaginative explorations of plays with a particular emphasis on dramatic action. They work toward the completion of this goal by (1) investigating, in light of performance, a play's dramaturgy both from within (formally) and from without (historically, culturally); (2) by cutting, arranging, and producing scenes from plays they are studying; (3) by discovering formal and thematic threads that run through the plays, readings, and topics of this class; (4) by considering ways to increase the breadth and depth of theatre productions at Puget Sound through course work grounded in the Knowledge, Identity, and Power rubric. Although contemporary world theatre classes have similar learning outcomes and a common methodology, the plays and fields of study (e.g., African Diaspora, Asian Theatres, Voices of the Americas) differ from one class to another. *Taught in rotation with THTR 250, 252, and 256.*

### 256 Contemporary World Theatre

Through the lens of tradition and innovation, students explore the dramaturgy of contemporary world theatre from the 1960s to the present with an emphasis on plays from North America and the United Kingdom. Students in this and all contemporary world theatre courses engage with and collaborate in a set of informed, imaginative explorations of plays with a particular emphasis on dramatic action. They work toward the completion of this goal by (1) investigating, in light of performance, a play's dramaturgy both from within (formally) and from without (historically, culturally); (2) by cutting, arranging, and producing scenes from plays they are studying; (3) by discovering formal and thematic threads that run through the plays, readings, and topics of this class; (4) by considering ways to increase the breadth and depth of theatre productions at Puget Sound through course work grounded in the Knowledge, Identity, and Power rubric. Although contemporary world theatre classes have similar learning outcomes and a common methodology, the plays and fields of study (e.g., African Diaspora, Asian Theatres, Voices of the Americas) differ from one class to another. *Taught in rotation with THTR 250, 252, and 254.*

### 291 Theatre Production

0.25 activity unit  
Student participation in acting, scenery construction, lighting, costuming, and properties for a departmental production. *May be repeated for credit.*

### 300 The Actor and the Craft of Characterization

This course begins with a deeper exploration of the theories within the Stanislavsky system of acting, focusing on psychological, emotional, physical, and intellectual processes that aid the actor when entering the world of the realistic play. The course then moves to physical approaches to character based in clown traditions as a bridge toward absurdism. Over the semester students explore both physical and emotional approaches to developing characters and apply them to a range of dramatic styles in both lab and class work. Participation includes extensive scene work and rigorous physical and vocal activity. *Prerequisite: THTR 215. Students must also register for the 300 lab. Offered frequently.*

### 310 The Actor and the Classic Repertoire

In this advanced acting course, students must engage in rigorous text analysis, rehearsal, and performance of a variety of classical texts including the Greeks, French

---

200  2018–19 GRADUATE BULLETIN  UNIVERSITY OF PUGET SOUND
Theatre Arts

comedies, and Shakespeare. In the weekly lab, students train in Lecoq-based movement exercises, commedia mask work, voice, and stage combat. In doing so, students practice integration of language with the body and breath with thought. By acquiring skills in scansion, rhetoric, period movement, and vocal release, students develop tools for making engaging and honest acting choices with rich texts. Participation includes extensive scene work and rigorous physical and vocal activity. Prerequisite: THTR 215. Students must also register for the THTR 310 lab. Offered frequently.

313 Directing This course serves as an introduction to the process of theatrical direction through in-depth course work and an intensive practicum. Students build a foundation in visual composition, script analysis, scene work, and collaboration, using the classroom as a laboratory to practice communicating vision and working with actors. Students then apply their directorial approaches in rehearsal while developing administrative skills as they produce a culminating festival of student-directed scenes from full-length plays for the public. Prerequisites: Theatre Major; THTR 215, 300 or 310; and permission of instructor. Students must also register for the THTR 313 lab.

317 Scene Design A study of the history of architecture and interior design is combined with an exploration of techniques and styles of rendering and model construction. Contemporary theory and criticism within the field of scenography, methods of research, and play analysis are examined as tools for developing valid and original designs for the theatre. Prerequisite: THTR 217.

323 Projects in Dramaturgy In this seminar, students gain a better understanding of dramaturgy and the role it plays in the work of actors, designers, directors, dramaturgs, and playwrights. In addition to reading, writing, and talking about dramaturgy, students develop skills as theatre makers by participating in practical projects sponsored by the department that explore the relationship amongst dramaturgy, collaboration, community, and one or more of the following areas: devising, new play development, re-imaging the classics, and theatre education. This course may be repeated for credit. Prerequisites: THTR 200 or 215 and permission of instructor.

325 Playwriting The course introduces students to the art and craft of playwriting by combining seminar and workshop formats in which members write, present, and revise monologues, dialogues, and sketches. Students work toward a final portfolio of this material as well as the completion of a short one-act play. The course also involves the analysis and discussion of published, produced plays; of conflict, suspense, characterization, plot, and other elements of drama; and of writing with actors, directors, producers, dramaturgs, and theatre audiences in mind. Crosslisted as ENGL 325. Prerequisite: instructor permission. Offered occasionally.

371 Theatre History I: From the Origins of Theatre to the 17th Century Incorporating a discussion of theories on the origins of theatre, this course explores the development of Western and non-Western dramaturgical techniques from the earliest records of performance through the Spanish Golden Age in Europe. Students examine the intersection of cultural history, theatrical practice, and dramatic literature by focusing on cultural context, the theatrical space, and performance conventions. Coursework includes scene reconstruction performances, research projects, oral presentations, and exams. Offered fall semesters. Prerequisite: THTR 200, 250, 252, 254, or 256.

373 Theatre History II: 18th Century to the Present Through dramaturgical analysis, studies of artist biography, and creative projects, students explore how, why, when, and where people have made theatre from the mid-seventeenth century to the contemporary moment. Encompassing Western and non-Western traditions, the class emphasizes the discontinuities produced by European modernism. Coursework includes scene reconstruction performances, research projects, oral presentations, exams, and an exploration of the student’s personal vision for theatre in the contemporary world. Offered spring semesters. Prerequisite: THTR 250, 252, 254 or 256.

485 Topics in Theatre Arts The place of this course in the curriculum is to allow the Theatre faculty to teach intensively in their particular fields of research and expertise and to allow students an in-depth study of one period or movement important in the history of drama. Students become familiar with research tools and methods of a particular period or movement and with the issues surrounding them. May be repeated for credit. Offered occasionally.

490 Senior Theatre Festival Majors in Theatre Arts undertake a supervised thesis project in their main area of interest. This could include dramaturgy, design, acting, or directing. The exact nature of the project varies but involves the extensive reading of plays, research, and the public presentation of the student’s work. For students in their final year of study. Prerequisite: Theatre Arts majors only.

495/496 Independent Study Students who enroll in this course work with a faculty member in the Theatre Arts department to develop an individualized learning plan that connects the actual internship site experience to study in the major. The learning plan will include required reading, writing assignments, as well as a culminating project or paper. Prerequisite: approval of tutorial professor and the Internship Coordinator.
Academic Advising leads a campus-wide early alert network for students in academic difficulty. Referrals to the Center for Writing, Learning, and Teaching; Counseling, Health, and Wellness Services; and other services across campus ensure students have access to resources, inside and outside of the classroom.

Graduate School Preparation
Approximately one in five Puget Sound students go on to graduate or professional school immediately after graduation, and nearly half enroll in graduate programs within five years of graduation. Recognizing this, both faculty advisors and the Office of Academic Advising offer support and counsel for students planning further education.

Health Professions Advising
Chair: Joyce Tamashiro
Associate Advisor: Jennifer Allen-Ayres

The Health Professions Advising Office provides special career counseling, practice interviews, letters of evaluation, and assistance in the application process for students who aspire to careers in the fields of medicine, veterinary medicine, dentistry, physician assistant, optometry, nursing, pharmacy, and related fields. Students interested in occupational therapy or physical therapy should contact the School of Occupational Therapy or School of Physical Therapy at Puget Sound. Students interested in careers in the health professions may major in any subject, but should meet minimum requirements in the sciences, mathematics, and other courses specified by the professional schools. In addition, national standardized admission examinations are required of applicants to most professional programs. Students intending to apply to medical school should complete the following courses before taking the Medical College Admission Test (MCAT): BIOL 111 and one additional biology course (BIOL 212 Cell Biology is recommended); introductory chemistry (two courses); organic chemistry (CHEM 250/251); physics (PHYS 111/112 or 121/122); and biochemistry. Topics in statistics, psychology (PSYC 101), and sociology (SOAN 101) are also covered on the MCAT, and many students complete this coursework before taking the MCAT. Additionally, individual medical schools may require or recommend these and other courses, such as calculus and genetics, for admission. English courses are increasingly recommended by medical schools, and our seminars in Scholarly Inquiry generally fulfill such requirements.

Students are encouraged to consult the Health Professions Advising website at pugetsound.edu/hpa and make early contact with the Health Professions Advising staff. The office, along with a resource center that includes entrance requirements, and other information, is located in Thompson Hall, Room 203. For appointments students may call 253.879.2708 or send an e-mail message to healthprofessions@pugetsound.edu.

Teaching and Counseling Professions Advising
Teaching Advisor: Terence Beck
Counselor Advisor: Grace Kirchner

It is never too early to begin planning for your career in teaching or counseling. School of Education faculty members are available to provide targeted advising for undergraduate students interested in pursuing the Education Studies minor, graduate work, or a career in education, school counseling, or mental health counseling. Students can also access information about planning to pursue an M.A.T. or M.Ed. degree by visiting pugetsound.edu/education. Contact information: 253.879.3382, edadvising@pugetsound.edu.
Pre-Law Advising
Advisor: Brad Reich

As the Law School Admission Council and American Bar Association state in their Official Guide, “the ABA does not recommend any undergraduate majors or group of courses” for pre-law students. Instead, “taking a broad range of difficult courses from demanding instructors is excellent preparation for legal education.” The LSAC and ABA recommend a curriculum that teaches “analytical and problem-solving skills, critical reading abilities, writing skills, oral communication and listening abilities, [and] general research skills.” Accordingly, Puget Sound offers no undergraduate pre-law major, encouraging students interested in the law to follow the academic program that most interests them and to seize every opportunity to take courses that will promote their critical thinking, reading, writing, and research skills.

In their early years at Puget Sound, students interested in the law should concentrate on taking challenging courses in the disciplines that intrigue them. When they reach their junior year, they should begin earnestly, and specifically, researching both law schools and legal careers. Students should also begin to plan for the Law School Admission Test.

Resource materials for pre-law students are available through the pre-law advisor Brad Reich (School of Business and Leadership, breich@pugetsound.edu).

Career and Employment Services

Career and Employment Services (CES) helps students acquire the skills, experiences, and contacts they will need to build a meaningful career after college. CES is a comprehensive career engagement center that integrates job, internship, and career-planning resources for students seeking part-time, full-time, on-campus, summer or work-study opportunities.

CES guides students as they define their interests and explore possibilities, helping them channel the passions that emerge in the classroom into potential career paths. CES helps students think about their time at Puget Sound, translating skills into marketable experience.

Connect with CES tools, resources, and people, including:
• Career advising and assessment to help create your personalized plans for career development.
• Events designed to help you explore career paths, prepare for professional situations, connect with employers, and more.
• Appointments and workshops to perfect your resume, practice interview skills, and polish your LinkedIn profile.

Visit pugetsound.edu/ces for additional information and access to online career resources.

Internship and Cooperative Education Program

Coordinator: Rebecca Pettit

Career and Employment Services (CES) provides a full range of resources and services to help students connect with experiential opportunities. In partnership with other liberal arts colleges throughout the nation, CES has developed online access to thousands of opportunities in the Puget Sound region and across the country.

It may be possible to receive credit for some experiences through the internship program or the cooperative education program, provided those arrangements are made prior to enrollment. Students interested in pursuing an internship may visit pugetsound.edu/ces or contact CES in Howarth 101 for more information.

For specific details about course offerings and requirements, see the Internship section of this bulletin.

Fellowships Office

Director: Kelli Delaney
Faculty Advisor: Jeffrey Grinstead

Students have many opportunities to earn external scholarships, fellowships, or other special support for postgraduate travel, language immersion, research, and study. Some external awards support upper-division undergraduate study. The Associate Director of Fellowships works in collaboration with a Fellowsships faculty committee as well as faculty mentors to assist students in applying for external fellowships and scholarships awards, including the Rhodes, Marshall, Gates Cambridge, Mitchell, Fulbright, Luce, Truman, Ford Foundation, James Madison, Howard Hughes, Watson, Goldwater, Boren, Udall. Success in achieving external scholarships and fellowships requires early and strategic planning.

Students are encouraged to begin the exploratory process during spring semester of their first year, and during their second year begin working with the Fellowships Office and faculty mentors to initiate the application process. For appointments students may come to Howarth 114J or call 253.879.3250. Students may also access information at pugetsound.edu/fellowships or send an e-mail message to fellowships@pugetsound.edu.

Center for Writing, Learning, and Teaching

Acting Director: Rachael Shelden

The Center for Writing, Learning, and Teaching promotes collaboration, curiosity, and critical thinking among peers. We support the campus community in the pursuit of their academic and pedagogic goals, fostering a thoughtful learning community in which people with different experiences, values, and perspectives can grow together.

A wide range of services and programs are designed to promote effective and independent learning. Students may take classes to improve their reading speed and comprehension. They may meet with a professional staff member for assistance with developing strategic learning competencies, or with a peer for tutoring in specialized content areas. They may also take advantage of workshops on various topics or join a peer-led study group.

The center also helps students from all academic disciplines develop their ability to use writing as a tool for thinking and learning. With the assistance of faculty or specially trained peer writing advisors, students learn how to overcome writer’s block, approach an assignment, and assess the audience and purpose of a paper. Working on a one-to-one basis with a writing advisor, students also receive help with organizing their ideas, writing a strong thesis statement, and reviewing their written work to make it correct, clear, direct, and persuasive.

Prospective graduate students use the center’s resources to receive thoughtful advice on scholarship and graduate and professional school applications.

In addition, the center administers foreign language proficiency assessments, one way in which students may fulfill the university’s foreign language graduation requirement.

The center advises faculty members on ways of using writing in their courses and provides faculty development opportunities. For appointments, students may come to Howarth 109 or call 253.879.3395. More information on services and schedules is available online at pugetsound.edu/cwlt.

Student Accessibility and Accommodation

Director: Peggy Perno

The University of Puget Sound is committed to providing support, program access, and equal educational opportunity to all qualified students with medical, psychological, physical and learning disabilities.
Student Accessibility and Accommodation is the designated office that reviews disability documentation and requests for reasonable accommodation. For information about disability law, registering with Student Accessibility and Accommodation and requesting accommodations, please visit pugetsound.edu/studentaccessibility or call 253.879.3399 to schedule an appointment.

**International Programs**
Director: Roy Robinson

The Office of International Programs (OIP) seeks to cultivate global citizenship through international, academic experiences. OIP provides students with meaningful opportunities to study, engage in service learning, participate in internships and/or conduct research in a wide variety of international settings. The office also supports international students, faculty and staff, including advising on issues of immigration and cultural adjustment.

**Technology Services**

Technology Services (TS) provides an extensive range of tools and resources to support student, faculty, and staff use of current and evolving technologies. The campus features more than 100 electronic teaching spaces and more than 300 computers in general access and residence hall labs. There are also discipline-specific computer labs and a state-of-the-art digital media lab and a wide variety of multimedia equipment available for checkout.

The university runs a high speed connection to the Internet with comprehensive wireless connectivity in all campus buildings, including every residence hall and university-owned house. Each student is assigned a Puget Sound login which provides access to the wireless network, a 1 GB email account, university-owned computers, myPugetSound (the university portal), Moodle, SoundNet (the campus intranet), vDesk (a virtual desktop for anytime, anywhere computing), and a 4 GB network file share.

See pugetsound.edu/sttech for a comprehensive guide to technology resources for Puget Sound students. For computer recommendations and links to discounted pricing on hardware and software, visit pugetsound.edu/ts/purchasing. Free downloads of anti-virus software are available at pugetsound.edu/techhelp.

Learn more about Technology Services at pugetsound.edu/ts. For assistance, contact the Technology Service Desk at 253.879.8585, servicedesk@pugetsound.edu, or by visiting the Tech Center in Collins Memorial Library.

**Collins Memorial Library**

Director: Jane Carlin

Collins Memorial Library is a central part of academic life at Puget Sound and plays an integral role in teaching and learning. Its mission is to provide excellent collections, high-quality service, engaging learning environments, and innovative instruction.

The library provides access to a rich variety of resources. The physical collection consists of more than 450,000 volumes of books, periodicals, music scores, media, archives, and special collections. In addition, the library provides access to thousands of periodicals and electronic books accessible from the desktop via electronic subscriptions. Students may also access online indices and full-text databases which greatly expand access to information. Puget Sound is a member of the Orbis-Cascade Alliance, a consortium of academic institutions in the Northwest. If Puget Sound does not have access to resources onsite, users may request materials from the consortium which are delivered in two to four business days.

Library services help students develop the research skills they need to succeed in their academic career and in life. Reference assistance is offered in person and through a virtual 24/7 network of librarians. Subject librarians are available for one-on-one research consultations. Librarians also work closely with faculty, offering research skills sessions for students, consultation on the design of course assignments, and handouts or Web pages tailored specifically to the resources and research techniques most appropriate to the course.

Collins Memorial Library offers a variety of study spaces, ranging from individual tables to rooms for group study. The library is fully networked and provides data ports and wireless access for individual laptops throughout the building. The library’s Learning Commons, available to users with university network accounts, has 36 computer workstations that provide access to library resources as well as to productivity and course-related software. The Technology Center, located on the lower level of the library, also provides assistance.

The building is open 116.5 hours a week so that students have access to study areas and materials as much as possible. Twenty-four-hour access is available during reading period and final exam weeks.

**ACADEMIC POLICIES**

The university reserves the right to change the fees, rules, and calendar regulating admission and registration; to change regulations concerning instruction in and graduation from the university and its various divisions; to withdraw courses; and to change any other regulation affecting the student body. Changes go into effect whenever the proper authorities determine and apply not only to prospective students, but also to those who, at that time, are matriculated at the university. Information in this Bulletin is not to be regarded as creating a binding contract between the student and the school.

The university also reserves the authority to deny admission to any applicant; to dismiss when formal action is taken by the Academic Standards Committee or a Hearing Board; to discontinue the enrollment of any student when personal actions are detrimental to the university community; or to discontinue the enrollment of a student in violation of the Student Integrity Code.

The **Student Handbook** (available on the university’s website) is the comprehensive repository of academic and student conduct policies. See the handbook for policies on academic integrity, grading, academic standing, transfer, study abroad, Student Integrity Code, Sexual Harassment Policy, Alcohol and Drug Policy, and Residence Policy.

For information about academic policies, including classification of students, academic load, registration, independent study, system of grading, academic standing, transfer evaluation, student rights and responsibilities, Notification of Rights under the Family Educational Rights and Privacy Act, please view the Academic Handbook, available online and through the Registrar.

**ADMISSION TO THE UNIVERSITY**

**Vice President for Enrollment:** Laura Martin-Fedich
Associate **Vice President for Admission:** Shannon Carr
**Senior Associate Director of Admission:** Robin Aijian ’04
**Associate Directors of Admission:** Vicki Pastore, Mike Rottersman ’99, Edward Truong, Martha Wilson
**Assistant Directors of Admission:** Britney Jackson, Torri Lutton ’89, P’17
Admission to the University

Assistant Director of Admission/Music Recruitment Coordinator: Megan Grady
Admission Counselors: Miles Burdick ’15, Ryan Del Rosario ’15

Each applicant to the university should present those qualities of character and the seriousness of purpose which would indicate that he or she will benefit from and contribute to the campus community. Each applicant is given individual consideration and a careful evaluation is made of the student’s curricular and cocurricular record.

Admission to the university extends the privilege of registering in courses of instruction only for the term stated in the letter of acceptance. The university necessarily reserves the option to refuse extension of this privilege and to deny any application.

Recommended high school course preparation for admission. The Admission Committee recommends that students complete the following pattern of coursework in high school as preparation for University of Puget Sound. The Committee recognizes that because the university is committed to maintaining an international student body, course patterns will vary considerably. Therefore, this pattern of coursework is recommended, but not required: English - four years; Mathematics - three/four years; History/Social Studies - three years; Foreign Language - two/three years of a single language; Natural/Physical Laboratory Science - three/four years; and Fine/Visual/Performing Arts - one year.

Campus visits. Prospective students are encouraged to visit campus while classes are in session. Throughout the year, admission counselors are available to answer questions and conduct interviews with high school seniors and transfer students. Tours led by current Puget Sound students and information sessions led by admissions counselors are available Monday through Friday.

Prospective students may attend classes in their area of interest during regular class sessions. Arrangements can be made for visiting high school seniors to stay in a residence hall for one night, Monday through Thursday. Visiting students are given passes to campus events and meal service.

The Office of Admission is closed during the Thanksgiving holiday weekend and Winter Break. During Fall Break, Winter Break, Spring Recess, and Summer Break only limited services are available because classes are not in session during these times. Please consult the academic calendar in this Bulletin for specific dates.

To arrange a campus visit, please see pugetsound.edu/visit. For further information, please contact the Office of Admission at 253.879.3211, or admission@pugetsound.edu. Before scheduling a campus visit, prospective students will benefit from browsing the university’s website at pugetsound.edu to learn about campus activities and events that may be of interest.

First-Year Admission

Except for Early Admission or Simultaneous Enrollment, prospective first-years may apply for admission any time after the beginning of the senior year in high school. Applications are accepted for fall and spring term admission.

First-year Admission Procedures. To apply for admission, a prospective first-year must submit the following credentials to the Office of Admission. Please note that all application materials become the property of the university unless otherwise indicated in writing when the application is submitted. Photocopies, scanned originals, or facsimile (FAX) copies of any official documents may be sent, but an application is not considered complete until original documents are received.

1. Common Application. The university is a member and exclusive user of the Common Application. The Common Application, including the Member Questions section, must be completed and submitted online at www.commonapp.org.
2. Transcripts. An official high school transcript that includes an applicant’s 9th through 11th grade academic record should be forwarded to the Office of Admission.
3. Tests. Standardized test scores (ACT and SAT) are optional for most applicants, but required for students who have been homeschooled, who attend secondary schools that do not assign grades, and/or who attend schools whose instruction is in a language other than English, or do not primarily instruct in English. Students choosing not to submit test scores as part of their application will be required to answer two short-answer (100 words or less) essay questions as a supplement to their application.
4. School Report. (Included in the Common Application) Applicants should submit this form to their secondary school counselors. The evaluators should forward the completed form along with a personal recommendation to the Office of Admission.
5. Teacher Evaluation. (Included in the Common Application) Applicants should submit this form to a current or recent teacher. The evaluator should forward the completed form along with a personal recommendation to the Office of Admission.
6. Early Decision Agreement. (Included in the Common Application) Applicants intending to apply Early Decision must complete and submit the Early Decision Agreement included in the Common Application for First-Year Admission.
7. Application Fee. A $60 (U.S. funds) non-refundable processing fee must be submitted with the Application for First-Year Admission. Official fee waivers are acceptable.

Regular Decision Plan. Applications are due January 15. The Admission Committee will continue to consider applications received after this date on a space-available basis. For Regular Decision applicants, notification of admission decisions is on or before April 1. The university subscribes to the National Candidates’ Reply Date of May 1 and does not require advance payments prior to this date. The Early Action plan applies to fall term admission only. Advance Tuition Payments are not refundable.

Early Action Plan. Students who wish to apply to University of Puget Sound early in their senior year may want to consider the Early Action plan. Applications are due November 15 with decision notification no later than January 15. The university subscribes to the National Candidates’ Reply Date of May 1 and does not require advance payments prior to this date. Advance Tuition Payments are not refundable.

Early Decision Plan. Students who have selected University of Puget Sound as their first choice and wish to commit to enrolling early in their senior year may want to consider the Early Decision plan. The application for admission is due on November 15. The student receives a notification of acceptance which is mailed by December 15 (along with a tentative notification of financial aid, if admitted), and the student pays an Advance Tuition Payment by January 15. Advance Tuition Payments are not refundable.

Early Decision is a binding agreement. Students may apply to other colleges simultaneously, but they may only apply to one college or university through the Early Decision plan. Students accepted under this plan are expected to withdraw their applications from other colleges and submit an Advance Tuition Payment to University of Puget Sound. Any Early Decision candidate not admitted will receive one of two determinations: a deferral of decision, which secures reconsideration for the candidate among the Regular Decision candidates, or a denial of
admission, which withdraws the application from further consideration. If one of these determinations is made, the applicant is free to apply to other institutions.

For complete information on financial aid and scholarship opportunities, please refer to the “Student Financial Services” section of this Bulletin.

Early Admission. Advanced high school students who have not completed graduation requirements—and do not intend to do so—and are seeking early entrance to college may apply for admission to University of Puget Sound. Admission is contingent upon an outstanding high school record. Students interested in Early Admission should submit all parts of the Common Application, standardized test scores, and recommendations from the secondary school head or principal, the student’s college counselor or advisor, and the student’s parents or guardians.

Simultaneous Enrollment While in Secondary School. Students who have advanced beyond the levels of instruction available in their secondary school may enroll simultaneously in courses at University of Puget Sound and at their secondary school. Admission is contingent upon an outstanding high school record. Students interested in simultaneous enrollment should contact the Office of Admission for more information.

Deferred First-Year Admission. Admitted first-year students requesting a deferral must confirm their enrollment, indicating their request to defer and an explanation of their plans for the deferral period, along with the Advanced Tuition Payment of $500, on or before the posted response deadline (i.e., May 1). First-year students who are granted a deferral should not undertake academic work for college credit (or matriculate) at another institution during this period, unless approved by the Office of Admission. Once a student’s deferral has been approved, an additional $500 Advance Tuition Payment will be due to hold the student’s place in the class.

Students who intend to matriculate at another institution but desire to eventually enroll at Puget Sound must reapply for admission at a future date as a transfer student.

Credit Transfer Policies

Advanced Placement. The university participates in the Advanced Placement Program of the College Board. The university normally will grant lower division credit for scores of 4 or 5 on an Advanced Placement (AP) Examination, and in selected instances for scores of 3. Students may be allowed up to a total of sixteen (16) units of advanced standing credit by examination, including AP and IB credit. AP credit may be applied toward university core requirements and students may earn exemptions from first-year Puget Sound courses. Details regarding specific examinations, grade requirements, credit awards, and course exemptions are available from the Office of the Registrar.

International Baccalaureate. University of Puget Sound will grant one (1) unit of lower-division credit for a student’s results on each International Baccalaureate (IB) Higher Level Examination passed with a score of 5, 6, or 7. Additionally, one (1) unit of lower division elective credit will be allowed for Theory of Knowledge if a student has earned the IB Diploma. Students may be allowed up to a total of sixteen (16) units of advanced standing credit by examination, including AP and IB credit. Details regarding specific course exemptions are available from the Office of the Registrar.

College Classes While in High School (including Running Start). College credits earned prior to high school graduation may transfer if such credits appear on the transcript of a regionally-accredited college or university. This includes coursework completed through concurrent enrollment programs, such as Washington’s Running Start and College in the High School programs. All other transfer restrictions apply, including credit limits, general transferability, university core requirements, and major and minor credit policies.

Transfer Admission

Students who have attended other regionally accredited colleges or universities may apply for Transfer Admission. Each student is admitted on a selective basis. The following general criteria are applied:

1. Honorable dismissal from the institution(s) previously attended.
2. Good academic standing at the institution last attended, with a minimum cumulative grade point average of 2.0 to be considered.

Transfer of Credit. The university will evaluate for transfer all courses which are appropriate to a Puget Sound baccalaureate degree program. Transferability will be determined through a course evaluation in accordance with the policies established by the faculty and administration. To be transferable, a course must be offered by a regionally accredited university or college recognized by University of Puget Sound. Personal development, remedial, technical, or vocational courses are not transferable.

General Policies for Transfer Students

1. One University of Puget Sound unit is equivalent to four (4) semester credits or six (6) quarter credits.
2. Transfer students are limited to 16 units (96 quarter credits or 64 semester credits) of transfer credit and must earn at least 16 more units at Puget Sound to complete the 32 units required for a bachelor’s degree.
3. The maximum activity credit allowed within a Puget Sound degree program is 2.0 units. Activity credit includes athletics, music performance, theatre performance, forensics, and any other student participation program.
4. Advanced Placement (AP) or International Baccalaureate (IB) examination scores should be submitted with the application materials. Puget Sound does not provide credit for CLEP examination scores or for military training.
5. No more than a combined total of four (4) units of self-paced study (e.g., online and electronic) courses are accepted in transfer. Such courses do not fulfill university core requirements. Additionally, students requesting transfer credit for such courses must provide a course syllabus or outline.
6. No more than four (4) academic units taken with a pass/fail or credit/no credit grading option may apply toward the 32 units required for graduation. In addition, all university core requirements must be taken for a letter grade.
7. All coursework will be evaluated on an individual basis to determine fulfillment of university core requirements. Sophomore transfer students may complete four (4) core requirements and the foreign language requirement with transfer credit while junior transfer students may complete five (5) core requirements and the language requirement with transfer credit. All students must complete the Connections core requirement at Puget Sound. Courses that transfer in fulfillment of core requirements may not be completed through independent study nor be graded on a pass/fail basis.
8. Sixteen (16) units must be completed in residence in order to obtain a Puget Sound degree. At least four (4) units for a major and three (3) units for a minor must be completed in residence.
9. Following admission to and enrollment in the university, if it is learned that a student misrepresented his or her academic record
Admission to the University

when applying for admission, he or she may be subject to immediate expulsion.

Special Regulations

1. Within a baccalaureate degree program, the university makes a clear distinction between the first 16 units (first and sophomore years) and the last 16 units (junior and senior years) of coursework. The following educational programs are considered part of the first and sophomore years, and are acceptable in transfer to a combined total of 16 units:
   - Accredited college or university
   - Advanced Placement (AP)
   - International Baccalaureate (IB)
   These educational programs are also subject to the individual transfer credit limits established by the university before being accepted into a degree program.

2. Once a student has 16 or more units, that student cannot count credit earned through one of the above first and sophomore level educational programs toward the Puget Sound degree.

3. Credit will not be granted for dual enrollment or simultaneous matriculation with two or more institutions.

4. Specific courses not commonly offered in baccalaureate degree programs will be examined. If equivalencies can be established by the appropriate departments, schools, or administrative officers, the courses will be acceptable for transfer.

5. Decisions are petitionable to the Academic Standards Committee for just cause.

Transfer Admission Procedures. Credentials required for admission to the university with advanced standing include the following as described below. Please note that all application materials become the property of the university unless otherwise indicated in writing when the application is submitted. Photocopies, scanned originals, or facsimile (FAX) copies of any official transcripts or test scores may be sent, but an application is not considered complete until original documents are received.

1. The Common Application. The university is a member and exclusive user of the Common Application. The Common Application, including the Member Questions section, must be completed and submitted online at commonapp.org.

2. Transcripts. Official transcripts of the student record from each college and university previously attended and, upon request, a high school transcript must be sent to the Office of Admission. Any student who has completed less than one full year of college work should submit a high school transcript and examination results from the SAT, ACT or test-optional essays. Upon receipt of application, the Office of Admission will contact applicants for test scores or test-optional essays. Also, any student who enrolled in college courses while in high school must submit a high school transcript. Such transcripts must be sent directly to the university by institutions previously attended and not by way of the student. Official evaluation of the transcripts will be provided to the student upon acceptance for admission.

3. Application Fee. A $60 (U.S. Funds) nonrefundable processing fee must be submitted with the Common Application. Official fee waivers are acceptable.

4. College Report. (Included in the Common Application.) This form is available online at commonapp.org. Applicants should submit this form to the Registrar’s office at their current institution. The evaluators should forward the completed form to the Office of Admission.

5. Academic Evaluation. (Included in the Common Application.) One Academic Evaluation is required. This form is available online at commonapp.org. Applicants should submit this form to a current or recent college instructor. The evaluator should submit the completed form online or forward the completed form along with a personal recommendation to the Office of Admission.

6. Official scores of any nontraditional work [including Advanced Placement (AP) or International Baccalaureate (IB) examination scores] may be submitted with the application materials. No credit is given for military experience or CLEP examination scores.

Second Baccalaureate. Students who have already attained a baccalaureate degree from an accredited institution (including Puget Sound) may apply to enroll at Puget Sound for a Second Baccalaureate degree. Students wishing to earn a second baccalaureate degree must complete a minimum of 8 additional units in residence. These units must be academic and taken for a grade. Students must also complete departmental requirements current as of the date of their post-baccalaureate enrollment. Each additional baccalaureate degree requires 8 more discrete academic, graded units. To apply for a second baccalaureate degree, students must submit:

1. The Common Application. The university is a member and exclusive user of the Common Application. The Common Application can be completed and submitted online at commonapp.org. Students should indicate the intent to enroll as a Second Baccalaureate Student in the Member Questions section.

2. The Common Application Member Questions section.

3. Transcripts. Official transcripts from all previous colleges attended (if the student has previously attended Puget Sound, only transcripts for coursework taken since their last term at Puget Sound must be submitted).

4. Application Fee. A $60 (U.S. Funds) nonrefundable processing fee must be submitted with the Common Application. Official fee waivers are acceptable.

5. Academic Evaluation. (Included in the Common Application.) One Academic Evaluation is required. This form is available online at commonapp.org. Applicants should submit this form to a current or recent college instructor. The evaluator should submit the completed form online or forward the completed form, along with a personal recommendation, to the Office of Admission.

6. Official scores of any nontraditional work [including Advanced Placement (AP) or International Baccalaureate (IB) examination scores] may be submitted with the application materials. No credit is given for military experience or CLEP examination scores.

Deferred Transfer Admission. Students offered undergraduate admission to Puget Sound may request a deferral of enrollment, which must be approved by the Office of Admission. Generally, deferrals may be granted for one semester or one year, but not longer. If the deferral request is approved, any academic merit scholarship will also be deferred to the future entry term.

Admitted students requesting a deferral must confirm their enrollment, indicating their request to defer and an explanation of their plans for the deferral period, along with the Advanced Tuition Payment of $500, on or before the posted response deadline. Transfer students who are granted a deferral may continue to take college courses at their current institution but should not enroll in courses (or matriculate) at another institution during the deferral period, unless approved by the Office of Admission. Once a student’s deferral has been approved, an additional $500 Advanced Tuition Payment will be due to hold the student’s place in the class.
Returning Students. Undergraduate students who formerly have attended the university (as regular matriculants) but have not been in attendance for one or more terms (excluding summer session) or whose leave of absence has expired should contact the Office of the Registrar.

Non-Matriculant Enrollment. Students who do not intend to pursue a degree, including those wanting to audit courses, may register for classes as non-matriculant students. Students interested in enrolling as non-matriculants must complete a non-matriculant registration agreement form, which may be obtained from the Office of the Registrar.
1. Non-matriculants must wait until the first day of the term to register for a class.
2. Registration of non-matriculant students is on a space-available basis.
3. At the time of registration, non-matriculants must pay for registered course(s) in full, or set up a payment plan with Student Financial Services.
4. No more than three (3) units taken as a non-matriculant may be applied toward a University of Puget Sound undergraduate degree.

Reservations, Payments, and Health Forms
First-year. Students admitted to Puget Sound will receive a Letter of Acceptance. An Advance Tuition Payment of $500 is required for each new student and reserves a place in the student body. Students must confirm their enrollment and submit the non-refundable Advance Tuition Payment by May 1 for regular decision or early action admission or within 30 days of their admission notification for early decision. Puget Sound reserves the right to rescind an offer of admission should a student fail to maintain the academic and/or personal standards demonstrated in the individual’s application.

Students should submit the Housing Application online after submitting their Advance Tuition Payment. Students are responsible for return of the medical history and immunization form prior to enrollment. This history and immunization form is provided to a student prior to the term in which that student plans to enroll.

Transfer Students. Students admitted to Puget Sound will receive a Letter of Acceptance and a transfer evaluation.

A non-refundable Advance Tuition Payment of $500 is required for each new student and reserves a place in the student body. Puget Sound reserves the right to rescind an offer of admission should a student fail to maintain the academic and/or personal standards demonstrated in the individual’s application.

Students should submit the Housing Application online after submitting their Advance Tuition Payment. Students are responsible for return of the medical history and immunization form prior to enrollment. This history and immunization form is provided to a student prior to the term in which that student plans to enroll.

International Students
Application and Academic Credentials. University of Puget Sound welcomes applications from international students. The university is authorized under federal law to enroll nonimmigrant students. Along with all required application materials, applicants should include those items outlined in this section of the Bulletin which are applicable to their class standing. Academic credentials must be translated into English and must be sent directly by the institutions previously attended. Hand-carried documents or copies of documents sent by students will cause a delay in the application process. Please note that all application materials become the property of the university unless otherwise indicated in writing when the application is submitted.

English Proficiency. Students attending secondary school where the primary language of instruction is not English must submit their scores from SAT, ACT, the Test of English as a Foreign Language (TOEFL), or the International English Language Testing System (IELTS). A minimum of 85 on the TOEFL iBT or 6.5 on the IELTS is recommended.

Financial Statement. Students on an F-1 Visa (Student Visa) must also provide evidence of sufficient funds to cover one full year of study by filing College Board’s International Student Certification of Finances. International students must not depend upon earnings from employment, anticipated financial assistance, or scholarship grants.

Summer Session
Non-matriculating students may register for summer classes by completing a non-matriculant registration agreement form available from the Office of the Registrar. Non-matriculating students wishing regular student standing for summer session must complete the appropriate application form outlined previously. Attendance in a summer session does not guarantee a student matriculating status.

Graduate Study Programs
Information concerning graduate study in education, occupational therapy, or physical therapy admission requirements, application procedures, and other pertinent data is available from the Office of Admission, University of Puget Sound, 1500 N. Warner St., Tacoma, WA 98416-1062, telephone: 253.879.3211; e-mail: admission@pugetsound.edu; website: pugetsound.edu.

DIVISION OF STUDENT AFFAIRS
Vice President for Student Affairs/Dean of Students: Uchenna Baker
Associate Dean of Students/Director of Residence Life: Debbie Chee
Associate Dean of Students/Director of Orientation and Sexual Assault Prevention Education: Marta Cady
Associate Dean of Students/Director of Student Union and Programs: Sarah Comstock
Director of Counseling, Health, and Wellness Services: TBA
Assistant Dean of Students: Sarah Shives
Director of Student Activities: Moe Stephens
Director for Intercultural Engagement: Vivie Nguyen
Director for Spiritual Life & Civic Engagement: Dave Wright ’96

The Vice President for Student Affairs/Dean of Students works on behalf of all students through collaboration with faculty, staff, and student leaders. She joins other university officers in long-range planning and advises the president and Board of Trustees on student issues and concerns. Assistance is available for a wide variety of issues, including personal or academic problems, family or personal emergencies, or general guidance with issues of life as a student. The Dean of Students office is in Wheelock Student Center, Room 208, 253.879.3360, Campus Mailbox 1069.

The dean also has overall responsibility for the following Division of Student Affairs (DSA) departments:

Center for Intercultural and Civic Engagement (CICE)
The Center for Intercultural and Civic Engagement houses a multitude of student resources. Home to the Office of Intercultural Engagement and the Office of Spiritual Life and Civic Engagement, students use CICE as an avenue for community, support, and programming.
Office of Intercultural Engagement
The Office of Intercultural Engagement is committed to enhancing intercultural awareness and creating an inclusive learning environment in which everyone feels heard, welcome, and respected. Our staff provides resources and support for all students interested in exploring identity-based issues. In particular, we support the individual and community needs of students of color; LGBTQ (lesbian, gay, bisexual, trans and non-binary, queer or questioning) students; women; first generation college students; and students of various spiritual backgrounds, abilities, and documentation statuses. The office oversees the Student Diversity Center and Social Justice Center, which provide open and warm community space for students to gather with friends and organizations; seek solidarity; engage in intercultural dialogue; and implement/attend programs related to identities, communities, and cultures.

Spiritual Life and Civic Engagement
The Office of Spiritual Life and Civic Engagement is responsible for supporting and developing programs and resources for a broad range of students and groups related to religious life, spiritual diversity, social justice, civic engagement, and community service. The University Chaplain is available to students of all religious or spiritual backgrounds, including those who identify as non-religious, agnostic, or atheist, for support, reflection, and program development. Student-led religious life clubs provide connection and activities for students from specific spiritual backgrounds, and students are always welcome to form new groups that meet their needs. Student Interfaith Coordinators help develop and implement programs and give student leaders a chance to develop skills in interreligious leadership. Significant scholarship and leadership opportunities are available for returning students of all religious backgrounds.

The Office of Spiritual Life and Civic Engagement is a central point for the campus community to connect with off-campus organizations for service and engagement projects. Students can mentor and tutor local youth, volunteer for a campus “food salvage” program that supports a local transitional housing program, and participate in a program that collects thousands of items of clothing and furnishings for donation to Tacoma-area service organizations. We also actively support volunteer engagement and host speakers that encourage active citizenship.

The Office of Spiritual Life and Civic Engagement also works with a wide range of student groups and campus initiatives that support interest in and exploration of social justice, inclusion, and diversity. The office facilitates an Alternative Break program, which offers students the chance to spend part of fall and spring breaks immersed in Tacoma doing community service, meeting with local activists and leaders, and reflecting on the intersection of social disparities with their own values and identities. We also partner closely with the Office of Intercultural Engagement to engage issues of difference and inclusion on campus.

Counseling, Health, and Wellness Services (CHWS)
CHWS provides confidential multidisciplinary care in support of student physical and mental health.

Counseling Services: Our providers help students address anxiety, depression, substance abuse, eating disorders, issues related to sexuality and relationships, adjustment to college, trauma, and other concerns. No appointment is needed to initiate counseling. Simply drop by CHWS for an initial screening week day afternoons between 1–4 p.m. Based on that contact, students and providers collaborate to determine best treatment options which might include short-term counseling in CHWS (group or individual treatments) or referral to off-campus providers for longer-term, specialized, or more intensive treatment needs.

Medical Services: CHWS provides confidential medical evaluation and treatment for primary health care needs. CHWS is not equipped to provide emergency room care, so students with urgent treatment needs should go directly to a location hospital. We emphasize self-care, health promotion, and disease prevention. Providers work to get students back to academic rigors as soon as possible, coaching students to become their own self-advocates with their healthcare needs. Appointments can be scheduled online, in person, or over the phone. Students are charged $25–55 per visit depending on the complexity of their visit. Additional charges may be added for medications, vaccines, medical supplies, or lab tests, which CHWS typically bills at below-market rates. CHWS staff refer students to off-campus specialty care, X-rays, or other necessary services. Students are expected to arrive on campus with adequate health insurance supporting local area treatment.

New Student Orientation
Puget Sound’s new student orientation program works to make the transition to college and the university community smooth, easy, and fun. Students have the opportunity to interact with faculty, staff, and classmates while exploring the Northwest.

BRAVe
Bystander Revolution Against Violence (BRAVe) creates and facilitates programming for the campus community to address issues of sexual and gender based violence including sexual assault, dating and domestic violence and stalking. Education around healthy relationships, consent and survivor support are also part of the portfolio of programming included for students.

Off-Campus Student Services (OCSS)
OCSS has a website with tips and resources to assist students living off campus. Topics on the website include Rights and Responsibilities, Conflict Resolution, Safety, Searching for Housing, Negotiating Your Lease, and how to make the transition to off-campus living.

Residence Life
The University of Puget Sound, as a residential liberal arts college, affirms the educational benefits inherent in this kind of undergraduate experience. Student learning, in and out of the classroom, and student success are enhanced by the on-campus residential experience. Being a part of a community of scholars is also reinforced by living in campus housing. Because of this, Puget Sound requires all students to live on-campus for their first two academic years with the university and significant numbers of students choose to continue living on campus through graduation to fully reap the benefits of a residential liberal arts experience.

Residence Life seeks to ensure that the academic mission of the university is sustained by students’ living arrangements on campus. The department strives to create a sense of community within each of the residential facilities. Through educational and social programs and other resources, the department aids residents in the development of those qualities that are essential to academic achievement, personal growth, and successful group living. Living spaces on campus include Residence Halls (eleven Tudor-Gothic residence halls are arranged in two spacious quadrangles on the north and south ends of campus) and Union Avenue Residences (residences on Union Avenue that house eight of the university’s national fraternities and sororities—Sigma Alpha Epsilon, Phi Delta Theta, Beta Theta Pi, Sigma Chi, Alpha Phi, Gamma Phi Beta, Kappa Alpha Theta, and Pi Beta Phi; Delta Delta Delta members reside in campus houses; first-year students are not allowed to live in the chapter houses). Students residing in these buildings are required to purchase a meal plan. Residence Houses (these
48 houses vary in size) are reserved for continuing students, and include some theme housing. Students residing in residence houses have the option of purchasing a meal plan.

The university offers several special residential programs including Theme Floors and Halls (e.g., healthy living/substance free, and outdoor programs/adventure education). In addition, first-year students may be enrolled in a fall seminar whose participants live together on the same floor of a residence hall. These seminars are referred to as residential seminars. Also, there are Theme Houses that create strong links between living and learning experiences by involving students who have similar interests and who develop a living environment that is conducive to intellectual inquiry beyond the classroom. The special program houses include the Honors/Langlow House for upper-division students in the Honors program, language and music houses, and a number of houses whose themes range from academics to community service. Campus houses are reserved for students at the sophomore level and higher.

First-year students who are interested in joining a fraternity or sorority participate in formal recruitment at the start of spring semester and may move into the chapter’s facility at the beginning of their sophomore year. Transfer students with sophomore standing or above may participate in fall informal recruitment and move into the chapter’s housing facility immediately, provided space is available.

Each living unit is staffed by undergraduate students, or resident assistants (RAs), who serve as peer counselors, hall administrators, and facilitators for the residents of their living area. The student leader team also initiates, organizes, and implements educational and developmental programs that contribute to the academic and personal growth of residents. The leader team enforces the Student Integrity Code and other university policies. Resident Community Coordinators (RCCs) are student leader teams working in the continuing student areas (on-campus houses, Oppenheimer Hall, Smith Hall, Thomas Hall, and Trimble Hall). Resident Directors (RDS) are full-time, master’s-level university staff members who live in apartments in the residence halls. The RDS coordinate daily life in the residence halls and supervise Residence Life Student Leadership Teams and programming.

The Student Integrity Code as well as federal, state, and local laws govern students in all residence units. Failure to comply with the governing laws and codes may be considered grounds for termination of residence. Students are encouraged to be self-regulating and to adopt their own system of government within each facility, consistent with university policies. Each residential unit has a student government that engages in community issues and assists in policy decisions.

**Residence Life Application Process**

To be eligible for a room assignment, students must be enrolled in classes for the following semester. An application form for admitted students can be found on myPugetSound. Continuing students sign up for on-campus housing via the Housing Selection process in the spring semester.

Upon a room assignment, the housing contract and all terms and conditions set forth are binding for the entire academic year. This contract applies to all student residents of university-owned facilities.

Appeals to be released from the residential requirement or cancel a housing contract must be submitted to the Residence Life office via the On-Campus Housing Contract Appeal form available at pugetsound.edu/reslifepolicies.

Confirmation of room assignments and roommate information for fall enrollment is posted to myPugetSound and placement letters are mailed to admitted students during the month of June.

**Rates**

Room and board costs are charged as a unit, and all students living in residence halls (including Thomas Hall and Trimble Hall or the Union Avenue facilities) must pay board as well as room charges. Residents of on-campus houses are charged room costs only and have the option of purchasing a meal plan. Room and board rates are subject to change.

University housing rates are detailed in the “Student Financial Services” section of this Bulletin.

**Housing for Continuing Students**

Each fall and spring semester, a housing selection process is held for continuing students. In the spring semester, all current students are invited to participate in the on-line Housing Selection process. An email detailing the various options and process is sent in December. For more information, contact Residence Life, 253.879.3317, Campus Mailbox 1003. Information and policies about contracts, terms and conditions, and appeals listed above are applicable for all enrolled students.

**Student Activities**

Student Activities enhances the living-learning environment, encourages student participation in Puget Sound traditions, and provides resources and leadership opportunities that empower students to build a foundation for their future. Student Activities encompasses Greek life and leadership, outdoor programs, and student-led cultural and social programs. The myriad programs are inclusive of all students and members of the Puget Sound community.

At the beginning of the spring semester, students may consider joining one of the campus fraternities or sororities. Greek living is a residential option that attracts over a third of the student body and provides a supportive environment for its members. The Greek community at the University of Puget Sound is founded upon the “Four Pillars” of Leadership, Scholarship, Service, and Tradition. These pillars represent the commitment from each fraternity and sorority to the values of our community.

With a rich and storied tradition dating back more than 80 years, thousands of alumni have proudly and fondly looked back on their years as a member of the Greek community as a key part of their Puget Sound experience. Over the years, fraternities and sororities have played a major role in shaping student life at Puget Sound.

Puget Sound Outdoors facilitates student-led programs to explore the breathtaking Pacific Northwest and enhance the educational experience. The program provides weekend outdoor trips, presentations, equipment rental, a bike shop, and outdoor and leadership skills development, and leadership opportunities.

**Wheelock Student Center**

Wheelock Student Center (WSC) is the hub of campus life. Each day of the week, WSC is busy with activities ranging from afternoon concerts to espresso breaks, from club and organization meetings to poetry readings. WSC is home to the Bookstore, dining hall, Diversions Café, The Cellar, Information Center, and Mail Services. The Information Center, located on the main level of the WSC, provides connections for new students and campus visitors as well as selling tickets to a variety of campus performances and lectures.
Schedule of Tuition and Fees

Tuition and fees are established in the spring for the following academic year. The university reserves the right to change tuition, room and board, and other fees for a given semester without prior notice. Once the semester begins, no changes will be made to the tuition or fees for that semester. Every student is presumed to be familiar with the tuition, fees, and financial policies published in this Bulletin.

Puget Sound Costs

The Cost of Attendance (COA) is the estimated cost of the direct and indirect expenses a student can expect during an academic year. Direct costs are charges billed by Puget Sound that appear on the student account. These charges include tuition, student government fees, meal plans, and housing or room fees. Indirect costs are expenses that the student will incur that are not billed by Puget Sound. These charges include books and supplies, transportation, personal expenses, and off-campus housing.

Direct Costs for Full-Time Undergraduate Students for 2018–19

Tuition (full-time) ......................................................... $49,510
Standard Room and Board ........................................... $12,540
Student Government Fee ........................................... $266
TOTAL ........................................................................ $62,316

Estimated Indirect Costs:

Books and supplies ......................................................... $1,000
Transportation–In State .............................................. $500
Transportation–Out of State ........................................ $1,420
Personal Expenses........................................................ $1,800
Total Estimated Indirect Costs .................................... $3,300-4,220

These estimated costs are for enrollment during the nine-month academic year. Costs may be higher if a student elects courses for which special instruction or services are necessary.

Tuition

Tuition for undergraduate students will be charged each semester (fall and spring) as follows:

Full-time (3 to 4.25 units) ................................................. $24,755
Overload, per unit ....................................................... $6,250
Part-time (less than 3 units), per unit ................................ $6,250
Tuition charges for fractional unit courses will be computed at the per unit rate of.......................... $6,250

Refer to the Academic Policies section of this Bulletin for definitions of full-time and part-time students, as well as overloads and activity units. For full-time students, failure to enroll in 4.25 academic units per term or 0.5 activity units does not accumulate future tuition credit.

All students in the Occupational Therapy 3-2 Program will be charged tuition at the undergraduate rate plus the student government fee until such time as a bachelor’s degree is earned or the student is considered in graduate status for financial aid purposes. Once this occurs, the student will be charged on a per unit basis.

All students enrolled in a Second Baccalaureate program will be charged according to undergraduate rates less the student government fee.

Full-time students and alumni may audit, without charge, one class per term, with a maximum of two classes per academic year. Other students will be charged one-half the per unit rate. All auditors will be charged any applicable class instruction fees. Reduced tuition rates are not available to students who change a graded class to an audit class.

For a list of non-auditable courses, see the Academic Handbook.

Rates for University-owned Residences

Standard Room and Board ............................................. $12,540

This rate includes a medium meal plan and standard on-campus housing for the fall and spring semesters. Costs will be higher for students who elect single rooms and rooms in university houses, Union Avenue, Commencement Hall, or Trimble Hall. Vacation periods are excluded.

Housing contracts are for a full academic year, unless otherwise specified. Release from the housing contract requires the approval of a formal petition to the Residence Life office. Unless released from their housing contract, students remain responsible for room charges for the year regardless of where they reside.

Applied Music Fees

The Applied Music fee is $200 per quarter-unit, not to exceed $400 for lessons taken for the same instrument. The fee is nonrefundable after the beginning of the term. These classes count as academic, not activity, units toward graduation requirements.

Activity and Course Fees

The following course and activity fees are nonrefundable after the last day to drop without record.

Bowling (PE 141) .......................................................... $95
First Aid/CPR (PE 196) .................................................. $54
Golf (PE 152, PE 153) ................................................... $70
Hiking/Backpacking (PE 131, 132) ................................. $80
Horseride Riding (PE 137, PE 138) ............................... $500
Kanji in Context (JAPN 230) ......................................... $10
Lifeguard Training (PE 159) .......................................... $54
Major Exploration & Decision (ACAD 201) ................. $10
Martial Arts (PE 146) ................................................. $50
Nutrition/Energy Balance (EXSC 201) ......................... $40
Physiology of Exercise (EXSC 363) ............................. $50
Rock Climbing (PE 134) .............................................. $95
Sailing (PE 135, PE 136) ............................................. $250
Scuba (PE 130) ......................................................... $82

Other Fees

Application for admission .............................................. $60
Late confirmation fee (for payment received after the payment deadline) .............................................. $200
Payment plan participation fee (per semester) ................ $80
Returned check fee ..................................................... $25
Advance tuition payment - entering students ............... $500

Student Financial Services

Associate Vice President for Student Financial Services: Maggie Mittuch
Associate Director for Financial Aid: Bryan Gould
Associate Director for Student Accounts: Cree Bradford

At Puget Sound, we believe that developing a strong foundation of financial literacy is an important part of a student’s education. Student Financial Services staff members actively partner with students and families to develop those financial literacy skills as we assist in establishing realistic plans and solutions for financing a Puget Sound education.

For full-time students, failure to enroll in 4.25 academic units per term full-time and part-time students, as well as overloads and activity units.
Financial Aid

There are two types of financial assistance available at Puget Sound: 1) Need-based financial aid is awarded to students whose families do not have sufficient financial resources to pay for college as determined by completion of the Free Application for Federal Student Aid (FAFSA). Grants, loans, and employment opportunities are all examples of need-based financial aid. 2) Non-need based financial aid is awarded to students without regard to financial need. Academic, talent, or achievement awards are all examples of non-need based aid. Non-need based loans like Federal Unsubsidized Direct loans or Federal PLUS loans are also available to assist in managing college costs. Eligibility for need-based financial aid is based on demonstrated financial need. Financial need is defined as the difference between the total cost of attendance and the amount a student and their family are expected to contribute as calculated by the FAFSA.

Financial need determines the amount of need-based financial aid (grants, subsidized loan, work-study) students are eligible to receive. Puget Sound strives to create a financial aid package that meets a student’s demonstrated need, although funding limitations or other eligibility criteria can prevent us from satisfying full need in all cases.

In order to remain eligible for need-based financial aid, students must complete the FAFSA each year. The amount of need-based financial aid a student is eligible to receive each year may vary depending on the level of financial need and/or other scholarship or grant assistance they receive.

How to Apply for Need-Based Financial Aid

Students wishing to apply for need-based financial aid must complete the Free Application for Federal Student Aid (FAFSA), listing University of Puget Sound (code 003797). The FAFSA is available online at www.fafsa.gov.

First-year applicants interested in being considered for need-based financial aid should complete the FAFSA by the application deadline for admission to receive priority consideration. Please consult the Admission Office webpage at pugetsound.edu/apply for current application deadlines.

Graduate Students should submit the FAFSA no later than March 31.

Continuing and Transfer Students for priority consideration, the FAFSA should be completed by March 31.

Financial Aid Programs

Puget Sound Scholarships and Grants

Puget Sound’s financial aid program is composed of a variety of university scholarships and grants that are funded by tuition revenue, endowment earnings, and gifts. Part of every tuition dollar goes to support Puget Sound aid programs. Additionally, many scholarships and grants are provided through the financial commitments of Puget Sound alumni and friends. The majority of Puget Sound scholarships are offered to undergraduates at the point of admission and are subsequently renewed provided students meet the renewal criteria. A limited number of named scholarships are available to currently enrolled students who meet the selection criteria established by donors.

Federal Grants

Pell Grants and Supplemental Educational Opportunity Grants are directed at undergraduate students with exceptional financial need. The amount of grant awarded is determined by the Expected Family Contribution (EFC) as calculated by the FAFSA.

Washington State Grants

The Washington State Need Grant program helps the state’s lowest-income undergraduates. Eligibility is determined by the Washington Student Achievement Council.

Federal Direct Loans

Puget Sound participates in the Federal Direct Student Loan program. Under this program the federal government serves as the lender. There are two types of Federal Direct loans: Subsidized and Unsubsidized Direct loans. The Subsidized Direct Loan is need-based and requires demonstrated need according to the FAFSA. The government pays the interest on these loans while a student is enrolled at least half time. Unsubsidized Direct loans are not need-based, interest begins accumulating as soon as the funds are disbursed to the university. Payment is not required on these loans while a student maintains half time enrollment. Students can elect to make payments towards the interest accumulating on Unsubsidized Direct loan by contacting the loan servicer. The interest rate for undergraduate Federal Direct loans is currently fixed at 4.45% and is subject to change.

Federal Perkins Loan

The federal Perkins Loan program has ended and no new loans can be made. If you borrowed a loan through the Perkins Loan program, you may be eligible to have part or all of the loan cancelled. The loan program carries certain cancellation provisions, including provisions for those working in the Allied Health Professions and for certain areas of teaching. Information on these cancellation opportunities is available on the Student Financial Services website at pugetsound.edu/sfs.

Work-Study Employment Opportunity

Work-study is a need-based financial aid program that assists students by providing an opportunity to earn money while gaining valuable work experience. On-campus work-study jobs are available in many departments and encompass a wide variety of skills and responsibilities. Off-campus, career-related work-study jobs require advanced skills and are especially suitable for Washington State residents who have completed one or two years of study. Off-campus work-study jobs are available at select employers, including community service organizations.

Academic Scholarships

All incoming undergraduate students are considered for academic merit scholarships, which range in amount from $13,000–$24,000. Awards are based on the students overall admission application, including standardized test scores and academic performance in high school or college. No separate application is required.

Lillis Foundation Scholarships

The Lillis Foundation Scholarship, a full tuition and room and board scholarship, will be awarded to two entering first-year students who exhibit the potential to become competitive candidates for undergraduate and postgraduate fellowships and scholarships. Lillis Scholarship applications, standardized test scores, and complete admission applications are due by December 15. Finalists will be selected by a scholarship committee and invited to Puget Sound for an interview.

Matelich Scholarships

The Matelich Scholarship, a full tuition and room and board scholarship, will be awarded to two entering first-year students who exhibit extraordinary promise in academics and demonstrate a capacity for a life of leadership and sustained personal growth. While at Puget Sound, Matelich Scholars will be recognized campus leaders and will continue on paths of leadership after they become alumni. Matelich Scholarship applications
and complete admission applications are due by December 15. Finalists will be selected by a scholarship committee and invited to Puget Sound for an interview.

**National Merit Scholarships**
Incoming first-year students who are National Merit Finalists and list University of Puget Sound as their first-choice college with the National Merit Scholarship Corporation are eligible to receive a $1,000–$2,000 scholarship, depending on their level of financial need.

**Department Nominated Scholarships**
Puget Sound’s department sponsored scholarship program is composed of a number of named scholarships provided through the financial commitments of University of Puget Sound alumni and friends. These scholarships are awarded to students based on their academic achievement and/or financial need. Scholarship recipients are recommended by the department faculty during the spring semester for the following academic year. Details on these programs are available on the Student Financial Services website.

**Talent Scholarships (Audition and/or application required)**
Applicants must demonstrate talent in art, forensics, music or theater. Recipients are expected to share their talents through performance or other forms of demonstration. Auditions and/or scholarship applications are required.

- **Art Scholarships** – Awarded to students who plan to major in visual arts or art history.
- **Forensics Scholarships** – Recipients compete in intercollegiate speech and debate events.
- **Music Scholarships** – Recipients are expected to take an active role in musical activities and participate either in a university performing music group or as an accompanist.
- **Theater Scholarships** – Recipients serve as crew or cast members for fall and spring productions. Students are not required to major in theatre arts.

**University Scholarship**
A limited number of named scholarships established by Puget Sound alumni and friends will be awarded to currently enrolled students meeting the selection criteria defined by individual donors. Completion of a scholarship application, available on the Student Financial Services website, is required for consideration for some but not all awards. Scholarships are awarded in late spring on an annual basis and applied to the recipient’s financial aid package for the following academic year.

**University Scholarship and Grant Eligibility**
Eligibility for university scholarships and grants is limited by the following policies.

1. The total amount of university scholarships and grants received cannot exceed the cost of tuition.
2. The total amount of need-based federal, state, or university scholarship and grant aid received cannot exceed financial need.
3. The total amount of aid received from all sources cannot exceed the cost of attendance.

If a student’s financial aid award must be reduced, the reductions occur in the following order: need-based loan assistance, work-study employment, and finally university grant assistance.

**Additional Sources of Assistance**

**Outside Scholarship Opportunities**
Private or outside scholarships may help students with their college expenses. Students can access links to a number of outside scholarship resources on the Student Financial Services website at pugetsound.edu/sfs.

**Part-Time Employment Opportunities**
Career and Employment Services (CES) maintains information on part-time employment opportunities available to all Puget Sound students regardless of work-study status. Priority in placement for on-campus jobs is given to those who have been awarded work-study as part of their financial aid package.

**Parent Federal PLUS Loan**
Parents may borrow a Federal Direct PLUS Loan for any year that their student is enrolled at least half time as an undergraduate student. Under the Federal Direct Student Loan program, the federal government serves as the lender and the interest rate is currently fixed at 7%. PLUS Loans have an origination fee of 4.264% that is subtracted from each disbursement. Interest rates and fees change annually. Detailed information is available at pugetsound.edu/sfs.

**Private Education Loans**
Puget Sound encourages students to pursue federal student loans prior to applying for private educational loans. Private loans are designed to meet educational costs not covered by other forms of financial aid, provided the qualifying credit and income criteria are met; cosigners are usually required. Information about private loan programs is available at pugetsound.edu/loans.

**Veterans Aid**
Select academic programs at University of Puget Sound are approved by the United States Department of Veterans Affairs (VA). A student who is eligible for Chapter 30, 33, 1606, or 1607 benefits should contact the Veterans Affairs Coordinator in the Office of the Registrar (Jones Hall, Room 013; 253.879.3160). A student who qualifies for Chapter 31 Vocational Rehabilitation benefits should contact Student Financial Services (Jones Hall, Room 019; 253.879.3214).

**Billing and Payment**
Puget Sound utilizes an online billing system called TouchNet Bill + Payment. Through Bill + Payment, students and authorized users can view monthly bills, account activity and make online payments via e-check or credit card.

Semester billing information will be available online in early July for fall and early January for spring semester. The monthly statement summarizes your semester charges (estimated tuition, fees, room and board) less your estimated financial aid, to calculate the payment due. More billing information can be found online at pugetsound.edu/admission/tuition-aid-scholarships/bill-payment-information-new/.

Financial aid credit is not given for work-study awards and certain outside scholarships not disbursed directly to the university. When these funds are received, they will be used to pay off the student’s account balance or reduce the monthly payment plan balance.

Funds received by the university from loans or scholarships must be applied to the student’s account if there is any unpaid balance at the time of receipt. Any expected financial aid that is delayed or canceled for any reason will increase the student’s account balance and payment due for the term.

Payment may be made online through the Bill+ Payment system by e-check or credit card. Debit cards are not accepted. Credit card pay-
ments are subject to a 2.8% service fee. Checks and cash are also accepted forms of payment. Please note that credit cards are only accepted through the Bill + Payment system. We are unable to accept credit card payments by phone or in person by card swipe.

Payment Deadlines
Payment is due by the following deadlines:
- Fall: August 15
- Spring: January 15

Students must comply with these payment deadlines to avoid late fees. If students anticipate difficulties in meeting the payment deadline, they must contact Student Financial Services before the deadline to make special arrangements.

Monthly Payment Plan
The university offers an interest-free monthly payment plan that allows for extended payment of the balance due. The net amount due for the semester plus an $80 payment plan participation fee is divided into five monthly payments. Payment plan amounts may be adjusted as account changes occur. The first payment is due by August 15 for fall and January 15 for spring, with additional payments due the fifteenth of each month. A late fee of $25 will be charged each month for payments not received by the due date.

All monthly payment plan requests are subject to review and final approval by Student Financial Services. Payment plans may be modified or canceled if payments are not made promptly when due, or at any other time when, in the judgment of the appropriate university officials, and sufficient justification for such action exists.

Registration for Classes
Registration for classes is confirmed when the required payment for the semester has been received. Students who have not made financial arrangements by the payment deadline are assessed a $200 late fee. Students who do not have their payment arrangements completed by the tenth day of classes may have their registration cancelled. Students are able to re-register on a space-available basis once financial arrangements have been made.

The university reserves the right to cancel the registration of any student who fails to meet his/her financial obligations when such action is deemed to be in the best interest of the university. Such action does not, however, cancel the incurred obligations on the part of the student. The university reserves the right to withhold transcript of record or diploma, or to withhold registration for a subsequent term, until all university charges have been paid and the student’s account is paid in full. The university further reserves a similar right, as stated in the preceding sentence, if (1) any student loan is in a past-due or delinquent status, or (2) any student has caused the university to incur a financial loss and has not voluntarily repaid the loss.

Tuition Adjustments
Students who completely withdraw are made according to the following timetable:

<table>
<thead>
<tr>
<th>Adjustment Period</th>
<th>Tuition Adjustment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st day of semester</td>
<td>100%</td>
</tr>
<tr>
<td>1st day of classes</td>
<td>75%</td>
</tr>
<tr>
<td>11th day of classes</td>
<td>50%</td>
</tr>
<tr>
<td>1st day of the 5th week</td>
<td>25%</td>
</tr>
<tr>
<td>1st day of the 6th week</td>
<td>0%</td>
</tr>
</tbody>
</table>

For the exact dates of adjustment periods by semester, refer to the Academic Calendar.

Housing Refund Policy: Students withdrawing before the 10th day of classes will receive a 100% refund on housing charges but will be assessed a $500 housing cancellation fee. Room charges are non-refundable for students withdrawing after the 10th day of classes. Detailed information on the room charge refund policy is available from the Office of Residence Life.

Board charges will be adjusted based upon the unused portion of the student’s meal plan for those students who withdraw before the end of a semester.

Financial Aid for students dropping from full-time to part-time or completely withdrawing will be calculated to determine whether a portion of federal and institutional aid must be returned. Adjustments for students completely withdrawing will be calculated to determine whether a portion of federal and institutional aid must be returned. Adjustments for students completely withdrawing are prorated, calculated on a daily basis up to the 60% completion point of the semester. Please note that the Financial Aid Return policy and calendar is different from the Tuition Adjustment policy and calendar for reasons of Title IV Federal Aid regulatory compliance.

Tuition adjustments are adjustments of charges assessed, and are not calculated based on payments made. A full copy of the refund policy, with examples, is on file in the Student Financial Services Office.

All financial aid information, including program eligibility, award amounts, and loan interest rates, is subject to change.

MS, PhD, University of Washington, 1981, 1986

Beardsley, William: Professor, Philosophy
BA, Johns Hopkins University, 1976
MA, PhD, University of Pittsburgh, 1978, 1984

Beck, Terry: Professor, Education
BA, Seattle Pacific University, 1979
M.Ed, University of Puget Sound, 1990
PhD, University of Washington, 2000

Beezer, Rob: Professor, Mathematics and Computer Science
BS, Santa Clara University, 1978
MS, PhD, University of Illinois, 1982, 1984

Belot, Francoise: Visiting Instructor, French Studies
MAITR, Université de Nice-France, 1998
DEA, Université de Nice-France, 1999
MA, PhD, University of Washington, 2004, 2013

Benveniste, Mike: Assistant Professor, English
BA, MA, University of California Santa Barbara, 2000, 2003
PhD, Stanford University, 2012

Bernhard, James: Professor, Mathematics and Computer Science
BA, Princeton University, 1993
PhD, Harvard, 2000

Beyer, Tim: Associate Professor, Psychology
BA, Washington University, 2001
PhD, University of California, Berkeley, 2006

Block, Geoffrey: Music
BA, University of California, Los Angeles, 1970
MA, University of Michigan, 1973
PhD, Harvard, 1979

Bodine, Sigrun: Professor, Mathematics and Computer Science
MA, San Diego State University, 1991
PhD, University of Southern California, 1998

Boer, Mary: Clinical Instructor, Education
BA, MAT, University of Puget Sound, 1996, 1998

Boisvert, Luc: Associate Professor, Chemistry
BS, PhD, Sherbrooke University, 1999, 2006

Boyles, Bob: Clinical Professor, Physical Therapy
BS, Eastern Washington University, 1989
MS, DSc, Baylor University, 1991, 2002

Brackett, LaToya: Visiting Assistant Professor, African American Studies
BA, Cornell University, 2006
MA, PhD, Michigan State University, 2011

Breitenbach, William: History
BA, Harvard, 1971
MPhil, PhD, Yale University, 1975, 1978

Bristow, Nancy: Professor, History
BA, Colorado College, 1980
MA, PhD, University of California, Berkeley, 1983, 1989

Brody, Nicholas: Assistant Professor, Communication Studies
BS, PhD, The University of Texas at Austin, 2005, 2013
MA, Arizona State University, 2009

Brown, Gwynne: Associate Professor, Music
BM, University of Puget Sound, 1995
MM, Indiana University Bloomington, 1997
PhD, University of Washington, 2006

Buescher, Derek: Professor, Communication Studies
BA, Whitman College, 1992
MA, University of California, Davis, 1995
PhD, University of Utah, 2003

Burgard, Dan: Professor, Chemistry
BA, Colorado College, 1996
PhD, University of Denver, 2006

Butcher, Alva: Professor, Business and Leadership
BS, Seattle University, 1964
MA, Columbia University, 1966
MBA, PhD, University of Washington, 1983, 1992

Chambers, America: Assistant Professor, Mathematics and Computer Science
BA, Swarthmore College, 2005
MS, PhD, University of California, Irvine, 2010, 2013

Chiu, David: Associate Professor, Mathematics and Computer Science
BS, MS, Kent State University, 2002, 2004
PhD, Ohio State University Columbus, 2010

Christoph, Julie: Professor, English
BA, Carleton College, 1993
MA, PhD, University of Wisconsin Madison, 1996, 2002

Claire, Lynnette: Professor, Business and Leadership
BA, BS, University of California, Davis, 1989, 1989
MS, PhD, University of Oregon, 2001, 2005

Clark, Kenneth: Instructor, Geology
BS, Central Washington University, 1984
MS, Western Washington University, 1988

Colbert-White, Erin: Assistant Professor, Psychology
BS, Denison University, 2007
MS, PhD, University of Georgia, 2009, 2013

Conner, Beverly: Instructor, English
BA, University of Puget Sound, 1978
MA, University of Washington, 1986
Faculty

Coutros, Peter: Lora Bryning Redford Post-Doctoral Fellow in Archeology
BA, Moravian College, 2008
MA, MPhil, PhD, Yale University, 2010, 2012, 2017

Crane, Johanna: Professor, Chemistry
BS, Muskingum College, 1989
AM, PhD, Washington University, 1991, 1994

Crawford, Isiaah: Professor, Psychology/President
BA, St Louis University Mo, 1982
MA, PhD, Depaul University, 1985, 1987

DeHart, Monica: Professor, Sociology and Anthropology
BA, University of California, Davis, 1994
MA, PhD, Stanford University, 1997, 2001

DeMarais, Alyce: Professor, Biology
BS, University of Washington, 1985
PhD, Arizona State University, 1991

DeMotts, Rachel: Professor, Environmental Policy and Decision Making
BA, Marquette University, 1995
MA, PhD, University of Wisconsin Madison, 2000, 2005

Despres, Denise: Professor, Humanities/Honors/English
BA, University of Notre Dame, 1979
MA, PhD, Indiana University, 1977, 1985

Dillman, Brad: Professor, International Political Economy
BA, Ohio State University Columbus, 1984
MA, MPhil, PhD, Columbia University, 1987, 1988, 1994

Dove, Wendy: Visiting Instructor, Mathematics and Computer Science
BS, MAT, University of Puget Sound, 1985, 1991

Dueker, Alicia Ramirez: Visiting Instructor, Hispanic Studies
MA, PhD, University of Washington, 1990, 1996

Duthely, Regina: Assistant Professor, English
BA, PhD, St Johns University, 2007, 2017
MA, Cuny Queens College, 2011

Elias, Edwin: Visiting Assistant Professor, Sociology and Anthropology
BA, University of California Santa Barbara, 2006
MA, PhD, University of California, Riverside, 2011, 2016

Elliott, Joel: Professor, Biology
BS, MS, University of Alberta, 1983, 1987
PhD, Florida State University, 1992

Elliott, Greg: Professor, Physics
BA, BS, University of California Santa Barbara, 1980, 1980
MS, PhD, University of California, San Diego, 1982, 1988

Erving, George: Professor, Honors/Humanities/English
BA, Stanford University, 1977
MBA, University of Oregon, 1980
MA, St. John's College, 1995
MA, PhD, University of Washington, 1996, 2005

Erzen, Tanya: Visiting Associate Professor, Religious Studies
BA, Brown University, 1995
MPhil, PhD, New York University, 1998, 2002

Evans, James: Professor, Physics/Science, Technology and Society
BS, Purdue University West Lafayette, 1970
PhD, University of Washington, 1983

Ferrari, Lisa: Associate Professor, Politics and Government
BA, Williams College, 1986
MA, Boston College, 1989
PhD, Georgetown University, 1998

Fields, Karl: Professor, Politics and Government/Asian Studies
BA, Brigham Young University, 1983
MA, PhD, University of California, Berkeley, 1984, 1990

Fisher, Amy: Assistant Professor, Science, Technology and Society
BS, Mount Allison University, 1999
MS, The University of Calgary, 2002
PhD, University of Minnesota, 2010

Fortmann, Lea: Associate Professor, Economics
BA, Gonzaga University, 2003
MPA, University of Washington, 2007
PhD, Ohio State University Columbus, 2014

Fox-Dobbs, Kena: Associate Professor, Geology/Environmental Policy and Decision Making
BS, Brown University, 1999
PhD, University of California Santa Cruz, 2006

Freeman, Sara: Associate Professor, Theatre Arts
BA, University of Puget Sound, 1995
MA, PhD, University of Wisconsin Madison, 1997, 2002

Fry, Poppy: Associate Professor, History
BA, Kenyon College, 2000

Gardner, Andrew: Professor, Sociology and Anthropology
BA, George Washington University, 1991
MA, PhD, The University of Arizona, 2000, 2005

Garrison, James: Visiting Assistant Professor, Philosophy
BA, Whitman College, 2004
MA, University of Hawaii at Manoa, 2007
PhD, University of Vienna, 2015

Gast, Betsy: Instructor, Education
BA, University of Oregon, 1974
M_ED, University of Puget Sound, 1978

Gessel, Megan: Assistant Professor, Chemistry
BA, Whitman College, 2005
PhD, University of California Santa Barbara, 2011

Gibson, Cynthia: Visiting Assistant Professor, Mathematics and Computer Science
BA, University of Puget Sound, 1989
MS, PhD, University of Oregon, 1991, 1995

Glover, Denise: Visiting Assistant Professor, Sociology and Anthropology
BA, Bard College, 1989
PhD, University of Washington, 2005

Glover, Jamila: Visiting Assistant Professor, International Political Economy
BBA, University of Houston, 2002
MBA, Texas Women's University, 2010
PhD, Old Domain University, Norfolk, VA, 2017

Goettsche, John: Visiting Instructor, Mathematics and Computer Science
BS, Eastern Oregon University, 2013
Goldstein, Barry: Professor, Geology/Environmental Policy and Decision Making  
BA, Cuny Queens College, 1975  
MS, PhD, University of Minnesota, 1980, 1985

Gomez, Andrew: Assistant Professor, History  
BS, BA, Florida International University, 2008, 2010  
MA, PhD, University of California, Los Angeles, 2012, 2015

Gordon, Dexter: Professor, African American Studies/Communication Studies  
BA, Jamaica Theological Seminary, 1984  
MA, Wheaton College, 1991  
PhD, Indiana University, 1996

Grinstead, Jeff: Associate Professor, Chemistry  
BS, University of Puget Sound, 1997  
PhD, University of Washington, 2003

Grunberg, Leon: Sociology and Anthropology  
BA, University of Sussex, 1970  
MA, University of Manchester, 1972  
PhD, Michigan State University, 1979

Gunderson, Chad: Assistant Professor, Art and Art History  
BFA, Minnesota State University-Mankato, 2007  
MFA, Arizona State University, 2011

Haltom, Bill: Professor, Politics and Government  
BA, MA, PhD, University of Washington, 1975, 1978, 1984

Hamel, Fred: Professor, Education  
BA, Santa Clara University, 1985  
MA, MAT, University of Chicago, 1986, 1990  
PhD, University of Washington, 2000

Hands, Wade: Professor, Economics  
BA, University of Houston, 1973  
MA, PhD, Indiana University, 1977, 1981

Hannaford, Sue: Professor, Biology/Neuroscience  
BS, California Institute of Technology, 1987  
PhD, University of Washington, 1993

Hanson, John: Professor, Chemistry  
BA, Whitman College, 1981  
PhD, University of California, Berkeley, 1988

Hanson, David: Visiting Instructor, Hispanic Studies  
BA, Pacific Lutheran University, 1991  
MA, Seattle University, 2000

Harpring, Mark: Professor, Hispanic Studies  
BA, Butler University, 1996  
MA, PhD, University of Kansas, 1998, 2004

Harris, Paul: Visiting Assistant Professor, Music  
PhD, University of North Carolina Chapel Hill, 2007

Harris, Travis: Visiting Assistant Professor, Chemistry  
BA, Willamette University, 2006  
PhD, Montana State University, 2011

Hastings, Jennifer: Professor, Physical Therapy  
BA, University of California, Berkeley, 1981  
MSPT, Boston University, 1985  
PhD, University of Washington, 2006

Hieta-aho, Erik: Visiting Instructor, Mathematics and Computer Science  
BS, California Polytechnic University, Pomona, 2009  
MA, San Diego State University, 2012  
PhD, Ohio University, 2018

Hodum, Peter: Associate Professor, Biology/Environmental Policy and Decision Making  
BA, Bowdoin College, 1988  
PhD, University of California, Berkeley, 1999

Holland, Suzanne: Professor, Religious Studies/Bioethics  
BA, Indiana University, 1978  
MA, Louisville Presbyterian Theological Seminary, 1991  
PhD, Graduate Theological Union, 1997

Hong, Zaixin: Professor, Art and Art History  
BA, Zhejiang University, 1982  
MA, PhD, China National Academy of Fine Arts, 1984, 1996

Hooper, Kent: Professor, German Studies/Humanities  
BA, MA, PhD, Northwestern University, 1980, 1985, 1986

Houston, Renee: Professor, Communications Studies  
BA, University of California Santa Barbara, 1991  
MA, PhD, Florida State University, 1993, 1996

Hoyos Galvis, Jairo: Assistant Professor, Hispanic Studies  
MA, PhD, University of Pittsburgh, 2013, 2016

Hutchinson, Rob: Professor, Music  
BA, California State University Bakersfield, 1992  
MM, Northern Arizona University, 1993  
PhD, University of Oregon, 1998

Imbrigotta, Kristopher: Visiting Assistant Professor, German Studies  
BA, Ohio University Athens, 2003  
MA, PhD, University of Wisconsin Madison, 2006, 2013

Ivancic, Sonia: Visiting Assistant Professor, Communication Studies  
BA, University of Puget Sound, 2008  
MA, University of Colorado Boulder, 2014  
PhD, Ohio University, 2018-anticipated

Irvin, Darcy: Visiting Assistant Professor, English  
BA, University of California, Los Angeles, 2002  
MA, PhD, University of California, Davis, 2004, 2011

Jackson, Martin: Professor, Mathematics and Computer Science  
BS, University of Puget Sound, 1984  
MS, PhD, University of Oregon, 1985, 1989, 1990

Jacobson, Robin: Professor, Politics and Government  
BS, Johns Hopkins University Undergraduate Admissions, 1996  
PhD, University of Oregon, 2004

James, Anne: Professor, Occupational Therapy  
BS, Western Michigan University, 1978  
MS, Boston University, 1987  
PhD, University of Connecticut, 2005

Jasinski, James: Professor, Communication Studies  
BA, MA, Northern Illinois University, 1978, 1980  
PhD, Northwestern University, 1986

Johnson, Michael: Professor, Art and Art History  
BFA, University of Massachusetts, 1992  
MFA, University of Cincinnati, 1995
Johnson, Lisa: Professor, Business and Leadership  
BA, MFA, Indiana University Bloomington, 1996, 1997  
JD, Northwestern School of Law of Lewis & Clark College, 2001  
MFA, Pacific Lutheran University, 2010  
PhD, Portland State University, 2011

Johnson, Kristin: Professor, Science, Technology and Society  
BA, University of Washington, 1997  
MA, PhD, Oregon State University, 2000, 2003

Johnson, Gregory: Visiting Assistant Professor  
BS, Whitworth University, 1997  
PhD, Arizona State University, 2003

Johnson, Sherri: Visiting Assistant Professor, Business and Leadership  
BS, Trinity International University, 1989  
MSED, University of Wisconsin River Falls, 1980  
PhD, University of Minnesota, 1997

Joshi, Priti: Professor, English  
BA, University of Maryland, 1988  
PhD, Rutgers University, 1998

Kaminsky, Tatiana: Professor, Occupational Therapy  
BS, University of Wisconsin Madison, 1995  
MS, PhD, University of Washington, 2003, 2008

Kelley, Diane: Professor, French Studies  
BA, The College of William and Mary, 1990  
MA, PhD, University of California, Los Angeles, 1993, 1998

Kendall, Chris: Assistant Professor, Politics and Government  
BA, Miami University, 1994  
JD, University of California, Berkeley, 2001  
PhD, Princeton University, 2014

Kessel, Alisa: Professor, Politics and Government  
PhD, Duke University, 2006

Kigar, Sam: Assistant Professor, Religious Studies  
BA, Reed College, 2006  
MA, PhD, Duke University, 2014, 2018

Kim, Jung: Associate Professor, Exercise Science  
BS, University of California, Los Angeles, 1995  
MA, Pepperdine University, 2000  
PhD, New Mexico State University, 2006

Kirchner, Grace: Professor, Education  
BA, Oberlin College, 1970  
MA, PhD, Emory University, 1972, 1975

Kontogeorgopoulos, Nick: Professor, International Political Economy  
BA, University of North Carolina Chapel Hill, 1992  
MA, University of Toronto, 1994  
PhD, The University of British Columbia, 1998

Kotsis, Kriazta: Professor, Art and Art History  
MA, Eotvos Lorand University, 1990  
PhD, University of Washington, 2004

Krause, Alan: Associate Professor, Business and Leadership  
BA, Williams College, 1989  
MBA, Portland State University, 2002  
PhD, University of Oregon, 2012

Krughoff, Laura: Assistant Professor, English  
BA, Loyola University Chicago, 2000  
MFA, University of Michigan, 2003  
PhD, University of Illinois Chicago, 2014

Kukreja, Sunil: Professor, Sociology and Anthropology  
BA, St Cloud State University, 1985  
MA, Kansas State University Manhattan, 1987  
PhD, American University - Washington DC, 1990

Kupinse, William: Professor, English  
BA, Colby College, 1989  
MA, Bucknell University, 1995  
MA, PhD, Vanderbilt University, 1996, 1999

Lago-Grana, Pepa: Professor, Hispanic Studies  
LICEN, University of Santiago de Compostela, 1991  
MA, PhD, University of Nebraska - Lincoln, 1993, 1997

Lanctot, Brendan: Associate Professor, Hispanic Studies  
BA, Haverford College, 2000  

Lara, Jose: Visiting Instructor, Hispanic Studies  
PhD, The University of British Columbia, 2016

Latimer, David: Associate Professor, Physics  
BA, Vanderbilt University, 1998  
MS, PhD, University of Oxford, 1999, 2002

Lee, Hajung: Assistant Professor, Religious Studies/Bioethics  
BSE, Duke University, 2000  
JD, Seattle University, 2006  
MA, Fuller Theological Seminary, 2010  
MBE, Harvard Medical School, 2017  
PhD, Boston University, 2017

Lee, Il-Hyung: Visiting Assistant Professor, Chemistry  
BS, Kaist University, South Korea, 2008  
PhD, University of California, Berkeley, 2012

Leuchtenberger, Jan: Professor, Asian Studies  
BA, Grove City College, 1986  
MA, Monterey Institute International Studies, 1995  
MA, PhD, University of Michigan, 2001, 2005

Lewin, Benjamin: Professor, Sociology and Anthropology  
BA, Trinity University, 1999  
MA, University of Akron, 2001  
PhD, Arizona State University, 2005

Li, Mengjun: Assistant Professor, Asian Studies  
BA, Fudan University, 2000  
MA, PhD, Ohio State University Columbus, 2009, 2014

Liao, Sam: Associate Professor, Philosophy  
BA, Rutgers University, 0  
MA, PhD, University of Michigan, 2008, 2011

Livingston, Lynda: Professor, Business and Leadership  
BA, The University of Texas at Austin, 1985  
MS, Texas A&M University, College Station, 1988  
PhD, University of Washington, 1996

BS, University of Puget Sound, 1985  
PhD, University of Washington, 1994

Roberts, Holly: Clinical Assistant Professor, Physical Therapy  
BA, Western Washington University, 1998  
MSPT, US Army-Baylor University-Houston, 2000  
DPT, Baylor University, 2007

Rodgers, Steve: Instructor, French Studies  
BA, MA, University of Oregon, 1979, 1982

Rogers, Brett: Associate Professor, Classics  
BA, Reed College, 1999  
PhD, Stanford University, 2005

Rouse, Melvin: Assistant Professor, Psychology  
BS, Virginia Polytechnic Institute & State University, 2004  
MA, Boston University, 2005  
PhD, Johns Hopkins University Post-Baccalaureate Premed, 2014

Rushton, Brian: Visiting Assistant Professor, Mathematics and Computer Science  
BS, MS, PhD, Brigham Young University, 2007, 2009, 2012

Ryken, Amy: Professor, Education  
BA, Mills College, 1985  
MPH, PhD, University of California, Berkeley, 1990, 2001

Sackman, Douglas: Professor, History  
BA, Reed College, 1990  
PhD, University of California, Irvine, 1997

Salvador Sanchis, Aurora: Visiting Instructor, Hispanic Studies  
BA, Universidad de Granada, 2011  
MA, University of Washington, 2014  
MA, University of Texas at Austin, 2017

Sampen, Maria: Professor, History  
BA, Reed College, 1990  
PhD, University of California, Irvine, 1997

Scharrer, Eric: Professor, Chemistry  
BS, Bates College, 1988  
PhD, University of North Carolina Chapel Hill, 1993
Sherman, Daniel: Professor, Environmental Policy and Decision Making  
BA, Canisius College, 1995  
BA, Victoria University Wellington, 1996  
MA, Colorado State University, 1999  
MA, PhD, Cornell College, 2002, 2004

Simms, Renee: Associate Professor, African American Studies  
BA, University of Michigan, 1988  
JD, Wayne State University, 1992  
MFA, Arizona State University, 2007

Smith, Jess: Assistant Professor, Theatre Arts  
BA, University of Puget Sound, 2005  
MFA, Columbia University, 2011

Smith, Katherine: Professor, History  
BA, Vassar College, 1998  
MA, MPHIL, PhD, New York University, 1999, 2001, 2004

Smith, Adam: Assistant Professor, Mathematics and Computer Science  
BA, Lewis Clark College, 1999  
MS, PhD, University of Wisconsin Madison, 2002, 2009

Smithers, Stuart: Professor, Religious Studies  
BA, San Francisco State University, 1980  
MA, MPHIL, PhD, Columbia University, 1984, 1985, 1992

Soumare, Rokiatou: Assistant Professor, French Studies  
MA, University of Oklahoma, 2009  
PhD, University of Oklahoma, 2016

Sousa, David: Professor, Politics and Government  
BA, University of Rhode Island, 1982  
PhD, University of Minnesota, 1991

Spivey, Amy: Professor, Physics  
BS, Westmont College, 1996  
MS, PhD, University of Colorado Boulder, 1999, 2003

Spivey, Mike: Professor, Mathematics and Computer Science  
BS, Samford University, 1994  
MS, Texas A&M University, College Station, 1997  
MA, PhD, Princeton University, 1999, 2001

Stambuk, Tanya: Professor, Music  
BM, MM, Juilliard School, 1982, 1983  
DMA, Rutgers University, 1994

Steele, Karin: Clinical Assistant Professor, Physical Therapy  
BA, University At Buffalo (SUNY), 1999  
DPT, University of Puget Sound, 2009

Stirling, Kate: Professor, Economics  
BA, Saint Martin’s University, 1980  
MA, PhD, University of Notre Dame, 1983, 1987

Stockdale, Jonathan: Professor, Religious Studies  
BA, Kenyon College, 1987  
MA, PhD, University of Chicago, 1993, 2004

Struna, Jason: Assistant Professor, Sociology and Anthropology  
BA, Metropolitan State University of Denver, 2003  
MA, University Colorado Denver, 2008  
PhD, University of California, Riverside, 2015

Sullivan, Peter: Assistant Professor, Economics  

Sultemeier, David: Visiting Assistant Professor, Biology  
BS, PhD, New Mexico State University, 2001, 2007

Swinth, Yvonne: Professor, Occupational Therapy  
BS, University of Puget Sound, 1984  
MS, PhD, University of Washington, 1991, 1997

Tamashiro, Joyce: Instructor, Biology  
BS, University of Puget Sound, 1978  
PhD, University of California, San Diego, 1985

Tanaka, Tsunefumi: Visiting Assistant Professor, Physics  
BS, Worcester Polytechnic Institute, 1990  
MS, PhD, Montana State University, 1992, 1997

Tepper, Jeff: Professor, Geology  
AB, Dartmouth College, 1981  
MS, PhD, University of Washington, 1985, 1991

Thatcher, Courtney: Assistant Professor, Mathematics and Computer Science  
BA, Boston University, 2001  
MS, PhD, University of Chicago, 2003, 2007

Thines, Bryan: Associate Professor, Biology  
BS, SUNY Plattsburgh, 2000  
PhD, Washington State University, 2006

Tiehen, Justin: Associate Professor, Philosophy  
BA, University of Chicago, 2000  
PhD, The University of Texas at Austin, 2007

Tomlin, George: Professor, Occupational Therapy  
BS, Massachusetts Institute of Technology, 1972  
MA, Boston University, 1979  
MS, University of Puget Sound, 1983  
PhD, University of Washington, 1996

Tracy Hale, Alison: Professor, English  
BA, University of California, Berkeley, 1985  
MA, Boston University, 1989  
MA, San Francisco State University, 1995  
PhD, University of Washington, 2005

Tromly, Benjamin: Professor, History  
BA, Grinnell College, 1999  

Tubert, Ariela: Professor, Philosophy  
BA, New York University, 1996  
MA, PhD, The University of Texas at Austin, 2001, 2005

Tullis, Alexa: Professor, Biology  
BA, University of California, Berkeley, 1987  
PhD, University of Chicago, 1994

Udbye, Andreas: Associate Professor, Business and Leadership  
BBA, Pacific Lutheran University, 1983  
MBA, University of Washington, 1988  
PhD, Portland State University, 2014

Utrata, Jennifer: Associate Professor, Sociology and Anthropology  
BA, University of Chicago, 1992  
MA, PhD, University of California, Berkeley, 2001, 2008

Valentine, Mike: Professor, Geology  
BS, SUNY Center Albany, 1975  
MA, PhD, University of Washington, 1975, 1990
Faculty

Vélez-Quiñones, Harry: Professor, Hispanic Studies  
BA, Washington University, 1982  
MA, PhD, Harvard, 1983, 1990

Villicana, Adrian: Assistant Professor, Psychology  
BA, University of the Redlands, 2008  
MA, California State University of San Bernardino, 2011  
PhD, University of Kansas, 2017

Walls, Kurt: Professor, Theatre Arts  
BT, Willamette University, 1981  
MFA, University of Washington, 1984

Warning, Matt: Professor, Economics  
BS, Auburn University, 1983  
MS, University of California, Davis, 1988  
MS, PhD, University of California, Berkeley, 1992, 1997

Warren, Suzanne: Visiting Assistant Professor, English  
AB, Bryn Mawr College, 2000  
MFA, University of Florida, 2004  
PhD, University of Cincinnati, 2011

Warren, Barbara: Professor, Exercise Science  
BS, Southwest Missouri State University, 1973  
MS, PhD, Indiana University Bloomington, 1974, 1982

Watling, Renee: Visiting Assistant Professor, Occupational Therapy  
BS, MS, PhD, University of Washington, 1992, 1998, 2004

Weinberger, Seth: Professor, Politics and Government  
BA, University of Chicago, 1993  
MA, Georgetown University, 1994  
PhD, Duke University, 2005

Weiss, Stacey: Professor, Biology  
BS, University of California, Los Angeles, 1991  
PhD, Duke University, 1999

Weisz, Carolyn: Professor, Psychology  
BA, Stanford University, 1987  
MA, PhD, Princeton University, 1989, 1992

Wesley, John: Associate Professor, English  
BA, The University of British Columbia, 2003  
PhD, University of St Andrews, 2008

White, Heather: Visiting Assistant Professor, Religious Studies/Gender and Queer Studies  
BA, Eastern University, 1997  
M.Div, Princeton Theological Seminary, 2000  
PhD, Princeton University, 2007

Wiese, Nila: Professor, Business and Leadership  
BS, Oklahoma State University, 1991  
MIM, Baylor University, 1992  
PhD, University of Oregon, 1996

Wilbur, Kirsten: Clinical Associate Professor, Occupational Therapy  
BA, Luther College, 1983  
BS, MS, University of Puget Sound, 1985, 2008  
EDD, University of Washington, 2016

Williams, Linda: Professor, Art and Art History  
BA, Sonoma State University, 1990  
MA, The University of Texas at Austin, 1992  
PhD, University of Washington, 2004

Wilson, Ann: Clinical Associate Professor, Physical Therapy  
BS, University of Puget Sound, 1989  
M.ED, University of Washington, 1994

Wilson, Paula: Professor, Business and Leadership  
BA, PhD, University of Washington, 1978, 1989

Wimberger, Peter: Professor, Biology  
BA, University of Washington, 1982  
PhD, Cornell University, 1991

Wittstruck, Anna: Assistant Professor, Music  
BA, Princeton University, 2009  
PhD, Stanford University, 2015

Wolf, Bianca: Associate Professor, Communication Studies  
BA, Arizona State University, 1998  
PhD, University of Iowa, 2009

Wood, Lisa: Professor, Psychology  
BA, MAT, PhD, University of Washington, 1975, 1979, 1987

Wood, Nicole: Visiting Assistant Professor  
BS, MS, California State University, Fullerton, 2005, 2008  
PhD, University of Northern Colorado, 2018-Anticipated

Woods, Carrie: Assistant Professor, Biology  
BS, MS, University of Guelph, 2002, 2008  
PhD, Clemson University, 2013

Worland, Rand: Professor, Physics  
BA, University of California, Los Angeles, 1977  
MA, PhD, University of California Santa Barbara, 1984, 1989

Yoshimura-Smith, Dawn: Visiting Instructor, Occupational Therapy  
BSOT, University of Puget Sound, 1983

Zopfi, Steven: Professor, Music  
BM, University of Hartford, 1987  
MFA, University of California, Irvine, 1992  
DMA, University of Colorado Boulder, 2001

Zylstra, Sheryl: Clinical Assistant Professor, Occupational Therapy  
BA, University of Washington, 1989  
MS, University of Illinois Chicago, 1995  
DROT, Temple University, 2015

Faculty Emeriti

Anton, Barry: Psychology  
BA, University of Vermont, 1969  
MS, PhD, Colorado State University, 1972, 1973

Baarsma, William: School of Business and Leadership  
BA, University of Puget Sound, 1964  
MA, DPA, George Washington University, 1966, 1972

Balaam, David: International Political Economy  
BA, California State University-Chico, 1972  
MA, PhD, University of California-Santa Barbara, 1974, 1978

Barnett, Suzanne Wilson: History  
BA, Muskingum College, 1961  
MA, PhD, Harvard University, 1963, 1973

Bauer, Wolfred: History/Associate Dean  
BA, PhD, University of Washington, 1951, 1964
Faculty

Bauska, Barry: English
BA, Occidental College, 1966
PhD, University of Washington, 1971

Block, Geoffrey: Music
BA, University of California, Los Angeles, 1970
MA, University of Michigan, 1973
Ph.D, Harvard Undergraduate Admissions, 1979

Breitenbach, William: Professor, History
BA, Harvard University, 1971
M Phil, PhD, Yale University, 1975, 1978

Cannon, Douglas: Philosophy
BA, Harvard University, 1973
PhD, Massachusetts Institute of Technology, 1982

Chandler, Lynette: Physical Therapy
BS, Simmons College, 1961
BA, MEd, PhD, University of Washington, 1967, 1974, 1983

Clayson, Shelby: Physical Therapy
BS, University of Minnesota, 1960
MS, University of Colorado, 1966

Clifford, H. James: Physics
BS, PhD, University of New Mexico, 1963, 1970

Colby, Bill: Art
BA, University of Denver, 1950
MA, University of Illinois, 1954

Cousens, Francis: English
BA, California State University-Los Angeles, 1956
MA, California State University-Northridge, 1963
PhD, University of Southern California, 1968

Danes, Zdenko F.: Physics
BS, PhD, Charles University, Prague, 1947, 1949

Dasher, William: Chemistry
BS, Western Washington University, 1974
PhD, University of Washington, 1980

Davis, Thomas A.: Mathematics and Computer Science/Dean
BA, Denison University, 1956
MS, University of Michigan, 1957
PhD, Cambridge University, 1963

Dickson, John: Business and Leadership
BA, Colorado College, 1965
MBA, Indiana University, 1967
PhD, University of Oregon, 1974

Duncan, Donald: Physical Education
BA, Washington State University, 1951
MS, University of Washington, 1969

Eggers, Albert: Geology
BS, Oregon State University, 1966
MA, PhD, Dartmouth College, 1968, 1971

English, John T.: Education
BA, MA, Michigan State University, 1961, 1964
PhD, University of Oregon, 1973

Fields, Ronald: Art
BA, Arkansas Polytechnic College, 1959
MA, University of Arkansas, 1960
PhD, Ohio University, 1968

Finney, John: Associate Dean/University Registrar and Associate Professor, Comparative Sociology
BA, University of Puget Sound, 1967
MS, PhD, University of Wisconsin, 1969, 1971

Frankel, Carol: Education
BA, MA, Stanford University, 1964, 1965
EdD, Washington State University, 1983

Garratt, Robert: Humanities
BA, MA, San Jose State University, 1964, 1969
PhD, University of Oregon, 1972

Goodman, Douglas: Economics
BS, Illinois College, 1972
MS, PhD, University of Illinois, 1975, 1978

Graham, Ernest: Psychology
BA, Western Washington University, 1960
MS, PhD, Washington State University, 1964, 1966
JD, University of Puget Sound, 1979

Greene, Mott: Science, Technology, and Society/Honors
BA, Columbia College, 1967
MA, PhD, University of Washington, 1974, 1978

Greenfield, Peter: English
BA, PhD, University of Washington, 1972, 1981
MA, Mills College, 1975

Grunberg, Leon: Sociology and Anthropology
BA, University of Sussex, 1970
Certificate of Education, University of Manchester, 1972
PhD, Michigan State University, 1979

Guilmet, George: Comparative Sociology
BS, MA, University of Washington, 1969, 1973
PhD, University of California-Los Angeles, 1976

Hale, Catherine: Psychology
BA, University of Maine-Orono, 1979
MA, PhD, Purdue University, 1982, 1986

Hansen, J. Tim: English
BA, Whitman College, 1956
MA, University of Washington, 1960
PhD, University of Oregon, 1965

Heimgartner, Norman: Education
BA, New York State University, 1952
MA, Columbia University, 1958
EdD, University of Northern Colorado, 1968

Hodges, Richard: Education
BEd, Oregon State University, 1952
BS, MS, Oregon College of Education, 1953, 1958
EdD, Stanford University, 1964

Holm, Margo B.: Occupational Therapy, OTR
BS, University of Minnesota, 1968
MEd, Pacific Lutheran University, 1978
PhD, University of Nebraska-Lincoln, 1980
Hostetter, Robert: Education  
BA, MA, Central Washington University, 1959, 1963  
EdD, University of Oregon, 1969

Hulbert, Duane: Music  
BM, MM, Juilliard School of Music, 1978, 1979  
DMA, Manhattan School of Music, 1986

Hummel-Berry, Kathleen: Physical Therapy  
BS, MEd, PhD, University of Washington, 1975, 1978, 2001

Kay, Judith: Religious Studies  
BA, Oberlin College, 1973  
MA, Pacific School of Religion, 1978  
PhD, Graduate Theological Union, 1988

Kerrick, Jerrill: Mathematics and Computer Science  
BA, MS, California State University-San Jose, 1962, 1967  
PhD, Oregon State University, 1971

Kline, Christine: Education  
BA, Mills College, 1967  
MA, University of Pennsylvania, 1968  
EdD, Rutgers, 1985

Lamb, Mary Rose: Biology  
BA, Reed University, 1974  
MLS, State University of New York-Albany, 1975  
PhD, Indiana University, 1983

Lind, R. Bruce: Mathematics and Computer Science  
BS, Wisconsin State University, 1962  
MS, PhD, University of Wisconsin, 1964, 1972

Lindgren, Eric: Biology  
BA, MA Walla Walla College, 1965, 1966  
PhD, University of North Carolina, 1972

Loeb, Paul: Philosophy  
BA, Cornell University, 1981  
PhD, University of California-Berkeley, 1991

Lupher, David: Classics  
BA, Yale University, 1969  
PhD, Stanford University, 1980

Mace, Terrence: Biology  
BA, Carleton College, 1968  
MS, University of Minnesota, 1971  
PhD, University of Montana, 1981

Mann, Bruce: Economics  
BA, Antioch College, 1969  
MA, PhD, Indiana University, 1974, 1976

Martin, Jacqueline: Foreign Languages and Literature  
BA, University of Washington, 1944  
MA, Boston University, 1952  
PhD, University of Oregon, 1966

Matthews, Robert: Mathematics and Computer Science  
BS, MS, PhD, University of Idaho, 1968, 1971, 1976

Maxwell, Keith: Business and Leadership  
BS, Kansas State University, 1963  
JD, Washburn University School of Law, 1966

McCuistion, John: Art  
BA, Humboldt State University, 1971  
MFA, University of Montana, 1973

McCullough, James: Business and Leadership  
BS, MS, University of California-Davis, 1965, 1970  
MBA, University of Houston, 1973 PhD, University of Washington, 1976

McGruder, Juli E.: Occupational Therapy  
BS, Indiana University, 1975  
MS, Indiana University-Indianapolis, 1979  
MA, PhD, University of Washington, 1994, 1999

Mehlhaaff, Curtis: Chemistry  
BS, University of California-Berkeley, 1961  
PhD, University of Washington, 1965  
JD, University of Puget Sound, 1989

Musser, Robert: Music  
BS, Lebanon Valley College, 1960  
MM, University of Michigan, 1966

Nagy, Helen: Art  
BA, MA, PhD, University of California-Los Angeles, 1969, 1973, 1978

Neel, Ann: Comparative Sociology  
BA, University of California-Riverside, 1959  
MA, PhD, University of California-Berkeley, 1965, 1978

Ostrom, Hans: English/African American Studies  
BA, MA, PhD, University of California-Davis, 1975, 1978, 1982

Overman, Richard: Religion  
BA, MD, Stanford University, 1950, 1954  
MTh, School of Theology, Claremont, 1961  
PhD, Claremont Graduate School, 1966

Peterson, Gary: Communication and Theatre Arts  
BA, University of Utah, 1960  
MA, PhD, Ohio University, 1961, 1963

Phibbs, Philip M.: President/Politics and Government  
BA, Washington State University, 1953  
MA, PhD, University of Chicago, 1954, 1957

Pierce, Susan R.: President/English  
AB, Wellesley College, 1965  
BA, University of Chicago, 1966  
PhD, University of Wisconsin-Madison, 1972

Pierson, Beverly: Biology  
BA, Oberlin College, 1966  
MA, PhD, University of Oregon, 1969, 1973

Potts, David B.: History  
BA, Wesleyan University, 1960  
MA, PhD, Harvard University, 1961, 1967

Rickoll, Wayne: Professor, Biology  
BS, Rhodes College, 1969  
MS, University of Alabama-Birmingham, 1972  
PhD, Duke University, 1977

Riegecker, John: Mathematics and Computer Science  
BA, Goshen College, 1968  
MS, Northern Illinois University, 1971  
PhD, University of Illinois-Chicago, 1976
Faculty

Rindo, John: Theatre Arts
BA, University of Wisconsin-Eau Claire, 1977
MS, PhD, University of Oregon, 1979, 1984

Rocchi, Michel: Professor, French Studies
BA, MA, University of Puget Sound, 1971, 1972
PhD, University of Washington, 1980

Rousslang, Kenneth: Chemistry
BA, Portland State University, 1970
PhD, University of Washington, 1976

Rowland, Thomas: Chemistry
BA, Catholic University of America, 1968
PhD, University of California-Berkeley, 1975

Royce, Jacalyn: Theatre Arts
BA, University of California-Santa Cruz, 1986
PhD, Stanford University, 2000

Sandler, Florence: English
BA, MA, University of New Zealand, 1958, 1960
PhD, University of California-Berkeley, 1968

Scott, David: Mathematics and Computer Science
BA, Grinnell College, 1964
MA, Brandeis University, 1966
PhD, University of Washington, 1978

Share, Donald: Politics and Government
BA, University of Michigan, 1977
MA, PhD, Stanford University, 1980, 1983

Singleton, Ross: Economics
BA, University of Wyoming, 1969
PhD, University of Oregon, 1977

Slee, Frederick: Physics
BS, MS, PhD, University of Washington, 1959, 1960, 1966

Smith, Bryan: Mathematics and Computer Science
BA, University of Utah, 1974
MS, PhD, University of Idaho, 1977, 1982

Smith, David: History
BA, Bristol University, 1963
MA, Washington University, 1965
PhD, University of Toronto, 1972

Sorensen, James: School of Music
BFA, MM, University of South Dakota, 1954, 1959
EdD, University of Illinois, 1971

Steiner, Robert: Education
BA, University of Washington, 1962
MS, PhD, Oregon State University, 1968, 1971

Stern, Lawrence: Philosophy
BA, Rutgers University, 1958
MA, PhD, Harvard University, 1962, 1968

Stone, Ronald: Occupational Therapy
BA, Bethel College, 1968
MS, Virginia Commonwealth University, 1974

Taranovski, Theodore: History
BA, University of California-Los Angeles, 1963
MA, PhD, Harvard University, 1965, 1976

Diversity Statement

We Acknowledge
• the richness of commonalities and differences we share as a university community.
• the intrinsic worth of all who work and study here.
• that education is enhanced by investigation of and reflection upon multiple perspectives.

We Aspire
• to create respect for and appreciation of all persons as a key characteristic of our campus community.
• to increase the diversity of all parts of our university community through commitment to diversity in our recruitment and retention efforts.
• to foster a spirit of openness to active engagement among all members of our campus community.

We Act
• to achieve an environment that welcomes and supports diversity.
• to ensure full educational opportunity for all who teach and learn here.
• to prepare effectively citizen-leaders for a pluralistic world.

Equal Opportunity Statement

University of Puget Sound does not discriminate in education or employment on the basis of sex, race, color, national origin, religion, creed, age, disability, marital or familial status, sexual orientation, veteran or military status, gender identity, political affiliation, family medical history or genetic information, or any other basis prohibited by local, state, or federal laws. This policy complies with the spirit and the letter of applicable federal, state, and local laws, including Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act of 1990. Questions about the policy may be referred to the university’s Chief Diversity Officer (253.879.2827) or the Office of Civil Rights, Department of Education, Washington, D.C., 20202.
