Features and Design

This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

- **Compact Design**
  This projector is designed compact in size and weight. It is easy to carry and work anywhere you wish to use.

- **Compatibility**
  The projector widely accepts various video and computer input signals including: Computers, 6 Color systems, Component video, S-video and RGB scart.

- **Simple Computer System Setting**
  The projector has the Multi-scan system to conform to almost all computer output signals quickly. PLC-XU48 accepts signals up to UXGA resolution. (See page 25, 55.)

- **Digital Zoom (for Computer)**
  The digital zoom function expands (to approx. 16 times of screen size) or compress the image size, allowing you to focus on crucial information at a presentation. (See page 31.)

- **Keystone Adjustment**
  The keystone correction function is provided to correct distortion of the projected image allowing you to use the projector without locational constraints. (See page 22 and 39.)

- **Power Management**
  The Power management function reduces power consumption and maintains the lamp life. (See page 41.)

- **User’s Logo**
  A projected image can be captured and used for the starting display of the projector with the Capture function. You can also display the captured image in an interval during your presentation instead of blackout image with the No show function. (See page 23 and 40.)

- **Selectable Lamp Mode**
  Brightness of the projection lamp can be selected in the Setting menu. (See page 42.)

- **Blackboard Function**
  Blackboard can be used as a projection screen. The board color is limited to Green. (See page 29 and 35.)

- **Film Function**
  The Film function reproduces pictures faithful to the original film quality from 3:2 pull-down video contents. (See page 37.)

- **PIN Code Lock Function**
  The PIN code lock function prevents others except users from using the projector. (See page 18 and 43.)

- **Multilanguage Menu Display**
  Operation menu is available in 12 languages; English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Russian, Chinese, Korean, or Japanese. (See page 39.)

- **Switcheable Interface Terminal**
  The projector provides a switcheable interface terminal. You can use the terminal as computer input or monitor output conveniently. (See page 41.)

Each name of corporations or products in this book is either a registered trademark or a trademark of its respective corporation.
Before operating this projector, read this manual thoroughly and operate the projector properly.

This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time.

Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the “Troubleshooting” section in the end of this booklet. If the problem still persists, contact the dealer where you purchased the projector or the service center.

---

**CAUTION**

**RISK OF ELECTRIC SHOCK**

**DO NOT OPEN**

**CAUTION**: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT.

THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER’S MANUAL WITH THIS UNIT.

---

**NOTE:** This symbol mark and recycle system are applied only to EU countries and not applied to the countries in the other area of the world.

Your SANYO product is designed and manufactured with high quality materials and components which can be recycled and reused.

This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste.

Please dispose of this equipment at your local community waste collection/recycling centre.

In the European Union there are separate collection systems for used electrical and electronic products.

Please help us to conserve the environment we live in!

---

**Safety Precaution**

**WARNING**: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

---

This projector produces intense light from the projection lens. Do not stare directly into the lens as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam.

Install the projector in a proper position. If not, it may result in a fire hazard.

Provide appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector. Minimum clearance must be maintained. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.

Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.

If the projector is not to be used for an extended time, unplug the projector from the power outlet.

READ AND KEEP THIS OWNER’S MANUAL FOR LATER USE.

**CAUTION ON HANGING FROM THE CEILING**

When hanging the projector from the ceiling, clean air intake vents, air filters, or top of the projector periodically with a vacuum cleaner. If you leave the projector without cleaning for a long time, the dust will block the operation of the cooling function, and it may cause a breakdown or a disaster.

DO NOT SET THE PROJECTOR IN GREASY, WET, OR SMOKY CONDITIONS SUCH AS IN A KITCHEN TO PREVENT A BREAKDOWN OR A DISASTER. IF THE PROJECTOR COMES IN CONTACT WITH OIL OR CHEMICALS, IT MAY BECOME DETERIORATED.

---

**CAUTION**

Ne peut être utilisé dans une salle d’ordinateurs telle que définie dans la norme ANSI/NFPA 75 Standard for Protection of Electronic Computer/Data Processing Equipment.
All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer’s instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not install the projector near the ventilation duct of air-conditioning equipment.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

Voor de klanten in Nederland

Bij dit product zijn batterijen geleverd.
Wanneer deze leeg zijn, moet u ze nietweggooiden maar inleveren als KCA.
**Air Circulation**

Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered.

⚠️ **CAUTION**

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.
- Do not put any flammable objects near the vent.
- Keep the exhaust vent at least 3’(1m) away from any objects.
- Do not touch a peripheral part of the exhaust vent, especially screws and metallic part. This area will become hot while the projector is being used.
- Do not put anything on the cabinet. The materials put on the cabinet will not only get damaged but also cause fire hazard by heat.

Cooling fans are provided to cool down the projector. This projector monitors internal temperature and control the running speed of the cooling fans.

**Installing the Projector in Proper Position**

Install the projector properly. Improper Installation may reduce the lamp life and cause a fire hazard.

- Do not tilt the projector more than 20 degrees above and below.
- Do not point the projector up to project an image.
- Do not point the projector down to project an image.
- Do not put the projector on either side to project an image.

**Moving the Projector**

When moving the projector, replace the Lens Cover and retract Adjustable Feet to prevent damage to the lens and cabinet.

⚠️ **USE CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR**

- Do not drop or bump a projector, otherwise damages or malfunctions may result.
- When carrying a projector, use a suitable carrying case.
- Do not transport a projector by using a courier or transport service in an unsuitable transport case. This may cause damage to a projector. To transport a projector through a courier or transport service, consult your dealer for their information.
Federal Communication Commission Notice

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

AC Power Cord Requirement

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).

AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

AC Power Cord for the United Kingdom:

This cord is already fitted with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA approved BS 1362 fuse must be used of the same rating, marked thus . If the fuse cover is detachable, never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug (i.e. red or orange). Fuse covers are available from the Parts Department indicated in your User Instructions.

The wires in this mains lead are coloured in accordance with the following code:
- Green-and-yellow ........... Earth
- Blue .......................... Neutral
- Brown ......................... Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
- The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ▼ or coloured green or green-and-yellow.
- The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
- The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

WARNING: THIS APPARATUS MUST BE EARTHED.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

Hot air is exhausted from the exhaust vent. Do not put heat-sensitive objects near this side.
**Rear Terminal**

1. **COMPUTER IN 1/ COMPONENT IN**  
   Connect output signal from a computer (Analog RGB) or video equipment (Component or RGB Scart) to this terminal. Optional cables are required when using this terminal as component input or RGB Scart 21-Pin Video input. (p15, 17)  
   When the cable is of the longer variety, it is advisable to use this terminal and not COMPUTER IN 2 / MONITOR OUT.

2. **SERVICE PORT**  
   This jack is used to service this projector.

3. **AUDIO IN**  
   Connect the audio output from video equipment connected to 4 or 8 to this jack. (When the audio output is monaural, connect it to L (MONO) jack.) (p16)

4. **VIDEO**  
   Connect the composite video output from video equipment to VIDEO jack. (p16)

5. **USB (Series B)**  
   Connect the USB port of your computer to this port when you wish to use the PAGE ▲▼ buttons on the remote control to scroll back and forth pages on the screen of the connected computer. (p15)

6. **AUDIO IN COMPUTER/ COMPONENT**  
   Connect the audio output (stereo) from a computer or video equipment connected to 1 or 3 to this jack. (p15, 17)

7. **AUDIO OUT(VARIABLE)**  
   Connect an external audio amplifier to this jack. (p15, 16, 17)  
   This terminal outputs sound from AUDIO IN terminal (3) or (8).

8. **S-VIDEO**  
   Connect the S-VIDEO output from video equipment to this jack. (p16)

9. **COMPUTER IN 2/ MONITOR OUT**  
   This terminal is switcheable and can be used for input from a computer or output to the other monitor. Set the terminal up as either Computer input or Monitor output properly. (Used for Monitor out, this terminal outputs only incoming signal from COMPUTER IN 1/ COMPONENT IN terminal.) (p15, 41)

* A built-in micro processor which controls this unit may occasionally malfunction and need to be reset. This can be done by pressing the RESET button with a pen, which will shut down and restart the unit. Do not use the RESET function excessively.
**Top Control**

1. **KEYSTONE button**  
   Corrects keystone distortion. (p22, 39)

2. **INPUT button**  
   Selects input source. (p24, 32)

3. **POWER ON–OFF button**  
   Turns the projector on or off. (p18, 19)

4. **SELECT button**  
   Executes the item selected. It is also used to expand/compress the image in Digital zoom +/- mode. (p31)

5. **POWER indicator**  
   Blinks red until the projector gets ready to be turned on. It turns red when the projector is in the stand-by mode. It remains green while the projector is under operation.

6. **WARNING indicator**  
   Lights red when the projector detects abnormal condition. This also blinks red when the internal temperature of the projector exceeds the operating range. (p45)

7. **LAMP REPLACE indicator**  
   Turns yellow when the life of the projection lamp draws to an end. (p48)

8. **POINT (▲▼◄►) button**  
   Selects an item or adjusts value in the On-Screen Menu. These are also used to pan the image in the Digital zoom +/- mode. (p31)
   Point ◄► button are used as VOLUME +/- button. (p23)

9. **MENU button**  
   Opens or closes the On-Screen Menu. (p20)
**Remote Control**

![Remote Control Diagram]

1. **POWER ON-OFF button**
   - Turns the projector on or off. (p18, 19)

2. **VIDEO button**
   - Selects VIDEO input source. (p32, 33)

3. **COMPUTER button**
   - Selects COMPUTER input source. (p24)

4. **MENU button**
   - Opens or closes the On-Screen Menu. (p20)

5. **PAGE ▼ button**
   - Scroll back and forth pages on the screen when giving a presentation. (p9, 15, 42) Connect the projector and your computer with a USB cable to use these buttons.

6. **D.ZOOM ▼ button**
   - Select the Digital zoom +/- mode and resize the image. (p31)

7. **AUTO PC button**
   - Automatically adjusts a computer image to its optimum setting. (p26)

8. **IMAGE button**
   - Selects image level. (p29, p35)

9. **FREEZE button**
   - Freezes the picture. (p22)

10. **MUTE button**
    - Mutes the sound. (p23)

11. **P-TIMER button**
    - Operates the P-timer function. (p23)

12. **NO SHOW button**
    - Temporarily turns off the image on the screen. (p23)

13. **KEYSTONE button**
    - Corrects the keystone distortion. (p22, p39)

14. **Point ▼ ◄ ► (VOLUME + / -) buttons**
    - Select an item or adjust value in the On-Screen Menu. (p20)
    - Pan the image in Digital zoom +/- mode. (p31)
    - Adjust volume level. (Point ◄ ► buttons)(p23)

15. **Select button**
    - Executes the selected item. (p20)
    - Expands/compresses the image in Digital zoom mode. (p31)

---

**Operating Range**

Point the remote control toward the projector (Infrared Remote Receiver) when pressing any button. Maximum operating range for the remote control is about 16.4' (5m) and 60° in front of the projector.

---

To ensure safe operation, please observe the following precautions:
- Do not bend, drop the remote control or expose Remote Control to moisture or heat.
- For cleaning, use soft dry cloth. Do not apply benzene, thinner, splay or any chemical material.
Remote Control Battery Installation

1. Remove the battery compartment lid.

   Pull up and remove the lid.

2. Slide the batteries into the compartment.

   Two AAA size batteries
   For correct polarity (+ and -), be sure battery terminals are in contact with pins in compartment.

3. Replace the compartment lid.

To ensure safe operation, please observe the following precautions:

- Use (2) AAA, SUM-4 or R03 type alkaline batteries.
- Replace two batteries at the same time.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid.
- Do not expose the remote control to moisture, or heat.
- Do not drop the remote control.
- If a battery has leaked on remote control, carefully wipe case clean and install new batteries.
- Risk of explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.
**Positioning the Projector**

This projector is designed to project on a flat projection surface and can be focused from 4.3'(1.3m) - 32.8'(10.0m). Refer to the figure and the table below for the screen size and the distance between the projector and the screen.

\[ A : B = 9 : 1 \]

<table>

</tbody>
</table>

✓ **Note:**
- The brightness in a room has a great influence on picture quality. It is recommended to limit ambient lighting in order to obtain the best image.
- The values shown above are approximate and may vary from the actual size.

**Adjustable Feet**

Projection angle can be adjusted up to 11.8 degrees with the adjustable feet.

1. Lift the front of the projector and pull upward the feet lock latches on both sides of the projector.

2. Release the feet lock latches to lock the adjustable feet and rotate the adjustable feet to adjust the position and tilt.

3. To retract the adjustable feet, lift the front of the projector and pull and undo the feet lock latches. Keystone distortion of the projected image can be adjusted by menu operation. (p22, 39)
**Connecting the AC Power Cord**

This projector uses nominal input voltages of 100-120 V or 200-240 V AC. This projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce risk of electrical shock, do not plug into any other type of power system. Consult your authorized dealer or service station if you are not sure of the type of power being supplied. Connect the projector with all peripheral equipment before turning the projector on. (See page 15-17 for connection.)

---

**CAUTION**

For safety, unplug AC power cord when the projector is not in use. When this projector is connected to an outlet with AC power cord, it is in Stand-by mode and consumes a little electric power.

---

**NOTE ON THE POWER CORD**

AC power cord must meet requirement of the country where you use a projector. Confirm an AC plug type with the chart below and proper AC power cord must be used. If supplied AC power cord does not match your AC outlet, contact your sales dealer.

<table>

Connecting to a Computer

Cables used for connection
- VGA Cables (HDB 15 pin) (Only a cable is supplied.)
- USB Cable *
- Audio Cables (Mini Plug; stereo) *
(*= Not supplied with this projector.)

Note:
- If you wish to use Page ▲▼ buttons on the remote control, connect USB port of your computer to the USB socket of the projector. (p9 and 42)
- When connecting AUDIO OUT to external audio equipment, the projector’s built-in speaker is disconnected.
- When the cable is of the longer variety, it is advisable to use the COMPUTER IN 1 / COMPONENT IN and not the COMPUTER IN 2 / MONITOR OUT.
- Input sound to the COMPUTER/COMPONENT AUDIO IN terminal when using the COMPUTER IN 2 / MONITOR OUT terminal as input.

Note:
When connecting the cable, the power cords of both the projector and the external equipment should be disconnected from AC outlet.
Connecting to Video Equipment

Cables used for connection

- Video and Audio Cable (RCA x 3)
- S-VIDEO Cable
- Audio Cables (Mini Plug: stereo)

(✽ = Not supplied with this projector.)

Note:

- The S-VIDEO jack has priority over the VIDEO jack under the condition of connecting both the S-VIDEO jack and the VIDEO jack when selecting AUTO in the Input Menu.
- Input sound to the COMPUTER/COMPONENT AUDIO IN terminal when using the COMPUTER IN 2/MONITOR OUT terminal as input.
- When connecting AUDIO OUT to external audio equipment, the projector’s built-in speaker is disconnected.

Note:

When connecting the cable, the power cords of both the projector and the external equipment should be disconnected from AC outlet.
Connecting to Component Video Equipment

Cables used for connection
- Audio Cables (Mini Plug (stereo) x 2 or RCA x 2) ✽
- Scart-VGA Cable ✽
- Component-VGA Cable ✽
- Component Cable ✽
(✽ = Not supplied with this projector.)

Note:
When connecting the cable, the power cords of both the projector and the external equipment should be disconnected from AC outlet.
Turning On the Projector

1. Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.

2. Connect the projector’s AC power cord into an AC outlet. The POWER indicator blinks red in a moment and lights red.

3. Press the POWER ON-OFF button on the top control or on the remote control. The POWER indicator turns green lighting and the cooling fans start to operate. The preparation display appears on the screen and the countdown starts.

4. After the countdown, the input source that was selected last and the Lamp mode status icon (see page 42) appear on the screen.

   If the projector is locked with a PIN code, PIN code Input Dialog Box will appear. Enter the PIN code as instructed below.

Enter a PIN code

Select a number by pressing the Point ▲ button and fix the number with the SELECT button. The number will change to “✳”. If you fixed a wrong number, move the pointer to “Set” or “Clear” once by pressing the Point ▼ button, then return to “PIN code”. Enter the correct number again. Repeat this step to complete entering a four-digit number.

When the four-digit number is fixed, the pointer will automatically move to “Set”. Press the SELECT button so that you can start to operate the projector.

If you entered a wrong PIN code, “PIN code” and the number (✳✳✳✳) will turn red and disappear. Enter a correct PIN code all over again.

What is PIN code?

PIN code is a security code using Personal Identification Number that allows the person who knows it to operate the projector. Setting PIN code prevents others except the specific users from operating the projector.

A PIN code consists of a four-digit number. Refer to PIN Code Lock function in Setting on page 43 for locking operation of the projector with your PIN code.

CAUTION ON HANDLING PIN CODE

If you forget your PIN code, the projector can no longer be started. Set a new PIN code with special care, write it down in column on page 59 of this manual, and keep it at hand. Should the PIN code be missing or forgotten, consult your dealer or service center.

✔ Note:

• If the correct PIN code number is not input for 3 minutes after the PIN code dialog box appeared, the projector will be turned off automatically.
**Turning Off the Projector**

1. Press the POWER ON-OFF button on the top control or on the remote control, and a message “Power off?” appears on the screen.

2. Press the POWER ON-OFF button again to turn off the projector. The POWER indicator starts to blink red, and it continues while the cooling fans are operating for about 90 seconds. (About 120 seconds when the fan mode is L2. See page 44.)

3. When the projector has cooled down enough to be turned on again, the POWER indicator lights red. Then you can disconnect the AC power cord.

---

**Note:**

- The projector cannot be turned on during the cooling period with the POWER indicator blinking red. You can turn it on again after the POWER indicator lights red.
- When the On start function is on, this projector is turned on automatically by connecting the AC power cord to an AC outlet. (See page 41 for the On start function)
- Do not operate the projector continuously without rest. Continuous use may result in shortening the lamp life. Turn off the projector and give it a rest about an hour in every 24 hours.
- This projector monitors internal temperature and automatically controls the running speed of the cooling fans.
- If the WARNING indicator blinks or lights red, see “Warning Indicator” on page 45.

---

The message disappears after 4 seconds.
How to Operate the On-Screen Menu

The projector can be adjusted or set via the On-Screen Menu. Refer to the following pages regarding each adjustment and setting procedure.

1. Press the MENU button to display the On-Screen Menu.

2. Press the Point ▶ buttons to select a Menu icon to adjust. Press the Point ▲ buttons to select an item to adjust.

3. Press the SELECT button to show the item data. Press the Point ▶ buttons to adjust the data. Refer to the following pages for respective adjustment.

✔ Note:

The selected item is not in effective until the SELECT button is pressed.
**Menu Bar**

For computer source

- **Guide Window**
  Shows the selected Menu of the On-Screen Menu.

- **PC System Menu**
  Used to select computer system. (p25)

- **Image Select Menu**
  Used to select an image level among Standard, Real, Blackboard(Green), and Image 1 ~ 4. (p29)

- **Screen Menu**
  Used to adjust size of image. [Normal / True / Wide / Digital zoom +/-] (p31)

- **Setting Menu**
  Used to change settings of the projector or reset lamp replace counter. (p39-44)

- **Input Menu**
  Used to select input source either Computer or Video. (p24)

- **PC Adjust Menu**
  Used to adjust parameters to match with input signal format. (p26-28)

- **Image Adjust Menu**
  Used to adjust computer image. [Contrast / Brightness / Color temp. / White balance (R/G/B) / Sharpness / Gamma] (p30)

- **Sound Menu**
  Used to adjust volume or mute sound. (p23)

For video source

- **Input Menu**
  Used to select input source either Video or Computer. (p33)

- **Image Select Menu**
  Used to select an image level among Standard, Cinema, Blackboard(Green) and Image 1 ~ 4. (p35)

- **Screen Menu**
  Used to set size of image to Normal or Wide. (p38)

- **Input**
  Used to select input source either Computer or Video. (Refer to p34)

- **AV System Menu**
  Used to select system of selected video source. (Refer to p34)

- **Image Adjust Menu**
  Used to adjust picture image. [Contrast / Brightness / Color / Tint / Color temp. / White balance (R/G/B) / Sharpness / Gamma / Progressive / Film] (Refer to p36, 37)

- **Same function as menu for computer source.**
**Zoom and Focus Adjustment**

Rotate the Zoom Ring to zoom in and out. Rotate the Focus Ring to adjust the projected picture focus.

**Keystone Adjustment**

If a projected picture has keystone distortion, correct the image with KEYSTONE adjustment.

1. Press the KEYSTONE button on the top control, the remote control or select Keystone in the Setting Menu (p39). The keystone dialog box appears.

2. Correct keystone distortion by pressing the Point ▲▼ button. Keystone adjustment can be memorized. (p39)

- The arrows are white when there is no correction.
- The arrows disappear at the maximum correction.
- The direction of the arrow being corrected turns red.
- If you press the KEYSTONE button on the top control or on the remote control once more while the keystone dialog box is being displayed, the keystone adjustment will be canceled.

**Picture Freeze Function**

Press the FREEZE button on the remote control to freeze the picture on the screen. To cancel the FREEZE function, press the FREEZE button again or press any other button. (p11)
No Show Function

Press the NO SHOW button on the remote control to black out the image. To restore to normal, press the NO SHOW button again or press any other button. When a projected image is captured and set as “User” in the Logo item in the Setting Menu (p40), the screen changes each time you press the NO SHOW button as follows.

black out ➔ the captured image ➔ normal ➔ • • • • •

P-Timer Function

Press the P-TIMER button on the remote control. The timer display “00 : 00” appears on the screen and the timer starts to count time (00 : 00 ~ 59 : 59).

To stop the P-Timer, press the P-TIMER button. And then, press the P-TIMER button again to cancel the P-Timer function.

Sound Adjustment

Direct Operation

Volume
Press the VOLUME (+/-) button on the top control or on the remote control to adjust volume. The volume dialog box appears on the screen for a few seconds.

(+ button to turn up the volume and (-) button to turn down the volume.

Mute
Press the MUTE button on the remote control to cut off sound.

To restore sound to its previous level, press the MUTE button again or press the VOLUME (+/-) button.

Menu Operation

1 Press the MENU button and the On-Screen Menu will appear. Press the Point button to move the red frame pointer to the Sound Menu icon.

2 Press the Point button to move the red frame pointer to the item that you want to select, and then press the SELECT button.

Volume
Press the Point button to turn up the volume, and press the Point button to turn down the volume.

Mute
Press the Point button to cut off sound. Dialog box display is changed to “On” and sound is cut off. To restore sound to its previous level, press the Point button again.
**Input Source Selection**

**Direct Operation**
Choose either Computer 1 or Computer 2 by pressing the INPUT button on the top control or press the COMPUTER button on the remote control. Before using these buttons, correct input source should be selected through menu operation as described below.

**Menu Operation**

1. Press the MENU button and the On-Screen Menu will appear. Press the Point ▶ button to move the red frame pointer to the Input Menu icon.

2. Press the Point ▼ button to move the red arrow pointer to either Computer 1 or Computer 2, and then press the SELECT button.

3. After the Source Select Menu appears for Computer 1, move the pointer to RGB and then press the SELECT button.

**RGB**
When the input source is analog coming from a computer through the COMPUTER IN 1/COMPONENT IN terminal, select RGB.

**Component**
See “Selecting Input Source (Component / RGB-Scart 21-pin)” on p33.

**RGB (Scart)**
See “Selecting Input Source (Component / RGB-Scart 21-pin)” on p33.

![Diagram of Input Menu and Source Select Menu]

**Note:**
Computer 2 is not displayed when the COMPUTER IN 2/MONITOR OUT terminal is used as Monitor out. (p41)
Computer System Selection

This projector automatically tunes to various types of computers based on VGA, SVGA, XGA or SXGA with its Multi-scan system and Auto PC Adjustment. If Computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional setting. (Signal formats provided in this projector is shown on page 55)

Note:
The projector may display one of the following messages.

- **Auto**
  When the projector cannot recognize connected signal conforming to PC Systems provided in this projector, Auto PC Adjustment function works to display proper images and the message “Auto” is displayed on the PC System menu box. When the image is not projected properly, manual adjustment is required. (p27, 28)

- **-----**
  There is no signal input from computer. Check the connection of your computer and the projector. ( "Troubleshooting" p50)

- **Mode 1**
  User preset system manually adjusted in PC Adjust menu. Adjustment data can be stored in Mode 1 - 5. (p27, 28)

- **SVGA 1**
  PC Systems provided in the projector. The projector chooses a proper system and displays it.

*Mode 1 and SVGA 1 are examples.

Selecting Computer System Manually

PC system can also be selected manually.

1. Press the MENU button and the On-Screen Menu will appear. Press the Point ▶️ buttons to move the red frame pointer to the PC System Menu icon.

2. Press the Point ▼️ button to move the red arrow pointer to the system that you want to set, and then press the SELECT button.

PC System Menu

The Auto PC Adjustment function operates to adjust the projector.

Mode 1 and SVGA 1 are examples.
**Auto PC Adjustment**

Auto PC Adjustment function is provided to automatically adjust Fine sync, Total dots, Horizontal, and Vertical to conform to your computer. Auto PC Adjustment function can be operated as follows.

1. Press the MENU button to display the On-Screen Menu. Press the Point button to move the red frame pointer to PC Adjust Menu icon.

2. Press the Point button to move the red frame pointer to Auto PC Adj. icon and then press the SELECT button twice. This Auto PC Adjustment can be also executed by pressing the Auto PC button on the remote control unit.

**To store adjustment parameters**

Adjustment parameters from Auto PC Adjustment can be memorized in this projector. Once parameters are memorized, the setting can be done just by selecting Mode in the PC System Menu (p25). See “Store” on page 28.

**Note:**

- Fine sync, Total dots and Picture Position of some computers can not be fully adjusted with this Auto PC Adjustment function. When the image is not provided properly with this operation, manual adjustments are required. (p27, 28)
- The Auto PC Adjust cannot be operated when 480i, 575i, 480p, 575p, 720p, 1035i, or 1080i is selected in the PC System Menu.
**Manual PC Adjustment**

Some computers employ special signal formats which may not be tuned by Multi-scan system of this projector. Manual PC Adjustment enables you to precisely adjust several parameters to match those signal formats. The projector has 5 independent memory areas to memorize those parameters manually adjusted. It allows you to recall the setting for a specific computer.

1. Press the MENU button and the On-Screen Menu will appear. Press the Point ▼ button to move the red frame pointer to the PC Adjust Menu icon.
2. Press the Point ▼ button to move the red frame pointer to the item that you want to adjust and then press the SELECT button. An adjustment dialog box will appear. Press the Point ▼ button to adjust value.

- **Fine sync**
  Eliminates flicker from the image displayed. Press the Point ▼ button to adjust value. (From 0 to 31)

- **Total dots**
  Adjusts the number of total dots in one horizontal period. Press the Point ▼ button and adjust number to match your PC image.

- **Horizontal**
  Adjusts horizontal picture position. Press the Point ▼ button to adjust the position.

- **Vertical**
  Adjusts vertical picture position. Press the Point ▼ button to adjust the position.

- **Current mode**
  Press the SELECT button to show H-Freq. and V-Freq. of the connected computer.

- **Clamp**
  Adjusts clamp level. When the image has dark bars, try this adjustment.

**PC Adjust Menu**

- **Fine sync**
  Adjusts the number of total dots in one horizontal period.

- **Total dots**
  Adjusts horizontal picture position.

- **Vertical**
  Adjusts vertical picture position.

- **Current mode**
  Shows status (Stored / Free) of the selected Mode.
  Press the SELECT button at this icon to adjust the other items.

- **Clamp**
  Adjusts clamp level. When the image has dark bars, try this adjustment.

**Current mode**

- **H-Sync freq.**
  Adjusts H-Freq. of the connected computer.

- **V-Sync freq.**
  Adjusts V-Freq. of the connected computer.
**Display area**
Select the resolution at the Display area dialog box.

**Display area H**
Adjusts the horizontal area displayed by this projector. Press the Point ▲▼ button to decrease/increase value and then press the SELECT button.

**Display area V**
Adjusts the vertical area displayed by this projector. Press the Point ▲▼ button to decrease/increase value and then press the SELECT button.

**Full screen**
With this function on, SXGA image is fully displayed at 4:3 aspect ratio. It is displayed at 5:4 aspect ratio with this function off.

**Reset**
Resets all adjustment to their previous levels.

**Store**
To store adjustment data, move the red frame pointer to the Store icon and then press the SELECT button. Move the red arrow pointer to any of Mode 1 to 5 in which you want to store and then press the SELECT button.

**Mode free**
To clear adjustment data previously set, move the red frame pointer to the Mode free icon and then press the SELECT button. Move the red arrow pointer to the Mode that you want to clear and then press the SELECT button.

**Quit**
Exits the PC Adjust Menu.

**Note:**
Auto PC Adjust, Display area, Display area (H/V), and Full screen cannot be selected when “480i”, “575i”, “480p”, “575p”, “720p”, “1035i”, or “1080i” is selected in the PC System Menu (p.25).
**Image Level Selection**

**Direct Operation**

Select an image level among Standard, Real, Blackboard(Green), Image 1, Image 2, Image 3, and Image 4 by pressing the IMAGE button on the remote control.

*Standard*
Normal picture level preset on this projector.

*Real*
Picture level with improved halftone for graphics.

*Blackboard(Green)*
Picture level suitable for the image projected on a blackboard (Green). This mode assists to enhance the image projected on a blackboard. This is mainly effective on a green colored board, not truly effective on a black colored board.

*Image 1—4*
User preset image in the Image Adjust Menu (p30).

**Menu Operation**

1. Press the MENU button and the On-Screen Menu will appear. Press the Point button to move the red frame pointer to the Image Select Menu icon.

2. Press the Point button to move the red frame pointer to the level that you want to set and then press the SELECT button.

*Standard*
Normal picture level preset on this projector.

*Real*
Picture level with improved halftone for graphics.

*Blackboard(Green)*
Picture level suitable for the image projected on a blackboard (Green). See above for further description.

*Image 1—4*
User preset image in the Image Adjust Menu (p30).
**Image Level Adjustment**

1. Press the MENU button and the On-Screen Menu will appear. Press the Point button to move the red frame pointer to the Image Adjust Menu icon.

2. Press the Point button to move the red frame pointer to the item that you want to adjust, and then press the SELECT button. The level of each item is displayed. Adjust each level by pressing the Point button.

- **Contrast**
  Press the Point button to decrease contrast and the Point button to increase contrast. (From 0 to 63.)

- **Brightness**
  Press the Point button to adjust image darker and the Point button to adjust image brighter. (From 0 to 63.)

- **Color temp.**
  Press the Point button or the Point button for Color temp. level that you want to select. (XLow, Low, Mid, or High)

- **White balance (Red)**
  Press the Point button to lighten red tone and the Point button to deepen red tone. (From 0 to 63.)

- **White balance (Green)**
  Press the Point button to lighten green tone and the Point button to deepen green tone. (From 0 to 63.)

- **White balance (Blue)**
  Press the Point button to lighten blue tone and the Point button to deepen blue tone. (From 0 to 63.)

- **Sharpness**
  Press the Point button to soften the image and the Point button to sharpen the image. (From 0 to 15.)

- **Gamma**
  Press the Point button to obtain better balance of contrast. (From 0 to 15.)

- **Reset**
  Resets all adjustment to their previous levels.

- **Store**
  To store the image data adjusted manually, move the red frame pointer to the Store icon and press the SELECT button. The Image Level Menu will appear. Move the red frame pointer to the Image 1 to 4 where you want to set and then press the SELECT button.

- **Quit**
  Closes the Image Adjust Menu.
Screen Size Adjustment

This projector has a picture screen resize function, which enables you to display the desirable image size.

1. Press the MENU button and the On-Screen Menu will appear. Press the Point ▶ button to move the red frame pointer to the Screen Menu icon.

2. Press the Point ▼ button and move the red frame pointer to the function that you want to select and then press the SELECT button.

Normal
Provides image to fit screen size.

True
Provides image in its original size. When the original image size is larger than the screen size (1024 x 768), this projector enters “Digital zoom +” mode automatically.

Wide
Provides image to fit wide video aspect ratio (16 : 9) by expanding image width uniformly. This function can be used for providing a squeezed video signal at 16 : 9.

Digital zoom +
When the Digital zoom + is selected, the On-Screen Menu disappears and the message “D. Zoom +” is displayed. Press the SELECT button to expand the image size. And press the Point ▲ ▼ ▶ button to pan the image. The Panning function can work only when the image is larger than the screen size. A projected image can be also expanded by pressing the D.ZOOM ▲ button on the remote control.

Digital zoom –
When the Digital zoom – is selected, the On-Screen Menu disappears and the message “D. Zoom –” is displayed. Press the SELECT button to compress the image size. A projected image can be also compressed by pressing the D.ZOOM▼ button on the remote control.

To exit the Digital zoom +/- mode, press any button except the D.ZOOM▲▼ buttons, SELECT, and Point button.

To return to the previous screen size, select a screen size from the Screen Size Adjustment or select an input source from the Input source from the Input Source Selection (p24) again, or adjust the screen size with the D.ZOOM buttons.

Note:
- This Screen Menu cannot be operated when “720p (HDTV)”, “1035i (HDTV)”, or “1080i (HDTV)” is selected in the PC System Menu (p25).
- The True and Digital zoom +/– cannot be selected when “480i”, “575i”, “480p”, or “575p” is selected in the PC System Menu (p25).
- This projector cannot display any resolution higher than 1280 x 1024. If your computer’s screen resolution is higher than 1280 x 1024, reset the resolution to the lower before connecting to the projector.
- The image data in other than XGA (1024 x 768) is modified to fit the screen size in initial mode.
- The panning function may not operate properly if the computer system prepared in the PC Adjust Menu is used.
- The minimum compression ratio can be limited depending on the input signal or when the Keystone function is working.
**Input Source Selection (Video, S-Video)**

**Direct Operation**
Choose Video by pressing the INPUT button on the top control or the VIDEO button on the remote control. Before using these buttons, correct input source should be selected through menu operation as described below.

**Menu Operation**

1. Press the MENU button and the On-Screen Menu will appear. Press the Point button to move the red frame pointer to the Input Menu icon.

2. Press the Point button to move the red arrow pointer to Video and then press the SELECT button. The Source Select Menu will appear.

3. Move the pointer to the source that you want to select and then press the SELECT button.

**Auto**
When selecting Auto, the projector automatically detects incoming video signal, and adjusts itself to optimize its performance. The projector selects connection in the following order:

1st S-Video
2nd Video

The S-VIDEO jack has priority over the VIDEO jack under the condition of connecting both the S-VIDEO jack and the VIDEO jack.

**Video**
When video input signal is connected to the VIDEO jack, select Video.

**S-Video**
When video input signal is connected to the S-VIDEO jack, select S-Video.

**Note:**

When Monitor out is selected at the Terminal item in the Setting Menu, Computer 2 is not displayed. (p41)
**Input Source Selection (Component, RGB Scart 21-Pin)**

**Direct Operation**

Choose Computer 1 by pressing the INPUT button on the top control or press the COMPUTER button on the remote control. Before using these buttons, correct input source should be selected through menu operation as described below.

**Menu Operation**

1. Press the MENU button and the On-Screen Menu will appear. Press the Point button to move the red frame pointer to the Input Menu icon.

2. Press the Point button to move the red arrow pointer to Computer 1, and then press the SELECT button. The Source Select Menu will appear.

3. Move the pointer to the correct input source and then press the SELECT button.

**Component**  
When the input source is coming from video equipment connected to the COMPUTER IN 1/COMPONENT IN terminal with a Component-VGA Cable, select Component.

**RGB (Scart)**  
When the input source is coming from video equipment connected to the COMPUTER IN 1/COMPONENT IN terminal with a Scart-VGA Cable, select RGB (Scart).

**Note:**
- Component-VGA Cable and Scart-VGA Cable are optionally supplied. See page 58 for order.
- Computer 2 is not displayed when the COMPUTER IN 2/MONITOR OUT terminal is used as Monitor out. (p41)
**Video Input**

**Video System Selection**

1. Press the MENU button and the On-Screen Menu will appear. Press the Point button to move the red frame pointer to the AV System Menu icon.

2. Press the Point button to move the red arrow pointer to the system that you want to select and then press the SELECT button.

**Video or S-Video**

**Auto**
The projector automatically detects incoming video system, and adjusts itself to optimize its performance.

When Video System is PAL-M or PAL-N, select system manually.

**PAL / SECAM / NTSC / NTSC4.43 / PAL-M / PAL-N**

If the projector cannot reproduce proper video image, it is necessary to select a specific broadcast signal format among PAL, SECAM, NTSC, NTSC 4.43, PAL-M, and PAL-N.

**Component**

**Auto**

The projector automatically detects incoming video signal, and adjusts itself to optimize its performance.

**COMPONENT VIDEO SIGNAL FORMAT**

If the projector cannot reproduce proper video image, it is necessary to select a specific component video signal format among 480i, 575i, 480p, 575p, 720p, 1035i, and 1080i.

**Note:**
The AV System Menu cannot be selected when selecting RGB(Scart).

---

![AV System Menu](image)
**Image Level Selection**

**Direct Operation**

Select a desired image level among Standard, Cinema, Blackboard (Green), Image 1, Image 2, Image 3, and Image 4 by pressing the IMAGE button on the remote control.

**Standard**
Normal picture level preset on this projector.

**Cinema**
Picture level adjusted for the picture with fine tone.

**Blackboard (Green)**
Picture level suitable for the image projected on a blackboard (Green). This mode assists to enhance the image projected on a blackboard. This is mainly effective on a green colored board, not truly effective on a black colored board.

**Image 1–4**
User preset image in the Image Adjust Menu (p36, 37).

---

**Menu Operation**

1. Press the MENU button and the On-Screen Menu will appear. Press the Point button to move the red frame pointer to the Image Select Menu icon.

2. Press the Point button to move the red frame pointer to the level that you want to set and then press the SELECT button.

   - **Standard**
     Normal picture level preset on this projector.

   - **Cinema**
     Picture level adjusted for the picture with fine tone.

   - **Blackboard (Green)**
     Picture level suitable for the image projected on a Blackboard (Green). See above for further description.

   - **Image 1–4**
     User preset image in the Image Adjust Menu (p36, 37).
**Image Adjust Menu**

1. Press the MENU button and the On-Screen Menu will appear. Press the Point button to move the red frame pointer to the Image Adjust Menu icon.

2. Press the Point button to move the red frame pointer to the item that you want to adjust and then press the SELECT button. The level of each item is displayed. Adjust each level by pressing the Point button.

- **Contrast**
  Press the Point button to decrease contrast and the Point button to increase contrast. (From 0 to 63.)

- **Brightness**
  Press the Point button to adjust image darker and the Point button to adjust image brighter. (From 0 to 63.)

- **Color**
  Press the Point button to lighten color and the Point button to deepen color. (From 0 to 63.)

- **Tint**
  Press the Point button to obtain proper color. (From 0 to 63.)

- **Color temp.**
  Press the Point button for Color temp. level that you want to select. (XLow, Low, Mid, or High)

- **White balance (Red)**
  Press the Point button to lighten red tone and the Point button to deepen red tone. (From 0 to 63.)

- **White balance (Green)**
  Press the Point button to lighten green tone and the Point button to deepen green tone. (From 0 to 63.)

- **White balance (Blue)**
  Press the Point button to lighten blue tone and the Point button to deepen blue tone. (From 0 to 63.)

- **Sharpness**
  Press the Point button to soften the image and the Point button to sharpen the image. (From 0 to 15)

- **Gamma**
  Press the Point button to obtain better balance of contrast. (From 0 to 15.)

**Note:**
The Tint cannot be adjusted when the video system is PAL, SECAM, PAL-M, or PAL-N.
Progressive

Interlaced video signal can be displayed in a progressive picture.

- Off . . . .Not activated.
- L1 . . . .Select “L1” for an active picture.
- L2 . . . .Select “L2” for a still picture.

Film

This function is effective on 3:2 pulldown video source. With this function On, the projector reproduces pictures faithful to the original film quality.

Reset

Resets all adjustment to their previous figure.

Store

To store the adjustment data, move the red frame pointer to the Store icon and press the SELECT button. The Image Level Menu will appear. Move the red frame pointer to the Image Level 1 to 4 and then press the SELECT button.

Quit

Closes the Image Adjust Menu.

✔ Note:

- Progressive cannot be selected when 480p, 575p, 720p, 1035i, or 1080i is selected.
- Film can only be activated when selecting NTSC for Video System and L1/L2 for Progressive and in any state shown below:
  1. When selecting NTSC, NTSC4.43 PAL-M or 480i in the Video System Selection (p34).
  2. When selecting Auto and signal is NTSC, NTSC4.43, PAL-M(Composite) or 480i(Composite) in the Video System Selection (p34).
- 3:2 Pulldown or Telecine transfer is the process of changing images from film mode to video mode. While film runs at 24 frames per second (fps), NTSC television signals (or video) have a run rate of 30fps so the 24 fps film needs to be speeded up to 30fps and transferred using a proper field pattern to get the best film-like images.
Screen Size Adjustment

This projector has a picture screen resize function, which enables you to display the desirable image size.

1. Press the MENU button and the On-Screen Menu will appear. Press the Point button to move the red frame pointer to the Screen Menu icon.

2. Press the Point button and move the red frame pointer to the function that you want to select and then press the SELECT button.

- **Normal**
  Provides image at a normal video aspect ratio of 4 : 3.

- **Wide**
  Provides image at a wide screen ratio of 16 : 9.

**Note:**

Screen Menu cannot be operated when “720p”, “1035i”, or “1080i” is selected in the AV System Menu (p.34).
Setting

This projector has Setting menu that allows you to set up the other various functions described as follows;

1. Press the MENU button to display the On-Screen Menu. Press the Point button to move the red frame pointer to the Setting Menu icon.

2. Press the Point button to move the red frame pointer to the item that you want to set and then press the SELECT button. The Setting dialog box appears.

Language

The language used in the On-Screen Menu is available in English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Russian, Chinese, Korean, or Japanese.

Keystone

This function corrects distortion of a projected image. Select either Store or Reset with the Point button, and then press the Select button. The keystone dialog box appears. Adjust keystone with the Point button.

Store . . . . . stores the keystone adjustment even if the AC power cord is disconnected.

Reset . . . . . resets the keystone adjustment when the AC power cord is disconnected.

Blue back

When this function is “On,” the projector produces a blue image while input signal is not detected.

Display

This function decides whether to display On-Screen Displays.

On . . . . . . . shows all the On-Screen Displays.

Off . . . . . . does not show On-Screen Displays except;

- On-Screen Menu
- “Power off?” message
- P-Timer
- “No signal” message
- “Wait a moment!” message

Logo PIN Code Lock

This function prevents others except specific users from changing the Logo setting.

Off . . . . . . . the Logo setting can be changed freely from the Logo menu. (p40)

On . . . . . . . the Logo setting cannot be changed without the Logo PIN code.

If you want to change the Logo PIN Code Lock setting, enter a Logo PIN code along the following steps. The initial Logo PIN code is set "4321" at the factory.
**Setting**

**Enter a Logo PIN code**
Select a number by pressing the Point button and fix the number with the SELECT button. The number will change to “✳”. If you fixed a wrong number, move the pointer to “Set” or “Clear” once by pressing the Point button, then return to “Logo PIN code”. Enter the correct number again.

Repeat this step to complete entering a four-digit number.

When the four-digit number is fixed, the pointer will automatically move to “Set”. Press the SELECT button so that you can change the Logo PIN code lock setting.

If you entered a wrong Logo PIN code, “Logo PIN code” and the number (✳✳✳✳) will turn red and disappear. Enter a correct Logo PIN code all over again.

**Change the Logo PIN code**
Logo PIN code can be changed to your desired four-digit number. Select ‘Logo PIN code change’ with the Point button and press the SELECT button. Set a new Logo PIN code.

Be sure to note the new Logo PIN code and keep it at hand. If you lost the number, you could no longer change the Logo PIN code setting. For details on PIN code setting, refer to relevant instructions of the PIN Code Lock function on page 43.

**Logo**
This function decides what to be displayed on the starting-up display as follows:
- User . . . . . the image you captured
- Default . . . . the factory-set logo
- Off . . . . . . count-down only

**Capture**
This function enables you to capture the image being projected and use it for a starting-up display or interval of presentations.

After capturing the projected image, go to the Logo function and set it to “User”. Then the captured image can be displayed when turning on the projector next time or pressing the NO SHOW button. (p23)

To capture the image, select [Yes]. To cancel the Capture function, select [No].

**Note:**
- Before capturing an image, select Standard in the Image Select Menu to capture a proper image. (See page 29, 35.)
- A signal from a computer can be captured up to XGA (1024 x 768). A signal from video equipment can be captured except for 720p, 1035i, and 1080i.
- When capturing the image that has been adjusted by the Keystone function, the adjustment data is automatically reset and the projector captures an image without keystone adjustment.
- When the Logo PIN code lock function is On, the Logo and Capture menu cannot be selected.
- When starting to capture a new image, the previously stored image is cleared even if you cancel the capturing.

**Logo PIN Code Lock Dialog Box**
After a correct Logo PIN code is entered, the following dialog box will appear.

**Change the Logo PIN code**
Logo PIN code can be changed to your desired four-digit number. Select ‘Logo PIN code change’ with the Point button and press the SELECT button. Set a new Logo PIN code.

Be sure to note the new Logo PIN code and keep it at hand. If you lost the number, you could no longer change the Logo PIN code setting. For details on PIN code setting, refer to relevant instructions of the PIN Code Lock function on page 43.
**Setting**

### Ceiling
When this function is “On,” the picture is top/bottom and left/right reversed. This function is used to project the image from a ceiling mounting the projector.

### Rear
When this function is “On,” the picture is left/right reversed. This function is used to project the image to a rear projection screen.

### Terminal
The COMPUTER IN 2/MONITOR OUT terminal on the back of the projector is switchable for computer input or monitor output. (See page 9) Select Computer 2 or Monitor Out with the Point button.

- Computer 2 . . . . computer input
- Monitor Out . . . . monitor out

Terminal item is not available when selecting Computer 2 to the input source. Change the input source to the others (Computer1 or Video) so that the Terminal item will be available. (p24, 32, 33)

### Power management
For reducing power consumption as well as maintaining the lamp life, the Power Management function turns off the projection lamp when the input signal is interrupted and no button is pressed for 30 seconds or more.

If the input signal is interrupted and no button is pressed for 30 seconds or more, the timer display with the message “No signal” appears on the screen. The count-down of the set time will get started. The count-down time can be set between 1 and 30 minutes.

When the count-down time has been elapsed, the lamp will be turned off to cool itself down. The POWER indicator is blinking red during this cooling-off period. The next operation depends on the setting as follows:

- **Ready** . . . . . . When the lamp has been fully cooled down, the POWER indicator changes to green blinking. In this condition, the projection lamp will be turned on if the input signal is reconnected or any button on the top control or remote control unit is pressed.
- **Shutdown** . . . . When the lamp has been fully cooled down, the power will be turned off.
- **Off** . . . . . . . . . The Power Management function is canceled.

### On start
When this function is “On,” the projector is automatically turned on just by connecting the AC power cord to a wall outlet.

**Note:**
Be sure to turn the projector off properly (see “Turning Off the Projector” on page 19). If the projector is turned off in the wrong steps, the On start function does not operate properly.
Setting

**Lamp mode**
This function allows you to change brightness of the screen.

- **Normal** brightness
- **Controlled** brightness according with input signal
- **Lower** brightness reduces the lamp power consumption and extends the lamp life

✓ Note: Lamp mode is not switched into Eco mode within 2 minutes after the projector is turned on.

**Remote control**
This projector provides two different remote control codes; the factory-set, initial code (Code 1) and the secondary code (Code 2). This switching function prevents remote control interference when operating several projectors or video equipment at the same time.

When operating the projector in “Code 2”, both the projector and the remote control must be switched to “Code 2”.

To change the code for the projector: Select either “Code 1” or “Code 2” in this Setting Menu.

To change the code for the remote control: Press and hold both the MENU and IMAGE buttons together for 10 seconds or more. After changing the code, make sure the remote control operates properly.

**USB**
This projector is equipped with the USB port for interactive operation between the projector and computer. Selects either of the followings as needed.

- **When using the PAGE buttons on the remote control unit.** (p11)
- **When controlling the projector with a computer.**
  This item is provided for future use. Not available now.

**Key lock**
This function locks operation of the top control and remote control. It is useful to prevent operation by an unauthorized person.

- **Not locked.**
- **Locks operation of the top control.** To unlock, use the remote control.
- **Locks operation of the remote control.** To unlock, use the top control.

If the top control accidentally becomes locked and you do not have the remote control nearby, disconnect the AC power cord from the AC outlet, and then while pressing the SELECT button, reinsert the AC power cord. This will release the top control lock.

Remote control
Press and hold MENU and IMAGE buttons for 10 seconds or more.

USB
Select Key lock and this box appears. Choose one of these with the Point ▲▼ button and select [Yes] to activate it.
**PIN code lock**

This function prevents the projector from being operated by an unauthorized person and provides the following settings for security options.

- **Off**.............the projector is unlocked with the PIN code.
- **On1**.............requires to enter the PIN code every time turning on the projector.
- **On2**...........requires to enter the PIN code to operate the projector once the power cord is disconnected; as long as the AC power cord is connected, the projector can be operated without the PIN code.

To change the PIN Code Lock setting or the PIN code (the four-digit number), you are required to enter the PIN code. “1234” is set as the initial PIN code at the factory.

**Enter a PIN code**

Select a number by pressing the Point button and fix the number with the SELECT button. The number will change to “*”. If you fixed a wrong number, move the pointer to “Set” or “Clear” once by pressing the Point button, then return to “PIN code”. Enter the correct number again. Repeat this step to complete entering a four-digit number.

When the four-digit number is fixed, the pointer will automatically move to “Set”. Press the SELECT button so that you can change the following PIN code lock settings.

If you entered a wrong PIN code, “PIN code” and the number (****) will turn red and disappear. Enter a correct PIN code all over again.

**To Change the PIN Code Lock setting**

Select Off, On1, or On2 with the Point button and then “Quit” with the Point button and press the SELECT button to close the dialog box.

**To Change the PIN Code**

The PIN code can be changed to your desired four-digit number.

Select “PIN code change” with the Point button, and press the SELECT button. The New PIN code input dialog box will appear.

Select a number with the Point button and fix the number with the SELECT button. Repeat it to complete entering a four-digit number. When the four-digit number is fixed, the pointer will automatically move to “Set”. Then press the SELECT button.

**CAUTION:**

WHEN YOU HAVE CHANGED PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE PIN CODE NO. MEMO ON PAGE 59, AND KEEP IT SECURELY. SHOULD THE PIN CODE BE LOST OR FORGOTTEN, THE PROJECTOR CAN NO LONGER BE OPERATED.
**Setting**

*Fan*
This function provides you the following alternatives in the cooling fans operation after turning off the projector.
- **L1** ... normal operation
- **L2** ... slower operation than the normal (L1), but takes longer to cool down the projector. In this mode, cooling time after turning off the projector will be extended longer than in the normal mode.

*Lamp counter reset*
This function is used to reset the lamp replace counter. When replacing the projection lamp, reset the lamp replace counter by using this function. See page 49 for operation.

*Factory default*
This function returns all setting values except for the user logo, PIN code lock, logo PIN code lock and the lamp counter to the factory default settings.
**Warning Indicator**

The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator and the POWER indicator to take proper maintenance.

---

**The projector is shut down and the WARNING indicator is blinking red.**

When the temperature inside the projector exceeds the normal temperature, the projector is automatically shut down to protect the inside of the projector. The POWER indicator is blinking and the projector is being cooled down. When the temperature inside the projector returns to normal, the POWER indicator lights red and the projector can be turned on.

✔ **Note:**

After the temperature inside the projector returns to normal, the WARNING indicator still continues to blink. When the projector is turned on again, the WARNING indicator stops blinking.

---

**Then check the matters below:**

- Did you provide appropriate space for the projector to be ventilated? Check the installing condition to see if ventilation slots are not blocked.
- Is the projector not installed near the ventilation duct of air-conditioning equipment which may be hot? Install the projector away from the ventilation duct of air-conditioning equipment.
- Are the air filters clean? Clean the air filters periodically.

---

**The projector is shut down and the WARNING indicator lights red.**

When the projector detects an abnormal condition, it is automatically shut down to protect the inside and the WARNING indicator lights red. In this case, disconnect the AC power cord and reconnect it, and then turn the projector on once again for check. If the projector is still turned off and the WARNING indicator lights red, disconnect the AC power cord and contact the service station for check and repair.

---

**CAUTION**

DO NOT LEAVE THE PROJECTOR WITH THE AC POWER CORD CONNECTED UNDER THE ABNORMAL CONDITION. IT MAY RESULT IN FIRE OR ELECTRIC SHOCK.
Cleaning the Air Filters

Air filters prevent dust from accumulating on the surface of the optical elements inside the projector. Should the air filters become clogged with dust particles, it will reduce cooling fans’ effectiveness and may result in internal heat build up and adversely affect the life of the projector. Clean the air filters following the steps below.

1. Turn off the projector, and disconnect the AC power cord from the AC outlet.
2. Turn the projector upside down and remove the air filters by pulling the latches upward.
3. Clean the air filters with a brush or rinse them softly.
4. When cleaning the air filters by rinsing, dry them well. Replace the air filters properly. Make sure that the air filters are fully inserted.

**CAUTION**
Do not operate the projector with the air filters removed. Dust may accumulate on the LCD panel and the projection mirror degrading picture quality. Do not put small parts into the air intake vents. It may result in malfunction of the projector.

**RECOMMENDATION**
We recommend avoiding dusty/smoky environments when operating the projector. Usage in these environments may cause poor image quality.

When using the projector under dusty or smoky conditions, dust may accumulate on a lens, LCD panels, or optical elements inside the projector. This condition may degrade the quality of a projected image.

When the symptoms above are noticed, contact your authorized dealer or service station for proper cleaning.

Attaching the Lens Cover

When moving this projector or while not using it over an extended period of time, replace the lens cover.

1. Pass the string through a hole of the lens cover.
2. Turn the projector upside down.
3. Attach the string with lens cover to a hole on the bottom of the projector and secure it with a screw.
Cleaning the Projection Lens

Follow these steps to clean the projection lens.

1. Disconnect the AC power cord before cleaning.

2. Softly wipe the projection lens with a cleaning cloth that contains a small amount of non-abrasive camera lens cleaner, or use lens cleaning paper or a commercially available air blower to clean the lens. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface.

3. When the projector is not in use, replace the lens cover.

Cleaning the Projector Cabinet

Follow these steps to clean the projector cabinet.

1. Disconnect the AC power cord before cleaning.

2. Softly wipe the projector body with a soft, dry cleaning cloth. When it is heavily soiled, use a small amount of mild detergent and finish with a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface.

3. When the projector is not in use, put the projector in an appropriate carrying case to protect it from dust and scratches.
Lamp Replacement

When the life of the projection lamp of this projector draws to an end, the LAMP REPLACE indicator lights yellow. If this indicator lights yellow, replace the lamp with a new one promptly.

Follow these steps to replace the lamp.

1. Turn off the projector and disconnect the AC plug. Allow the projector to cool for at least 45 minutes.

2. Loosen the screw with a screwdriver, and remove the lamp cover.

3. Loosen 2 screws of the lamp with a screwdriver and pull out the lamp by grasping the handle.

4. Replace the lamp with a new one and tighten the 2 screws back into position. Make sure that the lamp is set properly. Replace the lamp cover and tighten the screw.

5. Connect the AC power cord to the projector and turn on the projector.

6. Reset the Lamp replace counter. See “Lamp Replace Counter” on the next page.

CAUTION

Allow a projector to cool, for at least 45 minutes before you open the Lamp cover. The inside of the projector can become very hot.

CAUTION

For continued safety, replace with a lamp of the same type. Do not drop a lamp or touch a glass bulb! The glass can shatter and may cause injury.

ORDER REPLACEMENT LAMP

Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

- Model No. of your projector: PLC-XU41 / PLC-XU47 / PLC-XU48
- Replacement Lamp Type No.: POA-LMP79 (for PLC-XU41) (Service Parts No. 610 315 5647)
POA-LMP55 (for PLC-XU47 / PLC-XU48) (Service Parts No. 610 309 2706)
**Lamp Replace Counter**

Be sure to reset the lamp replace counter after the lamp is replaced. When the lamp replace counter is reset, the LAMP REPLACE indicator stops lighting.

1. Turn the projector on, press the MENU button and the On-Screen Menu will appear. Press the Point \[\rightarrow\] button to move the red frame pointer to the Setting Menu icon.

2. Press the Point \[\downarrow\] button to move the red frame pointer to the Lamp counter reset item and then press the SELECT button. The message “Lamp replace counter Reset?” is displayed. Move the pointer to [Yes] and then press the SELECT button.

3. Another confirmation dialog box appears and select [Yes] to reset the Lamp replace counter.

**Note:**

Do not reset the Lamp replace counter without implementation of lamp replacement. Be sure to reset the Lamp replace counter only after replacing the lamp.

---

**LAMP HANDLING PRECAUTIONS**

This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in accidents, injury, or create a fire hazard.

- **Lamp life may differ from lamp to lamp and according to the environment of use.** There is no guarantee of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps.

- **If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE indicator lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down.** (Follow carefully the instructions in the Lamp Replacement section of this manual.) Continuous use of the lamp with the LAMP REPLACE indicator lighted may increase the risk of lamp explosion.

- **A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.**

**IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.**

If a lamp explodes, disconnect the projector’s AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.
Troubleshooting

Before calling your dealer or service center for assistance, check the items below once again.

- Make sure you have properly connected the projector to peripheral equipment as described in “Connecting to a Computer” and “Connecting to Video Equipment” on page 15–17.
- Make sure all equipment is connected to AC outlet and the power is turned on.
- If the projector does not project an image being operated with a computer, restart the computer.

<table>
<thead>
<tr>
<th>Problem:</th>
<th>Solutions</th>
</tr>
</thead>
</table>
| No power | - Plug the power cord of the projector into the AC outlet.  
- See if the POWER indicator lights red.  
- Wait 90-120 seconds after the projector is turned OFF when turning the projector back on. The projector can be turned on after the POWER indicator turns red. (See “Turning Off the Projector” on page 19.)  
- Check the WARNING indicator. If the WARNING indicator lights red, the projector cannot be turned on. (See 'Warning Indicator' on page 45.)  
- Check the projection lamp. (See page 48.)  
- Unlock Key lock for the projector in the Setting Menu. (See page 42.) |
| Image is out of focus. | - Adjust focus of the projector. (See page 22.)  
- Provide proper distance between the projector and the projection screen. (See page 13.)  
- Check the projection lens to see if it needs cleaning. (See page 47.)  
- Moving the projector from a cool to a warm place may result in moisture condensation on the projection lens. In such cases, leave the projector OFF and wait until condensation disappears. |
| No image | - Check the connection between your computer or video equipment and the projector. (See page 15–17)  
- See if the input signal is correctly output from your computer. Some laptop computers may need to change the setting for monitor output when connecting to a projector. See your computer’s instruction manual for the setting.  
- It takes about 20 seconds to display an image after turning on the projector.  
- See if the selected system is corresponding with your computer or video equipment. (See page 25 and 34)  
- Select correct input source once again through menu operation. (See page 24, 32 and 33)  
- Make sure the temperature is not out of the specified Operating Temperature (5°C ~ 35°C). |
| Image is Left/Right reversed. |
| image is Top/Bottom reversed. | - Check the Ceiling / Rear item. (See “Setting” on page 41.)  
- Check the Ceiling item. (See “Setting” on page 41.) |
| No sound | - Check audio cable connection from audio input source.  
- Adjust the audio source.  
- Press the Volume (+) button. (See page 23)  
- Press the Mute button. (See page 23) |
Some displays are not seen during the Operation. – Check the Display item. (See “Setting” on page 39.)

PIN code dialog box appears at start-up. – PIN code lock is being set. Input a PIN code (1234 or numbers you have set). (See “PIN code lock” on page 18 and 43.)

Computer 2 cannot be selected. – Select Computer 2 at the Terminal item in the Setting Menu. (See “Setting” on page 41.)

The Terminal item cannot be selected. – The Terminal item in the Setting Menu cannot be selected after Computer 2 is selected. Select other input source such as Computer 1 or Video with the INPUT button on the top control, the COMPUTER button or the VIDEO button on the remote control so that the Terminal item can be selected.

The Remote Control does not work. – Check the batteries.
- Make sure no obstruction is between the projector and remote control.
- Make sure you are not too far from the projector when using the remote control. Maximum operating range is 16.4’ (5m).
- Make sure the code of the remote control is conformed to the projector. (See page 42.)
- Unlock Key lock for the remote control in the Setting Menu. (See page 42.)

Page Up/Down function does not work. – Make sure your computer is connected to the projector with a USB cable. (See page 15.)
- Check cable connection between the projector and your computer. (See page 15.)

WARNING:
High voltages are used to operate this projector. Do not attempt to open the cabinet.

If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Give the model number and explain about the problem. We will advise you how to obtain service.
### Indicators and Projector Condition

Check the indicators to see the projector condition.

<tr>
<td>Computer/ Component Audio Input Jacks</td>
<td>Mini Jack (stereo) x 1</td>
</tr>
<tr>
<td>Service Port Connector</td>
<td>Mini DIN 8 pin x 1</td>
</tr>
<tr>
<td>USB Connector</td>
<td>USB Series B receptacle x 1</td>
</tr>
<tr>
<td>Audio Output Jack</td>
<td>Mini Jack (stereo) x 1 (Variable)</td>
</tr>
</tbody>
</table>

## Audio

<table>
<thead>
<tr>
<th>Description</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Internal Audio Amp</td>
<td>1.0W RMS</td>
</tr>
<tr>
<td>Built-in Speaker</td>
<td>1 speaker, ø1.1” (28mm)</td>
</tr>
</tbody>
</table>

## Power

<table>
<thead>
<tr>
<th>Description</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voltage and Power Consumption</td>
<td>AC 100 ~ 120 V (3.6 A Max. Ampere), 50 / 60 Hz (The U.S.A and Canada)</td>
</tr>
<tr>
<td></td>
<td>AC 200 ~ 240 V (1.8 A Max. Ampere), 50 / 60 Hz (Continental Europe and The U.K.)</td>
</tr>
</tbody>
</table>

## Operating Environment

<table>
<thead>
<tr>

<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating Temperature</td>
<td>41 ℉ ~ 95 ℉ (5 ℃ ~ 35 ℃)</td>
</tr>
<tr>
<td>Storage Temperature</td>
<td>14 ℉ ~ 140 ℉ (-10℃ ~ 60 ℃)</td>
</tr>
</tbody>
</table>

## Remote Control

<table>
<thead>
<tr>
<th>Description</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Battery</td>
<td>AAA, SUM-04 or R03 Type x 2</td>
</tr>
<tr>
<td>Operating Range</td>
<td>16.4˚ (5m) / ±30˚</td>
</tr>
<tr>
<td>Dimensions</td>
<td>2.0” x 0.91” x 4.8” (51.5mm x 23.2mm x 123mm)</td>
</tr>
<tr>
<td>Net Weight</td>
<td>2.11 oz (60g) (including batteries)</td>
</tr>
</tbody>
</table>
## Accessories

- Owner’s Manual
- AC Power Cord
- Remote Control and Batteries
- VGA Cable
- Lens Cover with String and Screw
- PIN Code Label

- The specifications are subject to change without notice.

- LCD panels are manufactured to the highest possible standards. Even though 99.99% of the pixels are effective, a tiny fraction of the pixels (0.01% or less) may be ineffective by the characteristics of the LCD panels.

- The On-Screen Menu and figures in this manual may differ slightly from the product.
## Configurations of Terminals

### COMPUTER INPUT/COMPONENT INPUT/MONITOR OUTPUT TERMINAL (ANALOG)

Terminal : HDB15-PIN

#### Pin Configuration

## Optional Parts

The parts listed below are optionally available. When ordering those parts, give the item name and Model No. to the sales dealer.

**Model No.**

**COMPONENT-VGA Cable** : POA-CA-COMPVGA

**SCART-VGA Cable** : POA-CA-SCART

(This cable is used for RGB Scart 21-Pin Video output of video equipment.)

**Laser pointer remote control unit** : POA-RCKIT03

**Presentation Kit** : POA-RCKIT02
**PIN Code Number Memo**

Write down the PIN code number in the column below and keep it with this manual securely. If you forgot or lost the number and unable to operate the projector, contact the service station.

**PIN Code Lock No.**

Factory default set No.: 1 2 3 4*

**Logo PIN Code Lock No.**

Factory default set No.: 4 3 2 1*

*Should the four-digit number be changed, the factory set number will be invalid.

**While the projector is locked with the PIN code...**

Put a label below on in a prominent place of the projector’s body while it is locked with a PIN code. The label is provided with the product to identify the projector locked with a PIN code.
