NOTES

- 1) Two Introductory Surveys courses, preferably taken in the first or second year.
- 2) One philosophy course is required: PHIL 332 or PHIL 220. A different course in philosophy may be approved by the STS Director.
- 3) Two Ancillary Courses in the natural sciences (NS) are required; preferably in the same natural science and taken in the first or second year.
- 4) Methods Course: STS 350. Preferably taken fall of junior year.
- 5) Five STS electives are required, including at least one course from categories 1, 2 and 3 (see Bulletin for list of STS electives in each category).

The STS major is a "contract" major of 12 units in which a student develops a course of study with a committee of faculty members. The student and committee develop a coherent set of courses for that program and complete the contract by the first semester of the junior year. The signed contract is reviewed periodically and justified modifications may be made.

A GPA of 2.0 is required both in all contract courses and in upper division (300-400 level) contract courses.

Four units of upper-division STS course work must be taken in residence, with the option of one of these units being approved as part of a study-abroad program; subject to advance approval from the student's contract committee.

Contracts must be approved before completing upper-division course work. Inclusion of course work completed before the contract is approved is not guaranteed.
