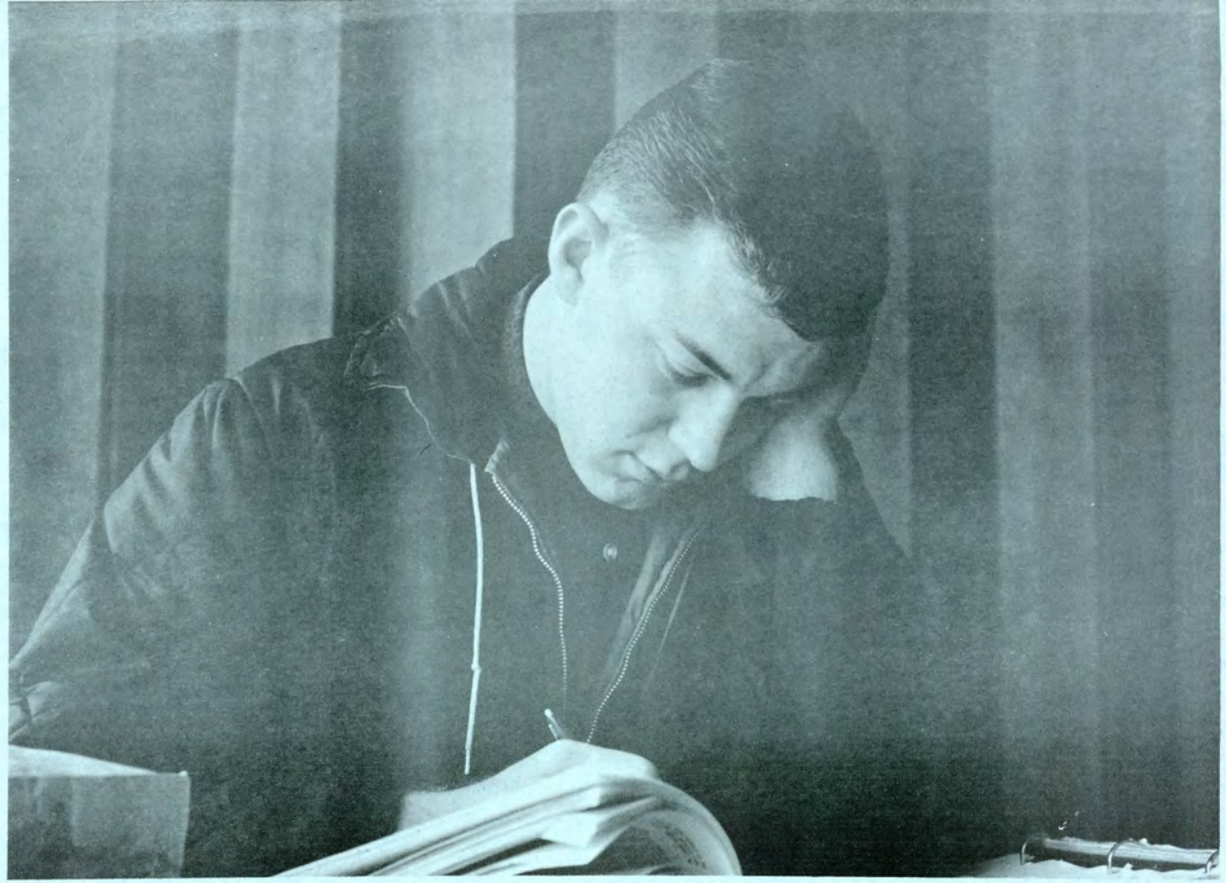
LIBRARY ARCHIVES

Freshman Curriculum Guide 1964-65



The freshman curriculum guide is designed to assist you in planning your first year of study at the University of Puget Sound. The information about courses in the guide will help you prepare for your faculty appointment and serve as a class schedule for your freshman year.

Entering students generally approach their college planning with one of three attitudes: those who are interested in a specific field, those interested in several fields and those undecided about a particular field of study.

If your plans are somewhat definite, the best approach is to tentatively choose those courses you believe are necessary. You will be able to determine the necessary courses by referring to the general University requirements and those special requirements of the major field which interests you. The general and special requirements are listed in the University Bulletin. After consulting with your faculty advisor, the final decision about your class program can be made.

If you are interested in several fields, you should choose basic courses in those fields. Through this introduction, you probably will be able to determine in which field you would like to continue your studies. It is also important that general University requirements be included in your class schedule.

If you have not chosen a particular field of study and have no preferences at this time, we suggest you take introductory courses in several fields which might interest you. After taking some basic courses, you should be able to determine a field of study in which you would like to major. You should inform your faculty advisor that you have not chosen a specific field and he will be able to suggest basic courses which will serve as an introduction to major fields and also fulfill general University requirements.

GENERAL REQUIREMENTS

To broaden the educational experience of the students who attend the University of Puget Sound they are enrolled in both the liberal arts and sciences curriculum as part of their degree program. The general University requirements for undergraduates in addition to major study requirements are as follows:

a. English Composition, 6 credit hours.

b. Physical Education, 5 semester hours
Men who take the first four semesters of Air Science will need to take only three semester hours of PE simultaneously.

c. Natural Science, a one-year laboratory course in a biological science and a one-year laboratory course in a physical science, except if a student has completed a unit of either type of science in high school, he may satisfy the requirement by a one-year course in the other type; and if, he has completed a unit in each, he may satisfy the requirement by one year of any laboratory science or of Mathematics 111 and 112.

d. Social Studies, not less than nine semester hours from specified courses. These requirements may be met by choice from courses in Economics, History, Political Science, Psychology and Sociology. A student majoring in Economics, History, Political Science, Psychology or Sociology must fulfill the nine hours of general college requirements from the social science area outside his major.

e. Humanities, not less than nine semester hours which shall be from specified courses and shall include three semester hours of religion. Selections to meet these requirements may be made from courses in Art, English, Music, Philosophy, Religion and Mathematics 151.

NOTE: Certain major studies leading to Bachelor of Arts and Bachelor of Science degrees require study in a foreign language and for the Bachelor of Science, additional science courses.

Generally freshmen should consider study in each of the fields listed above. A typical freshman course should include 12-17 hours, and vary according to the student's ability and outside responsibility.

<u>The following courses are expected to be taken the freshman year:</u>

1. English Composition
2. Physical Education
   a. For men: PE 1 or 2
   b. For women: PE 51

<u>A student should also include in their program:</u>

1. A course in the natural sciences.
   a. One of the elementary courses in Biology, Botany, Chemistry, Geology, Physics, Physical Science or Math 111 or 112. *
2. A course in the humanities, specifically Religion 101. *
3. A course in the social studies area. *
4. Students working for the degrees of Bachelor of Arts and Bachelor of Science must complete two college years, or the equivalent, in one foreign language. Students with one year of a foreign language in high school should enter the second semester of the elementary course, with two years, the first semester of intermediate course.

* Refer to the general University requirements for specific information.

UNIVERSITY ADVANCED PLACEMENT EXAMINATIONS

Many freshmen begin college already prepared for an advanced course of study. Entering students at the University of Puget Sound who have proven scholastic ability and intellectual desire are encouraged to participate in the UPS Advanced Placement Program.

Special examinations conducted on campus September 11, and offered by cooperating departments, will be used to determine the students qualifications for advanced placement and credit. Any student who has had honors courses or advanced placement opportunities in high school, or other special background, may use this opportunity to establish his proficiency in any introductory course.

Any student who qualifies under this program will be eligible for advanced course work in the area of his examination and will be given semester hours of credit (no letter grade) comparable to that earned for completion of a similar course at the University of Puget Sound.

If students have not already completed the College Board Advanced Placement Examinations, they may arrange for local examinations by notifying the Office of Admissions.

MAJOR FIELDS OF STUDY

A student at the University of Puget Sound may declare an academic major sometime after the first semester of the freshman year but before the beginning of the junior year. A major field seldom constitutes more than one third but never less than one fifth of a student's total course work. Thus a student is able to select courses outside his major field which will broaden his academic background.

The University catalog should be used as a reference in determining requirements, prerequisites, course descriptions and other details which are listed under each major or career field. In the bulletin each course is assigned a value in terms of class hours. For example, a literature class is listed as <u>World Literature -- English 131, 132 Credit, 3 semester hours each semester</u> which means that each semester a student would receive three credits for attending the class three times a week. In college a student receives approximately an hour of credit for each hour in class and usually will spend fifteen to sixteen hours in class a week. To graduate a student needs 120 academic hours in addition to five hours in physical education. Therefore, a student should take thirty to thirty-two hours a year or fifteen to sixteen hours each semester to complete a degree program in four years.

First Semester, 1964-65

Advanced Placement Testing	September 11
Freshman Registration	September 14
Freshman Orientation	September 15, 16
Classes begin	Thursday, September 17
Latest date for discontinuing a course without F unless work is satisfactory to date of withdrawal	Friday, October 9
Latest date for removal of INC grades	Friday, October 30
Mid-semester	Friday, November 13
Thanksgiving Holiday begins at noon	Wednesday, November 25
Ends at 8:00 a.m.	Monday, November 30
Christmas Recess, begins	Saturday, December 19
Ends at 8:00 a.m.	Monday, January 4
Closed Period (from 6 p.m. to 6 p.m.)	January 8-22
Examinations	January 18-22, inclusive
Last day of the first semester	Friday, January 22

Second Semester, 1964-65

Registration for day classes	Wednesday, Thursday, January 27, 28
Classes begin	Friday, January 29
Latest date for discontinuing a course with F unless work is satisfactory to date of withdrawal	Friday, February 19
Latest date for removal of INC grades	Friday, March 12
Mid-semester	Friday, March 26
Spring Recess, begins	Saturday, March 27
Ends at 8:00 a.m.	Monday, April 5
Closed Period (from 6 p.m. to 6 p.m.)	May 14-28
Examinations	May 24-28, inclusive
Baccalaureate and Graduation Convocation	Sunday, May 30

EXPLANATORY NOTES

The standard class period is fifty minutes. In general, classes begin on the hour, starting at 8:00 a.m., with intermissions of ten minutes. There are some exceptions, chiefly in the late afternoon and evening classes.

Courses numbered in the 100's and 200's are "lower-level" courses and are introductory or basic in the subject.

A course-number not preceded by a comma and followed by a period indicates a one-semester course.

Under the titles of courses which have laboratories, or which are divided into small groups for recitations, the words "Laboratory" or "Recitation" appear, with entry of alternative hours for laboratory and recitation. Small letters (a, b, c, etc.) following a course-number designate different sections of the same course. Such letters following the word "Laboratory" or "Recitation" similarly indicate a choice of sections at different hours.

Names of buildings are abbreviated as follows: FH, Field House; G, Gymnasium; H, Howarth Hall; J, Jones Hall; K, Kittredge Hall; M, Music Building; B, middle wing of South Hall (frame building east of the gymnasium); C, west wing of South Hall; D, detached building south of the B-C group.

In the curriculum guide the introductory course in literature is listed as follows: 131, ,132 - World Literature (3, 3) 8:00 M W F Corkrum J 203. The numbers 131, ,132 indicate that it is a "lower level" course and that the course is continued through both fall and spring semesters. To complete the course a student will attend class both semesters at 8:00 in the morning on Monday, Wednesday and Friday and will receive six credit hours. The instructor is Mr. Corkrum and the class is held in Jones Hall in Room 203.

The following schedule lists courses which are offered as freshman curriculum in both semesters of the academic year, 1964-1965. Numbers in the left column designate first-semester courses; numbers in the right column designate second-semester courses.

Abbreviations: (GR) General Requirement; (H) fulfills Humanities Requirement; (SS) fulfills Social Studies Requirement; (BS) fulfills Biological Science Requirement; (PS) fulfills Physical Science Requirement.

SEMESTER Fall	Spring	Description of Course (credit)	Hour and Day	Instructor	Room
		AIR SCIENCE			
101. a		--Foundations of Aerospace Power (1)	9:00 Th	Henry	FH1
101. b		--Foundations of Aerospace Power (1)	11:00 Th	Henry	FH1
101. c		--Foundations of Aerospace Power (1)	1:00 Th	Henry	FH1
103.		--Leadership Laboratory (1/2)	12:00 W	Henry	FH1
	102. a	--Foundations of Aerospace Power (1)	9:00 Th	Henry	FH1
	102. b	--Foundations of Aerospace Power (1)	11:00 Th	Henry	FH1
	102. c	--Foundations of Aerospace Power (1)	1:00 Th	Henry	FH1
	104.	--Leadership Laboratory (1/2)	12:00 W	Henry	FH1
	106.	--Elective Course			

Designated University courses will be selected for the Air Science 106 Elective Course during the spring semester of the freshman year. All Air Science students are required to attend Leadership Laboratory once each week each semester. The Leadership Laboratory credits are counted toward the physical education activity requirements.
