

Puget Sound is a nationally-ranked private liberal arts institution located in North Tacoma.

# About us, you ask?

Our student body consists of 2,600 individuals, all working hard toward unique goals while engaging the world in diverse ways. Many Puget Sound students major in interdisciplinary fields, take on multiple minors, and travel abroad. They join and lead more than 100 student-run organizations on campus. Some spend their time in studios creating works of art, or take to the stage for musical and theater performances. Still others conduct experiments in nearby waterways and mountains, or in state-of-the-art science facilities on campus.

Nearly half of our students hold on-campus jobs each year, gaining workplace experience in roles ranging from assisting in the Physics Lab to coordinating Diversity Programs. They take on internships, build apps, and start companies—tackling real-world problems with innovative solutions. *At Puget Sound, students hone the communication, critical thinking, teamwork, and leadership skills that employers value.*

*2,400 students  
from 46 states;  
74 percent  
from outside  
Washington state.*

## TOP 10 MAJORS

With 50 areas of study available at Puget Sound, students are exposed to a depth and breadth of knowledge and experience across disciplines, making them ideal candidates for myriad roles.
