

Email Configuration for Android

Setting up Puget Sound email on your Android device

The steps to configure your Puget Sound email account may vary depending on the device and the operating system version. You may have to modify these instructions, but the settings apply to all Android devices.

- 1) Under **Settings**, select **Accounts** and tap on **Add account**.
- 2) When prompted for the type of account, select **Exchange** or **Corporate**.
- 3) Enter your Puget Sound email address when prompted.
- 4) Enter your Puget Sound password when prompted.
- 5) Refer to the server settings in the table below, if necessary. *Note: On pre-Lollipop versions, you will need to reopen the account from **Settings** in order to change these settings.*
- 6) Allow remote security administration if prompted.
- 7) Customize the account sync settings as desired. These can be changed later, if needed.
- 8) When prompted, activate **device administrator**.

Server Settings

Account Type	Exchange or Corporate
Server	webmail.pugetsound.edu
Domain	pugetsound
Username	Your Puget Sound username, not the full email address
Port	443
Security	Use secure connection (SSL) or Use SSL/TLS
