2021-2022 CURRICULUM GUIDE

CHEMISTRY/DUAL DEGREE ENGINEERING

DEGREE: BA

CONTACT PERSON: JOHANNA CRANE, CHEMISTRY/ RAND WORLAND, PHYSICS

A SUGGESTED three-year program:

This is provided as a guide for a possible sequence for completing everything in 3 years. Other sequences are possible. Please talk with your advisor and Director of the Dual Degree Engineering program. Those students with advanced standing (transfer credit, AP, IB etc.) will have more flexibility.

- 2) By arrangement with the Chemistry Department a student could take a chemical engineering course at an affiliate school which would satisfy this requirement. Columbia University, Washington University (St. Louis), and the University of Southern California have specific requirements which can be met by choosing core classes appropriately. See the Dual Degree Engineering requirements. At least 0.5 units at the 300-400 level required by major.
- 3) A minimum grade of C must be earned in all courses for the major.

*Meet with advisor to ensure that major requirements as well as university requirements are met.

NOTES

A grade of C or higher is required in all major courses at Puget Sound.

A higher GPA is necessary for successful admission to the affiliate engineering programs. Students pursuing Dual-Degree Engineering (DDE) should work closely with the Dual Degree Engineering Director early in their Puget Sound careers to ensure that all the requirements are met.

*These major requirements may be used to fulfill university cores.

**Students with sufficient background and preparation in high school chemistry and calculus may test out of Chemistry 110 and/or Mathematics 180/181.

#CHEM 231 (if needed) is exempt from the tuition overload policy.

Refer to the Bulletin for additional courses recommended for Biomechanical, Electrical, Chemical or Mechanical Engineering.
