The STS major is a "contract" major of 13 units in which a student develops a course of study with a committee of faculty members. The student and committee develop a coherent set of courses for that program and complete the contract by the first semester of the junior year. The contract is reviewed periodically and justified modifications may be made.

A GPA of 2.0 is required both in all contract courses and in upper division (300-400 level) contract courses.

Four units of upper-division STS course work must be taken in residence, with the option of one of these units being approved as part of a study-

Contracts must be approved before completing upper-division course work. Inclusion of course work completed before the contract is approved is not guaranteed.
