**NOTES:**

- 1) Students with strong Chemistry background could take CHEM 115.
- 2) Students who take CHEM 115 should take CHEM 230.
- 3) Biology majors, take BIOL 111/112 first year. BIOL 112 covers material on the DAT; BIOL 212 includes an introduction to immunology and is preparation for, biochemistry, and dental school courses.
- 4) Some schools (including UW) require microbiology. Check with individual dental schools for additional requirements.
- 5) Some schools require biochemistry. If a lab is required, take CHEM 460 & 461 (prerequisites CHEM 230 or 231). BIOL 361 is a non-lab, one semester course.
- 6) Schools vary widely, so check programs of interest. Many programs do not list specific courses; others require statistics and/or calculus. Some schools ask for 2 semesters of math.
- 7) Of the three units of upper division coursework required outside the first major, the Connections course will count for one unless it is used to meet a major requirement.

\*Meet with advisor to ensure that major requirements as well as university requirements are met.

\*\*PHYS 111/112 is preferable, but 121/122 is acceptable.

\*\*\*Recommended. Required at some schools.
