

University of Puget Sound Supported Phone Models and Cost

Note: We no longer have direct replacements for the older 79xx series of phones (example: 7942, 7962). All phone replacements will be with 78xx or 88xx series Cisco phones that must be purchased. If you are purchasing a phone that also requires a new line extension (example: new hire) there will be an additional one-time \$150 license fee charged in addition to the cost of the phone.

Supported Phone Models

7811 - \$90

Single line phone with 384x106 monochrome display (no backlit display). Typical use: Ideal for areas with light use, part-time staff or student work areas.

7821 - \$100

2 Lines with a 396-162 pixel backlit monochrome display. Typical use: Ideal for areas with light use, part-time staff or student work areas.

7841 - \$120

4 Lines with a 396x162 pixel backlit monochrome display. Typical use: Ideal for areas that require multi extension/line monitoring or answering.

8811 - \$140

5 Lines with a backlit 800x480 monochrome display. Ideal for areas that require multi extension/line monitoring or answering. Typical use: Full time staff and/or administrative staff.

8841 - \$165

5 Lines with 800x480 color display. Ideal for areas that require multi extension/line monitoring or answering. Typical use: Full time staff, administrative and executive staff.

The above phones (Cisco 7821,7841, 8811, 8841) do not support key expansion modules (sidecar). If you need phones with more than five lines/extensions, expansion modules or conference phones please contact us for more information.
